In voting against the Republic the majority of the electors have voted for peace. It is not too much to say that out of Paris the desire for peace is so strong that it would be accepted on any terms not manifestly dishonourable and ruinous. One hears wealthy people, who a few weeks back clamorously demanded the prosecution of the war, now admit that a continuance of it presents no hope of advantage; whilst as to the peasantry, who are the bulk of the electoral community, they hate war because it makes them suffer.

The elections have made M. Thiers virtually "master of the situation," he being returned by ten or twelve different constituencies, and the party of which he is the chief being the most numerous in the new Assembly. It is expected and hoped that at the earliest moment possible he will declare for peace; and as he is almost the only practical statesman of a high order France possesses, as too he is renowned for his patriotism, even for that exaggerated and boastful form of it called Chauvinism, any opposition that might be made to him would not be of much avail.

With M. Thiers in control of the Assembly, there is no fear of wild financial projects gaining acceptance. But on the other hand, there is little hope of a radical reform of taxation, such as that of Peel in England, being effected; and yet it is certain that France needs one—certain, too, that a more favourable moment for one could not be found than that which will follow the conclusion of peace. On the Commercial Treaty with England, which will very shortly become one of the great questions of the day, his well-known Protectionist opinions justify the apprehension that his action will be pernicious. He will, however, have to take into consideration the fact that the denunciation of the Treaty, or the modification of it in a Protectionist spirit, will cause dearness of many articles of general consumption absolutely necessary; and that the sufferings of the people will be aggravated very considerably if dearness be added to the heavy burden of taxation they will have to bear.

Apropos to the Treaty, we have an explanation of the statements about it transmitted from Paris last week. M. Dorian, the Minister of Public Works, proposed to denounce it, but the Government refused. Such were the facts. M. Dorian's proposition was most extraordinary, seeing that the circumstances of the moment did not permit a calm examination of the matter; seeing, too, that it did not concern his department, but that of Commerce, and that there was manifest im-

propriety in his meddling with it when the Minister of Commerce, his colleague, was away. But his conduct will cease to appear surprising when it is stated that he is an iron-master, and as such, of course, a rabid enemy of the Treaty. It deserves to be noted, however, because it shows how utterly unscrupulous the Protectionists are when they see an opportunity of gaining any advantage.

The Government at Paris has once again meddled with commercial bills. The last decree suspended the payment of them, that is, all legal proceedings respecting them, to the 13th of the present month; but a new decree, dated the 9th, grants another month's delay from the said 13th. As the delegation of Bordeaux is now (happily) deprived of authority, this new enactment is applicable to all France, and even to Algeria also, as well as to Paris. The preamble of the decree is somewhat singular, saying "that it is desirable to return as quickly as possible to the strict execution of engagements which is the fundamental law of commerce." It would have been natural after this to have read that there should be no more delay, and yet further delay is ordered.

The additional taxation which the war will necessitate, both for the State and for municipalities, has already begun to be applied in Paris. The municipality of that city has obtained a decree, dated 1st February, authorising it to impose 14 per cent. on the rent of houses, &c., of 4,000f and upwards; 12 per cent. on that from 2,500f to 4,000f; 10 from 1,500f to 2,500f; 8 from 1,000f to 1,500f; 6 from 600f to 1,000f; 4 from 400f to 600f. Holdings of less than 400f are to be exempt. Formerly the higher rents had only about half these rates, and exemptions extended to those of 600f. To this augmentation of Direct taxation will no doubt be added as great, or even a greater one, in the Indirect, otherwise Octroi. The Government on its part will undoubtedly have in the shape of new taxes, to exact more than the municipality. Altogether the Parisians, and the foreign residents among them, will be in sad plight.

The last quotations of the Paris bourse that have reached these parts are as follow:—

We have no explanation of the fall from the 6th to the 9th. On the 10th uneasiness about the result of the Paris elections was felt. It is vexatious that at Havre we have nothing later than the 10th, but the fact is that postal communications, established between Paris and the rest of France since the 1st, do not yet exist for this town, owing to the Prussians having intercepted our letters at Rouen, because the Havre post office people have had the incredible folly to quarrel with them about the rate of postage. All we know of Paris comes, as last week, from what a few stray travellers and the newspapers they bring with them tell us.

Re-provisioning in Paris of live animals, flour, provisions, fuel, &c. has entirely ceased, and the trade in them has been re-established. At first many dealers had the mortification of seeing the goods they offered for sale pillaged by the famished mob, and that rendered them for a few days cautious in taking in supplies. But the pillagers have since been reduced to order.

The Bordeaux delegation of the Government, a few days before being put down by authority from Paris, decreed that 1 000 000f should be given to towns and villages that have suffered from the invasion. The sum is absurdly small for the object mentioned, and when and how it is to be furnished by the Treasury are not stated.

The Prussians, as is known, levy for themselves in the departments they occupy the taxes ordinarily paid to the Government, and they display great severity in exacting payment. In this department, for example Seine Inferieure, of which the chief town is Rouen, they demand that the Direct taxes on the basis of 1870, and an amount equal to them for Indirect, shall be paid each month within five days from the end of the month, under pain of 5 per cent. extra per day for a week, and after the week of having the commune that does not pay in totality occupied by troops, who are to be lodged and fed gratis, and are besides to receive 6f per day per officer and 2f for each man. At Chartres they have imposed similar conditions, and no doubt have done the same almost everywhere.

In addition to taking taxes, the Germans, notwithstanding the armistice, have imposed war contributions on towns and villages in this region, and it is to be presumed that they have not been more merciful elsewhere. Rouen has been called on to furnish 6,000,000f; Fecamp, 640,000f; Treport, 184,000f; Lillebonne, 252,000f; and mere villages 25f per head of the population. The French complain that this is a violation of the armistice, and if an armistice means the suspension of hostilities, they do not appear to be in the wrong, since there is decided hostility in taking people's money against their will. The Government having been appealed to, has made representations on the subject to the Prussian head-quarters at Versailles, and it telegraphs to say that they have a chance of being taken into consideration.

Following close on the Prussian announcement relative to the payment of taxes at Rouen, there appeared an earnest appeal from the mayor of that city to its citizens to pay the municipal tax imposed in December last for relieving unemployed workmen and the poor. In support of his prayer the mayor makes the sad statement that not fewer than 40,000 persons are now being relieved, and that the cost of soup, bread, fish, &c., for them is 100,000f a week.

When the city of Rouen was occupied by the enemy, the authorities of Havre thought fit to prevent cotton and coal from being sent hence to that town, in the hope that by depriving the factory population of the means of working, they would be plunged into distress, and would revolt against the invaders. The Havre wiseacres thought this a profound political move, and did not perceive that it was both silly and wicked. They have maintained the interdiction since, and continue to do so in spite of the armistice. They do not perceive, apparently, that whilst causing inconvenience to Rouen, it will, if persisted in much longer, drive away trade from Havre. In a sitting of the Chamber of Commerce of Rouen held on the 10th, under the presidency of M. Pouyer-Quertier, the following resolution was adopted:—"Considering that it is notorious that the municipal and administrative authorities, under whom for the present is placed the town of Havre, interdict absolutely the sending from that town to Rouen, and its district, of all merchandise necessary for industry, and particularly cotton and coal, under whatever circumstances the said merchandise may have been carried to the town; considering that this arbitrary measure, applied rigorously for more than two months, could only be justified by the necessities of national defence; but that at present, on account of the armistice and of the provisional raising of the military blockade, the pretext alleged can no longer be maintained, and that the measure becomes iniquitous and inhuman, inasmuch as the effect of it is to deprive of means of existence the innumerable populations who live by the cotton manufacture in the departments of the Seine Inferieure and the Eure;—considering that all the representations made by merchants of Havre and manufacturers of Rouen have not been able to modify the inflexible pretension of the Havre authorities;—the Chamber of Commerce of Rouen delegates to two of its members, MM. Pouyer-Quartier and Cordier, the express mission of exposing these facts to the Government of National Defence, and of calling on it for a prompt and energetic act of authority to put an end to this abuse of power on the part of the local administration of Havre."

In the Havre newspapers, a few days back, appeared a letter from some carriers of the town, very respectable traders, it is said, stating that they had offered to do for 5,000f a day the carrying for what is called the army of Havre, which has heretofore cost 11,000f, and that they have obtained no answer from the military authorities. This is a new example to be added to the many, of the way in which in the war the public money is squandered.

To the many disasters that have befallen France has now to be added the cattle plague. It has broken out in the departments of Finistère, Mayenne, Sarthe, Orne, and is reported to have appeared in the north also.

An official notification is made, that the navigation of the Seine "is possible" up to Maisons and Bougival. In a straight line these places are only a few miles from Paris, but beyond the river winds a good deal, and is obstructed by the bridges destroyed. The expectation is, however, entertained that it will soon be cleared right up to the capital. Though the longest, the river is the cheapest way of making expeditions to Paris, but vessels of a very small draft of water are necessary for it. The railway from Havre to Rouen was to have been reopened for traffic on the 11th, but the Prussians, for some unexplained reason, kept it closed. Yesterday, however, it was announced that they had set it free. By it Paris can be reached *viâ* Amiens, provided travellers carry no baggage, can find room in the few trains that run, and above all, can get written permissions from both French and Prussians. Even then they are in danger of being stopped at St Denis, within a few miles of Paris. What advantage the

Prussians can have in rendering access to the city so difficult now that it is virtually in their possession, no one can tell. In a day or two, however, it is to be presumed the armistice will be prolonged, and then no doubt Paris will be completely reopened. Even if war should recommence, there would be no reason for keeping it shut up.

The transactions in the market of Havre have not yet become so extensive as might have been expected from the hope that is generally entertained of peace. The following is a detail of them since last report :—

COTTON.—The sales have been 340 bales, chiefly United States. The brokers on Friday put the closing quotations at 50 kilogs. New Orleans very ordinary, 102f; Oomrawuttee, &c, good ordinary, 83f; Tinnevelly ditto, 80f; Madras ditto, 74f.

COFFEE.—50 tons Malabar, 90f the 50 kilogs, in bond; 500 casks ditto, 115f, duty paid; 1,871 ditto, prices not stated; 1,149 Hayti, 102f to 108f, duty paid; 503 Gonaives, 115f and 112f; 706 Winard, 110f and 80f, in bond; 140 Ric, 110f, duty paid; 450 Santos, 109f; 300 Mysore, 115; 75 Guatemala, 110f.

TALLOW.—127 pipes 46 demi-pipes La Plata sheep, 52f to 54f the 50 kilogs; 12 pipes saladeros ox, prices not stated; 20 pipes Monte Video ditto, 56f.

WOOL.—16 bales Buenos Ayres, 1f 55c to 1f 60c the kilog.

P.S.—London newspapers received to-day contain a Bordeaux telegram asserting that "the Prussians are making ruinous requisitions on the inhabitants of Havre." The Prussians have never entered this town, and have not obtained sixpence from it in money or kind. The false telegram referred to is much to be regretted, as it is calculated to cause uneasiness to the commercial people in England who trade with Havre.

HAVRE, Feb. 16.

By an arrival from Paris of the 14th, we learn that the Government had authorised the municipality to raise by loan in that city, "in any form it might think fit, and on the best terms to be obtained," the 200,000,000f demanded by the Prussians as a war contribution, and to raise a further sum not exceeding 5 per cent. of that amount for "the expenses of issue and of negotiation;" also, as a guarantee for the same, to pledge, if necessary, "all the real property it possesses not set apart for a public service;" and to impose a tax "on any articles of consumption, or on any source of revenue it might please." This decree shows that all that was said about the 200,000,000f having been offered by certain banking houses, or of subscriptions for it being solicited in foreign cities, was erroneous. It is, perhaps, not necessary to remark that the tax referred to is altogether distinct from that on rent mentioned in the letter of yesterday.

The following bourse quotations have been received :—

	Feb. 13.		Feb. 14.
	f c		f c
Threes—cash	51 50	... .	51 70
End of month	51 50	.....	51 70
New Loan (Empire)—cash	52 25	.....	52 70
End of month	52 25	.....	52 75
Italian Fives—cash	57 20	.....	57 0
United States ditto	105	.....	106½
Ottoman, 1869, ditto	270 0	.....	267 0

The quotations for end of month of the principal companies were as follow :—

	Feb. 13.		Feb. 14.
	f c		f c
Credit Foncier	955 0	.....	972 50
Comptoir d'Escompte	537 50	.....	...
Credit Mobilier	125 0	.....	...
Orleans Railway	825 0	.....	...
Northern	965 0	.....	...
Eastern	401 0	.....	...
Lyons-Mediterranean	835 0	.....	...
Northern	545 0	.....	...
Western	512 50	.....	...
South-Austrian Lombard	400 0	.....	...

It is remarked in a report of the bourse that on the 14th the Threes at Marseilles was 52f 35c, and at Bordeaux 52f 60c. Those prices being higher than at Paris, it was said either that those markets saw the situation in a brighter light than the Parisian speculators did, or did not imitate their "prudent moderation."

The letters from Paris for Havre, detained by the Prussians at Rouen, have been distributed to-day. They are the first received *by post* since the investment of the capital.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 15th day of February, 1871.

ISSUE DEPARTMENT.

	£		£
Notes issued	36,216,595	Government Debt	11,015,100
		Other Securities	3,984,900

Clearing-house return	...	76,055,000	83,008,000	85,960,000	90,716,000

In 1861, the Bank rate continued at 8 per cent., to which it had been suddenly raised the previous week, but the accounts this week showed a comparatively small recovery of bullion, in consequence of the high rate—from 6,356,000*l* to 6,850,000*l*. During the week there had been unfavourable news from America, and M. Mirés in Paris had become bankrupt, besides other fresh causes of monetary disturbance. The discount houses were limiting their business.

In 1868, money was at 2 per cent., with no prospect of early change. The Irish question was being greatly discussed.

In 1869, money was tending to be dearer in the open market, chiefly on account of the demands for recent foreign loans. In politics, the French menaces against Belgium were causing some apprehension.

In 1870, there was little business in the money market, and the tendency for the moment was rather downwards.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 9,004,998*l*; in 1868, an excess of 3,738,068*l*; in 1869, an excess of 1,314,602*l*; and in 1870, a deficiency of 1,240,234*l*. In 1871, there is an excess of 201,306*l*.

DISCOUNT AND MONEY MARKET.—The movement of the market this week, in spite of a great deal of uncertainty, has again been towards a higher value for money. The demand at the Bank, and at the joint-stock and private banks, has

been very active, the other securities in the Bank account for the week having been increased by 1,508,000*l*, and the demand having also continued good since the account was made up. The discount houses, again, are not working below the Bank rate for the finest short-dated paper, while the rate for three months' Bank bills is fully a ¼ higher than it was last week, and the rates for trade bills and long-dated paper are also higher. Notwithstanding this pressure there is a little uncertainty as to the immediate course of the money market. There appears to be a momentary stringency in the open market, in consequence of the large receipts of revenue during the last few weeks. These have increased the Government balances, but there is less floating money in Lombard street. There has also been a little movement to-day in consequence of the negotiations of some of the bills upon London, which had been given to the German Government in part payment of the war contribution of 8,000,000*l* levied upon Paris. It is thought, however, in some quarters, that these causes will only act for the moment, and though the bills from Paris will be of a large amount, 2,600,000*l* in all, yet in consequence of the great accumulation of money, something more decisive will be needed to cause a distinct advance in the Bank rate. The stringency in the open market caused by the revenue payments again may, it is supposed, in consequence of the unusually strong position of the Bank, have its effect restricted to the mere increase of the Bank's business. Still the prevailing, and we are inclined to think the sound, impression is, that money is steadily advancing, and that the causes now operating are surely increasing in strength, though the movement is most gradual, while there is still so much uncertainty about the coming peace.

The increase of "other" securities at the Bank during the week is, as we have noticed, 1,508,000*l*. The public deposits have increased by 1,318,000, and the private deposits by 560,000*l*; but the bullion has increased 102,000*l*, and the reserve, 349,000*l*. The reserve is now 13,668,000*l*, against 27,389,000*l* of "liabilities."

We subjoin our usual quotations for mercantile paper having various periods to run :—

Bank bills—2 months		2¼	per cent.
Do 3 —		2⅜	per cent.
Do 4 —		3½	per cent.
Do 6 —		3¾	per cent.
Trade bills—2 3 months		2¾ 3	per cent.
Do 4 —		3¼ 3½	per cent.
Do 6 —		4	per cent.

The allowance for deposits at the joint stock banks and discount houses is as follows :—

Joint Stock Banks at call	1½	per cent.
Discount houses at call	1½	per cent.
Do with seven days' notice	1¾	per cent.
Do fourteen days	2	per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent.		Open Market, per Cent.

Amsterdam	4½	5½	4½	5
Turin	5	6	5	6
Brussels	2½	4	2½	3½ ¾
Madrid	5	5	5	5
Hamburg	...	...	3	4
St Petersburg	5	8	4½	7

English Government Stocks.—The stock markets this week have again been inactive and in suspense, the state of dealings, combined with the uncertainty as to the character of the coming peace and its effects, causing numerous fluctuations without any material feature to notice. Generally it may be said the tendency in the early part of the week was to improvement. Consols touched 92⅝ ¼ on Tuesday, and closed at 92½, a fractional advance on last Friday's prices. The foreign market was likewise buoyant, including American securities, and home railways, though in a less degree, shared in the improvement. On Wednesday and Thursday, however, there was an equally general dulness and relapse, Consols falling to 91⅞ 92, or a point lower than the closing prices of last Friday, and this weakness has continued to-day, a slight tendency to recovery being checked by the reports of German intention to make a triumphal entry into Paris. The improvement, such as it was, has been ascribed to the more favourable views taken of the prospects of peace, and the subsequent relapse to renewed apprehensions of dear money; but though both these causes are now generally affecting the stock markets, they could not have acted in the way described. The improvement was evidently a continuation of the reaction which had begun at last settlement, in consequence of the attempt to close bear accounts, and was especially manifest in foreign stocks, which had been weakest. Much of the later dulness, again, was due to the inherent weakness of home railways, in which the realisations are numerous now that the dividends have been declared, and are beginning to be paid on almost all the principal lines. The dull tone predominates, in consequence of the continued apprehensions of dear money, and of the competition of foreign loans which will ensue after the peace.

As regards English Government securities, we have already noticed the principal changes in Consols during the week. To-day there has been hardly any change in the quotation, and the closing price it will be seen is rather lower than last week's. It is probable that the fall in Consols would have been much greater than it is but for the dealers being very short of stock, which has no doubt been a feature of the markets for many months, but is now felt more strongly than ever. It would not be at all surprising if this scarcity should have a marked effect at the next settlement, as there seems no likelihood of much stock being put on the market before peace is definitely adjusted.

Subjoined is a list of the highest and lowest prices of Consols every day :—

CONSOLS.

	Money. Lowest.	Highest.	Account. Lowest.	Highest.	Exchequer Bills. March.	June.
Saturday	92	92½	92	92½	8s pm	12s pm
Monday	92	92½	92	92½	6s pm	7s pm
Tuesday	92	92¼	92	92¼	4s pm	9s pm
Wednesday	91⅞	92	91⅞	92	4s pm	8s pm
Thursday	91⅞	92	91⅞	92	3s pm	8s pm
Friday	91⅞	92⅛	91⅞	92⅛	2s pm	7s pm

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.	Closing Prices this day.		Inc. or Dec.
Consols for money	91⅛ 2⅛	91⅛ 2	−	1/16
Ditto account	91⅛ 2⅛	91⅛ 2	−	1/16

Victoria 6 %	112 13	112 13	...	...
Ditto New 5 %	101 2	101½ 2½	+	½

Foreign Government Stocks.—The buoyancy early in the week was especially manifest in foreign securities, and was a natural reaction from the great depression approaching to panic which prevailed at the close of last week. It may be considered, too, that there is a tendency to discount the prospect of an easy peace, from which it is anticipated there will be a comparatively stable condition of European politics for some time. The principal improvement was in Turkish, accompanied by more favourable reports as to the provision of means for the coming dividends, and announcements from Constantinople of a change of Finance Minister, and proposals for new taxes. It can hardly be doubted that the Turkish revenue would be more productive, even without new taxes, if in better hands; but reforms must take a long time. The North German loan has also improved, in consequence of purchases on German account, the belief being that the Government is employing a portion of the indemnity obtained from Paris in this manner. The French National French loan has also been buoyant, from purchases, it is stated, on private German account, to which cause is also traced an advance in French Rentes. These are stocks however most likely to be acted upon by the prospects of a stable peace. Peruvian 6 per Cents. have also been largely bought, on the ground of their lowness of price compared with the 5 per Cents., and there has been a marked advance in

them. To-day the dulness of Wednesday and Thursday has continued, a slight improvement at the opening being more than compensated by the reports of the German terms about Paris, and still more by the report that King Amadeus had been shot at, which made Spanish weak and other stocks in sympathy.

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.		Closing Prices this day.		Inc. or Dec.

The closing quotation for the French National Defence loan was 88½ to 88⅝; North German Confederation, first issue, 99¾ to 100; ditto second issue, 1⅝ to 1¼ pm.

English Railways.—The railway market, as we have noticed, has been weak, the payment of the dividends inducing speculative holders to realise, but, as will be seen, the fall in the quotations for the week is comparatively little. It would undoubtedly have been greater if speculation had not been checked by the suspense of the last two or three months. The prices of the principal stocks are a good deal lower than they would have been with more favourable prospects. As it is, now that the usual time has come for realising, speculators make the best of their dealings, though with a good deal of reluctance, the feeling being that in almost any event another considerable rise in the value of home railway property will take place in the next few months. The traffics this week, as will be seen, have again been very favourable. To-day there is no special feature to notice, the general dulness continuing, and very little business having been transacted.

Notwithstanding the general depression Metropolitan District stocks have again improved in consequence of another great advance in the traffic returns—an advance, however, which must partly be ascribed to the influx of passengers on the day of the opening of Parliament. It is a peculiarity of the Metropolitan District line that from its position it must benefit largely by every State ceremonial at Westminster or Buckingham Palace, and this should be one of the elements in calculating its returns.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices :—

	Closing Prices last Friday.		Closing Prices this day.		Inc. or Dec.

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted, for the week ending February 11, to 664,844*l*, being an increase of 40,460*l* on the corresponding week of last year. The aggregate receipts of the half-year to date are 3,296,302*l*, being an increase of 111,816*l* on the corresponding aggregate of last year. The principal increases of the week have been—London and North-Western, 7,219*l*; North-Eastern, 5,163*l*; Great Western, 5,112*l*; Lancashire and Yorkshire, 3,419*l*; Great Northern, 3,239*l*; Midland, 3,250*l*; and South-Eastern, 2,568*l*. The following shows the increase or decrease in each case, for the week and in the aggregate :—

American Securities.—There has been a steady demand for American Government securities throughout the week, and the quotations, as shown below, are about ⅜ higher at the close. Erie shares remain quiet and unchanged in value, but there has been a fair inquiry for Atlantic and Great Western Consolidated bonds (Bischoffsheim's certificates). State bonds remain without any material alteration in price.

	Closing Prices last Friday.		Closing Prices this day.		Inc. or Dec.
United States 6 % 5/20 Bonds, exchng. 4/6	90⅛	1	91⅛	⅛	+ ⅛
Ditto 1865 Issue	90⅛	⅛	90⅜	⅛	+ ⅛

Virginia 6 % Bonds	53	5	53	5	... ...
Ditto 5 % Sterling Bonds	55	8	55	8	... ...

Joint Stock Banks.—The distribution of the dividends recently declared has led to reinvestments in joint stock bank shares, the hardening tendency in the value of money, and the favourable prospects before trade, having further stimulated purchases. The shares of some of the Indian banks, however, continue to show weakness, Oriental and

English, Scottish and Australian Chartered, for instance, being ½ lower on the week. Otherwise the market has ruled very firm, and the movements have been upwards. Among the changes are—a rise of ½ in Anglo-Egyptian, Otago, and City; ½ in British Columbia, British North-American, Chartered Mercantile of India, London of Mexico, London and River Plate, and London and County; 1 in Australasia, and 2 in Ionian.

TELEGRAPHS.—A fair amount of animation has prevailed in this department, and the quotations show a further recovery from the recent depression. Anglo-Mediterranean have risen 5; Anglo-American, ½; Indo-European, 1; British Australian, British Indian Extension, Great Northern, Marseilles, Algiers, &c., and Reuter's ¼ each. On the other hand the failure of the attempts to restore the cable has caused a decline of ⅜ in West Indian and Panama on the week.

The directors of the Submarine Telegraph Company have resolved to recommend a dividend at the rate of 7½ per cent. at the forthcoming meeting of shareholders.

MINES.—The fluctuations in the value of British mining shares, though not numerous, have been somewhat important in extent. West Chiverton have been pressed for sale, and have given way 4; West Seton have declined 5; Wheal Seton, 3; and East Lovell, 1. South Wheal Frances shares closed at an advance of 2; while Great Laxey, Marke Valley, are ½, and North Wheal Crofty ¼, higher on the week. Business in foreign mines has been much restricted, and the only important movements are—a rise of 1 in General Mining; ½ in Eberhardt; and a decline of ½ in Cape Copper.

MISCELLANEOUS.—A steady business has been transacted in this department, and the leading companies are higher on the week. Telegraph Construction shares, however, have been flat, and leave off at a decline of 1½; while Hooper's are ½ lower. Silver's India Rubber shares, on the other hand, have been in demand, and have risen 2½. Among other changes are—a rise of ½ in Australian Agricultural; 1 in Canada, Darjeeling, South Australian Land, Tobacco (Italian) Loan, and Foreign and Colonial Trust. Royal Mail Steam shares are 2 higher, and National Discount ¼.

Mr W. Hope, Q.C., has addressed a letter to the shareholders of the International Financial Society (Limited), urging them to support a requisition to the directors to call an extraordinary general meeting for the purpose of considering the relations of the meeting with the Metropolitan Sewage Company.

EXCHANGES.—There are slight alterations in the exchanges this week as compared with last, showing a diminution in the demand for the means of remittance to the principal cities of the continent. The tenders for 400,000*l* in bills on India were received on Wednesday at the Bank of England, when the amounts allotted were—to Calcutta, 344,200*l*, to Bombay, 50,000*l*, and to Madras, 5,800*l*. The *minimum* price was fixed as before, at 1s 10d on all the Presidencies, and tenders on Calcutta and Madras at 1s 10⅜d will receive about 76 per cent., and on Bombay at that price in full. These results show a further increase in the demand for means of remittance to the East.

BULLION.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week:—

Gold.—Our market has been quiet during the week; the demand for abroad has almost entirely ceased; and of the arrivals mentioned below, about 90,000*l* has been sent into the Bank. Sovereigns have been withdrawn for shipment to Egypt and the Cape, the Nyanza having taken 30,000*l* to Alexandria, and the Gambia 25,000*l* to Natal. The Russia has brought 100,000*l* from New York; the Soudan has brought 4,500*l* from Africa; the Shannon has brought 13,400*l* from the West Indies; the Caribbean has brought 60,000*l* from the Pacific—total, 177,900*l*.

Silver continues in fair, but not very active, demand for Holland, and all present arrivals are taken for transmission thither. Prices remain as quoted by us. The City of London has brought 25,000*l* from New York, the Russia has brought 79,000*l* from New York, the City of Antwerp has brought 55,500*l* from New York, the Delta has brought 132,000*l* from India, the Shannon has brought 29,000*l* from West Indies, the Lord of the Isles has brought 150,000*l* from India—total, 470,500*l*.

Mexican dollars.—We have received during the week about 15,000*l* of this coin from New York. There are but few orders for China, and as a rule the coin is taken for refining purposes.

Exchange on India for banks' drafts at 60 days' sight is 1s 10⅜d to 1s 10½d. The Council bills on India were allotted yesterday; the *minimum*, as before, was 1s 10d per rupee. Tenders on Calcutta and Madras at 1s 10⅜d will receive about 76 per cent., and on Bombay, at same price, in full.

Indian Government loan notes remain as last quoted, viz., 4 per Cents., 90½ to 91; 5 per Cents., 98½ to 99; and 5½ per Cents., 106 to 106½.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; ditto fine, 77s 9d per oz std; ditto refinable, 77s 11d per oz std; South American doubloons, 73s 8d per oz; United States gold coin, 76s 3d per oz. Silver—Bar silver, 5s 0⅛d to 5s 0⅜d per oz std; ditto containing 5 grains gold, 5s 0⅜d to 5s 0⅝d per oz std; Mexican dollars, 4s 10¾d to 4s 10⅞d per oz.

There were no bullion operations at the Bank of England to-day.

According to the official returns published in to-night's *Gazette*, the imports of the precious metals during the week ended February 15, amounted to—Gold, 195,644*l*; silver, 453,288*l*. The exports were—Gold, 140,440*l*; silver, 140,240*l*. It may be noted that these figures afford a rough approximation to the truth only, the value of the gold bullion being declared at the rate of 4*l*, and the silver—both bullion and coin—at 5s per ounce. The estimate is, therefore, excessive to the extent of 3 per cent. on gold, and probably 5 per cent. or more on silver.

MEETINGS OF COMPANIES NEXT WEEK.

1871.

Feb. 20.—Berlin Waterworks.

21.—Australian Agricultural Company.
Dublin and Meath Railway, Dublin.
Lancaster and Carlisle Railway, Lancaster.
Muswell Hill Estate Company.

22.—Maryport and Carlisle Railway Company, Maryport.
City of Glasgow Union Railway.

23.—Imperial Gas Light and Coke Company.
South-Eastern Railway Company.

24.—British Land Company.
Danube and Black Sea Railway.
Liverpool Tramways Company.
Mid Hants Railway.
Mid Wales Railway.

Feb. 24.—Millwall Dock Company.
Monmouthshire Railway.
Salisbury and Yeovil Railway.
25.—Bristol and Exeter Railway, Bristol.
East Norfolk Railway, Norwich.

FEBRUARY SETTLEMENTS.

Ticket Day—February 27th.
Account Day—February 28th.

PUBLIC COMPANIES.

RAILWAY COMPANIES.

Cockermouth, Keswick, and Penrith.—The revenue showed an increase of 2,695*l*, and some increased expenses had been incurred by renewals. The balance available for dividend, after providing for interest on preference shares, was 5,357*l*, out of which the directors recommended the payment of a dividend at the rate of 4 per cent. per annum, and that the balance of 677*l* be carried to reserve.

Erie.—The Erie board state that on the 30th September last the capital was $83,536,910 in shares, and $23,398,800 in bonds. The gross revenue for the year was 16,179,461, and the working expenses and rents $14,824,860; balance, $1,354,601. The sum absorbed in interest on bonds was $1,646,623.

Great Eastern.—At the meeting a 1¾ per cent. per annum dividend was declared. The meeting was then made special, and resolutions were passed confirming a former resolution, that the Metropolitan Extensions should be constituted as a separate undertaking, that 650,000*l* be raised under the Act of 1867 to complete those extensions, and that interest at the rate of 5 per cent. per annum on such stock be payable half-yearly out of the gross receipts on those lines, and that the residue be retained by the Great Eastern Railway.

Great Northern.—Summary of revenue accounts for the second half-years of 1869 and 1870 :—

	1869.		1870.
Gross receipts	£1,166,878		£1,204,642
Working expenses	537,346		553,154
Net	629,532		651,488
Surplus from previous half-year	4,142		4,194
	633,674		655,682
Preference charges	334,155		303,340
Available for dividend	299,519		352,342
—on the ordinary stock at the rate of 7¾ per cent. per annum	*298 219	(8¼ % p.a.)	348,994
	1,300		3,348

* These figures include dividends on the A and B stocks; on the A stock at 9½ and 10½ per cent. per annum respectively, and on the B stock at the rate of 6 per cent. in both half-years.

Capital Account.

	Expended.		Received.
	£		£
To 30th June, 1870	18,947,906		18,788,818
During the half-year	266,289		318,501
Total, 31st December	19,214,195		19,107,319

Estimated outlay during the current half-year 350,000*l*. The directors regret that a serious difference has arisen between the boards of the Midland and Great Northern Railway Companies relative to the rates for the carriage of coal to London. The leading railway companies interested in the coal traffic strongly advised the directors of the Midland board to accept the friendly mediation which had been proffered by the chairman of the North-Eastern Railway Company, or that of some other practical umpire. The Midland Company still decline any arbitration or mediation, which might, in their opinion, reopen Sir John Karslake's award.

Liskeard and Caradon.—Dividend declared at the rate of 5 per cent. per annum.

Maryport and Carlisle.—The gross revenue receipts for the past half-year amounted to 53,701*l*, and the expenditure to 19,476*l*, leaving a balance of 34,225*l*, which, added to 1,099*l* brought from the preceding half-year, enabled the directors to recommend a dividend on the ordinary stock at the rate of 12 per cent. per annum, and on the preference stocks according to their respective guarantees, carrying over a balance of 1,121*l* to the next half-year. Capital expended, 743,881*l*.

North-Eastern.—Outline of the revenue accounts for the second half-years of 1869 and 1870 :—

	1869.		1870.
Gross revenue	£2 245,587		£2,447,065
Working expenses	1,007,964		1,110,092
Net	1,237,623		1,336,973
Add previous balance	9,804		12,148
	1,247,427		1,349,121
Deduct preference charge	618,548		615,537
Available for dividend	628,879		733,584
—on the ordinary stock at the rate of 7½ per cent. per annum	619,409	(8½ % p.a.)	719,556
Surplus	9,470		14,028

Capital Account.

	Expended.		Received.
	£		£
To 30th June, 1870	41,392,754		41,352,416
During the half-year	367,215		528,226
Total, 31st December	41,757,969		41,880 642

Estimated outlay during the current half-year 732,116*l*. The falling off in preference charges is due to the redemption of the Hull and Selby purchase shares. The directors recommend that a dividend at the rate of 2½ per cent. per annum be paid on the Hull and Hornsea stock, out of the balance at the credit of the revenue account. The purchase of the shares of the West Durham Railway Company had been completed. Of the 166,667 6*l* shares created at the last meeting, 156,663 had been issued, the remaining 10,004 shares, carrying interest from the 1st of January last, would be issued at 1*l* 10s per share premium. The line between York and Doncaster was opened on the 2nd of January last, and the whole of the company's lines for which Acts had been obtained were either in progress or would soon be staked out and let to contractors.

North British and Caledonian.—Two awards have just been made by Mr Eborall. In the first he has awarded upwards of 5,000*l* damages to the North British, in addition to the 1,050*l* which he had previously given them. The main question in the second award, as to the exercise of the facilities under the Scottish Central Amalgamation Act for traffic to the south of Greenhill, he has decided against the Caledonian Company; but he has awarded two sums of 50*l* against the North British Company.

North London.—The directors recommended a dividend for the half-year of 2¾ per cent. on the preference stock, and on the ordinary stock and share capital at the rate of 6 per cent. per annum, leaving a balance of 2,078*l* to be carried forward. Capital expended, 3,583,216*l*.

Salisbury and Yeovil.—The half-year's gross traffic amounted to 43,430*l*, showing a decline of 102*l*. The balance for ordinary dividend was 13,853*l*, out of which a 7 per cent. per annum distribution absorbed 11,435*l*.

South-Eastern.—The revenue accounts for the half-years ended 31st January, 1870 and 1871 :—

	1869–70.		1870–71.
	£		£
Gross receipts	798,217		754,684
Working expenses	355,964		339,326
Net	442,253		415,358
Previous surplus	3,560		22,997
	445,813		438,355
Preference charges	292,422		284,003
Available for dividend	153,391		154,352
—on the ordinary stock at the rate of 4 per cent. per annum	*152,729	(4 % p. a.)	*152,729
Surplus	662		1.623

* Including the "preferred" dividend at the rate of 7 per cent. per annum, and the "deferred" dividend at the rate of 1 per cent. per annum.

Capital Account.

	Expended.		Received.
	£		£
To 31st July, 1870	18,566,919		18,393.197
During the half-year	18,428		131,366
Total, 31st January, 1871	18,585,347		18,524,563

Estimated outlay during the current half-year, 80,500*l*. The reduction in preference charges is owing mostly to deductions made at the corresponding period for the construction of the new Waterloo station. The loss of continental traffic amounted to 65,898*l*; but local traffic showed increase. The current financial half-year will consist of only five months, it having been determined to make the half-years terminate on the 30th June and 31st December. The steam-boat traffic has of course been very depressed. The company has carried 6,059 packages of food for Paris, free of charge. The agreement for a fusion of traffic with the Chaham and Dover and the "Brighton" stands postponed for the present.

Stratford-on-Avon.—The traffic receipts have advanced 550*l*. Dividend annonnced at the rate of 6 per cent. per annum. It is proposed to substitute narrow for broad guage.

BANKS.

London and Provincial Bank.—A dividend at the rate of 9 per cent. per annum absorbs 4,556*l*, leaving 1,946*l*.

FINANCE, CREDIT, AND DISCOUNT COMPANIES.

British India and Colonial Trust and Agency Corporation, Limited.—Creditors are required to send particulars of claims to the liquidators by the 1st of March.

Credit Foncier of England, Limited and Reduced.—The capital is now reduced to 1,000,000*l* in 5*l* shares.

ASSURANCE COMPANIES.

Mutual Life Assurance.—At the annual meeting the new business of the past year was stated to have consisted of 275 policies, covering 124,216*l*, at annual premiums of 4,814*l*. The accumulated fund is 723,113*l*, and the assurances in force are 4,198*l* for a total of 2,391,955*l*, yielding in premiums 75,906*l*.

MISCELLANEOUS COMPANIES.

Australian Agricultural.—A dividend of 10s 6d per share, free of income tax, is notified, absorbing 10,500*l*. The company's business is stated to be improving.

English and Australian Copper.—The available net revenue is only 344*l*, owing to the unprecedentedly low price of copper.

Egyptian Government 7 per Cent. Loan, 1864.—Bonds representing 167,000*l* have been drawn for redemption at par on the 1st April.

[CONTINUED FROM PAGE 206.]

Falmouth, Gibraltar, and Malta Telegraph.—The cable has been repaired.

Foreign and Colonial Government Trust.—Certificates of the first issue have been drawn representing 13,500*l*, which will be paid off at par on the 1st March.

Frederick Braby and Co.—Interim dividend announced at the rate of 10 per cent. per annum.

Gloucester Wagon.—Interim dividend 10 per cent. per annum.

Grosvenor Hotel.—The accounts showed a balance of 4,745*l*, which was partly appropriated in payment of interest as dividend on the preference shares, and in payment of a dividend of 5s per share on the ordinary stock. 1,000*l* was added to the reserve fund, and a balance was carried to next account.

Linoleum Manufacturing.—Dividend declared at the rate of 15 per cent. per annum, free of income tax.

London General Omnibus.—A dividend at the rate of 7½ per cent. per annum, free of income tax, is announced.

Marseilles, Algiers, and Malta Telegraph.—The report states that the gross revenue from the opening of the line to the 31st of December, 1870, amounted to 4,091*l*, and the expenditure to 1,354*l*, leaving 2,737*l*, which the directors propose to carry forward. As the telegraphic system in France was almost entirely closed to the public during the greater part of the time since the line was opened, the directors think the actual receipts afford good ground for the expectation of a prosperous future.

Massachusetts 5 per Cent. Sterling Loan for 619,900*l*.—Messrs Barings having invited subscriptions for this sterling loan at the price of 91 per cent., 413,300*l* is required for the completion of the Troy and Greenfield Railroad and Hoosac Tunnel, and the balance for the "War Fund." The bonds, in sums of 100*l* and 200*l* each, bear interest in London half-yearly, the first payment being due on the 1st July, and the principal is repayable in 1889.

New Granada Bonds.—Active bonds have been purchased and redeemed to the amount of 9,600*l*, and deferred bonds to the amount of 10,350*l*.

San Paulo Gas.—The works are being favourably progressed with, the contract price being 34,750*l*. The number of public lights is to be increased, and prospects are considered encouraging.

Telegraph Construction and Maintenance.—The annual meeting will be held on the 28th instant, "at which the directors will propose a cash dividend of 24s, in addition to the *ad interim* dividend, and a bonus of 3*l* per share out of the Submarine Telegraph share property held by the company, to be realised under the supervision of trustees.

Val de Travers Asphalte Paving, Limited.—Capital 100,000*l*, in 10*l* shares. This new undertaking purposes to acquire the goodwill, contracts, and assets of the existing Val de Travers Asphalte Company, Limited, the consideration being 4,500 fully-paid shares in the present company. The Société des Asphaltes du Val de Travers, by its concession, grants a monopoly of its supply of the asphalte of Val de Travers, Neufchatel, Switzerland, for England and its colonies. The prospectus states that no other source of supply of this material has yet been discovered, and that the proceeds of the shares now offered for public subscription are required as additional working capital.

West India and Panama Steamship.—The report states that a marked advance in business has occurred, and that a dividend at the rate of 6 per cent. for the year, free of income tax, will leave a balance of 3,870*l*.

MINING COMPANIES.

Imperial Ottoman Mining Company, Limited.—The following is from the report of Capt. Champion, the manager of the company's mines at Balia, under date 30th January:—"I am glad to inform you that the crusher is working satisfactorily, and crushing ore. I have a full number of hands dressing it, and I anticipate it will be brought up to a good percentage. All hands are being employed preparing ore for market."

Mining Iron Ore.—The year's receipts were 34,172*l*, at a working cost of 22,155*l*. Dividend, 4s per share, free of income tax.

South Aurora Silver.—The directors have resolved to pay an interim dividend for the four months from 1st September to 31st December last at the rate of 20 per cent. per annum, free of income tax (6s 8d per share), and an additional 5 per cent. per annum from the 29th October to 31st December, upon 3*l* paid in excess on that day by shareholders upon their application for fully paid up shares—viz., 6d per share.

The Commercial Times.

POST OFFICE ANNOUNCEMENTS.

The undermentioned offices have been opened since the publication of the last list of Postal Telegraph Offices, or will be opened for the transaction of telegraphic business on the 15th February:—England—Barraway, near Royston; Bassingbourne, near Royston; Beaconsfield (Bucks); Beaumaris (Anglesea); Borth (Cardiganshire); Chapel Town, near Sheffield; Colwyn, near Conway; East Cowes, near Cowes; Helmsley, near York; Kirkby Moorside, near York; Menai Bridge (Anglesea); Newcastle-on-Tyne, Neville street. Ireland—Dromod; Newtown Forbes, near Longford; Piltown. Metropolitan district—Clapham rise, S.W.; Lancaster street, Hyde park, W.

It has been officially intimated that henceforth, not only unsealed letters but sealed letters also may be forwarded to Paris in the mails sent via Dieppe. Registered letters for Paris may also be forwarded.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

There was no new feature in the wheat trade to-day. Supplies of English were short, and the condition of the samples was inferior, but there was a good show of foreign wheat on offer. Trade ruled dull for all descriptions, but no change took place in the quotations. Barley, beans, and peas, were without alteration in value, sales being restricted within very narrow limits. Maize and oats tended in favour of holders, but there was little export demand. The purchases of flour for ship-

ment were very small to-day, and prices were easier. American barrels sold at 29s. This week's imports of foreign and colonial produce have amounted to 9,600 quarters of wheat; 17,460 barley, 2,446 oats, 920 beans, 4,850 maize, 6,490 sacks and 11,340 barrels of flour.

At Liverpool and Wakefield this morning the wheat trade ruled dull at drooping currencies.

The Liverpool cotton market has been dull during the past week, and prices have declined about ⅛d per lb. The total sales are 61,590 bales, of which the trade have taken 47,930 bales, speculators and exporters 13,660 bales. The imports for the week are 195,000 bales, the actual exports 8,458 bales; and to-day's stock is estimated at 750,820 bales. Quotations for American descriptions have receded ⅛d per lb, East Indian 1/16d per lb, and Bengals ⅛d per lb since this day week. To-day the market closes quiet; sales, 10,000 bales.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended February 16, 1871:—

	Imported.	Exported.
American.....bales	171,725	5,783
Brazilian	6,744	811
East Indian	14,827	5,555
Egyptian	8,907	568
Miscellaneous	4,169	16
Total.....	206,372	12,733

At New York, on the 16th inst., middling Upland cotton was quoted at 15¼ cents per lb. Bombay advices to Feb. 11 quote the cotton market quiet at 185 rupees for Dhollerah fair.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, January 21:—There has been very little doing in cotton. Dealers continue averse to entering into contract for forward delivery Oomrawuttee, and of the small total of business transacted the largest proportion has consequently been old cotton. Demand has chiefly run upon Dhollerah, without selection, at prices varying according to quality, on the basis of 187 rs per candy for the best parcels obtainable. The week's sales amount to only 2,700 candies, a very trivial aggregate considering how far we are now into the season. In the up-country market prices are somewhat higher, and the amount of business done has in consequence been more restricted. The ryots are very exacting in their demands, while on the other hand buyers for the most part refuse to follow the advance. In and around Oomrawuttee proper the rainfall has been light, and little damage will be done, but in the districts of which Kangaum is the centre, about three inches fell, and much deterioration must be caused by the presence of black leaf and stain. The yield, however, will not, we believe, be affected, as so far as can be ascertained only the third pickings remained on the trees, and many of the bolls, which would not have come to maturity had no rain fallen, will now ripen, and make up for any deficiency which may arise in the earlier growings. From Dhollerah we learn that crop prospects continue favourable, and that picking may be expected to begin in the Wudwan district about three weeks hence. Regarding the Dharwar crop, the manager of the Carwar company writes:—"Insect blight has to a very small extent appeared, but as the plants are well advanced, there is no reason to expect that damage of any moment will result. About the end of the month some of the kuppas should be ready for picking." From Tinnevelly we have a telegram dated 19th, quoting 6 1/16d per lb.

Export of Cotton from Bombay to Jan. 20.

Actual exports since last mail left, 17,232 bales.

Messrs E. B. Liddell and Co., of Alexandria, have furnished the following report, dated Feb. 3:—Our preceding cotton report was dated 27th ult. We have had another quiet week, attributable in no small degree to a continuance of the monetary tightness noticed by our last. The business transacted has been at about ⅛d over previous rates, especially for parcels of satisfactory quality, which in each grade are becoming so far from plentiful as to command extreme figures whenever met with. Yesterday and to-day, despite more money in the place, prices have been weaker, and close at about following quotations:—Fair, 8¼d per lb, f.o.b.; good fair, 8⅛d ditto; fully good fair, 8⅛d to 8⅜d, ditto; good to fine (Gallin), 10d to 13d, ditto. Freight about ⅛d per lb for steam-pressed bales.

The colonial produce markets closed with less animation. Sugar is lower on the week for both raw and refined goods; while common teas have tended in favour of buyers. Coffee and cocoa have ruled steady in value and demand. Rice is unchanged in price. The indigo sales have gone steady at advanced rates.

Messrs J. D. Campbell and Co., of Mauritius, writing on Jan. 12, thus refer to the sugar market:—After a period of inactivity the last days of the year saw a slight revival in business, and considerable purchases were made for Australia and Bombay at prices fully sustaining previous quotations, and in some cases showing a rise of 10c to 15c. Since then little business of any importance has taken place, and a stand is being taken by buyers to force down prices. It is scarcely probable that if a fall be obtained it will be more than trifling and momentary, because any decline of importance would produce activity and reaction, not easily resisted by buyers, who had begun to collect cargoes. The only sorts of sugars scarce are middling to fine yellows and refining greys. The last are very scarce, and from first hands it would be hard to lay in a good cargo. Grey syrups continue to accumulate without buyers, but we doubt if any holder would sell at prices lower than their usual relation to other sorts would fix. We estimate the cost, f.o.b., of No. 13 grey refining sugar (taking sugar $6.90, freight 1*l* 2s 6d, and exchange at 4 per cent. prem.) at 28.9 per cwt. The following quotations represent recent prices as nearly as possible, and are those asked by holders—pretty firmly:—Grey syrups—No. 6 to 9, $4.85 to $5.75, nominal; No. 10 to 11, $5.85 to $6, ditto; No. 12, $6.15 to $6.25. Grey vesous—No. 12, $6.80 to $6.90; No. 13 to 14, $6.90 to $7; No. 15, $7 to $7.10. Whites—No. 16 to 18, $7.15 to $7.45; No. 19 to 20, $7.50 to $7.75; above No. 20, $7.85 to $8.15; counter No. 16 to 20, $7.25 to $7.60. Yellows—Crystals, first, $7.25 to $7.40; ditto, second, $7 to $7.15; very fine counters, $7.15 to $7.25; good to fine ditto, $6.90 to $7.10; doubtful ditto (greyish), $6.60 to $6.85; good to fine brown, $6 to $6.40; low to fine ration, $5.25 to $6. Statement of sugar shipped from 14th December, 1870, to 11th January, 1871:—To the United Kingdom, 1,093 tons; to Bombay, 1,396; to Melbourne, 356; to Sydney, 348; to Adelaide, 897; to Cape colonies, 135; and to other places, 1,678 tons.

Annexed is Messrs William Moran and Co.'s indigo report, dated Calcutta, January 17:—The catalogues of the public sales of indigo, which have occurred during the past week, have comprised 3,167 chests, but after deducting a few bought in lots and numerous rejections of parcels sold to arrive, and other rejections which have already been counted as sold, the quantity of fresh indigo disposed of amounts to 2,600 chests only, making the total quantity out of the market up to last night 78,000 maunds. Prices are unchanged, and we have rarely known them to vary so little in the course of a season as they have hitherto done this year, and the same remark applies to the rate of exchange. Exports of indigo from 1st November, 1870, to 14th January, 1871:—To Great Britain, 10,136 chests; to France, 155; to Trieste, 2,381; to foreign Europe, 190; to America, 1,133; to Gulphs and Levante, 758—total, 14,753 chests.

The annexed is dated New York, Feb. 3:—The sharp rise in gold and exchange has imparted a slight impetus to the business of exportation, though there are certain adverse influences existing between the home and foreign markets to be harmonised before the outward movement of produce can be expected to have free play. The unsettled state of political affairs in Europe has stiffened the exchange and gold markets, and led to an advance in rates. The supply of commercial exchange has been reduced considerably by the recent halt in the exports of cotton, bread stuffs, and petroleum, and drawers have had little difficulty in establishing higher rates. The supply of bankers' exchange has been somewhat increased by bills drawn against a loan of half a million sterling, recently negotiated in London by the Camden and Amboy Railway Company. The rates are scarcely up to the point at which American coin can be remitted at a profit. The supply of currency remains abundant, and the money market easy, at 4 to 6 per cent. on call, and 7 to 8 per cent. discount. Gold and exchange close dull, with a slight reaction from the maximum rates.

THE COTTON TRADE.

LIVERPOOL.—February 16.

The cotton market continues heavy, influenced by large imports as well as large receipts in the ports of the United States, and though in the early part of the week a rather firmer tone was apparent, quotations for most descriptions are reduced about ⅛d per lb. For Sea Island the demand has been less active, but without any quotable change in prices.

American has further given way about ½d per lb. New York advices to the 15th instant quote middling Upland 15½c, costing to sell in Liverpool 8¼d per lb, by steamer. Brazil has been neglected, and prices are nominal at ¼d per lb decline. Egyptian continues heavy, and prices of the current qualities are ¼d to ½d lower. East Indian has been slow of sale, the lower qualities especially having been in very limited request, and quotations are reduced ¼d to ½d per lb.

In cotton to arrive the transactions continue numerous. The latest quotations are—American, basis of middling, from any port, January shipment, 7 7/16d; January-February, 7 7/16d; April delivery, not below low middling, 7 7/16d; Mobile, at sea, 7½d; not sailed, 7½d; May delivery, not below good ordinary, 7¾d; Savannah, shipping or shipped, not below good ordinary, 7¾d; February-March shipment, not below good ordinary, 7¾d; February-March, 7¾d; New Orleans, January shipment, ship named, 7⅞d; April delivery, not below low middling, 7 1/16d; bales, March-April delivery, not below good ordinary, 7¾d, 7 7/16d per lb.

The sales of the week, including forwarded, amount to 61,590 bales, of which 3,130 are on speculation, and 10,530 declared for export, leaving 47,930 bales to the trade.

FEB. 17.—The sales to-day will probably amount to about 8,000 bales, the market without change.

	bales.
An increase of import compared with the same date last year of	410,570
An increase of quantity taken for consumption of	22,110
A decrease of actual exports of	4,890
An increase of stock of	434,630

In speculation there is a decrease of 56,010 bales. The imports this week have amounted to 195,580 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to February 11) is 295,000 bales. The actual exports have been 47,930 bales.

LONDON.—FEBRUARY 16.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association :—

The market has been very inactive since our last report, and prices generally show a decline of ¼d per lb, both on the spot and for arrival.

NEW YORK.—FEB. 3.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, Feb. 3. From the figures thus obtained it appears that the total receipts for the seven days have reached 154,482 bales, against 150,800 bales last week, 146,887 bales the previous week, and 132,585 bales three weeks since, making the total receipts since Sept. 1, 1870, 2,352,297 bales, against 1,835,290 bales for the same period of 1869, showing an increase since Sept. 1, this year, of 517,005 bales. The exports for the week ending this evening reach a total of 73,528 bales, of which 62,606 were to Great Britain and 10,922 to the continent, while the stocks at all the ports, as made up this evening, are now 617,177 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night :—

Week ending Feb. 3.	Exported to Great Britain.	Exported to Continent.	Total this week.	Same week 1870.	Stock. 1871.	Stock. 1870.
New Orleans	9196	4504	13700	17435	230159	212650

All other ports	1265	1438	2073	1979	33000	30500
Total	62606	10922	73528	57260	617117	529248
Total since Sept 1	1172264	280482	1402746	979331	...	...

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 15,268 bales, while the stocks to-night are 87,929 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to Jan. 27, the latest mail dates. We do not include our telegrams to-night, as we cannot ensure the accuracy or obtain the detail necessary by telegraph :—

The market the past week has lost the activity and buoyant tone observable during the previous week. This has been due to the dull and unfavourable reports from Liverpool, the result

probably of our continued large receipts, and to the doubt which still hangs around the war question. There appears also to be somewhat less confidence among holders here, and yet the offerings, though sufficient to meet the demand are not very liberal, notwithstanding the increased estimate of the crop which the extremely free arrivals at the ports are making popular. The better grades are especially firm, middling closing at only ⅛c decline from last Friday, while ordinary and good ordinary are ¼c lower, and low middlings are ⅜c lower. Last Saturday, with a dull market, low middling and the grades below were reduced ⅛c. Monday and Tuesday there were no change in the quotations. Wednesday low middling declined ⅛c, and the lower grades ¼c. Thursday there was a further reduction of ⅛c on all grades, and to-day there has been no change, but the market has been dull and so closes to-night. For forward delivery the transactions have been large, but the decline has not been so great for the later month.

	37076	41009	124310	23418	17829	103623

These totals show that the interior stocks have decreased during the week 3,933 bales (being now 20,687 bales more than for the same period last year), while the aggregate receipts are 13,658 bales more, and the shipments 23,180 bales more than for the corresponding period of 1870.

The exports of cotton this week from New York show a decrease since last week, the total reaching 14,027 bales, against 16,825 bales last week. Below we give our table, showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1870; and in the last column the total for the same period of the previous year:—

—*New York Commercial and Financial Chronicle.*

NEW YORK, Feb. 10.—According to Messrs Moffat, Davidis, and Co.'s report, the week's receipts of cotton at all United States' ports have been 161,000 bales, and since the 1st of September, 2,515,000 bales. Shipments to England, 68,000 bales; to France, none; and to the continent, 28,000 bales. Total since the 1st of September, 1,500,000 bales; stock at all ports, 665,000 bales.

NEW YORK, Feb. 14.—The receipts of cotton at all American 5orts during the last four days have been 83,000 bales. Exports to Great Britain, 36,000 bales; and to the continent, p,000 bales.

NEW YORK, Feb. 15.—The receipts of cotton at all United States' ports to-day have been 14,000 bales.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, Feb. 16.—Our market has assumed a very quiet tone, and the business done during the last few days especially has been quite insignificant in amount. The very large imports of cotton into Liverpool are at length causing a weakness in prices here, and as buyers have no faith in the maintenance of present values for yarn and cloth, they are making few offers, and these chiefly with the object of testing the ideas of producers. Spinners, on the other hand, are more anxious to sell at a concession in price, as they are enabled to get an equivalent in cotton. Manufacturers are, as yet, rather firm in refusing lower rates, but in order to sell now they must also submit to a reduction in price. The daily business, with the previous engagements, are sufficient as yet to keep down stocks. Market closes very tame, and prices favouring buyers.

Messrs Alexander Collie and Co., received the following telegram from Manchester yesterday:—There is no change to report in the tone of this market since Tuesday.

BRADFORD.—A more hopeful feeling prevails in the wool market, though the business done is only of a restricted character, and for immediate consumption. Wools of the demi class, particularly wethers, are still most in favour. Bright-haired wools, which have been long greatly neglected, and are rather scarce in this market, are more in request. Prices are still very firm. There is a moderate business doing in English noils and brokes. In some departments of both yarns and pieces there is rather more activity, though the high rates are said to be a marked obstacle to business.

ROCHDALE.—There was a rather better attendance of buyers in the flannel market, and a little more business was done in both plain and fancy goods. A moderate amount of Yorkshire goods were sold. The demand for wool was dull, but prices are firm. There was no change in the quotations for flannels or Yorkshire goods.

LEEDS.—Selections were made of both spring and summer fabrics and ordinary plain cloths to fully as great an extent as on this day week. There are fair deliveries of goods direct from the manufacturers to the merchants, and these, combined with the sales in the public markets, show that the woollen cloth trade of this town and district is quite as good as it was last year at the like period.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Feb. 3.—The market for flour and wheat has for some time been dull, and closes lower; while coarse stuffs have been variable. The receipts of flour have been quite moderate all the week. At the opening there was a good shipping demand at advancing prices, but holders kept constantly ahead of buyers, and but little was done. On Monday, the announcement of the surrender of Paris, and the conclusion of an armistice between Prussia and France, precipitated a great excitement—$7 was paid for large lines of extra State, and many holders did not name less than $7.15, but the market weakened towards the close, and showed continual depression, until yesterday, when shippers took about 10,000 barrels at $5.25 to $6.50, No. 2 superfine and inferior extras, and $6.80 to $6.85 for good extras, and to-day there was very much the same sort of demand, but less active, and prices were 5c lower; common to good extra State selling at $6.75 to $6.85. In wheat, the speculative feeling has been very strong, and during

the excitement of the Monday following the surrender of Paris, new spring advanced to $1.58 to $1.61, and amber winter to $1.64 to $1.63, but from this price steadily declined to $1.54 to $1.57 for new spring, and $1.57½ to $1.60 for amber winter, when speculative orders were executed, mainly at $1.55 for prime No. 2 in store. Considerable lines of old spring have been closed out at $1.44 to $1.48. Millers have been well represented in market, but have bought little. White wheats have remained quiet. To-day, the decline in Liverpool, and the extreme firmness in ocean freights, caused by corn seeking room, caused a very dull market, and the only transaction of moment was a boat load of No. 1 spring at $1.54 in store. Corn has arrived but moderately, and has been taken to a fair extent for export, but holders show no confidence, and prices have been weak, closing at 85c to 87c for new western mixed and yellow. White corn is dull and unsettled.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The export demand having now subsided, there has been a great lack of animation in the grain trade during the past week, and the tendency of prices has been downwards throughout. Supplies of English wheat on offer have been small, and the condition of the samples has been inferior. Fine dry parcels have sold at late rates, but less money has been accepted to effect sales of produce generally. Foreign wheat has changed hands slowly at barely late rates. Trade is just now in a state of suspension, and little activity can be looked for until the political situation becomes more defined. Our own millers are fairly stocked, and decline to operate to any important extent at the rates now current. On the other hand holders refuse to make concession in the face of the possibility of a renewal of hostile operations in France, holding at the same time the reasonable belief that the French demand is only temporarily satisfied, and that shipments will be resumed on an even more extensive scale at an early date. This will probably be the case, particularly if terms of peace are arranged and the existing obstacles to trade removed. Flour has fallen considerably on the week, sales of barrel flour being reported to-day at 29s.

The spring corn trade has ruled dull; grinding barley, beans, and peas are about 1s per quarter lower. Maize and oats ruled dull at the opening of the week, but to-day a reaction took place, and sales took place at firm currencies.

Mr George Dornbusch thus reports the state of the floating grain and seed trade:—During the last eight days 45 grain and seed-laden vessels have arrived at ports-of call, viz.:—24 wheat, 3 maize, 11 barley, 2 flour, 1 linseed, 1 rapeseed, 1 fodder-seed, 1 cotton-seed, and 1 valonea. The floating grain trade has been quiet, though steady in tone. Wheat.—The expectation of large arrivals has kept business in suspense, and only few transactions have transpired. Maize has been in quiet demand at easier prices. Barley at first steady in price, later, to make sales, slightly lower prices had to be accepted. In rye little business has been done. The reported sales are as follows:—Wheat—31 arrived cargoes: Berdianski, 51s 3d to 52s; Marianopoli, 52s to 53s; new ditto, 52s to 53s; Ghirka and Taganrog, 49s to 52s; new Crost ditto, 52s to 52s 6d; new ditto, 50s 6d; new Rostoff ditto, 49s; Ghirka and Taganrog and Constantinople, 45s; Ghirka and Odessa, 51s to 51s 6d; new ditto, 52s 7½d to 52s 9d; Ghirka Nicolaieff, 50s to 52s 3d per 492 lbs; Polish Odessa, 58s; prime spring new York, 53s per 480 lbs; Californian San Francisco, 60s 6d per 500 lbs. To be shipped, 1 cargo Marianopoli, 52s 6d per 492 lbs. Maize—7 arrived cargoes, Odessa, 34s to 35s 1½d; Galatz, 35s 3d to 35s 6d; Fournian, 35s 6d per 492 lbs. Barley—4 arrived cargoes: Azow Kertch, 27s; Azow Taganrog, 26s 6d to 27s 3d; Kustendje, 27s per 400 lbs. Rye—To arrive, 4 cargoes; Azow Berdianski, 36s; Azow Taganrog, 37s; Odessa, 37s; Danubian, 36s 9d per 480 lbs. Linseed firm, and rather dearer. Arrived 300 tons East India Calcutta, 60s 9d to 61s; 2,000 bags East India Calcutta, 60s to 61s 6d per 410 lbs. On passage, one or two cargoes: Azow, 60s 6d; 5,400 quarters Azow, 61s per 424 lbs; 180 to 200 tons East India Calcutta, 61s 9d to 62s per 410 lbs. Rape seed steady. On passage: 100 tons ordinary brown Calcutta, 68s 6d per 416 lbs; 800 bags Kurrachee, 64s per 424 lbs; 1,600 chests wild Black Sea Odessa, 32s 6d per 424 lbs; 3,000 bags wild East India and Kurrachee, 61s 6d to 62s per 416 lbs. Shipped or to be shipped, 200 tons East India Calcutta, 68s per 416 lbs. To be shipped, 200 tons ordinary brown Calcutta, 68s 6d per 416 lbs. Cotton-seed quiet. One arrived cargo Egyptian, 9l 10s. On passage, 90 tons Egyptian, 9l 2s 6d per ton. Shipping, 120 tons Egyptian, 9l 2s 6d per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market has not yet shown any symptoms of activity, being still unsettled, and the trade generally have restricted their operations. After so long an interval of quietude, a revival of the demand is now looked forward to, especially as the statistics are favourable. The home deliveries keep large, and the stock in the London Dock, warehouses, &c., is now reduced to 57,170 tons, against 72,560 tons last year, and 69,150 tons in 1869 at the same date. There were 1,262 casks West India sold to yesterday, including fine crystalised Demerara at 37s to 37s 6d per cwt. Good refining qualities remain steady in price. Low brown descriptions are still depressed. A decline of several shillings has been accepted for dry refined goods without leading to any increase of demand, but the prices are still high in comparison with raw sugar.

Mauritius.—A small parcel of fine grainy white has sold privately at 40s. 1,613 bags by auction were chiefly sold: brown, low to good, 23s to 30s 6d; pale soft grainy, 32s 6d to 34s.

Madras.—780 bags native brown were brought in and afterwards sold at 23s 6d to 26s 6d. 395 bags low soft brown Date sort withdrawn.

Bengal.—400 casks, ex recent sales, have been sold: brown, 22s; low, 19s.

Manila.—3,060 bags good clayed have been disposed of at 28s.

Other Foreign.—At auction, 174 hogsheads 53 barrels Porto Rico chiefly sold at and afterwards: low to good yellow, 32s to 35s, being rather cheaper. 3,643 bags Guatemala were chiefly bought in, a few lots brown and yellow selling at 30s to 32s 6d. By private contract, 350 casks 150 boxes Havana are reported at 31s per cwt.

Refined.—The market is quiet, with sales of dry goods at about 4s per cwt under last rates for common kinds, and prices still tend downward. Titlers, &c., 48s to 50s per cwt. There is a moderate business doing in pieces.

MOLASSES.—About 300 puncheons West India are reported at 11s 6d to 13s 6d. 46 puncheons Porto Rico by auction sold at 13s 6d per cwt.

RUM.—Good Jamaica continues in demand. A few sales have been effected in common West India. Demerara, 2s 0½d. About 500 casks Mauritius have sold chiefly at 1s 5d per proof gallon.

COCOA.—The moderate quantity of Trinidad brought to public sale has obtained steady rates, and 910 bags about two-thirds sold. Low to good, 60s to 70s; good to fine, 72s 6d to 95s; and small lots very superior as high as 120s. 891 bags Guayaquil were bought in. Privately sales at 47s to 53s. Export deliveries have increased, and those for home are steady. The total stock is still considerably larger than at the corresponding date of last year.

COFFEE.—The market is very steady at last week's prices. Sales have been reported on native Ceylon to arrive at 56s 6d *without*, and at 57s *with* guarantee of quality. 427 bags 110 casks by auction chiefly sold; mixed and rather small berry to good, 56s 6d to 59s; bold 61s 6d to 62s. The public sales of plantation have been small, and went off at last week's quotations, 516 casks 79 barrels 267 bags finding buyers. Colory, low middling to good middling, 65s to 74s; good to fine bold, 75s to 81s 6d. Arrivals during the past fortnight will shortly afford a better supply. 70 cases 1,038 bags East India chiefly met with buyers, including Mysore, &c., at 76s to 82s. 844 bags Guatemala partly sold at 58s to 61s; colory, 66s to 68s. 121 casks 511 bags Porto Rico were taken in at 62s to 67s. A floating cargo of St Domingo has sold at 54s for the Mediterranean, two of Santos for the continent at 53s and 53s 3d per cwt, and one of Rio at 49s 6d per cwt. There have been further arrivals from Colombo, and the total stock here is about 3,000 tons above that of last year. The Netherland's Trading Company have declared 124,100 bags for sale on the 22nd inst.

TEA.—There have been further arrivals, and the market without animation. Low and common grades, which are in full supply, remain dull. Medium to good steady. 3,899 packages by auction went at about former rates for Congou and a slight decline upon green. A steady business in Indian tea by private contract, fine and strong qualities being in demand, while inferior and weak are difficult to sell. The sales on Tuesday went flatly. Assam Company's tea met with fair competition at full rates. The bulk of other kinds withdrawn, but some since found buyers at reduced prices.

RICE.—The speculative demand last referred to having partly subsided, the market is rather quiet. At the public sales of Bengal 9,456 bags were bought in above the previous value. A few hundred bags

good new white since sold at 12s 6d. A floating cargo of Rangoon at 10s 6d, *open charter*. 400 tons Bassein at 10s 3d, ex ship. 200 tons low Bengal at 9s 3d to 9s 4½d, ex ship. On the spot fine Ballam at 10s 9d. Some parcels of Rangoon at 10s 9d to 11s, and fine white Bengal at 12s 9d to 13s 6d; also some Madras at 9s 9d to 10s 7½d per cwt.

IMPORTS and DELIVERIES of RICE to Feb. 11, with STOCKS on hand.

SAGO.—Transactions have been upon a very limited scale. 1,384 bags small grain were chiefly bought in. A few lots good sold at 18 per cwt. Bold withdrawn.

SAGO FLOUR.—700 bags now landing have sold at 15s 3d per cwt.

TAPIOCA.—1,335 bags were chiefly taken in. A portion sold at 2d to 2⅜d per lb for Singapore.

PEARL TAPIOCA.—121 bags Singapore, part sold: small, 17s to 18s; fine white medium, 19s 6d to 20s. Very bold taken in at 18s per cwt.

SPICES.—The public sales yesterday went off flatly. 222 bags white Singapore part sold at 7⅜d to 7¾d for common quality; two lots fine, 8¾d. 210 bags fair Penang realised 7⅝d. Black is a shade cheaper, with sales at 5⅞d and 5 1/16d. 546 bags Penang, by auction, part sold at 5¾d to 5⅞d. Of 2,612 bags Singapore, a portion only sold at 5⅞d to 6d, bales Zanzibar cloves, about one-third part sold at 3d; a few lots, 3⅛d; a few lots good 6d to 6⅛d. There is now a limited inquiry. 2,417 fine, 3⅛d to 3⅜d. 59 cases brown nutmegs sold at rather lower rates, for middling qualities, 82 to 81's, 2s 5d to 2s 6d; 112 to 100's, 2s 2d to 2s 3d. 15 cases mace went at last week's prices, and chiefly sold: middling Penang, 3s 4d to 3s 5d; low Singapore, 3s to 3s 2d per lb. 94 cases Cochin ginger, chiefly wormy, and low quality, were taken or withdrawn above the value. 60 bags African withdrawn. There have not been any public sales of Jamaica. 40 cases cassia buds part sold at 8*l* 12s 6d. There is a steady demand for pimento, and 2,124 bags, by auction, chiefly sold at 1⅞d to 2⅛d per lb.

SALTPETRE.—Prices have been irregular. The sales of Bengal by private contract amount to 3,000 bags, refraction 20¾ to 7¾, 27s to 28s; 4¼, 29s 6d. 100 tons reported for arrival at 27s 6d per cwt.

IMPORTS and DELIVERIES of SALTPETRE to Feb. 11, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imported.....tons	1170	960	720	980
Total delivered	1180	1760	1450	1460
Stock	2380	4020	3460	7650

INDIGO.—The periodical sales of East India have gone off with fair spirit at the previous currency to 6d per lb advance. Low qualities were at the opening depressed, but have since been in partial demand. Desirable sorts of Kurpath met with spirited competition: middling to good Bengal also found ready buyers. Dry leaf Madras went dearer for middling, but at 3d to 4d per lb decline for low quality. There were 8,563 chests in the catalogues, and 2,450 sold to yesterday.

DRYSALTERY GOODS.—A few transactions have occurred in Gambier. On the spot block has sold at 15s 6d, and 15s 9d ex ship. 790 bales by auction were disposed of at 15s 3d to 15s 6d, and 226 bales cubes at 18s to 18s 3d. 1,800 boxes cutch chiefly sold at 20s 6d to 22s according to quality, and privately 21s accepted for good. Bengal turmeric bought in at 20s to 22s per cwt. There have not been any public sales of Bengal safflower.

SHELLAC.—350 chests by auction sold at full prices. Reddish and livery orange, 125s to 127s 6d; fine red button, 135s to 137s 6d. Several sales privately, chiefly in orange, at above prices, and fine DC orange at 7*l* per cwt.

METALS.—The markets have not shown any return of activity. No improvement can be quoted in the iron trade. Rails in steady demand latter being 2d to 3d per lb dearer than at the last sales. There were and quoted about 6*l* 10s at the works. Scotch pig iron barely supports the advance, but not much business passing. To-day's price is 51s 10½d to 52s per ton cash. English lead meets a steady demand. Spelter has been dull. Silesian quoted 17*l* 15s to 18*l*. Business done for arrival at 17*l* 10s. The sales reported in copper are chiefly in Chili, &c., which has sold freely at 65*l* to 66*l*. Other kinds, including English, are very firm. Australian, 74*l* to 75*l*. Foreign tin attracts comparatively little attention. A few sales have been made at lower rates. Straits, 131*l* to 132*l*; afloat, 130*l* to 130*l* 10s per ton. Quicksilver, 11*l* 7s 6d per bottle, being lower. A good demand prevails for tin plates.

JUTE.—Transactions during this week have been moderate in extent and chiefly for arrival at fully last week's rates, and jute yarns are rather higher in Dundee. The stock at this port is remarkably small—viz, 15,364 bales, against 57,400 bales year and 86,500 bales in 1869, and prices in Calcutta are relatively high.

HEMP.—Business has been done in Manila privately at reduced prices, and the public sales on Wednesday, which comprised 1,677 bales, went off at considerable decline, varying from 3*l* to 5*l* from the late highest point, the common qualities showing the greatest depression. About half the above quantity was withdrawn. The remainder sold as follows:—Brown and common, 41*l* to 45*l* 10s; good roping, 50*l* 10s to 51*l* 10s; Boluzan, 52*l* to 53*l*. 484 bales Sunn, &c., part sold at 15*l* 15s to 18*l* 5s. Petersburg quiet at 34*l* 10s to 35*l* per ton for clean.

LINSEED.—The market continues firm, with a steady demand. Calcutta, 61s to 61s 6d, afloat, 62s; Bombay, 62s; Black Sea, afloat, 60s 6d to 61s per quarter.

OIL.—The market for olive is firm. Gallipoli, 50*l* to 50*l* 10s; Mogadore, 48*l* 10s. Common fish oils remain quiet. Sperm is in demand, at 84*l* per ton. Linseed oil dull, at 31*l* to 31*l* 5s; April to June, 32*l* 10s. English brown rape, 45*l* to 45*l* 10s; last four months, 45*l*, paid. Palm is inactive, with a full supply. Lagos, 38*l* 10s, and the lower qualities down to 32*l*. The market for cocoa-nut has been without animation, and it is now quiet. Ceylon quoted 40*l*; afloat, 40*l* 15s to 41s. Cochin, 45*l* and 47*l* per ton on the spot, according to quality.

PETROLEUM.—American refined, 1s 5½d to 1s 6¼d per gallon, and the market quiet.

TURPENTINE.—American, 37s; French, 36s 9d per cwt.

TALLOW.—There has been a want of animation in the market during the week, with prices in favour of the buyers. The tone of business was quiet this morning. Petersburg on the spot and to June, 44s 3d to 44s 6d; October to December, 45s 6d to 45s 9d. The public sales of to-day are smaller than for some time past.

PARTICULARS OF TALLOW—Monday, Feb. 13, 1871.

POSTSCRIPT. FRIDAY NIGHT.

SUGAR.—The market continues inactive. 501 casks West India have sold, making the week's business 1,763 casks. 2,250 bags beet sugar by auction were taken in at 32s to 34s 6d for grainy yellow; 840 cases Glucose at 19s; 600 bags soft brown Java have sold privately at 19s.

COFFEE.—413 casks 74 barrels and bags plantation Ceylon by auction obtained steady prices. 165 bags rather bold mixed Singapore sold at 58s 6d. Further business done in native Ceylon to arrive at 57s per cwt.

PEPPER.—Black is dull. Business has been done in Singapore white at 7⅞d per lb.

DRYSALTERY GOODS.—143 bales Bengal safflower part sold at 11*l* 7s 6d to 14*l* 5s. 925 bales Gambia bought in: bleck, 15s 9d to 16s. 2,370 boxes Pegue cutch were taken in at 22s 6d per cwt.

SHELLAC.—Of 685 chests by auction, about 450 sold. Reddish and second orange at 6*l* to 6*l* 7s 6d, including native orange; good Garnet, 6*l* to 6*l* 2s 6d.

SAFFLOWER.—143 bales Bengal by auction part sold at 11*l* 7s 6d to 14*l* 5s per cwt.

OIL.—35 tuns colonial sperm sold at 84*l* to 84*l* 5s. 479 casks palm partly found buyers at 33*l* to 38*l* 15s. 95 casks cocoa-nut sold at 44s 3d for Ceylon, and Sydney 33s 6d to 36s 6d per cwt.

TALLOW.—Town reduced to 45s. Petersburg declined to 44s 3d and 45s 6d last three months. 1,000 casks Australian by auction went rather lower, and 750 casks sold: mutton, 42s to 43s 9d; beef, 35s 6d to 42s 6d. 249 casks South American were chiefly taken in. A few lots sold at 40s to 42s per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market is easier this week, and medium Titlers have been sold at 48s. Dutch crushed continues steady, sales have been made for first marks at 39s f.o.b. Holland and shipped to London for March at 37s 6d f.o.b. Holland.

ENGLISH WOOL.—Not quite so much demand for English wool, but without any change in prices.

COLONIAL WOOL.—The public sales continue well attended, prices very firm.

FLAX.—Market firm.

HEMP.—Market very dull, and no sales to report during the week.

SILK.—Market quiet. Prices unaltered. Holders firm.

SEEDS.—The seed trade rules quiet, with rather more inquiry for white mustard and canary.

TOBACCO.—The market continues very quiet, and there is very little demand for American tobacco, either for home trade or export purposes. Prices continue without alteration. There has been more inquiry for cigar tabacco, and good growths suitable for substitutes are in demand, for which full prices are obtained.

LEATHER.—The transactions in leather were again restricted on Tuesday at Leadenhall for want of supplies, the articles most scarce and in demand being light crop hides, light English butts, light common dressing hides, shaved hides, bellies, hips, calf skins, and horse hides. Prices of all goods were well supported, and for bellies and calf skins rather higher rates were obtained.

METALS.—The business of the week has again been limited. Copper is very firm in prices of all kinds, although the transactions are few. Iron is steady. Tin is rather easier to buy. Spelter is in fair demand. Lead is well maintained. Tin plates are in good demand.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	45	0
Fat by ditto	2	1
Yellow Russian ditto	45	9
Melted stuff	33	6
Rough stuff	17	0
Greaves	19	0
Good dregs	6	0

Imports for the week, 513 casks.

PROVISIONS.

The flat market of the past week has been followed by a further reduction of 1s per cwt in bacon: prime sizeable Waterford, 64s f.o.b.; heavy, 3s less; Cork and Limerick, 62s, landed; Hambro, 58s. Fine butter scarcer than our last. A small parcel of French arrived on Wednesday, and was soon sold at long prices. No arrival of Friesland, in consequence of the frost in Holland. Fine quality, free from fish, very rare, and worth 168s. Hams, no change in value.

METROPOLITAN CATTLE MARKET.

MONDAY, Feb. 13.—The total imports of foreign stock into London last week amounted to 6,140 head. In the corresponding week in 1870 we received 4,397; in 1869, 3,793; in 1868, 893; and in 1867 8,425 head.

There were short supplies of both beef and mutton on sale here to-day, and though there was a fair proportion of good animals on offer, a large number of the beasts was in rough condition. Notwithstanding the limited arrivals, no change took place in the quotations, which remain as current on Monday last—namely 5s 8d to 5s 10d for prime Scotch heifers. Good Norfolk fed beasts sold at 5s to 5s 8d per 8 lbs. The number of sheep in the pens was small, but fully equal to the demand

which ruled far from active. The best Down and half-bred wethers sold at 5s 10d to 6s per 8 lbs. There were about 300 lambs on sale, which changed hands at about 1s per lb. Calves were dull and drooping in value.

Supplies on Sale	Feb. 14, 1870.	Feb. 13, 1871.
Beasts	2,873	2,460
Sheep	18,180	12,740
Calves	19	95
Pigs	60	100

HOP MARKET.

Borough, Friday, Feb. 17.—The hop market continues to exhibit much firmness. A fair amount of business is passing, and prices are well maintained, more especially for choice qualities, which, owing to their scarcity, realise on some occasions a slight improvement. Mid and East Kent, 40s to 140s; Weald of Kent, 40s to 75s; Sussex, 35s to 70s; Farnham and country, 75s to 112s; olds, 20s to 50s per cwt.

POTATO MARKETS.

Borough and Spitalfields, Friday, Feb. 17.—These markets are again well supplied with potatoes. The demand has been inactive, at about late rates. English regents, 70s to 90s; Scotch regents, 70s to 80s; and rocks, 60s to 70s per ton.

LIVERPOOL MARKETS.

WOOL.

(From our own correspondent.)

Friday, Feb. 17.—There is fair inquiry, but as our market offers very little choice of useful kinds of foreign, transactions are limited, and holders very firm in their demands.

CORN.

(From our own correspondent.)

Friday, Feb. 17.—At this market to-day there was a fair attendance. Wheat was slow, at 2d decline, though there were only few sellers. Flour 6d lower. Indian corn, 35s 9d wanted.

Wakefield, Friday, Feb. 17.—Trade for wheat was quiet at this market to-day, but prices are not lower. Barley was scarce, and 1s dearer. Other sorts were unaltered in value. Beans and other articles sell at late rates.

The Gazette.

Tuesday, February 14.

BANKRUPTS.

Brian Edwin Abery, London lane, Hackney, builder.
William Westlake, late of Stroud, Gloucestershire, tailor.
Rev. Edward Francis Browne, Wrexham, Denbighshire, Roman Catholic priest.
Henry Hardistry, Middleton, Lancashire, leather dresser.
William Hughes, Great Yarmouth, tailor.
John Brown Morris, Gainsborough, grocer.
Hammond Parker, Huddersfield, joiner.
William Brook Smith, Huddersfield, gentleman.

SCOTCH SEQUESTRATIONS.

John Baxter, Chryston, spirit merchant.
William Cochrane Murray, Edinburgh.
William Clark, Easter Golford, Nairnshire, farmer.
Walter Muir and David Muir, Glasgow, contractors.
Sarah M'Ewan, Port Glasgow, spirit dealer.
James Yule, Maryburgh, near Dingwall, merchant.

THE GAZETTE OF LAST NIGHT.

BANKRUPTS.

Frederick Samuel Harvey, Henry street East, St John's Wood, stationer and printer.
Spencer Naylor Dickson, Great Winchester street buildings, Old Broad street, merchant.
William Westlake, Stroud, tailor.
Charles Taylor, John street, Upper Holloway, contractor.

PERRY DAVIS' VEGETABLE

PAIN KILLER.

FOR INTERNAL AND EXTERNAL USE.

DEPOT—17 SOUTHAMPTON ROW, W.C. Price 1s 1½d, 2s 9d, 4s 6d, and 11s per bottle. Inhaler, 2s 6d each.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—
"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

TEETH.—MR WEBB (MANY

years with Mr Eskell, of 5 Grosvenor st., Bond st.) supplies ARTIFICIAL TEETH which cannot be surpassed for use, comfort, appearance, and durability. Painless treatment guaranteed throughout, as with all other operations, at consultations free. Terms moderate. N.B.—Any number of teeth made in two or three hours and repairs effected whilst waiting. At home daily until eight, at 27 New Bond st. His treatise, which is well worthy of perusal, free for two stamps.

MESSRS GABRIEL'S

extraordinary improvements in ARTIFICIAL TEETH and PAINLESS DENTISTRY, Patent No. 542 improved Jan., 1871, afford the following advantages:—

1stly. EXTREME LIGHTNESS (being completely self-supporting), combined with greater efficiency, durability, and comfort, thus avoiding the covering to the palate usually considered an indispensable adjunct to Artificial Teeth.

2ndly. MODERATE CHARGES, accounted for by their extreme simplicity of construction, while the highest class of workmanship and materials only are employed, combined with an experience of half-a-century in these specialities.

3rdly. ABSOLUTE IMMUNITY FROM PAIN, the compound NITROUS OXIDE GAS, after an experience of many years in actual use in hospital and private practice, combining this administration with an absolute certainty, because the gas being not only absolutely free from anything poisonous, but actually possessing properties which, as an imitation of nature (springs being entirely dispensed with), that detection becomes an impossibility.

MESSRS GABRIEL,
61 LUDGATE CITY, and
27 HARLEY ST., CAVENDISH SQ., London.

MESSRS GABRIEL'S
CELEBRATED PREPARATIONS
FOR PRESERVING AND BEAUTIFYING THE TEETH
Are sold by all Chemists and Perfumers in every town.
Price 1s 6d and 5s.

HOLLOWAY'S PILLS—

Comfort and Confidence.—In disordered stomach, torpid liver, impaired digestion, and headache, no medicine ever compounded can be found to compare with these pills. A few doses of them produce comfort, a short continuance with them effects a complete cure. In all cases of dyspepsia, biliousness, or what is more frequently the consequence, a sick headache, these pills will be found a perfect remedy. All bowel complaints, whether of children, females, or the aged, are at once subdued by this mild but searching medicine, which is composed of the balmy essences of the most precious herbs of the field. The purifying powers of these admirable pills are wonderful, and to cleanse, cool, and strengthen the system in any case of fever, ague, or infectious disease, they should be taken daily. Those in a low state, reduced and debilitated by excessive drinking, will find in these pills the genial tonic of which they stand so much in need. Sold by all chemists, and at the establishment of PROFESSOR HOLLOWAY, 244 Strand, London, where advice may be had gratis, daily, between the hours of 11 and 4, or by letter. Numerous testimonials of their value have been received from all parts of the world, and the fact that they are the most effectual remedy for bad legs, bad breasts, bad wounds, and bad sores of every description, is attested by many persons of the highest rank in society. Their searching and healing properties are known throughout the world to be unequalled, as they never fail to cure scurvy, sore heads, ulcers, and skin diseases of every kind, however inveterate. Holloway's Pills are wonderfully efficacious in all complaints incidental to females of all ages, and as a general family medicine are unsurpassed. They are confidently recommended as infallible in the following complaints:—Ague, asthma, bilious complaints, blood impurities, bowel complaints, colds, constipation of the bowels, consumption, debility, dropsy, erysipelas, fevers of all kinds, female irregularities, gout, headache, indigestion, inflammation, jaundice, liver complaints, lumbago, piles, rheumatism, retention of urine, scrofula, sore throats, stone and gravel, tic-doloureux, tumours, ulcers, venereal affections, weakness, worms of all kinds, whatever be their name or nature. Sold by all medicine vendors throughout the civilised world, at 1s 1½d, 2s 9d, 4s 6d, 11s, 22s, and 33s each box or pot.

CREAM OF IRISH WHISKIES,
in quality unrivalled, perfectly pure, and more wholesome than the finest Cognac Brandy.
Note the words—
"KINAHAN'S LL WHISKY,"
on seal, label, and cork.
Wholesale Depôt, 6A Great Titchfield street, Oxford street, W.

DUNVILLE'S OLD IRISH WHISKY,

BELFAST, of same quality as that supplied to the International Exhibition of 1862, Dublin Exhibition of 1865, Paris Exhibition of 1867, and now regularly to the House of Lords, the quality of which is equal to the finest French brandy, may be had direct from Belfast, in butts, hogsheads, quarter-casks, and cases.—Quotations on application to Messrs Dunville and Co., Royal Irish Distilleries, Belfast; or at their London offices, 4 Beaufort buildings, Strand, W.C.

ALLSOPP'S PALE OR BITTER

ALE.—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for their SEASON-BREWED PALE ALE, in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent, and at the Branch Establishments.

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Draught and Bottles, genuine, from all the most respectable Wine and Beer Merchants and Licensed Victuallers, on "ALLSOPP'S PALE ALE" being specially ordered.

DINNEFORD'S FLUID MAGNESIA.

—The medical profession for thirty years have approved of this pure solution of Magnesia as the best remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion; and as the best mild aperient for delicate constitutions, especially adapted for ladies, children, and infants.

DINNEFORD and CO., Chemists, 172 New Bond street, London, and of all other chemists throughout the world.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER

TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Umbilical ditto, 42s and 52s 6d; postage, 1s 10d. Post-office orders to be made payable to John White, Post-office Piccadilly.

NEW PATENT

ELASTIC STOCKINGS, KNEE

CAPS, &c., for VARICOSE VEINS and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS &c. They are porous, light in texture and inexpensive and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 13s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

TO SHIPPERS AND EXPORTERS.

NOTICE.

COMMERCIAL HISTORY AND REVIEW OF 1870. *As part of an early number of the* ECONOMIST, *we shall, in continuation of the Series commenced with* 1863, *issue a Supplement under the above title, containing a careful Digest of the leading Merchants' and Brokers' Circulars in the different branches of Trade, Returns of Prices, Accounts of the Banks of England and France, Appendices relating to special subjects of Mercantile Interest connected with the Year, &c.; the object of the Supplement being to place in possession of our readers a Commercial History of* 1870 *worthy of preservation and adapted for reference.*

This day is Published, No. II., New Series, Price 8d and 8½d,

THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL, for February, gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains a Financial Record of the Month: New Capital Created and Called; Table of Railway Traffic Receipts: Notices and Reports of Stocks, Failures, Railway, Banking, Finance, Insurance, and Miscellaneous Companies; New Companies and New Capital. Prices made up to February 22.

Advertisements for next Number, to be published on April 1, must be sent to insure insertion on or before March 30.

OFFICE—340 Strand.

THE INDEMNITY TO BE PAID BY FRANCE TO PRUSSIA, AND THE TWO WAYS IN WHICH IT WILL AFFECT ENGLAND.

THE indemnity which France has to pay to Germany is, putting it at the smallest probable amount, so large that it is taken completely out of the range of ordinary transactions. No equal sum probably has ever been in the hands of any Government *to use as it liked.* During a war no doubt greater sums than we hope the indemnity to be have been often borrowed. But then the destination of these sums was fixed. The Government borrowed them for the war, and on the war it had to spend them. But now the careful financiers of Berlin will draw an unprecedented sum from the money markets of the world. The way in which they will use that sum is optional; and as much of the money may very likely come from hence, it is very important for us to consider the effect.

The indemnity will affect us in two ways—first, by causing an export of bullion; and next, by causing an export of capital. And we must carefully keep these two operations distinct.

The first effect of so large an international monetary transaction is necessarily to cause a great movement of bullion, which is the international cash. And any such movement necessarily causes a great demand on the English market. Speaking broadly, of late years there have only been two great stores of bullion in the world—that in the Bank of France and that in the Bank of England. Now, though we have not seen any account of the Bank of France since September, yet we cannot be much wrong in assuming that its store of bullion has been much diminished, and that it will not of itself be enough for the indemnity demand. Consequently recourse must be had to this country, *and we shall have to part with our bullion whether we like it or not.* No doubt it is optional with Englishmen to subscribe to the forthcoming French loan. If the indemnity be very large, we hope they will not subscribe to it, since if France be too much burdened, she may incur grave financial difficulty. But our bullion will go, and that to a material extent, whether we subscribe or no. The loan will be taken by great capitalists—by Messrs Rothschild or others—and they have so great a command of securities that they can and will borrow in and take from this market an amount of bullion quite enough to raise the rate of interest.

Very small sums of bullion in comparison with the rumoured amounts of the indemnity will be enough to produce this effect. The only store of bullion practically available is that represented by the *banking* reserve of the Bank of England. In practice, the way to obtain bullion is by the sale of securities, or in some other way, to obtain a large credit in the banking department of the Bank of England, to draw a cheque on that credit, to obtain notes for it, and then obtain bullion for those notes at the Issue department. But if 4 or 5,000,000*l* were at once abstracted from the Bank reserve with a prospect of probable demands, the Bank would raise its rate very considerably, and the general market would follow it.

We may therefore be sure that the first effect of the indemnity will be a great bullion movement, which will cause a momentary rise in the value of money in Lombard street. How far then will that rise be permanent? To answer this fully we must know what the Prussian Government is going to do with the money, and that is exactly what we do not

know. If the bullion so obtained be placed in German banks, and they are free to use it, it will gradually flow back again. The rate of interest at Berlin will be much lower than elsewhere, and the Berlin capitalists will seek foreign investments for their money. As the rate of interest has been suddenly raised in England, these capitalists will probably choose English investments, and so we shall soon get our own bullion back again. But we do not feel sure that the Prussian Government will thus act. Frederick the Great used to like to keep a large store in the precious metals against a day of difficulty. The First Napoleon liked it also, and all great soldiers have a certain dislike to credit, which may fail when you most want it, and a strong partiality for gold and silver, which are sure to buy what you want in bad times as well as in good. Remembering how essentially military is the Berlin Government, and how little enamoured it is likely to be of abstract economical principle, we much suspect that a large sum in bullion may by some means or other be retained. It may be locked up in the Treasury, as in the United States, or the banks with which it is lodged may be fettered in some way, and obliged to keep some of it; and in either case, *our own* bullion will not quickly return to us, and the augmented value of money will continue here longer than it otherwise would.

But any rise in the rate of interest produced by an efflux of bullion is in its nature temporary. It tends to right itself. The rise in the rate of interest brings bullion here from foreign countries, as of late years we have abundantly seen. Even, therefore, if the Prussian Government lock up or retain at Berlin much of the bullion they obtain from us, the rise in money produced by its abstraction will not be permanent, for we shall soon get elsewhere other bullion to take its place.

The effect therefore of the indemnity upon our bullion, and through it upon the money market, will be sharp, but its effect upon our loanable capital, and in consequence upon the money market, will be mild but lasting. By "loanable "capital" we here mean nothing obscure; we only mean the aggregate sums standing to the credit of various persons in the ledgers of bill brokers and bankers. If these persons choose to subscribe to the indemnity loan, a certain sum will be transferred from their credit to that of the agents for the loan in London. If this sum were at once to be removed from the London money market, it would undoubtedly be very great. We are here dealing with very large amounts—suppose 20,000,000*l* or 30,000,000*l*. We can even imagine that a much larger amount might be subscribed if the German terms were moderate, if French credit seemed safe, and if the terms of the loan were tempting. But even these more moderate sums, if abstracted at once from our market, would produce a very grave effect. Money, as we have often shown, is a very delicate article: a very little excess in the supply diminishes the value very much, and a small increase in the demand also augments it very much. A great deal of floating money is held at interest, and therefore must be used somehow or other. When bills or similar securities are few, the holders of such money compete for it very anxiously. On the other hand, when the stock of money is scanty, persons who must discount their bills to pay their own acceptances press for it very greedily. The money market is therefore one of the most sensitive markets; a little change, either in supply or demand, produces an effect which would at first seem most unlikely. If, therefore, even a moderate part of the indemnity loan were subscribed in London, and taken off as a whole immediately to Germany, the effect would be great.

But no such amount is likely to be suddenly abstracted. The agents for the loan here will give short bills for the sums lent, and those bills will be sent to Germany. But at maturity the produce of these bills will not go thither. It would be a bad use of the money. Supposing that, as we have seen, the effect of the bullion transaction will be to drop the rate of interest in Germany below that of England, it would be very unintelligent finance to take the produce of all these bills away from England, where it can be best employed, to Germany, where it cannot be employed so well. And such finance would be very *un*-German. German bankers habitually hold much of their reserve in bills on England, and when money is dear here, they augment both the amount and the duration of such bills. Until therefore the produce of bills given for the indemnity can be profitably employed in Germany, we may be sure it will remain here.

How long this may be we cannot say. We do not know the first element in the question, for we do not know to what use the German Government will put this enormous and sudden windfall. We may be sure that for the moment much of it will swell the resources of the German banks, and that in the way described these banks will continue to lend it to this country. But of more distant prospects we cannot speak positively, so long as we are ignorant of the ultimate destination of the money and of the German financial policy. But probably this augmentation of the capital of Germany will sooner or later be used in aiding German industry, and used in a way in which English capital does not assist it now. Sooner or later, therefore, that capital will, by degrees, be taken from the market, and be invested more or less productively in Germany.

The sum total of the effect therefore will be this—the immediate demand for a considerable sum in bullion will cause an important, though temporary, rise in the value of money here; and besides there will be a permanent tendency in the rate of interest to rise, for Germany will be steadily calling in by instalments the sum which England will owe her for the indemnity, but which for a time she will permit to remain here. And as this constant payment to Germany will be a regular diminution of our means, it will for some time to come tend steadily to augment the value of money.

MR CARDWELL'S SCHEME FOR THE ABOLITION OF PURCHASE.

We differ with those of our contemporaries who approve Mr Cardwell's scheme for the abolition of purchase upon one material point. They underrate the importance of the sacrifice the country is called upon to make. Eight millions sterling is a great sum of money, and we believe, with Mr Osborne, that this sum will be considerably exceeded. All compromises of that kind cost more than the estimate; and although Mr Cardwell quoted poetry to show that soldiers fight for honour and not gain, all experience proves the bitter tenacity with which army officers adhere to the smallest pecuniary right—the unreasonable vexation they display at the smallest menace to an unreasonable perquisite. We may put the cost of the purchase of commissions at 10,000,000*l*, and ten millions would give the country many things it would like to have, even in the military department—would, for example, double the artillery, or pay for fortified camps in the south, or fortify the ports, or make the coast impregnable with a fleet of monitors for shallow water, or construct that great reserve arsenal at Cannock Chase, without which no scheme of defence can be said to be complete. A dead loss of the value of twenty "Captains" is a very great loss to the nation, and to talk of it as a light thing is to introduce a tone of extravagance into the public ideas of expenditure from which we may expect most injurious results.

Nevertheless the Ministry are wise in proposing that even at this cost the system of purchase in the army shall cease. The cause of all the wastefulness and of most of the weakness of our military organisation is the want of persistent and strenuous interest taken in the army by the electors; and this interest cannot be secured so long as that army is officered by a limited and, on the whole, unpopular—though not aristocratic—caste. That caste, in spite of theories, has proved itself very fairly efficient, has worked in a harmony with the civil power quite unusual in armies, and has been decidedly patriotic; but its existence has made the army an object of suspicion to the nation, instead of regard or respect. The desire has been to keep the army down, not because a small army is a security for peace—that would be reasonable—but because the community was suspicious that it might be taxed for the benefits of the cadets of great houses, and rich men's sons anxious for position. That suspicion reacted on the army, which saw in every project of reform an attack upon its perquisites, and in its eagerness to defend them, defended abuses such as the sinecure colonelcies, of which it was itself completely aware. Good organisation is impossible amid distrusts of that kind, and the abolition of purchase became therefore the *sine qua non* of real efficiency.

This argument applies at all times, but the events of late years have added some others of at least equal force. Great Britain has become, half-consciously, much more democratic; and in a democratic country, the standing army cannot long be maintained on a plutocratic footing. The common sense of men revolts too strongly at the idea of

sending men to be killed under the guidance of men who have, as Mr Cardwell frankly admitted, bought their commands at auction; while the instinctive jealousy of democracies revolts at the chance of honour, station, and opportunity of service being thus exclusively confined to the very rich. That may be a weakness, but the perpetual irritation of the weaknesses of a sovereign authority only makes that authority captious, vacillating, and distrustful. There must be some harmony of idea in the institutions of a State, and the army was out of harmony with every other branch of the State service. Then, just as the State had become more democratic, the military needs of the nation had outgrown the power of any caste to supply. A positive necessity had arisen for the employment of large numbers of soldiers, who must be guided by equally large numbers of officers, and by officers trained to the highest point of professional knowledge. No caste was sufficient to form a sufficient reservoir of military capacity. It was indispensable to revert from the wealthy to the nation, and of course if the nation were once invited to enter the arena purchase became impossible. The number of persons who can afford to purchase a commission, to live as men live when the rich set the tone, and to buy their way up pretty rapidly, is limited, the total sum required being little if at all less than 10,000*l*. To ask that amount from the kind of men who crowd into other professions would be useless, and purchase must be abolished in order to deepen the reservoir. It came to this in fact, that if we were to have a national army, a sufficiency of officers, and adequate power to compel officers to work hard, purchase must be abolished, even if abolition cost as much as the Abyssinian War. There was no help for it any more than there was for reconstructing the fleet, or substituting rifles for muskets, or any other indispensable improvement, and the expense became a secondary consideration.

The abolition of purchase having been accepted by the Cabinet, it remained to decide on the time, and on the alternative system to be adopted, and on both points Mr Cardwell displayed, as we conceive, sound judgment. The time fixed was the present. There was no reason for delay—the country is prosperous, the payments must in any case spread over many years, and all political reasons were in favour of the instant adoption of the new system. It will therefore commence at once, all future nominations to commissions being made irrespective of purchase on one of three grounds. A good non-commissioned officer will still have a claim—a rule absolutely essential to give hope and spirit to the rank and file of the army. So will an officer of the militia who has served two years with his corps, the idea being to make service in the stationary army much more attractive than heretofore. But the main claim—the claim by which three-fourths of all officers will enter the army—will be intellectual competence, as proved by success in a competitive examination. That test has no doubt been much denounced, and in some respects it is not perfect, but it is the only alternative to patronage—which Parliament would not establish,—it weeds out fools, it encourages special education, and it turns out, on the whole, both in the English and Indian Civil Services, men of more than average capacity and culture. The commission once gained the cadet will rise to his captaincy by seniority, and thenceforward will be promoted by "selection,"—an invidious method, which is attacked from all sides by the dispensers as well as by the receivers of patronage, but which is nevertheless inevitable. No other mode of appointing to commands ever did or ever will exist in any country in the world. Failure in war is so frightful an event, and men with their lives at stake are so decided in their resolve to be well led, that some system of selection is forced on the Government, even in the teeth of law. For instance, in the strictest seniority service in the world—that of the East India Company—no blind man, or coward, or lame man was ever appointed to command a regiment, an extraordinary institution,—"the Invalids"—being kept up to allow that much of selection without apparent injury to seniority. In the German army again, where a general must, for political reasons, often be a Prince, selection is nevertheless secured in the person of the Adlatus or Staff officer really in command. Selection of some kind is in fact an alternative to defeat: and as it must exist, it is better to acknowledge its existence, more especially as the pressure is certain to tend towards the claim of seniority, and to place the power in the hands of the responsible head of the army, who may have favourites, but who, if carefully chosen, must always desire to see the force under him effective. There will of course be much discussion upon this point, but of those who oppose it no one has ever recommended an alternative. Absolute seniority, besides being entirely inconsistent with the Parliamentary responsibility of the department, as well as with the prerogative of the Monarch, could not be worked without recourse to the Adlatus system. Competition is out of the question, and election within the regiment—conceivable in time of war, and not necessarily ineffective, as is shown by the history of all pirate, brigand, and free-lance bands—would in time of peace result in intolerable abuses. Mr Cardwell has therefore, as we conceive, in his treatment of purchase abolished a practice inconsistent with the necessities of our time, has replaced it by the best method of admission known, and has supported it by the only possible system of promotion.

THE RECENT RAILWAY REPORTS.

A few weeks ago, in an article on the Railway Traffic of last half-year,* we discussed the principal facts derived from the experience of that period—the great increase of traffic, and of the return to the proprietors. Almost all the reports, except those of the companies which close their accounts on the 31st of January, having now been published, it may be useful to return to the subject, and look at some points more closely. The reports, it will be understood, show no essential variation in the position of the companies as we then looked at it. The increase of the gross traffic was a fact already known, and we allowed with some exactness for the deductions necessary to be made on account of increased working expenses and new preference charges, in computing the probable addition to the ordinary dividend. The following is a comparison between the dividends reported on and our estimate:—

Last Half-Year's Railway Dividends.

	Dividend Declared.	Estimate.	Higher than Estimate.	Lower than Estimate.
Great Eastern	1¼	2	...	¾
Great Northern	8½	8½	...	—
Ditto A	10½	10½	...	...
Lancashire and Yorkshire	7	7¼	...	¼
London and North-Western	7¼	7½	...	¼
London and South-Western	5½	5½	...	...
London and Brighton	1½	1½	...	6/
Manchester and Sheffield	2½	2½	...	...
Midland	6¼	6¼	...	...
North-Eastern	8½	8½	¼	...

—the declared dividend corresponding with our estimate in one-half the cases, while the difference is in no case more than 6s per cent. But though the essential facts are not changed, the reports necessarily throw a great deal of new light upon them.

The point for proprietors in connection with the growth of railway traffic is the share of it which becomes available to the ordinary shareholder in the shape of increased dividend. Unless the new revenue is earned at least as cheaply as the old, reckoning both the working expenses and the fixed preference and debenture charges, the increase of gross traffic is no gain to the ordinary shareholder. There is another danger behind—an increase of the ordinary stock; but this mode of adding to the capital of great railways is not very common in comparison with other means, and has had practically very little effect on the recent dividends. We give below, then, one or two tables, showing how the increase of gross revenue turned out last half-year for the benefit of the ordinary shareholder. They show (1) the increase of the gross traffic, and the percentage of increase; (2 and 3) the increase of working expenses and of preference and debenture charges in a similar form; and (4) the increase of the amount paid for dividend, and of the rate of dividend earned. If the increase of gross traffic has been greater in proportion than the increase of working expenses and preference charges, then the shareholders must have received considerable benefit from the improvement. And as the balance of net revenue on which the dividend has to be calculated is usually small in comparison, it might be expected that the increase of the dividend would often be much greater in proportion than the increase of the gross revenue. This is what has happened in reality.

Putting all the ten railways together, we find that the increase of gross revenue has been 5.3 per cent.; but the increase of working expenses has only been 4.7, and of preference and debenture charges 1.7 per cent. On the other hand, the increase of the amount divided has been 9 per cent.

* Economist, Jan. 14, 1871.

—the increase of the rate of dividend having been very nearly the same, so that there has been little addition to the ordinary capital. That increase is from 5*l* 15s 3d to 6*l* 3s 10d, or 8s 7d per cent. per annum, which, as an average, represents a considerable improvement in a single half-year. The reality of this improvement may be shown in a different way by calculating the proportions of the working expenses, preference charges, and dividends to gross traffic. It appears that while the amount of the working expenses has increased, the proportion to the traffic has diminished, as follows:—

	Gross Traffic.	Working Expenses. Amount.	Per Cent. of Traffic.
	£	£	
1869	13,921,000	6,600,000	47·41
1870	14,656,000	6,908,000	47·13
Increase	735,000	308,000	...
Decrease	...	...	0·28

And the debenture and preference charges have diminished in proportion:—

	Debenture and Preference Charges. Amount.	Per Cent. of Traffic.
	£	
1869	4,172,000	29·90
1870	4,244,000	28·96
Increase	72,000	...
Decrease	...	0·94

On the other hand the amount of dividend and its proportion to the gross traffic have both increased:—

	Dividend. Amount.	Per Cent. of Traffic.
	£	
1869	3,331,000	23·93
1870	3,630,000	24·77
Increase	300,000	0·84

The percentage of improvement calculated on the gross revenue is small, but it is the last gains which tell most in a profit and loss account.

Of course the improvement has not been uniform in the case of all the companies. In one or two cases, in fact, the tables hardly show the exact state of matters. The Lancashire and Yorkshire, for instance, shows a less improvement than there really is, owing to the largeness of the balance carried over. The Brighton also shows an improvement smaller than the reality, from the debenture charges including the payment of arrears, not properly a charge on the half-year. And the comparison of the Metropolitan is complicated by the old mistakes in making up the accounts. There are also variations from year to year in certain miscellaneous receipts in the case of other companies. Still, making every allowance, the last table shows some very striking instances of the increased rate of dividend compared with the increase of gross traffic. The most remarkable are—

	Increase of Traffic. Amount.	Per Cent.	Increase of Dividend. Amount.	Per Cent.
	£		£	
Great Eastern	40,429	3·5	31,313	75·0
Great Northern	54,935	4·8	33,524	10·2
London and South-Western	40,320	4·4	19,544	9·5
London and North-Western	156,851	4·4	61,229	5·8
London and Brighton	13,589	1·0	17,099	50·0
North-Eastern	210,067	9·4	100,147	16·2

On the other hand the Midland shows a less proportionate increase of dividend—

	Increase of Traffic. Amount.	Per Cent.	Increase of Dividend. Amount.	Per Cent.
	£		£	
Midland	148,804	8·0	17,585	3·9

Of course the great increase of dividend arises, in one or two instances, especially in the case of the Great Eastern and Brighton lines, from the smallness of the amount which forms the starting point. The *percentage* of increase in these cases is not likely to be so great in future, though the amount should increase. But this remark will not apply to such lines as the North-Eastern, Great Northern, London and South-Western, and London and North-Western, where the dividends are already high. The slightness of the improvement in the case of the Midland is due to the great increase of preference and debenture charges, but this line is in a "state of transition," with a great deal of, as yet, unproductive capital.

The question for investors is whether the improvement is likely to continue, but we can see only one danger—the increase of capital. The companies which are most prosperous find it necessary to increase their capital charges so as to accommodate their new business. There is great danger in such a process of introducing facilities too much ahead of the traffic, and of charging renewals to capital instead of revenue. But with tolerably prudent management, even large additions to the capital ought not to endanger dividends. In all other respects, unless perhaps the expense for repairs and renewals is cut too fine, the prospect seems favourable. The great increase of business recently has been from goods, and not from passengers, showing that the country is doing more business; while of goods, it is "general merchandise" which has improved most. And according to the latest traffic returns, this improvement continues, though not perhaps at quite so great a rate as in 1870.

Railway Traffic and Dividends during Second Half-Year of 1870.

	3,631,384	3,331,520	299,864	9·00	6/ 3/10	5/ 15/3	8/7

* Including surplus lands. The real diminution in the dividend is comparatively little, the greater amount of the former dividends arising from the practice of crediting illegal items to revenue.

MR FORSTER'S BALLOT BILL.

It is obvious that the whole drift of modern politics tends to improve the condition and increase the power of the majority of the people at the expense of what may be called the political standard to be aimed at, and at the expense also of the

methods adopted to attain that standard. Every year we have new provisions for ensuring a certain moderate, not to say humble, standard of welfare for the million at the cost of a higher idea of welfare for those who do not stand in so great a need of help at all. We risk perpetually an almost certain lowering of the political standard of taste and principle in the middle-class for the sake of giving fresh protection to the exercise of political rights by the poorest class. There is no denying that the ballot is a new step in the same direction, and for its purpose probably a very effective step. It is confessedly an abandonment of the position that the exercise of political rights should be courageous and public—should be a public act founded on public motives, and intended to exercise at least as much influence through the medium of opinion as through the political machinery put in force. The ballot claims the right of secrecy for every elector, and of course will more or less diminish, so far as a formal act of the State can diminish, the scorn for secrecy in these matters, the respect for publicity, the social influences favourable to the manly public confession of political views. It will finally sever the exercise of power from the acknowledgement of responsibility. And in so doing it can hardly be doubted that it will not exercise a good influence on those who have stood as it were on the margin between independence and dependence, and have hitherto felt it a duty to profess publicly the opinions to which they give their real support. In the future they will feel that the law sanctions them in making a private affair of their political duties.

On the other hand, there can be no doubt that the effect of the measure on the multitudes who do not pretend to any genuine political independence, will be exceedingly favourable. They will no longer be obliged to vote one way and think another. As far as intimidation goes, we imagine Mr Forster's measure will really go to the root. And as regards even bribery, the temptation to offer bribes will be so vastly diminished by two quite distinct causes,—(1) the inability to tell how the election is going till the close of the poll; and (2) the inability to get proof that the bribee voted for the candidate by whose supporters he is paid,—that we may, at least, feel certain that corrupting influences directed to private individuals will be vastly diminished. Nothing, of course, can very much affect the sort of influence which a rich man gains who subscribes largely to local charities, and is, in other ways, a great benefactor to the district he wishes to represent. But in five cases out of ten it is not even desirable that the influence gained in this way should count for nothing. Of course if all these agencies are set to work purely to gain political support and not at all for the real welfare of the district, it would be desirable that they should fail,—for wealth distributed with such a purpose is pretty sure to do more mischief than good; but it would be impossible to distinguish these cases from the case of men of high local standing and real benevolence who have acted from perfectly pure motives, and who are well entitled to the local influence they thereby gain. The complete secrecy proposed by Mr Forster's Bill will certainly enormously diminish the worst kind of bribery—and the only kind of bribery open to ordinary candidates,—that of private individuals. In almost all corrupt boroughs, indeed, this would be attained to a great extent by the secrecy of the poll itself, even if the votes were afterwards published. The election petitions show that the money spent in these boroughs is almost always spent in the latter part of the day, when the running between the two candidates becomes very close, and the purchase of a few votes will seem to turn the scale in one direction or the other. Indeed the purchaseable voters always hang back expressly to raise their price till the excitement begins to tell on the supporters of the various candidates. With secret voting (even if the result were afterwards published) this *temptation* to corruption would be evaded. It is not till the excitement of the *racing* begins to tell that the money comes forth. With secret voting there will be none of the excitement of the racing till the umpire declares who has won the race, and so the strong competitive spirit of English party politicians—the spirit which leads them into nine out of ten of their peccadilloes—will be no longer appealed to. However, absolute secrecy, and not merely temporary secrecy, is clearly needed to prevent intimidation, and of course it is a very great additional security even against bribery. That men may still bribe, trusting absolutely to the honour of the bribee, is likely enough. But they will certainly be far more chary of their bribes and far more dissatisfied with their very doubtful investments, when they have absolutely no means of knowing that they did not pay enemies instead of friends, than they have hitherto been. Thus, if the object be to do away as completely as possible with the temptation to tempt on the part of the rich, absolute secrecy was absolutely inevitable.

And no doubt a great deal may be said for Mr Forster's principle that as you wish to remove even the suspicion of betrayal, and to do so without puzzling electors, the great majority of whom will be very easily puzzled, you must not adopt an elaborate and ingenious machinery which no one will understand, and had better even risk something in the way of bad votes, than disturb the public confidence in the perfectness of the secrecy. Mr Forster was certainly right to reject elaborate ballot schemes. We are not quite so sure that he was right to reject all means of afterwards checking the votes and striking off bad votes, for under sufficient guarantees it is possible the public might have had really full confidence in the secrecy of the voting, and yet have had the means of knowing, if investigation became necessary, how a particular vote was given. For example, this Bill, though it punishes "personation" very severely—which will probably go a great way in deterring from it—and though it provides for striking off a vote from the poll of any candidate on behalf of whom any one has bribed or induced another man to "personate" an elector,—there is no remedy at all for a case of personation, which is as likely as any, namely when a non-elector, or an elector who had already voted, personates another elector simply on his own account, in order to gain an influence or an extra-influence to which he is not entitled. Suppose John Smith, when he comes to tender his vote, finds that his vote has already been claimed and given by another man, and that there is nothing to prove who this other man is, or that he was the tool of any particular candidate. It becomes simply impossible to strike off his vote, because there is no record for whom his vote was given. And this might, in very populous constituencies, become a real danger, if it is really to be feared that an offence punishable by two years' imprisonment with hard labour, is likely to be committed by many people for the sake of giving a single vote. This is the only point in Mr Forster's Bill which strikes us as doubtful. Personation might grow to a very formidable evil in the populous constituencies, and we doubt if it is worth while to sacrifice all the means of detecting and striking off bad votes, merely for the sake of rendering the secrecy mathematically perfect. Practical secrecy might be adequately guaranteed, even though means were reserved of subsequently ascertaining for which candidate the bad votes had been given. Without pronouncing very confidently on this point, we are disposed to think Mr Forster may have gone too far. For the rest, that his Bill will practically diminish individual bribery enormously, and all but exterminate intimidation, is, we think, all but undeniable.

SAVINGS' BANKS RETURN.

THE following Return shows the amounts received from, and paid to, Savings' Banks, and Post Office Savings' Banks, in the United Kingdom, by the Commissioners for the Reduction of the National Debt, during the four weeks ending Saturday, Feb. 18, 1871:—

	Total Amount received by the Commissioners.	Total Amount paid by the Commissioners.
SAVINGS' BANKS:—	£ s d	£ s d
In money and interest credited	104,873 13 10	56,146 10 7
To transfer certificates from Post Office Savings' Banks to Savings' Banks	611 15 4	...
By transfer certificates from Savings' Banks to Post Office Savings' Banks	...	4,051 9 7
Total	105,485 9 2	60,198 0 2
POST OFFICE SAVINGS' BANKS:—		
In money and interest credited	353,387 6 4	...
To transfer certificates from Savings' Banks to Post Office Savings' Banks	4,051 9 7	...
By transfer certificates from Post Office Savings' Banks to Savings' Banks	...	611 15 4
Total	357,438 15 11	611 15 4

Total amount on Feb. 18, 1871, at the credit of—	£ s d
The fund for the Banks for Savings	37,959,210 15 10
The Post Office Savings' Banks fund	15,376,283 16 7
Total	53,335,494 12 5
Ditto—by last monthly account	52,824,899 2 10

BUSINESS NOTES.

THE FINANCES OF BRAZIL.—An annual circular issued by Mr Nathan, of Rio de Janeiro, quoted by the *Brazil and River Plate Mail* of the 22nd inst., contains an interesting statement of the debt and finances of Brazil. The debt at the close of 1870 was reckoned as follows* :—

	£
Foreign loans	12,796,400
Government stock, 4, 5, and 6 per cent.	25,015,430
Gold bonds	2,939,100
Treasury acceptances	4,258,600
Government notes	15,000,000
Deposits of orphans, absentees, including loan of $700,000 for 50 years at 5½ per cent.	2,396,875
Total	62,400,405
Estimated amount yet to liquidate on account of war	2,000,000
Total in 1870	64,400,405

A debt of 64,000,000*l*, the bulk of which is borrowed at 5 per cent., and a considerable part bears no interest at all, cannot be considered an enormous burden for an empire like Brazil. The latest *budgets*, moreover, show a considerable surplus of ordinary revenue over ordinary expenditure. They show :—

	1870-71. £	1871-72. £
Estimated ordinary revenue	9,410,000	9,580,800
— expenditure	8,232,672	8,574,126
Surplus	1,177,328	1,006,674

The interest, according to this account, cannot exceed a third of the ordinary revenue of the empire, and the large surpluses would indicate great elasticity of resources. That Brazil must have large natural resources in process of rapid development is in truth obvious enough. English trade has a very large stake in the country, and whatever the result may be to English investors, the mines, railways, and other undertakings we have established cannot but be profitable to the Imperial finances. The only drawback to the above picture is the want of authentic statements as to the extraordinary revenue and expenditure, and also as to the last closed account of the Empire. One would like especially to see what was the amount of revenue actually got in in a recent year. It is stated that a large part of the debt was cancelled last year, but it would be interesting to see the means by which this was done. Such an account would hardly be favourable enough to the present time, and the war and the fluctuation in the value of the paper money would cause an apparent diminution of revenue; but no real harm could ensue from the fullest details, since allowance could easily be made for the present more favourable circumstances.

TURKISH FINANCE.—The reports as to the irregularities which are alleged to have occurred in the provision of means for the recent drawings and dividends of the Turkish loans, have been repeated during the week; but the popular impression as to the likelihood of a complete stoppage of payment can hardly be well founded. The entire amount of the drawings and dividends in question is not very large. Since last September, when the siege of Paris interrupted the financial facilities of the Government, the whole drawings and dividends which have become due both in London and Paris—excluding the loan guaranteed by France and England, which need not concern Turkish creditors—have been :—

INTEREST.

	Amount of Debt Outstanding. £		Half-year's Interest. £
6 per cent. 1860 loan	1,700,000	.....	51,000
6 per cent. 1862 loan	6,500,000	.....	195,000
6 per cent. 1863-4 loan	6,650,000	.....	199,500
6 per cent. 1865 loan	5,274,500	.....	158,000
6 per cent. 1865 loan	36,363,636*(?)	.....	907,500
			1,511,000

DRAWINGS.

	Original Issue. £		Amount of Overdue Drawing. %	£
6 per cent. 1858 loan	5,000,000	.....	(1)	50,000
6 per cent. 1860 loan	2,000,000	.....	(½)	10,000
6 per cent. 1862 loan	8,000,000	.....	(1)	80,000
6 per cent. 1864 loan	8,000,000	.....	(1)	80,000
6 per cent. 1865 loan	6,000,000	.....	(1 5/16)	90,000
				310,000

* Original issue.

* Converting milreis into sterling at 24d.

And of these sums by far the largest part has undoubtedly now been met—the only serious hitch, as to the interest of the 5 per cent. loan of 1865, having been quickly got over. The drawings altogether amount only to 310,000*l*, and those due in London have been met. No doubt heavy payments are coming due, viz. :—

			£
Drawing on 6 per cent. 1869 loan		on 1st March	60,000*
Interest	—	1st April	360,000*
—	—	1858 loan, 1st March	127,000
—	—	1854 loan, 10th April	69,000
			616,000

* This is on the calculation that 12,000,000*l* only are in the hands of the public. The entire issue was 22,000,000*l*.

—the reports now chiefly relating to the alleged want of means for the payments on the 1st of March. But with large revenues coming in, the Turkish Government, however much embarrassed, will probably have means to make part payments, or to pay after some little delay, so that the crash of a complete stoppage is not even imminent. Still the possible hitches and delays will have a serious enough effect on the credit of the Government, and the price of its securities in the market.

THE METROPOLITAN DISTRICT RAILWAY STOCK—Some time ago we pointed out a remarkable inconsistency in the quotations of the London, Chatham, and Dover arbitration stocks, the 4½ per cent. debenture stocks being at 82, while the 4½ preference was at 40, and the ordinary at 14. If the latter two stocks were worth anything, the debenture stock should have been at par. The inconsistency has since been rectified in part, but a similar inconsistency would now appear to exist in the case of the Metropolitan District Railway stocks, the market for which is justly excited by the rapid increase of the traffic, and the early prospect of an immense addition to it when the Cannon street station is opened. The quotations this week have been about—

6 per cent. debenture stock	110	112
5 per cent. preference	58	60
Ordinary	28½	29½

And these are not consistent. To pay 3 per cent. on the preference stock, which the line must shortly be expected to do or the quotation would not be maintained, implies a surplus of 45,000*l* *net* revenue after paying the debenture interest; while the high quotation of the ordinary stock indicates an opinion that that stock too will soon get something. In other words, the debentures would be covered over and over again, and being at 6 per cent., should be worth about 140 instead of 110. In any case the debentures are *safer* to improve than the others, since a much less improvement would suffice. A close study of the facts of the line also shows that while there is solid reason to expect a fair surplus after paying the debenture interest, so that there is no doubt about the lowness of the quotation in their case, yet the surplus can hardly be for some time so high as is apparently anticipated, judging by the quotations of the preference and ordinary stocks. The calculation is governed by two facts—the approaching addition of the Cannon street terminus to the number of the company's stations, and the new mode of working the line, to be adopted at the expiration of the agreement with the Metropolitan Railway. These two causes combined, it is expected, will so improve the traffic in a few months, that the surplus of net revenue will pay a good dividend to the preference shareholders, with a prospect of rapid increase. But what will be the exact effect of these changes? First, as regards the opening of Cannon street, we should think that the only likely improvement is that the Metropolitan District trains, remaining about the same in number as at present, will become as profitable as the Metropolitan trains now are. There is no reason to expect an increase in the *number* of trains, for the principal change will be that the Metropolitan District passengers who now go *via* the Metropolitan to Moorgate street will go to Cannon street instead, and clearly they will need no more trains. All may not go, for the Metropolitan will only be a competitor for them as regards High Street Kensington, Gloucester road, and even South Kensington stations; but, on the other hand, a few passengers from purely Metropolitan stations may prefer the route of the Metropolitan District to Cannon street to making the whole journey on the Metropolitan line to Moorgate street. Now the profit on about 500 purely Metropolitan trains per day, excluding those which come upon it from the Great Western, Great Northern, Midland, and London, Chatham and Dover

lines, can hardly exceed 6,500*l* per week. Its whole traffic, taking the average of last half-year, is about 8,700*l*, and estimating that the "foreign" connections are only one-third as profitable as its own, the share of traffic due to its own trains will be as follows:—

	No. of Trains.	Proportion of Traffic. £
Own trains	500	6,500
"Foreign"—(516) = ...	172	2,200
	672	8,700

At this rate the 300 daily trains of the Metropolitan District might yield 3,900*l* per week after the opening of Cannon street station, and this we believe a maximum estimate, for the Metropolitan line is longer, and the fares should, on the whole, be higher than they are on the Metropolitan District. The *second* element in the calculation is the new mode of working—the introduction of trains from the main lines which have connections with the Metropolitan District; but as an immediate source of revenue these trains are not likely to be nearly so valuable as the Metropolitan. The latter supplies a direct route to the City for three great companies which had previously no other railway route—viz., the Great Western, Midland, and Great Northern; but the Metropolitan District offers no such advantage to any. The London and North-Western, which we see promises some trains, has access to the City by the North London line; the Midland and the Great Western have Moorgate street; the Brighton has London bridge; and the South-Western has the Cannon street station of the South-Eastern line, by means of the junction at Waterloo. Considerable districts of the Metropolis, west of the City proper, would be opened out by these Metropolitan District trains; but for every foreign passenger the Metropolitan District will take to the "City" it must compete with an existing railway. These are such very different conditions from those of the foreign traffic of the Metropolitan that for a good while after the new services are started we should doubt very much whether the Metropolitan District will draw a tenth part of the Metropolitan income from this source, or about 220*l* a week. This would make its whole traffic 4,120*l* a week, on which basis we may calculate how the debenture, preference, and ordinary stockholders would stand. The gross revenue per annum would be 214,000*l*, and the net revenue, allowing 45 per cent. for working expenses, would be 117,000*l*. This would yield dividends to the debenture and preference stocks as follows:—

	£
1,250,000*l* debenture stock and loans at 6 per cent...	75,000
[illegible]*l* preference at 2½ per cent.....	37,500
Balance	4,500
	117,000

—which shows that on a most favourable calculation the preference shareholders would get only 2½ or 2¾ per cent., the ordinary shareholders receiving nothing. It is a different question how quickly the Metropolitan District will subsequently improve, but it would take 1,000*l* more traffic per week to pay the preference shareholders in full. In the meantime, as the debentures would be fully covered with only half the increase of traffic above calculated, it will be seen how sure they are to improve, compared with stocks which speculation seems more to favour.

THE COURT OF CHANCERY AND THE INDIAN GOVERNMENT.—Vice-Chancellor Malins gave his judgment last week on the demurrers in the case of the Oriental Inland Steam Navigation Company *v.* the Secretary of State for India—a case in which, it will be remembered, he took what we thought the extraordinary course of recommending the facts to the consideration of the defendant, instead of deciding the question before him. We took occasion to object strongly to the too common practice of Judges to give extrajudicial opinions on cases, and we urged that this course was especially inexpedient where the Government was a party, since the Government has a public duty to perform as well as the Judge, and the one has no business to give advice to the other. The statement of the facts by the Vice-Chancellor, though he repeats his recommendation to the Government, appears to confirm the opportuneness of our objections. We have only an *ex parte* view of the case, for the merits have not been gone into on the demurrer, but the statements are certainly far from conclusive against the Indian Government. The correspondence discloses that the plaintiffs, having a fleet on the Indus, were being beaten in competition by the Scinde Railway Company, which was guaranteed by the Indian Government; that in these circumstances they tried to sell their property to their rivals, which could only be done with the sanction of the Government; and that they at last very nearly succeeded. After some negotiation a letter was obtained from the Secretary of State for India, stating that he "would sanction the purchase at the positive sum of "75,000*l*, if the Bombay Government consider the property "worth that sum;" and about the same date the Secretary of the Scinde Company spoke of having "much pleasure in "arranging the transfer of the vessels and other property on the Indus." The contention of the plaintiffs is that this amounted to a contract, subject to the single point of the value of the property referred to the Bombay Government; and they withdrew from the Indus upon the faith of it, contending now that they are entitled to specific performance because the Bombay Government had never had the question properly referred to it, and reported against the purchase on a different ground. In all this they say there was a breach of faith, and the Vice-Chancellor appears to lean to their view. In support of it it is also stated that the Bombay Government had in their hands reports approving of the proposed purchase. The charges are aggravated by an accusation of oppression against the Scinde Railway, in that they seized the property for a small debt to them while the negotiations were pending, and sold it by auction at an enormous loss. But even in the case as thus strongly put there are weak points, which we submit that a Government, as a trustee for others, must consider. The contract was certainly never formally settled, and we should doubt very much whether even the conditional promise to do so elicited from the Secretary of State so certainly binds him as the Vice-Chancellor assumes. If the agreement was final, why was it not put into shape? and if it was *not* final, and the condition by some accident was not fulfilled, was it to be binding on the Indian Government when it would not have been binding on the plaintiffs? The latter in fact began to act too soon in withdrawing from the Indus, if indeed they were not positively unable to keep up the competition any longer. So far as we can see, the purchase was from the beginning a mistake on the part of the Indian Government, as they did not need the plaintiffs' vessels, and the real charge against them is nothing more than this—that they repented at the last moment. If there is a contract they must be bound by it; but a Government is entitled to every support in reading its engagements strictly, and it is beyond the province of a Judge to speak of the plaintiffs having "claims arising out of these "transactions which cannot be properly disposed of, as "between them and the Indian Government, upon a mere "technical construction, whether there is or is not a contract "which can be enforced in this Court." Governments are but too ready, without such appeals, to yield to personal grievances, forgetting the interests of subjects who are altogether unrepresented.

SHAREHOLDERS' PROXIES AND THE STAMP ACT.—Another oversight, productive of no little inconvenience, has just been discovered in the Consolidating Act of last Session. By the law as it stood before, proxies given by shareholders for attendance and voting at meetings were liable only to a penny stamp, but by the law as altered the proxy must be in favour of one person only if it is to be valid with a penny stamp. In all other cases—that is, if the proxy contains the name of more than one person, which for obvious reasons is the common practice—the paper must bear a 10s stamp. The consequence is that no change having been announced, almost all the proxies presented at the recent meetings of the principal railways were insufficiently stamped; while in a few cases the inconvenience resulting from having proxies with one name only inserted was got over by the somewhat inconvenient plan of alternative proxies. The change seems to have happened in this way. By the old Acts the charge was worded as follows:—

> Letter or power of attorney or proxy to vote at any specified meeting, or adjournment thereof, of a joint-stock company or society, whose stock or funds are divided into shares, and transferable; or at any meeting of the proprietors, members, or contributors to the funds of any institution for education or charity, or of other persons having the control of the affairs of the institution, 1d.

—so that there was no doubt about the duty being one penny only. But by the new Act, the substitution of a 10s stamp

for proxies in favour of more than one person is equally clear. The charge is made under the heading of letters or powers of attorney, and the effective words are as follows :—

Letter or power of attorney, or commission, factory, mandate, or other instrument in the nature thereof :—(1.) For the sole purpose of appointing or authorising *any one person* to vote as a proxy at any one meeting at which votes may be given by proxy, 1d.

... ...

(6.) Of any kind whatsoever not hereinbefore described, 10s.

Here again there is no room for doubt ; and it is plain that instead of a consolidation there has been a change of the law, which certainly was not prominently declared beforehand to the business world. The change, as we have said, produces no little inconvenience, and the amount of revenue concerned being quite inconsiderable, there is no reason why the matter should not be rectified at once.

The Population of the Southern States.—Messrs Neill Brothers and Co., in their weekly cotton circular, give the following details of the recent census in the Southern States of America, to show that the civil war and freedom have not had the effect which was reckoned on in diminishing the negro population of the South. On the contrary, the population has increased. The return is stated to be complete, except as regards South Carolina :—

	No. of C'nties	1860. Coloured, Slaves and Free.	1870. Coloured Free.	Incre'se.	Decre'se
Cotton States—					
Alabama	22	212,000	222,000	10,000	...
Arkansas	58	108,000	120,000	12,000	...
Florida	27	51,000	77,000	26,000	...
Georgia	57	200,000	223,000	23,000	...
Louisiana	9	73,000	60,000	...	13,000
Mississippi	11	89,000	9,000	1,000	...
South Carolina	...	...	...	...	...
Texas	19	25,000	32,000	7,000	...
		758,000	824,000	79,000	13,000
Partially Cotton States—					
North Carolina	65	253,000	258,000	5,000	...
Tennessee	74	189,000	198,000	9,000	...
		442,000	456,000	14,000	...
Other Southern States—					
Kentucky	79	173,000	161,000	...	12,000
Missouri	90	84,000	88,000	4,000	...
Virginia	65	328,000	304,000	...	24,000
West Virginia	39	13,000	11,000	...	2,000
		598,000	564,000	4,000	38,000

Messrs Neill Brothers point out that in the purely cotton States there is an increase of 66,000, or 8¾ per cent. ; in the partially cotton States of North Carolina and Tennessee, an increase of 14,000, or 3¼ per cent. : and in the non-cotton States a decrease of 34,000, or 5¾ per cent. The bearing of such facts on the question of the cotton-producing capacity of the South is obvious. The abundance of labour is a most important element in the quantity and cost of the produce, and the figures of the census throw some light on the unexpectedly large production of the last two seasons in the South.

The International Financial Society.—The address which has just been issued by Mr Hope to the shareholders of the International Financial Society contains not a few remarkable statements. The first is a charge that the usual official report of the last meeting, which has been printed and circulated, is not a correct report ; that most important passages have been interpolated ; and that other important passages, chiefly the statements and questions of shareholders, have been omitted. The second is that, although the Society is deeply interested in the Metropolis Sewage Company, and a possible large loss may be impending, yet, "notwithstanding "the most urgent remonstrances and pressing invitations, Mr "Heath—the chairman both of the International and of the "Sewage Company—*has never visited the scene of any of the "Sewage Company's operations*, while Mr Rate, whose advice, "resulting in the present hostility of the Metropolitan Board "of Works, has been followed throughout, has, during the "whole five years of his management, made *only one short "visit of inspection, upwards of three years ago*. Yet Mr "Heath (*vide* his speech.....) threatens the Metropolitan "Board of Works with extinction if they venture to protect "themselves against the neglect, ignorance, and mismanagement of himself and Mr Rate." There are farther statements, to the effect that the Society is interested in the Sewage Company to the extent of 250,000*l*, and that the management of the affair has been extravagant and injudicious ; and the general conclusion is, that a Committee of Investigation should be appointed to see how the society stands. The matter is of course of direct importance only to the shareholders of the two companies ; but the action of some of the shareholders, and the resistance it meets with,—the directors, besides denying the statements made, objecting to the course proposed, —raise a question which is also of general interest. As a general rule, we should think when such charges are made by a respectable body of shareholders, there is no other course open but a full investigation. The effect of them tends to be prejudicial to the credit of the company, and the shareholders have no other alternative but to have a committee to prove them unfounded ; or if they are well founded, to have the management changed. The mischief is done by the mere statement of the charges, and the fullest investigation will really be beneficial. In the present instance the objections to the management are undoubtedly made by a most respectable body of shareholders. Possibly they are the mere fruit of unfounded suspicion ; but on general grounds we should advise the shareholders, and the shareholders of all other companies in similar circumstances, to assent to the demand for inquiry. As regards one of the charges—the mutilation of the report of last meeting—it would certainly appear that the document issued to the shareholders did not contain a sufficient account of the meeting. The defence of the directors is that it only purports to be a report of the chairman's speech ; but the report ought to be something more, and shareholders would do well to agitate for the circulation of the fullest short-hand reports of the proceedings of general meetings. The danger is that particular shareholders may be "bears" of the company's shares ; but where undertakings are perfectly sound, even the most ill-natured and malicious criticism will be anything but injurious.

Agriculture.

GAME AS PROPERTY.

We have already shown the utter fallacy of the game-preservers' assertion, that the Game Laws operate to prevent trespasses on land other than and besides game-trespasses. Let us now examine the no less absurd fallacy, that the evils of game-preserving are to be cured by enacting game to be the property of the owner (?) or the occupier of land.

This fallacy was enunciated in all its simplicity by Mr Brand, one of the Members for Hertfordshire, at the meeting of the Herts Chamber of Agriculture, to which reference has before been made. Mr Brand said that, "in his opinion, the two great evils (of game-preservation) were—first, the injury done to farming by the excessive preservation of ground-game, and the letting of shootings ; and secondly, the number of convictions arising out of the Game Laws, and the consequent demoralisation of districts where poaching was systematically carried on. *He believed there was a remedy for this.* In many parts poaching is considered to be a venial offence ; the neighbours of a poacher do not look upon him as a common thief,—he has been in prison, it is true, but for poaching ; he has not taken the property of any particular man. Game is not property, and as long as that continues the law you will not convince the poor that poaching is another word for stealing." Now that is a tolerably fair statement of the actual views with respect to game entertained alike by poachers and such of their neighbours who do preserve game, or abet game-preservation. Let us see what is Mr Brand's panacea. "Well, then," he added, "*do not allow this hazy idea of the nature of property in game to continue ;* repeal the Game Laws and make game the property of the occupiers of the land, defining clearly what is game.....Game will then be subject to the same protection as other property is, and punishments for offences against the Game Laws will no longer be given out of proportion in severity to those given for other offences."

This is no new idea, for the suggestion of making game "property" has often been made when the game-preservers and their allies have been driven to a corner in defence of their iniquitous code. But there is one objection to the suggestion being carried out—it is practically impossible. Game wants nearly every quality of "property," that is, so long as it is alive and unconfined. Who can identify the hare, pheasant, or partridge that may be found in a poacher's pocket ? If even the poacher be found on a game-preserver's land with a dead pheasant or hare

in his pocket, who can prove that it was killed on that land? Unless the poacher was actually seen to kill the identical game-creature, there can be no evidence on which any man could be convicted of felony. And although, doubtless, the gamekeeper, finding a man with game on his master's preserve, will often swear he *saw* the game shot, will the jury believe him? But the cases in which it is possible to adduce reliable evidence of the actual killing of particular game-animals must of necessity be very few, and in the absence of such evidence it will be impossible to convict a poacher of "stealing" this newly-created "property." It is, in truth, because men like Mr Brand, who would support the Game Laws in spite of their own better instincts, have a very "hazy" notion of the real, the inherent distinction that exists between the wild animals called game, and the domesticated animals which can be and are properly dealt with as "property." Even domestic creatures nearest akin to game birds, such as poultry, are often very difficult to identify, and convictions for fowl stealing are notoriously most difficult to be obtained. How then could game-animals be identified? In such cases there must always be a doubt, and by the law of England every person accused of stealing "property" is entitled to the benefit of a doubt. Suppose the game-watcher were to see a man shoot an Act-of-Parliament-property pheasant, and immediately give chase, can the watcher say which of several pheasants found in the poacher's pocket was the one so shot? The fact is, that prosecutions for stealing wild game could scarcely ever be carried to conviction.

Neither would any enactment that game be deemed by law "property" in the least degree alter the feelings with which poachers and their neighbours would regard the taking of wild animals. Though the law might call it stealing a hare to catch it in the open field, the offence would still be deemed a venial one, and imprisonment for game "stealing" would be no more of a blot on the working man's character than imprisonment for poaching is now. The distinction between property—ducks, fowls, and the like—and wild game-animals is inherent and ineradicable, and no game-preserver's manipulation of language or law can ever efface it. If game is to be protected by legal enactment it must be by protecting the whole class or classes comprised in that definition, and such enactments must of necessity be stringent, harsh, unjust, and demoralising—in a word, some such code as the existing Game Laws, which everybody excuses or condemns.

Literature.

RAILWAY INTELLIGENCER. January. 1871. Under the Sanction of the Committee of the Stock Exchange. Compiled from Official Returns by MIHILL SLAUGHTER, Secretary of the Share and Loan Department, Stock Exchange. London: Published by the Author, at the Share and Loan Department, Stock Exchange. 1871.

WE have to notice what is now the 16th issue of this most valuable publication, which is so well known and appreciated, however, that it is almost superfluous saying anything in its praise. The present issue contains a great deal of new matter, besides the usual changes in an interval of two years since the last issue. The consolidation of the stocks of several of the principal railway companies has especially caused a great deal of re-writing. The miscellaneous information again includes a careful summary of the new Stamp Act. Throughout the whole work, the care and accuracy which were formerly conspicuous have been maintained. The volume is quite indispensable as a handbook to investors and dealers in railway property on the Stock Exchange, embracing as it does every circumstance affecting the legal position of each description of property, and summarising the facts as to traffic, revenue, &c., to a very recent date.

ON SEATS AND SADDLES, BITS AND BITTING, AND THE PREVENTION AND CURE OF RESTIVENESS IN HORSES. By FRANCIS DWYER, Major of Hussars in the Austrian Service. William Blackwood and Sons.

WE are happy to welcome a second edition of Major Dwyer's excellent treatise on the management of the horse: if the principles so clearly laid down in it were more widely understood, and more generally acted upon, it would be well for both man and beast. The steady seat and light hand that make the safety and pleasure of the most delightful of all exercises are not, indeed, to be attained by the study of theories, however excellent; but the reason why practice is so far from making perfect, why there are people who ride constantly and fearlessly yet never acquire a good seat or become really good riders, may be found in the blank ignorance of the first principles of the art in those who are quite unconscious of their own deficiency. Major Dwyer begins at the root of the matter. He explains the mechanism of the horse, and the problems of equilibrium it and the rider have to solve. Into this matter he enters fully; shows by illustrations the effect of the various modes of sitting, and of the varying position of the reins upon the bearer's head and limbs; how a young horse will strive to preserve its equilibrium under the unaccustomed burden of a rider, by creating for itself a fifth limb in its mouth, "bores" on the rein and is hard-mouthed; how under judicious management it learns the art of balance, dispenses with the help of the reins, and grows soft-mouthed; how the same horse will be tender or hard-mouthed with different riders, according to the excellence or otherwise of their seat—in other words, their power of correct balance. "One rider assumes a seat which favours another, one that seriously impedes the efforts of the horse to get into balance," or worse still. "Supposing the seat, as far as the distribution of weight is concerned, to be identical, the unsteady rider will seek a support for himself on the reins, and the horse immediately bores against this, and becomes a hard puller; while the steady seat makes a light hand and a soft mouth." The methods for attaining a steady seat are then discussed. Major Dwyer lays great stress upon the central position of the saddle, which is too often put forward over the horse's shoulder, and on the stirrups being hung well under the saddle. In general, he considers they are hung much too forward. A central position on the horse and stirrups directly under, "are the conditions under which road-riding may be done safely and agreeably."

We would especially recommend his chapter on Bits and Bitting to the attention of our readers. The cruel severity of ignorant or careless grooms in the use of the bit drives many horses into restiveness. "There is much more in this," writes Major Dwyer, "than most people may be willing to believe. A ship with a damaged rudder is not more awkward and difficult to manage than a horse with a bit that is not perfectly adapted to his mouth and his whole frame, or which has been ill-placed." Sore glands and even blindness frequently follows the use of ill-fitting bits in young horses. Yet it is often asserted that one bit does as well as another, provided it will go into the horse's mouth. For young horses, a good snaffle, centre-jointed, neither too long nor too thin, is the best. Into his management of restiveness in horses we need not enter, but content ourselves with saying that, while it is especially suited for the study of professional riders, amateurs may find in it many profitable instructions and useful hints. He especially insists on the need of gentleness and self-restraint in the management of horses. Brutal breakers-in spoil more horses than they improve by their rude and cruel methods of instruction. "It cannot," says our author, whose experience on such a matter as this enables him to speak with confidence, "be too strongly impressed on the minds of those who undertake to handle restive horses, that very little can be done by main force, nothing at all by cruel or even severe treatment; whereas everything may be fairly hoped for from patience, judgment, and kindness."

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

HAVRE, Feb. 22.

The appointment by the National Assembly of M. Thiers to be chief of the Government—a position to which he was called by the public voice, he being elected not fewer than twenty-three times—has given great satisfaction to all men who wish to see quiet established in this distracted land. With him it is certain that nothing more than is absolutely necessary will be given for the peace that all see must be bought; and that in fact the victors will be less exacting with him than they would be with mere braggarts like Gambetta. With him, too, men see that the new attempt that will have to be made to obtain the great political desideratum of France, "order and liberty," will be inspired by statesmanlike sagacity, and conducted with common sense.

To the present moment we have in this town no authoritative announcement of the conditions of peace presented by the Germans. But so weary are people of the war, that they are ready to accept any that are not absolutely outrageous and insulting. The news that the armistice has been prolonged produces the belief that the negotiations at Versailles have taken a favourable turn.

The extremely Red character of the elections at Paris causes fears to be entertained that agitation and disturbances are destined to be seen there; and these fears are augumented by the fact that an end will soon have to be put to the pleasant life which the working-classes and the rabble have been leading since September last—they, on the shallow pretext of being "defenders of the country," having been clothed, paid, fed, lodged, at the public expense, and doing nothing in return except parading with muskets, and screaming for the Republic. In 1848, the like of these men got up a fearful insurrection, when they were made to understand that they could not permanently be maintained in idleness by the industrious part of the community; and there is no reason to hope that the men of to-day are better or wiser. The prospect of troubles in Paris renders the establishment of the Government and the

Assembly in some other town highly desirable, and the desire is beginning to be extensively expressed in the country. Perhaps Versailles is the best place that could be chosen: it is in one sense a suburb of Paris, and yet is far enough away to be out of the reach of the mob; it can easily be defended by troops, and having formerly been the seat of the Court and the Government, contains buildings that could be utilised for any purpose that might be wanted.

The Ministry of Finance, "in consideration of the fact that circumstances have rendered difficult the payment of calls on the 750,000,000f loan" (that of the Empire), announces that it will abstain from charging the 5 per cent. due for delay, providing the calls in arrear, and that of February, be paid in Paris before the 1st March, and in the departments before the 10th.

A comparison has been made at Paris between the prices of some of the principal securities on 1st July, before war was declared, and on the 8th February, after it was suspended. The Threes are shown to have sustained a depreciation of 30 per cent.; the Four-and-Half of rather more than 24¼; the Credit Mobilier of 41½; the Comptoir d'Escompte, 26½; Credit Foncier; 25½; Bank of France nearly 18¾; the principal railways from about 17 to nearly 36. In investments of an inferior order the decline has been still greater. The total loss amounts to a considerable number of *milliards*.

The issue of the new notes of 20f of the Bank of France has commenced at Paris. They are spoken of in some newspapers as if they were a wonderful invention, destined to be of great public utility. Perhaps that is because they are new, and novelties always please the Parisians. In reality, as 25f notes are in circulation, the need of them is not apparent.

The latest quotations received from the Paris Bourse are as follow:—

The above are for cash.

The London newspapers publish a telegram from Paris, stating that "an important movement of recovery in commercial affairs has taken place in that city." This oddly-worded assertion is probably based on a statement of one of the Paris journals, that "numerous orders for bronze articles have been received from England; for jewellery from Italy and Switzerland; for St Etienne ribbons from Belgium and Holland; and that European traders in the far East have written that they are in pressing need of *articles de Paris*." All this, however—assuming it to be true—does not amount to much.

Tales of financial scandals in connection with the war are cropping up apace, and when things settle down a little a searching investigation into them will have to be made by the National Assembly. From Lyons we hear that when fears were entertained that the city might be invested by the enemy, and that consequently no coal could be obtained for the gas-works, preparations were made for lighting with oil, and that they comprised a purchase of a vast quantity of oil at a third above the market price, and a contract for the supply of wicks sufficient to last for twenty years. In the same city a dealer in second-hand clothes was entrusted with the purchase of horses for the army, and loud complaints were made that the shoes, clothes, gaiters, cartridge boxes, and cooking utensils supplied to the soldiers were of infamous quality—some of them actually falling to pieces on being put into use. From Nantes it is reported that a large quantity of haversacks were purchased at 14f 50c each, when they ought to have been obtained at from 10f to 12f. The comptroller of the artillery workshops of La Buire has denounced to the judicial authorities contractors for supplying gun carriages so bad that they could not resist two minutes' firing. In the department of the Ain 10,000 tin cans were bought at a high price for the Mobilised Guard, and it was found afterwards that they would not hold water. At St Brieux, two contractors for great coats realised a profit of 40,000f out of an order for 140,000f, and having quarrelled about the division of it, appealed to the Law Court to decide between them. In a former letter you were informed that at Havre some carriers had publicly offered to do for 5,000f a day, instead of 11,000f, the carrying required for the army in these parts, and since then another has affirmed that it could be done for less than 2,000f—nay, that he himself actually, for six weeks in the very depth of winter, only charged 1,000f a day for the same work that is now being paid 11,000f. Almost everywhere the uniforms, blankets, shoes, and other articles supplied to Mobiles are represented to be bad. As to shoes in particular, thousands served out in the North had pasteboard soles, whilst many of those distributed to Bourbaki's army had the soles made of a substance so soft that it could be scooped out with the finger nail. Even in the supplies of arms and cannon obtained from the United States grave abuses are said to have been committed.

To these scandals Paris newspapers added another, which would have been very serious if true — namely, that M. Laurier, an advocate who has played a prominent part under the Republic, and who was employed in the negotiation of the 250,000,000f loan at London, had, though no one ever supposed that he was wealthy, purchased the Grand Hotel for 5,000,000f—an absurdly small sum, by the way, for such a splendid building. But M. Laurier, in a letter to provincial journals, affirms that the statement is a silly calumny.

The new Government of M. Thiers has lost no time in setting aside the absurd decree of the Bordeaux delegation, by which the export of oxen, sheep, flour, grain, eggs, and butter was prohibited. The principal object of this measure was to prevent such things being sent from Normandy to England; but the delegation did not see, first, that it would subject Norman farmers to heavy loss by depriving them of their principal market, and, next, that it would provide stores for the Germans to take when they invaded the province.

The prohibition to send coal and cotton from Havre to Rouen has also been removed. It was stated last week that the Rouen Chamber of Commerce had protested most energetically against it. The Municipal Council of Havre, on its part, has passed a resolution declaring that the municipal authorities of their town had nothing to do with it, and that the military alone were responsible for it. This appears to be true. The military entertained the bright idea that without cotton and coal the factory men of Rouen could not be set to work; that without work they would be troublesome to the Prussians, and that consequently the latter would be less able to attack Havre. The military did not perceive that the closing of Rouen against coal, cotton, and other products in which Havre deals was a dead loss to Havre; and that if it had long continued, the trade of the town would have been diverted to another channel. Perhaps even if they had perceived this it would have had no effect on them.

The heavy expenses which municipalities have had to incur for equipping and arming Mobile Guards, and for other war purposes, have been provided either by credit or by loans. The practical result of both was of course destined to be increased taxation; and in several places, among them Havre, the payment of augmented taxes is now beginning to be demanded. The Governmental imposts will of course have to be increased as well as the local ones; and with the two the French will find that in the future they will have to suffer in pocket, as in the past they have done from slaughter and devastation. The lesson they have received is a terrible one, but if it cures them of war for ever it will be worth its price.

In consequence of the loud complaints made by the populations of Normandy, against the imposition of new war contributions, notwithstanding the armistice—impositions in some places so excessive that it was not possible to pay them—and in consequences of representations made to Count Bismarck, the Prussians have consented in some cases to suspend the payment, in others to reduce the amount. But the French hold that, under the armistice, they are contrary to the usages of war, and think that restitution ought to be made of those exacted. Even at Honfleur, within the last few days a sum of 500,000f was demanded, and yet the Prussians never occupied that town. On the remonstrances of the French commander of the district, they said that payment might be withheld until they could obtain orders from Versailles. If they can tax Honfleur, there is no reason why they should not make Havre pay.

The Havre branch of the Bank of France announces from to-morrow the payment of the dividend of 30f declared for the second half of 1870. In several other branches the payment was effected last month.

The expectation that Paris would be freely opened has not been realised. To go there from this part of the country, it is necessary to get a written permission from the French local authorities, and another from the Prussian General Commanding at Rouen. The first one is granted readily enough, but the second is frequently refused without reason assigned. When both are secured, the holder is exposed to the risk of being delayed or turned back at St Denis, a few miles from the capital; and with both he is not allowed to have any other luggage than what he can carry in his hand. In consequence of these vexatious measures, a great many persons belonging to Paris, though anxious to return, have been obliged to prolong their stay in the country; and many mercantile men,

having occasion to go to the capital, have been subjected to serious inconvenience.

In the Havre market confidence is beginning to revive, and transactions have been more active. Of the latter all are not recorded, but among those made public since last report are the following:—

COTTON.—At the weekly meeting of brokers on Friday, the 17th, the quotations were nominally fixed: New Orleans very ordinary, 102f the 50 kilogs; Oomrawuttee good ordinary, 83f; Tinnevelly ditto, 80f; Madras ditto, 74f. The sales have been 1,167 bales.

COFFEE.—200 sacks Santos, 110f, duty paid, the 50 kilogs; 50 Rio washed, 112f; 35 Mysore, 112f; 100 Gonaives, 70f (in bond); 250 St Marc, 72f 50c; 100 Malabar, 115f; 476 Haiti, 112f 50c and 108f; 400 ditto, 104f; 980 Maracaibo, 110f; 210 bags Ceylon, 85f.

TALLOW.—25 demi-pipes La Plata sheep, 54f 50c the 50 kilogs, duty paid; 50 demi-pipes Monte Video saladeros ox, 56f; 25 pipes ditto, 55f 50c.

WOOL.—43 bales La Plata unwashed, 180f the 100 kilogs.

At *Bordeaux*, within the last few days, in COFFEE some Guadeloupe bonifieur has been sold at 157f 50c; 227 sacks Mysore, 120f; 515 Guatemala at prices not stated. In INDIGO 29 chests Kurpah have been taken.

THE PUBLIC REVENUE AND EXPENDITURE.

Increase	1,193,471	...	162,999	...	1,356,470

The other receipts to date were 5,000*l*, the other payments were 150,000*l*.

COMMERCIAL AND MISCELLANEOUS NEWS.

The Right Honourable the Lords of the Committee of Privy Council for Trade have received from the Secretary of State for Foreign Affairs a copy of a despatch from Her Majesty's Minister at Washington, transmitting a copy of the rules and regulations prescribed by the Secretary of the United States' Treasury under the Act of July, 1870, providing that merchandise imported at certain ports of the United States, and destined for certain other ports of the United States, may be immediately transported to such other ports. These rules can be inspected on application to the Commercial Department, Board of Trade, Whitehall gardens.

The returns of agricultural statistics in Ireland, which have now been published, state that the statistics were collected by the police from 600,000 separate holdings. The total acreage under all crops last year was 5,642,556 acres, being an increase over the preceding year of 64,776 acres. Compared with 1860, wheat shows a decrease of 19,546 acres, and oats of 36,476 acres. In barley there is an increase of 19,242, in bere and rye of 781, and in beans and peas of 760 acres. Green crops show an increase of 29,457 acres, the largest amount being in the extent under turnips, which increased last year by 16,987 acres. There is an increase in the extent under meadow and clover of 104,119 acres, and a decrease in flax of 34,459 acres. The returns of live stock for 1870, when compared with 1869, show an increase in the number of horses of 3,105, of cattle, 62,795; and of pigs, 377,108. Sheep exhibit a decrease of 317,211.

The advices from Buenos Ayres by the present mail reach to the 15th of January, and are favourable regarding the prospect of an early suppression of the insurrection in Entre Rios. Immigration from the continent of Europe continued on a large scale, and a great influx from France was reported to be likely on the termination of the war. The experiments with the agricultural machines forwarded from England and America for the Cordova Exhibition were attracting attention. The extension of telegraphic communication was likewise a subject of active interest, and it is hoped that a complete line from Buenos Ayres to Chili, across the Andes, will be in operation by the end of the present year. Mr Bateman, C.E., had sent in his report concerning the proposed port for Buenos Ayres, and it was understood the cost would be about 2,500,000*l*. with the result of saving 1,000,000*l* per annum to the trade of the place. A review in the Buenos Ayres *Standard* of the progress of the country during the past ten years embodies some striking facts. In 1860 there were only 15 miles of railway in the whole of the Argentine Republic; now there are 472 miles in operation, and 746 in course of construction. The only steam communication with Europe at that date was by the Royal Mail line; now there are nine lines. At the same time land near the city of Buenos Ayres has risen from 20*l* per cuadra (four acres) to 1,000*l*. The letters and papers passing through the Post Office have increased from 400,000 to 4,000,000; the produce of the wool, sheepskins, and tallow of Buenos Ayres, which was 1,156,000*l* in 1860, was last year 5,037,000*l*; and the immigration, which was then 6,000 in the twelve months, was last year 40,000, while the Custom-house revenue of Buenos Ayres alone has advanced from 600,000*l* to 2,400,000*l*. Finally it is remarked:—"In 1860 there was not a single British or other foreign enterprise of note in the Republic," and that at this moment there are "20 English companies, with an aggregate capital of more than ten millions sterling in railways, steamers, tramways, mining speculation, new colonies, &c."

The annual statistics of the commerce of New York just made up show that the importations of foreign goods during 1870 amounted to 63,000,000*l*, being 1,700,000*l* in excess of those of the previous year, which, with the exception of 1866, were larger than on any former occasion. Of this total, which represents cost value exclusive of freight and duty, about one-third consisted of what are termed dry goods—manufactures of cotton, linen, silk, wool, &c., and the remainder of general merchandise, such as sugar, tea, coffee, spirits, spices, china, glass, metals, drugs, fruits, seeds, &c. The specie shipments from New York during the year were 11,600,000*l*, against 6,400,000*l* in 1869. New York imports about two-thirds of all the goods landed in the United States, and exports about 40 per cent. of all that are shipped.

The returns of the Census of the United States for 1870 have been all received at Washington, and the enumeration has been completed sufficiently to show the total population of the country as compared with the total shown by the Census of 1860. There are now 37 States, while in 1860 there were 34, the additional States now having been Territories then.

Total population of the United States .....31,445,080 ...38,535,153

There is no enumeration of the wild Indian tribes of the West or of those in the Indian territory. Nebraska in 1860 (then a territory) contained a portion of the present territory of Dakota.

Mr J. R. Scott, the Registrar of the London coal market, has published the following statistics of imports and exports of coal into and from the port and district of London, by sea, railway, and canal, during January, 1871:—

IMPORTS.

By Sea.	Ships.	Tons.
Newcastle	230	150,029
Seaham	21	5,937
Sunderland	123	73,053
Middlesborough	12	6,306
Hartlepool	72	28,656
Scotch	20	7,767
Welsh	3	902
Yorkshire	25	3,466
Small coal	1	526
Cinders	6	638
Total	516	277,330
Imports during Jan., '70	660	320,526
Decrease in the present year	144	43,196

By Railway and Canal.	Tons.	cwt.
London and North-Western	78,258	17
Great Northern	108,612	0
Great Western	32,109	0
Midland	90,306	0
Great Eastern	40,874	11
South-Western	1,952	13
London, Chatham, and Dover	1,115	0
South-Eastern	1,072	13
Grand Junction Canal	163	15
Total	354,464	9
Imports during Jan., 1870	340,357	11
Increase in the present year	14,106	18

Export list, showing the distribution of coal imported into the port or district of London by sea, rail, and canal, and afterwards exported coastwise or to foreign parts, or sent beyond limits of London district, by rail or inland navigation, during January, 1871:—

EXPORTS.

1. Railway-borne coal passing "in transitu" through district ..... tons		40,750
2. Sea-borne coal exported to British Possessions, or to foreign parts, or to the coast ..... tons	43,324	
Ditto sent beyond limits by railway	6,884	
Ditto by canal and inland navigation	3,611	
		53,619
3. Railway-borne coal exported to British Possessions, or to foreign parts, or to the coast	13,795	
Ditto by canal and inland navigation	299	
		14,094
4. Sea-borne coal brought into port and exported in same ship		561
Total quantity of coal conveyed beyond limits of coal duty district during January, 1871		109,024
Ditto, January, 1870		97,575

Subjoined are the returns of the Irish banks of issue for the four weeks ending the 28th ult.:—

Name and Title as set forth in Licence.	Circulation authorised by certificate.	Average circulation during Four Weeks ending as above. 5*l* and upwards.	Under 5*l*.	Total.
	£	£	£	£
The Bank of Ireland	3,738,428	1,806,100	1,341,925	3,148,025

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 22nd day of February, 1871.

ISSUE DEPARTMENT.

	£		£
Notes issued	36,101,000	Government Debt	11,015,100
		Other Securities	3,984,900
		Gold Coin and Bullion	21,101,000
		Silver Bullion	...
	36,101,000		36,101,000

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities	12,915,011
Rest	3,383,727	Other Securities	20,261,146
Public Deposits, including Exchequer, Savings' Banks, Commissioners of National Debt, and Dividend Accounts	8,577,521	Notes	13,017,950
Other Deposits	19,741,451	Gold and Silver Coin	760,793
Seven-day and other Bills	699,201		
	46,954,900		46,954,900

G. FORBES, Chief Cashier.

Dated the 23rd February, 1871.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	23,782,251	Securities	33,623,157
Public Deposits	8,577,521	Coin and Bullion	21,861,793
Private Deposits	19,741,451		
	52,101,223		55,484,950

The balance of Assets above Liabilities being 3,383,727*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

	Increase. £	Decrease. £
Circulation	...	153,050
Public Deposits	836,975	...
Other Deposits	811,379	...
Government Securities	...	...
Other Securities	1,532,380	...
Bullion	..	23,297
Rest	13,779	...
Reserve	109,718	...

The following is the official return of the cheques and bills cleared at the Bankers' Clearing-house:—

	Week ending Feb. 22, 1871. £	Week ending Feb. 15, 1871. £	Week ending Feb. 23, 1870. £
Thursday	11,303,000	10,076,000	9,566,000
Friday	13,204,000	24,304,000	10,120,000
Saturday	13,150,000	16,676,000	12,424,000
Monday	10,293,000	13,465,000	8,946,000
Tuesday	12,073,000	13,365,000	9,783,000
Wednesday	11,384,000	12,830,000	9,879,000
Total	71,407,000	90,716,000	60,718,000

JOHN C. POCOCK, Deputy-Inspector.

Bankers' Clearing-house, Feb. 23, 1870.

The total since the 4th of January, 1871, is 548,079,000*l*, compared with 545,229,000*l* for the corresponding period last year, showing an increase of 2,850,000*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during

a period of four years, corresponding with the present date, as well as ten years back, viz. :—

At corresponding date with the present week.	Feb. 27, 1861.	Feb. 26, 1866.	Feb. 24, 1869.	Feb. 23, 1870.	Feb. 22, 1871
Circulation, including bank post bills	£ 20.104.589	£ 23.686.244	£ 23.252.346	£ 22.733.974	£ 23,782,251

Clearing-house return	...	54.046.000	58.230.000	60.718.000	71,407.000

In 1861, the rate of interest was still maintained at the high figure to which it was suddenly raised a fortnight before. Great caution was being exercised in the open market, apprehensions still prevailing with respect to America, and the results of the bad harvest of last season. In politics the American secession was more and more occupying attention.

In 1868, the reaction which followed 1866 had not yet worn off, and there was even less hopefulness than there existed a week or two before. In politics the events were the succession of Mr Disraeli to Lord Derby as Premier, and the impeachment of President Johnson.

In 1869, money was at 3 per cent. with little doing, the activity manifested a week or two previously having rather fallen off.

In 1870, the money market was comparatively inactive. The accounts of the revenue were most flourishing, and a large surplus was expected.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 8,460,177*l*; in 1868, an excess of 3,609,881*l*; in 1869, an excess of 1,161,117*l*; and in 1870, a deficiency of 1,307,558*l*. In 1871, there is a deficiency of 519,695*l*.

Discount and Money Market.—There has again been a good demand for money this week, both in the open market and at the Bank; and the rates which we quoted last week are firmly maintained. On Thursday only was there rather more ease, but to-day there has again been a fair demand, especially at the Bank. The business of the latter establishment has lately increased very much, the "other securities" being now 20,261,000*l*, or 4,098,000*l* more than they were a month ago, and the increase in the last fortnight being about 3,000,000*l*. The reserve, however, is still very strong, though the withdrawal of 240,000*l* for the continent to-day is another sign of the operation of causes which may soon diminish the store. The firmness of the terms current in the open market has likewise been maintained to-day by rather an active demand for money on the Stock Exchange for the Brazilian loan, and also in preparation for next week's settlements. The prevailing expectation still is of an increased demand for money, but this is always in view of peace being arrived at—the alarming telegrams of this afternoon not shaking the opinion that the conclusion of peace is the contingency to be provided for.

Among the changes in the Bank returns for the week are an increase of 1,532,000*l* in other securities, and of 108,000*l* in the reserve. The withdrawals of bullion on balance for the week amount to 23,000*l*, but as we have already stated, there has been a more serious withdrawal for the continent to-day of 240,000*l*.

We subjoin our usual quotations for mercantile paper having various periods to run :—

Bank bills—2 months	2¼		per cent.
Do 3 —	2½		per cent.
Do 4 —	3¼		per cent.
Do 6 —	3½		per cent.
Trade bills—2 months	2¾		per cent.
Do 3 —	3		per cent.
Do 4 —	3¼	3½	per cent.
Do 6 —	4	4½	per cent.

The allowance for deposits at the joint stock banks and discount houses is as follows :—

Joint Stock Banks at call	1½ per cent.
Discount houses at call	1½ per cent.
Do with seven days' notice	1¾ per cent.
Do fourteen days	2 per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent. 1870.	1871.	Open Market, per Cent. 1870.	1871.
Paris	2½	6	2	...
Vienna	5	6	5	5
Berlin	4	4½	3¼ ¾	3½ ¾
Frankfort	3½	4½	2½	3½ ½
Amsterdam	4½	3½	4½	3
Turin	5	6	5	6
Brussels	2½	4	2¼	3½ ½
Madrid	5	5	5	...
Hamburg	...	...	3	3½ ¾
St Petersburg	5	8	4½	7

The tendency of the continental rates has been rather downward for the last fortnight, and the Bank of Berlin in particular lowered its rate this week ½ per cent.; but the feeling in the market here continues entirely different.

English Government Stocks.—Until to-day the tendency in the stock markets this week was generally towards improvement, the favourable reports respecting peace, coupled with the continued accumulation of money, which seems as yet to have more than kept pace with the apprehensions of an increasing demand, disposing speculators, and to some slight extent investors, to take a more sanguine view of the immediate future. The home railway market was also firm, from causes which we have frequently referred to as likely to strengthen it notwithstanding dearer money; and the firmness of this market of course helped to improve the others. This afternoon, however, on the receipt of telegrams from Versailles to the effect that there was a hitch in the negotiations, especially as respects the indemnity—that the French negotiators wanted more time, and that the Germans, refusing to concede it, were making active preparations for a renewal of the war on the 27th—what was nearly a panic occurred, especially in the foreign department, the sales, it was stated, being chiefly on German account.

The greatest want of animation shown in any department in the earlier part of the week was in English Government securities, which only slightly changed. The fear of course is that in the event of peace and dearer money, such securities as have been held as reserves, or by timid foreign capitalists, will be largely sold; but the great scarcity of stock, on the other hand, tended to maintain the price. To-day, on the receipt of the unfavourable news as to the state of the peace negotiations, Consols were most unfavourably affected, the quotation falling at once to 91¾ ⅞, with little tendency to rally. What has been most operative is not the fear that peace will not be concluded at all, but the impression that the Germans will be most severe—that the payment of the indemnity will cause all the greater difficulty and disturbance, and that, after all, we shall only begin another period of armed peace.

Subjoined is a list of the highest and lowest prices of Consols every day :—

CONSOLS.

	Money. Lowest.	Highest.	Account. Lowest.	Highest.	Exchequer Bills. March.	June.
Saturday	91¾	92	91¾	92	4s pm	8s pm
Monday	91¾	92¼	91¾	92¼	3s pm	8s pm
Tuesday	91¾	92	91¾	92	3s pm	8s pm
Wednesday	91¾	92¼	91¾	92¼	4s pm	9s pm
Thursday	91¾	92¼	91¾	92¼	4s pm	8s pm
Friday	91¾	92	91¾	92	4s pm	7s pm

The following are the changes for the week, taking the latest unofficial prices for quotation :—

Ditto New 5 %	101¼ 2½	101¼ 2½	... ...

Foreign Government Securities.—In the beginning of the week foreign securities were comparatively inactive, but after Tuesday, when the prospects of peace improved, there was a general rally. The French National Defence loan espe-

cially improved, the rise on Thursday being 2⅛, but Egyptian, Turkish, Italian, Argentine, and Russian all advanced. The German loan also improved. This improved tone of the markets was hardly affected on Thursday by the issue of a new Brazilian 5 per cent. loan for 3,000,000*l*, the amount being too small in comparison to cause any immediate difference. Brazilians of 1865 fell ¾, but such a decline was to be looked for in consequence of the new issue being fixed at the comparatively low figure of 89 (really 88)—a price of course which ensures the success of the loan itself. To-day, however, the improvement was suddenly checked in the afternoon by the receipt of the Versailles telegrams, to which we have already referred. The French loan fell at once nearly 2 from the highest figure it had reached, and the German loan, Turks, Egyptian, Italian, and almost all foreign stocks receded in sympathy. Whatever happens, the apparent severity of the German terms cannot but have an unfavourable effect on all continental securities. The peace, if the French submit to it, will not be very stable, and the mere weight of the indemnity will entirely prevent France from lending that assistance to certain foreign Governments on which they have hitherto reckoned. Such securities, therefore, as have been largely held in France are likely to be weak, whether we have peace or war, since the kind of peace that now appears likely will have the same effect on them as war. Notwithstanding the panic feeling of the afternoon, the closing prices are still rather higher, as a rule, than those of last week.

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.
Argentine 6 %	90⅜ 1½	.....	90½ 1	— ½
Brazilian 5 % 1865	94 ½	.....	93¾ 4½	— ¾

The prospectus of the Brazilian loan, which has just been issued by Messrs N. M. Rothschild and Sons, states that it is authorised in conformity with the Law, No. 1,764, of 28th June, 1870. It is for 3,000,000*l* sterling, in bonds to bearer of 100*l*, 500*l*, and 1,000*l* each, carrying interest from 1st February, 1871, at 5 per cent. per annum, and the coupons payable half-yearly in London on 1st February and 1st August—the first being due on the 1st Aug. next. The price of issue is 89, payable by instalments, terminating on the 21st of August next, making the real price of issue, allowing for interest, about 88. There is to be a sinking fund of 1 per cent., commencing on 1st Feb., 1873, to be applied by purchases in the market when the bonds are under par, and when at or above par, by drawings by lots. The list will close on or before Wednesday next. The quotation on Thursday was 1⅛ to 1¼ prem., and to-day it is

English Railway Stocks. — In the absence of any externally unfavourable cause affecting all the markets, English railways greatly improved this week, principally from causes which are likely to continue for some time in operation. These are the favourable traffic returns, showing a steady advance in the productiveness of railway property, while the quotations of the principal stocks are still at a price which, with last year's dividends only, would yield investors a very good return. As will be seen below, the traffic returns this week are the best of the present year. The announcement of the Great Western dividend of 3¾ per cent. had also a favourable effect on the markets for the moment, a sharp rise taking place in Great Western stock—from 73⅛ ⅜ to 77⅛ ⅜ between Monday and Thursday—but the generality and firmness of the improvement could not have been due to this cause. The rise on Wednesday and Thursday amounted in Great Northern to 2, Great Northern A 1¾, Midland 1¼, North Eastern ¾, and London and North Western ½. To-day the market, especially in the afternoon, has been a little weaker, partly in consequence of realisations, and partly in sympathy with the depression in the foreign department; but the effect of these adverse influences has nevertheless been very slight, and the improvements we have already noticed are substantially maintained.

Great Northern to-day have been additionally firmer, in consequence of a report that an agreement has been come to with the Midland Company respecting the coal traffic.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices :—

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted, for the week ending February 18, to 670,626*l*, being an increase of 61,247*l* on the corresponding week of the previous year. The aggregate for the current half-year now is 3,966,929*l*, an increase of 173,064*l* on the corresponding period of last year. The principal increases for the week are—London and North-Western, 8,178*l*; North-Eastern, 6,987*l*; Great Western, 7,601*l*; Midland, 5,640*l*; Lancashire and Yorkshire, 4,536*l*; London and South-Western, 4,429*l*; South-Eastern, 4,099*l*; and Brighton, 3,644*l*. The great increase in the southern lines is no doubt the first effect of the re-opening of the communications with France :—

* The aggregate in the case of these companies is reckoned from the 1st of February, 1870.

Subscriptions have been invited this week for 108,000*l*, being the unissued balance of 160,000*l* perpetual 5 per cent. debenture stock of the Somerset and Dorset Railway, at the price of 95½. The prospectus states that the stock at the issue price will pay 5¼ per cent., and that the amount required to pay the half-yearly interest on the stock is 4,000*l*, while the net revenue last half-year was 9,174*l*, and for the whole year 16,615*l*; so that the margin, after paying the debenture interest, is equal to the amount of that interest.

Messrs Field, Wood, and Haynes are authorised by the contractor to receive applications for 235,000*l* (part of 260,700*l*) ordinary stock of the Devon and Somerset Railway, in 2,350 certificates of 100*l* stock each certificate. The price of the stock now offered is 38*l* for each certificate of 100*l* stock, payable as follows:—8*l* on each certificate applied for, payable on application; 10*l* on each certificate applied for, payable on allotment; 10*l* on each certificate applied for, payable 1st May, 1871; 10*l* on each certificate applied for, payable 1st July, 1871. 3 per cent. per annum on the stock—equal to 8*l* per cent. per annum on the amount invested—is guaranteed for 5 years, from 31st January last to 31st January, 1876. To insure payment, the necessary amount will be invested in Consols in the names of trustees, and the interest will be payable half-yearly on 31st July and 31st January in each year, at the National Provincial Bank of England, London. The first half-yearly payment will be made on the 31st July next. Reckoning the accrued interest and the discount for prepayment, the net cost of each certificate of 100*l* stock is reduced to 37*l* 10s.

Foreign and Colonial Railways.—We subjoin our usual list of the changes for the week:—

American Securities.—There is little change to notice in this department, in which only a moderate business has been transacted to-day. The reception of the Fenian exiles by President Grant, as announced by telegraph to-day, was regarded as a mere election intrigue, and had no effect upon the market. Prices have been well maintained, as will be seen from the statement below.

With regard to the announcement that the American Secretary of the Treasury will offer the new loan for refunding the 5-20 debt early in March, Messrs Jay, Cooke, McCulloch, and Co., in their last weekly circular, state:—

The loan will comprise the following classes of bonds, in the amounts specified:—

$	
500,000,000	of 5 per Cents., payable at the option of the United States after 10 years.
300,000,000	of 4½ per Cents., payable at the option of the United States after 15 years.
700,000,000	of 4 per Cents., payable at the option of the United States after 30 years.

Principal and interest to be payable in coin of the United States, and interest quarterly. Registered bonds will be issued in denominations of $50, $100, $500, $1,000, $5,000, and $10,000, and coupon bonds in $50's, $100's, $500's, and $1,000's. The bonds and the interest thereon are exempted by law from all taxes or dues of the United States, and from taxation in any form under State, municipal, or local authority. Subscribers to the loan will have preference in the following order:—1, Subscribers for equal amounts of each class of bonds; 2, Subscribers for equal amounts of the 5 per Cent. bonds and the 4½ per Cent. bonds; and 3, Subscribers for the 5 per Cents. The bonds will be offered at par in gold, and a deposit of 2 per cent. will be required on subscription; or bonds known as Five-Twenties may be given in exchange at par. The coin received in payment will be applied to the redemption of Five-Twenties. The loan will be opened on the 6th proximo, in the United States and Europe, through agents whose names will be hereafter made known. From the reception with which the announcement has met, there is every reason to expect that a large proportion of the 5 per cent. and 4½ per cent. loans will be readily negotiated. Whether it may be the purpose of the Treasury to influence the market, so as to equalise the price of bonds with the premium on gold, or to leave the loan to make its way upon its intrinsic merits, does not yet appear; but, in either case, a large measure of success seems to be reasonably certain, alike from the nature of the loan, and the public favour with which its announcement has met.

Joint Stock Banks.—The dealings in joint stock bank shares have not been extensive, but a firm tone has prevailed throughout, and the movements in the quotations have chiefly been of a favourable character. Union Bank shares have advanced 1½; Australasia, and Hong Kong and Shanghai 1; London and County, Joint Stock, Westminster, and Oriental ½; Agra ¼. On the other hand, British Columbia, and English, Scottish, and Australian are ½, and New South Wales 1 lower.

Telegraph Shares.—This department has ruled steady throughout the week, and the transactions have been on a more important scale than for some time past. The only adverse changes on the week are—a decline of ½ in British India Submarine, and of ¼ in Great Northern. Anglo-Mediterranean shares shows a further rise of 3; British Australian have advanced ¼; British Indian Extension ⅛; China Submarine ½; and Marseilles and Algiers ½. Telegraph Construction shares are ½ better, and Hooper's ½. Silver's India Rubber shares show no change on the week.

Mines.—Some important changes have taken place in the quotations for British mines, the market for which has been somewhat excited. Wheal Basset and New Seton have advanced about 15; Grenville, North Wheal Crofty, and Tin Croft are ½ better; but West Chiverton has declined 4, Wheal Seton 2, and Great Wheal Vor ½. The only changes worthy of note in foreign mining shares are—a rise of 1 in United Mexican, and a decline of ½ in Eberhardts.

Miscellaneous.—The dealings in this department have been much restricted, but the tendency of the quotations has been upwards. British American Land shares show a rise of 1, City Offices 1½, and Royal Mail Steam 2. Copper Miners of England shares are 1 lower; while London Financial and Van Dieman's Land shares have given way ½. Otherwise no change of importance has taken place.

The directors of the International Financial Society have issued a reply to the address of Mr Hope to the shareholders, which we noticed last week.

Bullion.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week:—

Gold.—There has been a good demand during the week, and, in addition to the arrivals mentioned below, about 200,000*l* have been withdrawn from the Bank. The gold by the Peninsular and Oriental steamer, due on the 25th inst., amounting to 580,000*l*, has also been sold for delivery. The La Plata has brought 12,100*l* from the Brazils, the Excelsior has brought 27,000*l* from New Zealand, the Lagos has brought 3,660*l* from Africa. The Pera has taken 5,220*l* in sovereigns to Alexandria, and further sums will shortly follow. The next overland mail from Australia, due about the 28th proximo, is bringing 430,000*l* gold, and the Great Briton left on 11th January for Liverpool with 165,000*l*.

Silver, owing to the cessation of the demand, has declined in value, and may be quoted at 60½d per oz standard. The Candia has brought 100,910*l* from India, the Elgin has brought 90,000*l* from India, the Idaho has brought 62,000*l* from New York, the City of Brussels has brought 70,000*l* from New York—total, 322,910*l*. The Nile has taken 13,980*l* to the West Indies.

Mexican dollars.—We have had but few arrivals during the week, and with the exception of an amount of 36,000*l* shipped to Shanghae, the coin is taken for refining purposes. A very considerable sum is expected here within the next few days.

Exchange on India for Banks' drafts at 60 days' sight is unaltered, the rates being 1s 10⅞d to 1s 10⅝d per rupee.

Indian Government loan notes are unchaged in price: the 4 per Cents. are 90⅝ to 91, the 5 per Cents. 98½ to 99, and the 5½ per Cents. 106 to 106½.

Quotations for bullion.—Gold—Bar gold, 77s 9d to 77s 9½d per oz std; ditto fine, 77s 9¾d per oz std; ditto refinable, 77s 11d to 78s per oz std; South American doubloons, 73s 8d per oz; United States gold coin, 76s 3½d per oz. Silver—Bar silver, 5s 0½d per oz std; ditto containing 5 grains gold, 5s 0¾d per oz std; Mexican dollars, 4s 10½d per oz, last price.

The sum of 240,000*l* was withdrawn from the Bank to-day.

The *Gazette* return states that the declared value of the imports of the precious metals into the United Kingdom during

the week ended Feb. 22, were—Gold, 104,062*l*; silver, 278,892*l*. The exports were — Gold, 290,746*l*; silver, 318,411*l*.

EXCHANGES.—The rates quoted on Tuesday and to-day show a farther falling off in the demand for the means of remittance to Belgium, Holland, and Germany.

Weedon and Daventree Railway, general, 10A Great Queen street.
West Cornwall Railway, general, Penzance.

WEDNESDAY, March 1.

Devon and Cornwall Railway, special general, 2 Westminster chambers.

THURSDAY, March 2.

Great Western Railway, general, Paddington.

FRIDAY, March 3.

Kettering, Thrapstone, and Huntingdon Railway, general, 2 Westminster chambers.

MARCH SETTLEMENTS.

Ticket Days—March 14th and 30th.
Account Days—March 15th and 31st.

PUBLIC COMPANIES.

RAILWAY COMPANIES.

Blyth and Tyne.—The net revenue for the past half-year, including 369*l* from the previous half, amounted to 23,503*l*, out of which the directors recommend the payments of dividends on the preference stocks, and 10 per cent. per annum on the ordinary stock and shares. In anticipation of the capital required for the Newbiggin and North Shields branches, the directors have made a call of 2*l* per share upon the ordinary shares, and they proposed shortly to call up the balance of 1*l* 10s per share.

Cork and Bandon.—Traffic receipts, 14,868*l*, showing an increase of 1,172*l*. A dividend at the rate of 2½ per cent. per annum is notified to the ordinary shareholders, leaving 6,648*l*. Capital expended, 343,186*l*.

Cornwall.—During the half-year the associated companies had to provide 6,955*l* to cover guarantees. The redeemable 5 per cent. preference shares are to be replaced by a 4½ per cent. stock.

Dublin and Meath.—The net result for the six months showed a balance of 989*l* available, after payment of all debenture interest and current expenses chargeable to revenue. The directors recommend an increased dividend at the rate of 1*l* 5s per cent. per annum on the first preference shares, carrying forward a balance of 225*l*.

Dublin, Wicklow, and Wexford. — The half year's traffic amounted to 101,858*l*, against 98,546*l* in the same half of 1869, showing an increase of 3,312*l*. The expenditure amounted to 42,005*l*, against 39,945*l*, showing an increase of 2,060*l*. The balance available was 31,405*l*, out of which the directors recommended payment of a dividend at the rate of 2½ per cent. per annum on the original shares, in addition to the dividends on all the preference shares, leaving a balance of 6,325*l*. The traffic agreement with the London and North-Western Company had been satisfactorily arranged, and they had subscribed 30,000*l* towards the cost of the Wexford Extension.

Edinburgh and Bathgate.—Dividend announced at the rate of 5 per cent. per annum; surplus, 452*l*. A further payment of 2s 6d per share was made for arrears of surplus rents.

Erie Bonds.—The coupons due 1st March of the Erie Railway loan of 1865 will be paid, on and after that date, at the counting house of Messrs J. S. Morgan and Co.

Furness.—Capital expended to 31st December, 3,055,510*l*. The railway and dock receipts for the half-year were satisfactory, and the directors recommend a dividend at the rate of 9 per cent. per annum. The balance of the revenue account would provide for the transfer of 5,000*l* to the reserve fund, which the directors also recommend, leaving a balance of 5,893*l* to the credit of the current half-year. The increase in the number and the size of the vessels now resorting to Barrow rendered it desirable that additional accommodation should be provided in the docks and harbour.

Great Northern.—At the meeting a dividend at the rate of 8¼ per cent. per annum was declared. The directors' proceedings with regard to the coal-rates were approved.

Great Northern and Western, Ireland.—The net receipts for the four months to the 31st October last amounted to 16,356*l*, and the rent under lease to the Midland Great Western from the 1st of November to the 31st of December to 4,763*l*, making together 21,118*l*; the working expenses amounted to 6,019*l*, leaving a balance, after payment of interest, of 11,342*l*. The directors recommend the payment of dividends on the 1st of April next.

Great Western.—The dividend has been officially announced at the rate of 3¾ per cent. per annum, with a surplus of 19,000*l*. The corresponding dividend was 3 per cent., with a bonus of 4s 6d upon the Great Western (Original) stock.

North and South-Western Junction.—Capital expended, 126,865*l*. The traffic receipts for the past half-year showed that 7,264*l* had been received, against 7,383*l* for the corresponding half of 1869, showing a decrease of 119*l*. The net result was an available sum of 4,014*l*, from which the directors recommend a dividend at the rate of 6 per cent. per annum, leaving a balance of 161*l*. The negotiations with the London and North-Western, Midland, and North London Companies had resulted in an arrangement for a joint lease of the undertaking to those companies on terms which would secure to this company in perpetuity a net annual dividend of 7 per cent. after providing for necessary expenses.

Rhymney.—The receipts for the half-year amounted to 33,969*l*, and for the corresponding half of 1869 to 35,825*l*, showing a decrease of 1,856*l*. The balance of net revenue amounted to 14,843*l*, and the guaranteed and preferential dividends to 11,199*l*, leaving a balance of 3,644*l*, out of which the board recommended that a dividend on the ordinary stock at the rate of 3 per cent. per annum be declared, leaving a balance of 752*l*. The Cardiff and Caerphilly line would be ready for inspection by the end of March, and the Penalltan branch by the end of April next.

[CONTINUED FROM PAGE 236.]

Somerset and Dorset Railway 5 per Cent. Debenture Stock for 160,000*l.*—The directors invite subscriptions for a balance of 108,500*l* of this stock, ranking for interest first after payment of the working expenses. The subscription price is 95*l* 10s per cent.; and the line, which is working order, already earns double the amount required as interest.

Stratford-upon-Avon.—Dividend announced at the rate of 6 per cent. per annum, surplus 27*l.*

Taff Vale.—At the meeting, the 10 per cent. per annum dividend was declared. The chairman referred to the happy increase in the traffic, and to the fact that in three years the redemption payment to the Waggon Company would cease.

Waterford and Limerick.—The traffic for the half-year amounted to 51,466*l*, and for the corresponding half of 1869 to 49,755*l*, showing an increase of 1,711*l*. A revision of rates last autumn tended to improve the results. The working expenses were 45½ per cent. of the earnings, as against 46¼ per cent. in the same half of 1869. After defraying working expenses and providing for interest on debentures, there remained a disposable balance of 20,546*l*, which, together with 1,099*l* from the preceding half-year, made 21,645*l*, out of which the directors proposed to pay the dividends on the preference shares, and at the rate of 3 per cent. per annum on the ordinary capital clear of tax, and also to carry to reserve fund 465*l*, leaving a balance of 2,656*l* for renewals.

West Norfolk.—Half-year's revenue, 2,298*l*. After paying debenture interest 432*l* remained to be applied to the reduction of the debt due to bankers.

BANKS.

London and Provincial.—A dividend at the rate of 9 per cent. per annum, free of tax, has been declared.

FINANCE, CREDIT, AND DISCOUNT COMPANIES.

Credit Foncier of England.—At the meeting a dividend was declared at the rate of 5 per cent. per annum; surplus, 16,149*l*. The half-year's profit was 27,179*l*.

International Financial.—In reply to statements made by Mr Hope, the directors' circular states that the Metropolis Sewage undertaking could not have been carried out without calling up the rest of the society's capital, while the expense of working the project would destroy any chance of profit for an indefinite period. They accordingly decided not to invest any further capital in the sewage scheme, but sought, and still seek, to obtain from the Metropolitan Board of Works such aid as may enable a modified plan to be carried out.

Leasehold Investment.—Dividend declared at the rate of 5 per cent. per annum.

ASSURANCE COMPANIES.

Commercial Union Assurance.—The directors have resolved upon a dividend of 10*l* per cent., free of of income tax (making with the interim dividend paid last September, 12½ per cent. for the year), and an addition of 30,000*l* to reserve fund, leaving 12,952*l* to be carried forward to this year's profit and loss account.

English and Scottish Law Life Assurance.—At the annual meeting it was announced that 562 new policies had been issued in 1870, insuring 427,722*l*, and yielding 14,085*l* in new premiums. The renewal premiums were 109,751*l*, and the invested funds 760,132*l*.

MISCELLANEOUS COMPANIES.

Berlin Water Works.—The net income of the undertaking for the half-year amounted to 34,052*l*, out of which a dividend was declared at the rate of 10½ per cent. per annum. The report mentioned that the anticipated falling off in the revenue in consequence of the war has not taken place.

Brazilian 5 per Cent. New Loan for 3,000,000*l Sterling.*—Messrs Rothschilds invite subscriptions for this new loan until the 1st of March, the issue price being 89 per cent., payable by instalments until 21st August. The prospectus states:—

Subscribers who prefer paying the instalments by anticipation of the above periods will be allowed a discount at the rate of 5 per cent. per annum. The redemption of this loan will be effected by a sinking fund of 1 per cent. per annum, to be applied to the purchase of bonds in the market when the price is under par, and when at or above par by drawings by lot. The operations of this sinking fund will commence on the 1st February, 1873.

The bonds are in sums of 100*l*, 500*l*, and 1,000*l* each, with interest coupons payable on the 1st August and 1st February.

British Land.—The profit during 1870, after paying an interim dividend of 2½ per cent., was 16,103*l*, and a further distribution of 5 per cent. is now recommended; surplus, 4,103*l*. Depression in the building trade has caused the falling off in profits.

Mullens and Co.—Dividend 10 per cent., free of income tax.

Southampton Docks.—At the meeting a 4 per cent. per annum dividend was declared.

Submarine Telegraph.—At the meeting the chairman said that the war in France had caused a decline in receipts from French messages. A dividend at the rate of 15 per cent. per annum was declared.

Surrey Commercial Dock.—A dividend at the rate of 5 per cent. per annum has been notified.

Telegraph Construction and Maintenance.—The year's report shows an available profit of 170,646*l*, after paying an interim dividend. Of this 44,820*l* is to be divided in cash, being 24s per share, and 112,050*l* as a bonus of 3*l* per share, at present represented by fully-paid shares at par in telegraph companies. With regard to the bonus it is stated "the directors propose to constitute a trust, and to transfer to trustees the 112,050*l* in fully-paid shares above mentioned, each shareholder receiving a certificate to the amount of 3*l* on each of his shares, and which will entitle the holder of the certificate to a rateable proportion of the produce realised by sale and dividends of the trust shares until all those shares are disposed of. It is proposed that the trustees be restricted for three years from selling any shares under par."

West India and Pacific Steam Ship.—At the meeting a dividend at the rate of 7 per cent. per annum was declared.

MINING COMPANIES.

Sweetland Creek Gold.—A third dividend of 4s per share, free of income tax, is announced.

The Commercial Times.

POST OFFICE ANNOUNCEMENT.

A large number of newspapers posted for places abroad are found to be prepaid with a halfpenny stamp only, and are consequently not forwarded. It is clearly stated in the printed notices upon the subject of the use of the halfpenny stamp, which have been issued to the public, and from the rules laid down in the "British Postal Guide," that a postage of one halfpenny is sufficient only for newspapers sent through the post between places in the United Kingdom, and for inland book and sample packets weighing not more than two ounces. A great many newspapers are also posted for foreign parts much beyond the prescribed limit of eight days from the date of publication. It is very desirable that those who post newspaper and book and sample packets for the colonies or foreign countries should carefully consult the "British Postal Guide," where all necessary information is given in regard to postage and other matters; as a disregard of the rules not only imposes much unnecessary trouble upon the department, but is also likely to cause disappointment and annoyance to the public themselves.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

There was rather more firmness in the wheat trade at Mark lane to-day, and the tendency of the quotations was in favour of holders. Fine dry parcels of English wheat, of which the supply was limited, commanded rather more money, but the general condition of the samples was inferior. Foreign wheat was held at extreme rates, in anticipation of the conclusion of peace and a revival of the export demand. Maize and oats were about 1s per quarter dearer on the week, while beans and peas showed firmness. Flour was more saleable at the rates lately current. This week's imports of foreign and colonial produce into London have amounted to 9,260 quarters of wheat, 8,700 barley, 1,450 maize, 1,090 sacks and 7,550 barrels of flour.

At Liverpool and Wakefield this morning a steady business was transacted in wheat on slightly higher terms.

The Liverpool cotton market opened with an improved demand, and rather dearer prices were paid, but since Wednesday the tone has been quiet. At the close American descriptions show an advance of ⅛d per lb, while East Indian and Bengal are unchanged. The total sales for the week are 84,580 bales, of which the trade have taken 62,360 bales, speculators and exporters 22,220 bales. The imports are 93,534 bales, the actual exports 17,660 bales, and to-day's stock is estimated at 764,550 bales. To-day the market closes steady. Sales, 12,000 bales.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended February 23, 1871 :—

	Imported.		Exported.
American.....bales	51,273	.....	10,446
Brazilian	21,423	.....	768
East Indian	4,814	.....	9,372
Egyptian	12,292	.....	184
Miscellaneous	2,377	.....	173
Total.....	93,179	.....	20,943

At New York on the 23rd inst. middling Upland cotton was quoted at 15¼ cents per lb. Bombay advices to February 18th report cotton weaker, at 185 rupees for fair Dhollerah.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, Jan. 28 :—In the beginning of the week business opened with a small but steady inquiry for cotton, at prices which showed no change from those current when our last report was written. Although accounts from home, received by telegraph, were the reverse of encouraging, each successive day brought a larger number of buyers into the market, both here and up-country, enabling holders of stocks to widen still further the relatively adverse difference which exists between spot and home prices, On Thursday the telegram announcing that proposals for the surrender of Paris had been made by the besieged came to hand simultaneously with advices of better prices in Liverpool, and caused an immediate advance in values. At the same time a strong demand from shippers set in both for old and new cotton, and before business closed on that day fully 1,800 candies had changed hands. The total sales for the week aggregate about 11,000 bales of all kinds, and contrary to what might have been expected at this period of the year, Dhollerah descriptions form a large proportion of the business done. Some good cotton is now obtainable on the green of Bhownuggur and Dhollerah qualities, but the average is much below the standard of fair. Sawginned Dharwar has been almost unsaleable during the week, although in price much under the position which ordinarily applies to this description. This is easily explained, as on examination it usually is found that the out-turn of the docras is decidedly inferior, being dull in colour, cut in staple, and much mixed with portions of seed and leaf. Of new cotton very little is yet to be found in this market, and as a good many contracts fell due on the 25th inst., very few dealers have been able to implement their engagements. In addition to the other elements of strength, this circumstance has no doubt helped considerably to buoy up prices in the Mofussil, as the belief still obtains there that Bombay dealers have to a great extent not yet covered in their forward delivery sales made in December. Advices from Khamghaum, Oomrawuttee, and Akote, report excited and advancing markets. The political news has created a firm belief in a large and early advance in home prices, and as high as 212 rs per candy was being demanded when our last telegrams left. Opinions are divided as to the extent of injury done by the late rains in Berar, but those who are best qualified to judge state that it will not be so great as was first anticipated. We shall know more accurately as to this next week, when we anticipate official reports will be published. From Broach and Dhollerah we have nothing new of interest to write. Crop accounts continue favourable. From Tinnevelly we have a telegram dated 27th, advising 6¾d per lb.

Actual exports since last mail left, 14,281 bales.

Messrs E. B. Liddell and Co., of Alexandria, have furnished the following report, dated February 10 :—Holders of cotton having conceded a reduction of ⅛d to ¼d per lb, the result has been a rather active business at our quotations, at which rates to-day's market closes firm, and with a hardening tendency. Gallin descriptions continue as scarce as ever, and fully maintain their value. Quotations :—Fair, 8d per lb, f.o.b.; fully fair, 8⅛d, ditto; good fair, 8¼d, ditto; fully good fair, 8⅜d to 8½d, ditto; Gallin, 10d to 13d, ditto. Freight about ¼d per lb for steam-pressed bales.

The colonial produce markets have ruled inactive, and prices have shown weakness. Transactions in sugar have been limited, but the supplies of coffee sent forwards have changed hands at about stationary currencies. Rice has been in moderate demand, on former terms.

The annexed is dated Akyab, January 19 :—During the last fortnight Laroong paddy has been arriving from the districts in moderate quantities; but almost all the grain had to be con-

tracted for beforehand: of regular market supplies we have had hardly any. Prices opened with a parity of 42 rs per 100 baskets. 3 parts and 28 lbs per basket, ready for shipment, at the present rate of exchange, equal to 4s 9d per cwt. free on board, and remained steady thereat. Of Nakrenzie paddy no supplies have been in the open market so far; the few boat-loads that arrive now and then had been likewise contracted for, at a parity of 47 rs to 49 rs for good three-parts rice, shipping quality, 28 rs per basket, equal to 5s 1d to 5s 2½d per cwt. free on board. These rates are still being offered for forward delivery; but there appears little inclination on the part of the natives to sell their produce readily at such prices, and we cannot look therefore for regular and large supplies before beginning of February. The samples of the Nakrenzie rice, which we have seen, show a fair quality, but the same will probably improve still as the season advances; all reports from the interior speak of a very good Nakrenzie crop, and the favourable weather during the last three months should warrant this. The yield will anyhow be larger than last year, and we calculate that from 100,000 to 110,000 tons of rice will be available for export.

Annexed is Messrs Durant and Co.'s circular, dated Feb. 23:—The quantity of silk offered at the periodical public sales was about 2,000 bales Bengal, 2,500 bales China, 800 bales Japan, and 1,200 bales Canton silk, with 330 ballots Persian. The whole was allowed, with few exceptions, to pass rapidly without biddings, and without presenting any special feature. The general market has been quiet for the last week, but rather the quiet of suspense as to politics than any diminished inclination on the part of manufacturers and throwsters to continue the full employment of mills and looms. On the other hand, importers have been more or less sanguine as to the immediate future; hence prices are fully supported. The deliveries are good. Canton silk continues at the improved rate of last month, and even Japan silk shows considerably increased figures.

Messrs Windeler and Bowes observe:—The colonial wool auctions, which commenced on 3rd inst., will close 27th inst. Up to date 113,092 bales have been offered, and for the remaining catalogues 18,000 are advertised, so that a total of about 131,000 bales will be brought forward. For the corresponding sales last year only 80,741 bales, chiefly new wools, had arrived in time. The present series was brought on a fortnight earlier, to allow of 5 series during this year, and the result has been so far satisfactory. The stock held over from last year, together with a large proportion of second-hand and old accumulations, has been disposed of with good spirit, and generally with some advance on last November rates. Prime washed Port Philip fleece has been offered in fair quantity, and, although still relatively cheap, the value realised has been certainly better than could have been obtained at any earlier period since the war commenced. The Bradford spinners have looked keenly after stout stapled parcels, but shorter grown fine wools suffer yet from want of French competition. Good average washed fleece may now be quoted at 17½d, an advance of 1d per lb upon last November, present position being about on a par with last year at this period. Unwashed, which sold last November irregularly, has been in steady and improving demand, good average being now worth 9½d per lb. Sydney fleece has remained difficult to sell; faulty parcels are no dearer than last sales, any improvement at first having been since lost. Superior flocks have again been partly withdrawn, their value now being so far below former quotations. Scoured wools of all sorts are 1d to 1½d per lb higher than November, and sell freely. Lambs have also been in much request. The selection of New Zealand has not been attractive, and shows little improvement in value, notwithstanding that middle-class bulky wools have been wanted. The Adelaides, all unwashed, of the new clip, have been well supported by the export buyers, and have brought fully the same prices as the flocks realised last year. Capes have relatively improved more than any other descriptions, the tendency being now to substitute these and other low priced fine wools for the manufacture of army cloth, in place of coarse wools formerly used for this purpose. Snow whites opened in brisk demand at 1d to 1½d per lb over November rates, and have since further advanced. Fleeces are ½d to 1d per lb higher, but with appearance of weakness.

With reference to the Cape wool trade, Messrs A. C. Stewart & Co., of Port Elizabeth, writing on Jan. 14, remark:—We have very little to report in wool since the date of our last circular. Business still continues in a very unsatisfactory state, holders of wool and buyers alike waiting for a solution of European difficulties. There have, however, been some private transactions on a considerable scale during the last few days, but prices have not transpired. An alteration in the terms of sale of wool and other produce came into effect on the 1st instant. In future, all sales of produce will be for cash, without discount, and there will be no charge made for wool bags. All our quotations henceforward will be on this basis. Full grown superior grease wool, suitable for the American market, is still in great demand, and for very superior parcels 6d to 6½d. net cash, has been paid. We quote the following as current prices this day, based on the few open transactions that have taken place:—Grease—Full-grown, superior, 5¾d to 6¼d; fine, light, for scouring, 4½d to 4¾d; heavy and inferior, 3½d to 4¼d. Fleecewashed—Superior, clean, 8¾d to 9½d; good average, 7¾d to 8½d; inferior and seedy, 7½d to 7½d. Snow white—Prime Uitenhage scoured, 14½d to 14¾d; second quality ditto and country scoured, 12d to 13½d; inferior country scoured, 10d to 11d. The following vessels have cleared for London—Sir Geo. Grey, 1,047 bales wool; s.s. Marsdin, 1,982 bales; s.s. Norseman, 2,155 bales.

Messrs Lewis and Peat report:—At the quarterly sale of East India indigo, the quantity declared for sale was 9,660 chests, comprising 3,175 chests new goods, 5,395 of previous sales, and 1,090 withdrawn (not shown). In spite of the prevailing dulness, both political and atmospherical, there has been a considerable business done between the close of October sales and the present ones in all the better kinds of Kurpah and Bengal, prices for which qualities gradually hardened, and to some extent recovered the ruinous depression of October, and had holders been more willing sellers, a much larger business might have been done. Several parcels of useful and good shipping Bengals sent from France changed hands, and also a few parcels of Kurpah and dry leaf Madras. The sales just finished opened with a good attendance of home buyers, but very few foreign; the biddings for desirable new parcels were lively, and the sale improved in tone for the next two days; subsequently a lower class of goods coming on, consisting of Oudes and Pondicherry Kurpah figs, &c., there was less spirit, and all very low Oudes and pale Pondicherry Kurpah had to be taken out. Dry leaf Madras was only in request for the better qualities; for the lower grades under 2s 6d there was little demand. Bombay figs were chiefly taken in at 1s 9d to 2s, a few lots selling at the former price; Bengal ditto, a few sold at 2s 3d to 2s 11d. Prices for good consuming and shipping Bengal show 4d to 6d advance; consuming Oudes and Plant Oudes par to 4d advance, and low Oudes were almost unsaleable, except at very low rates. Kurpah, owing to the very mixed character of the great bulk of the marks offered, sold rather irregularly, but on the whole, all with any colour, and not decidedly Pondicherry, sold freely at 3d to 9d advance. Dry leaf Madras: good ordinary and fine brought 4d to 6d advance, but the low sandy sorts were mostly bought in or withdrawn to support prices, the demand being evidently very restricted. The daily result shows 4,133 to have been sold in the room, 1,882 bought in and 3,645 withdrawn. In addition, about 2,000 of the bought in and withdrawn have been sold, making a total of 6,000 chests.

Annexed is Messrs William Moran and Co.'s indigo report, dated Calcutta, January 24:—The quantity of European-made indigo now remaining amounts to a few hundred chests only, and the competition for all kinds during the past week has been very brisk, at prices ranging from previous rates to occasionally 5 rs to 10 rs per maund higher, the advance being most observable on such qualities as are best suited to the American market and the Persian Gulph. The quantity out of the market to date is about 87,000 maunds. Exports of indigo from Nov. 1, 1870, to Jan 21, 1871:—To Great Britain, 12,117 chests; France, 155; Trieste, 2,549; foreign Europe, 202; America, 1,313; Gulphs and Levante, 1,094—total, 17,430 chests.

The annexed is dated New York, Feb. 10:—General trade progresses slowly, though in a few branches there is a gradual improvement, especially in seasonable manufactures, both of native and foreign production. On the whole, however, the spring trade is backward, and the aggregate transactions in February thus far are scarcely equal to expectations, betokening a want of confidence and an absence of reliable data for mercantile calculations. The export trade as a whole is very dull, the disposition of shippers being to await the result of the Franco-Prussian armistice; and the halting condition of the export trade has a depressing effect on the ocean carrying trade. The money market remains very easy, the indisposition to engage in fresh business enterprises rendering it difficult for the banks and bankers to keep their balances employed, even at current low rates of 4 to 5 per cent. on call, and 6½ to 7½ per cent. discount of prime mercantile paper. The gold market has been devoid of excitement, and the premium has consequently ruled steady, closing a trifle firmer yesterday than on either of the two preceding days. Foreign exchange is also firm, but the demand has not been very brisk. The heavy receipts of cotton, and a prospective revival of the export trade in leading staples of produce, foreshadow a liberal supply of commercial bills.

THE COTTON TRADE.

LIVERPOOL.—FEBRUARY 23.

Cotton has this week been in increased demand, with a hardening tendency, and on Wednesday there was considerable animation; since then the somewhat unexpected large receipts at the American ports have caused a quieter

feeling, but some of the quotations show an advance from last Thursday. Sea Island continues in moderate demand at steady rates, the trade being to some extent supplied by their own imports. In American the business has been large, and with greater firmness on the part of holders, an advance of $\frac{1}{32}$d to $\frac{1}{16}$d per lb was obtainable, but since Wednesday this advance has been only partially sustained. New York advices to the 21st instant quote middling Upland 15$\frac{1}{4}$ cents, costing to sell in Liverpool 8$\frac{1}{16}$d per lb, by steamer. Brazil continues neglected, but is firmly held. Egyptian has been in moderate demand, without change in prices. For East Indian the demand has been rather more active, some considerable purchases having been made for export, and prices, though at times rather irregular, are fairly supported.

In cotton to arrive the transactions have been large, and after some fluctuations close rather above last week. The latest quotations are—American, basis of middling, Memphis, from New York, shipping or shipped, by steamer, 7$\frac{5}{8}$d; New Orleans, April delivery, not below low middling, 7$\frac{7}{8}$d; low middling, Texas, ship named, 7$\frac{1}{2}$d per lb.

The sales of the week, including forwarded, amount to 84,580 bales, of which 4,830 are on speculation, and 17,390 declared for export, leaving 62,360 bales to the trade.

FEB. 24.—The sales to-day will probably amount to about 10,000 bales, with a steady market.

310940	764550	400710	442870

The above figures show:—

	bales.
An increase of import compared with the same date last year of	465,200
An increase of quantity taken for consumption of	42,160
An increase of actual exports of	10,770
An increase of stock of	453,610

In speculation there is a decrease of 57,440 bales. The imports this week have amounted to 93,534 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to February 18) is 290,000 bales against 24,000 bales last year. The actual exports have been 17,660 bales.

LONDON.—FEBRUARY 23.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

The market opened with a better demand, and prices were slightly against the buyers; but the tone has since become quieter, and we close at about last week's rates.

NEW YORK.—FEB. 10.

There appears to be little, if anything, really new on this market. At the opening to-day the feeling was pretty strong, but in the absence of pressing orders, buyers did not display much animation, and subsequently there was an entire absence of buoyancy, though no actual concession could have been obtained. Operators generally have also seemed rather disposed to await the receipt of the week's arrivals at the ports, as there appears to be an impression that the figures will likely have quite a positive effect. Exporters still claim to have no margin, and take only enough stock for their positive requirements, but there are evidences of increasing wants on the part of spinners, and this gives the upper grades a relative stronger tone than other qualities. The offerings have been fair, but most liberal from parcels on pier.

For future delivery the early transactions were at a slight improvement, but this was subsequently lost, and after a fair day's business the market closes quietly at about former figures. Some "short" sellers of the early portion of the month are inclined to cover. The following shows the receipts, exports, and stocks at the principal cotton ports since the commencement of the cotton year:—Receipts at cotton ports since Sept. 1, 1870:—New Orleans, 808,738 bales; Mobile, 280,818; Charleston, 261,010; Savannah, 550,039; Memphis, 141,230; Galveston, 143,085; Wilmington, 63,034; Norfolk, 211,786; other ports, 22,331—total, 2,482,671 bales. Foreign exports at

Southern ports and New York :—New Orleans, 562,805 bales; Mobile, 146,006; Charleston, 106,195; Savannah, 273,442; Galveston, 61,500; New York, 345,864; other ports, 23,987—total, 1,520,799 bales. Stocks at principal ports :—New Orleans, 253,528 bales; Mobile, 80,681; Charleston, 38,144; Savannah, 96,153; Galveston, 61,973; Norfolk, 7,780; New York, 81,000; Boston, 7,000—total, 626,259 bales.

NEW YORK, Feb. 17.—According to Messrs Moffat, Davidis, and Co.'s report, the week's receipts of cotton at all United States' ports have been 142,000 bales, and since the 1st of September, 2,660,000 bales. Shipments to England, 51,000 bales; to France, none; and to the continent, 24,000 bales. Total since the 1st of September, 1,575,000 bales; stock at all ports, 710,000 bales. Middling Upland, 7⅞d, cost and freight, per steamer.

NEW YORK, Feb. 22.—The receipts of cotton at all United States' ports during the last four days have been 81,000 bales. Exports to Great Britain, 53,000 bales; and to the continent, 19,000 bales.

NEW YORK, Feb. 23.—The receipts of cotton at all United States' ports to-day have been 31,000 bales.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, Feb. 22.—The business of the week has been of a very moderate extent, especially since Tuesday, on which day both spinners and manufacturers advanced their prices owing solely to an improvement in the Liverpool cotton market. Since then reports of larger receipts of cotton at the American ports have caused that staple again to decline slightly in value, hence our market is not so strong, and the advance attempted on Tuesday is now lost, and prices to-day are the same as those current last Friday. The daily sales during the week have been small both in yarns and cloths, and chiefly with the view of supplying pressing wants, and consequently for quick delivery. Buyers for forward delivery keep quite aloof from the market, as they do not feel inclined to pay the full rates asked by producers. The market closes quiet, and prices barely supported.

Messrs Alexr. Collie and Co. received the following telegram from Manchester yesterday :—Although there is but a limited business going on, the market continues firm, and quotations unchanged since Tuesday.

BRADFORD.—A more cheerful feeling prevails in the wool market, and there is more disposition to do business. More wool has changed hands during the past few days than for some time past. Demi-lustre wools, especially wethers, are in good request. A small business is doing in hogs. Skin wools are also in request. An improved tone is also apparent in both yarns and pieces, and more business is doing, especially in the former, at better prices.

LEEDS.—The cloth markets have been tolerably well attended both by manufacturers and merchants. The transfer of goods has been quite of an average character, and although there has not been large speculation, a fair amount of business has been done. Meltons and fancy coatings have been fully as much in favour as any other class, and the inquiries have been pretty numerous. Tweeds have been dull of sale.

BELFAST.—Flax—Supplies slightly in excess of those offered last week. Demand generally was good, and prices in some instances advanced 6d per stone. Yarns—Transactions during the past week were not equal in point of extent to those of preceding week. Firmness in prices continues to prevail. Power-loom linens (brown)—Demand fair for drills and heavy linens. Stocks stationary. Prices steady. Bleached and finished linens—Home demand was again of a fair steady character. Reduction in stocks has been made. Prices continue firm.

NOTTINGHAM.—Business in the lace trade continues in a healthy state. Plain cotton nets are selling to a moderate extent at their previous value. The lace market remains steady, and raw silk maintains its value. Manufacturers of hosiery continue well employed. Hosiery yarns are unaltered in value.

WOLVERHAMPTON.—The works are scarcely altered upon their state of activity as reported last week. Local failures divided the interest in the discussions with that which for eight months past has been the engrossing topic—the war between France and Germany.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Feb. 10.—The flour market has been more active, and prices have improved about 5c on nearly all grades. The demand was largely for export, but the home trade took considerable. The close was quiet but firm. Sales include superfine at $6.15 to $6.40; No. 2 at $5.25 to $5.50. Corn meal—The demand is moderate. Sales: Western yellow at $3.75. City sacked quoted at $1.55 for coarse, $1.60 for fine, $1.70 for bolted yellow, and $1.80 for bolted white. There has been a fair trade doing in wheat, and the market is about 2c better. The close was quiet, with none of the firmest, however, last. Sales are at $1.65 for white Michigan in store; $1.75 for small parcel of white; $1.53 in store, early, for No. 2 new spring; later, $1.56 to $1.57 afloat; $1.46 for old spring per sample; nominal at $1.75 to $1.85 for Diehl Genesee; $1.53 to $1.55 for Southern amber; $1.58 to $1.60 for good to choice amber Western. The demand for oats was good, and prices were fully 1c higher, closing firm. Sales at 67c afloat for Western; 68c afloat for Ohio, No. 1, and 66½c afloat for Ohio, No. 2; 68c afloat for State white. There has been a fair trade done in corn, both for export and home use, closing quiet. The sales are 82c for low mixed to 85c for high mixed; 85c for yellow Western; 82c for Jersey yellow on the pier. White Western nominal, and white and yellow Southern nominal. Barley—The firmness of holders restrict transactions, but no concession can be obtained as the stock is well under control.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The grain trade continues to be chiefly influenced by the course of politics. At the opening of the week the demand for wheat was very dull, and though the supplies of English on sale at Mark lane were small and in bad condition, prices gave way 1s to 2s per quarter. This decline extended to foreign qualities, in which few sales were reported. To-day, however, a reaction took place, it being anticipated that the French demand will be revived on a large scale on the conclusion of peace. Just now many obstacles exist to the transport of breadstuffs to Paris. The railway communication is under the control of the Prussian armies, and the vexatious delays arising in consequence add greatly to the cost of the produce when laid down in Paris. If these difficulties were removed, there is little doubt that large purchases would immediately be effected. As it is the exports of grain have been greatly in excess of former seasons, though the receipts have been large. The shipments from September 1 to February 18, compare as follow :—

	1868-69		1869-70		1870-71
	cwts.		cwts.		cwts.
Wheat	135,449	.....	127,496	.....	1,268,619
Barley	60,368	.....	11,745	.....	30,960
Oats	53,437	.....	43,903	.....	542,864
Maize	522	.....	9,414	.....	40,729
Flour.....	19,509	.....	9,088	.....	855,517

There are now about 350 cargoes of wheat on passage from all quarters to the United Kingdom, against about 210 at the corresponding period last year; but a large number of these will probably be diverted to the continent.

Maize and oats have been in fair request, and prices closed to-day at an advance of about 1s per quarter. Beans and peas have been held at extreme rates, having been in demand for setting. Flour has sold more readily, at the late decline of 2s per sack and barrel.

Mr Geo. Dornbusch thus reports the state of the floating grain and seed trade:—During the last se'nnight 55 grain and seed-laden vessels have arrived at ports-of-call, viz., 29 wheat, 5 maize, 6 barley, 3 rye, 2 beans, 2 milletseed, 4 linseed, 2 cotton-seed, 2 ground nuts, and 1 valonea. The floating grain trade has been dull, partly owing to the milder temperature, and the non-arrival of the overdue South European grain fleet. To-day a firmer tone prevailed. Wheat—For fine cargoes improved prices were obtainable, but ordinary sorts were cheaper. Maize in quiet demand, and rather cheaper. Barley slow to sell, and 6d cheaper on the week. Rye closing steady. A good cargo has been sold at 36s 6d per 400 lbs. The reported sales are as follows:—Wheat—11 arrived cargoes: Ghirka Odessa, 50s 6d to 51s 6d; new ditto, 51s 6d; new ditto from Nicolaieff, 50s 6d to 51s 6d; ditto from Marianopoli, 52s; New Rostaff Ghirka, 43s 6d per 492 lbs; Moldavian, 48s 7½d per 280 lbs; and Californian, 57s 6d per 500 lbs. No business has been done in cargoes on passage and for shipment. Maize—11 arrived cargoes: Odessa, 34s 6d to 35s 3d; Galatz, 34s 9d to 35s 4½d. On passage, 1 cargo Galatz at 34s per 492 lbs. Barley, 1 arrived cargo at 27s per 400 lbs. Rye, 1 arrived cargo, 36s 6d per 480 lbs. Linseed, coast cargoes 6d to 1s dearer. Arrived, 200 tons Patna and Calcutta at 62s; 100 tons fine bold Minzapore, 62s 6d; and 100 tons E.I. and Calcutta at 61s 6d. On passage, 200 tons ditto, at 62s. To be shipped, 2,000 qrs Azow Taganrog at 62s per 410 lbs. Rapeseed dull, and 6d to 1s cheaper. Arrived, 100 tons fine yellow mixed, at 73s. On passage, 100 tons ordinary brown Calcutta, at 68s. To be shipped, 200 tons, 67s per 416 lbs. Cottonseed quiet, and rather cheaper. To be shipped, about 2,100 tons Egyptian from Alexandria, at 8*l* 17s 6d per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market has been so exceedingly flat that prices remain almost nominal; but stocks held by the trade are small, and some improvement in the demand must soon be experienced. During the first three days there has been a total cessation of business in West India, with other descriptions almost neglected. Refined has also experienced some further decline, the export inquiry having entirely abated. The arrivals from the West Indies are likely to be large during the next few weeks. Beet sugar is offering for arrival, and the high prices of refined are calculated to stimulate the production in Holland and Belgian. The requirements of France are likely to be large, and the future course of the market is very uncertain. With some improvement in the delivery last week, the stock in London was reduced to 56,000 tons, against 71,000 tons in 1870, and 67,850 tons in 1869 at the same period.

Mauritius.—There have not been any public sales. Last week 2,000 bags fine crystalised white sold by private contract at 39s 6d per cwt, 6s duty.

Madras. — The low qualities have been neglected. A parcel of Jaggery is declared for public sale to-day.

Foreign.—No sales reported in Manila or other descriptions. 360 bags fine white crystalised beet sugar by auction sold at 36s per cwt.

Refined.—Dry goods have been disposed of at a further reduction, viz.:—46s to 48s for low to middling, and the market is still unsettled.

MOLASSES.—A parcel of St Kitts has sold at 12s 6d per cwt.

RUM.—A few sales have been effected upon former terms: Leewards, 1s 7d; Demerara, 2s to 2s 1d; hogsheads, 2s 2d. 100 casks Martinique of indirect import, at 1s 4d per proof gallon. Jamaica continues steady, business being done at 3s 6d to 4s 3d per gallon.

COCOA.—There have not been any public sales. Probably some parcels of colonial and foreign have changed hands at former rates, including Guayaquil at 45s to 47s per cwt. Total stock—35,700 bags against 22,000 bags last year, and 25,600 bags in 1860 at the corresponding period. The deliveries keep steady, and for export show some increase this season.

COFFEE.—The Netherlands Trading Company sold 134,100 bags at their public sale on Wednesday, when an advance upon valuations was obtained, but prices in this market being relatively high are not influenced by this result. Further speculative business has been done in native Ceylon, to arrive, at 57s to 59s 6d, according to quality and conditions. 72 casks 450 bags by auction sold at 57s to 57s 6d for mixed and good ordinary, and 60s to 61s for bold. 913 casks 450 barrels and bags plantation two-thirds met with buyers, but prices of common descriptions occasionally showed weakness. Pale and grey, 61s to 70s; colory went without material change; middling to bold, 66s to 75s; and superior, 76s to 82s 6d. 122 half-bales Mocha were chiefly withdrawn. A few lots sold, including good at 107s; mixed and broken, 87s to 89s. 1,413 bags East India partly found buyers: bold Cochin, 64s 6d to 66s; smaller, 59s to 59s 6d; native Malabar, 58s. 37 cases Tellicherry, 67s 6d. 152 bags Singapore sold at 58s for Bontyne, and 55s 6d for Bally. 51 casks 172 bags Porto Rico were taken in at 63s 6d to 64s. 146 bags Bahia part sold at 57s 6d to 60s 6d. 347 bags Santos withdrawn. A floating cargo of St Domingo sold yesterday, but no particulars transpired. One of Rio for a Northern port at 53s 6d. About 200 tons native East India have sold to arrive at 59s to 61s per cwt. The stock is nearly 3,000 tons in excess of that of last year at same date, but the deliveries are on the increase.

TEA.—The business by private contract has been of moderate extent, the lower qualities of Congou attracting more attention. Scented teas, from recent imports, meet a good demand. Small public sales have been held. 1,499 packages on Monday went at prices rather under the late highest point for the better sorts of green, common being lower. Subsequently, 9,619 packages went off quietly, and without any new feature to notice. Some parcels, printed with "reserved prices," were withdrawn.

RICE.—Sales on the spot have been rather limited, not exceeding 5,000 bags. The market is quiet, although firm. 2,200 tons Rangoon, February and March shipment, have sold at 10s 6d to 10s 10½d per cwt continental terms.

IMPORTS and DELIVERIES of RICE to Feb. 18. with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imports ...tons	15930	4740	9600	8200

Stock	54850	47950	34050	17580

Deliveries last week, 1,920 tons.

SAGO is very dull and 565 bags by auction were chiefly bought in. A few lots of medium grain sold at 19s 6d per cwt. Small withdrawn.

SAGO FLOUR.—951 bags Singapore were taken in at 15s 9d per cwt.

TAPIOCA.—320 bags Singapore partly sold at 2d per lb for middling rather small.

SPICES.—The principal feature in the market has been the large supply of Zanzibar cloves by auction, viz., 3,167 bales, which partly sold at 2⅞d to 3d for ordinary to good, which showed a slight decline. 37 cases Amboyna were taken in at 6d. 823 bales of Zanzibar clove stems sold at 1¾d to 1¼d. Nutmegs dull, and 30 packages by auction were withdrawn. 1,379 bags pimento went without spirit, and only partly found buyers at easier rates, ranging from 1⅞d to 2⅛d per lb. 25 cases cassia buds were sold at 8*l* 7s 6d to 8*l* 10s. 250 packages low quality cassia from Bombay sold at 17s to 18s. A small parcel of African ginger realised 30s per cwt. White pepper continues firm. 216 bags by auction sold at full rates: fair to very good, 7⅞d to 7¾d; a

few lots of Penang at 7¾d to 7⅞d. Black is without further alteration to report. 1,147 bags West Coast Penang, part sold at 5⅛d, and 728 bags Singapore bought in was since part sold at 6d. 325 bags Malabar withdrawn. Singapore has sold for arrival at 5⅞d per lb.

SALTPETRE.—The business has been restricted to the lower qualities of Bengal, which show some decline from former rates. Refraction 16 to 19, 26s; 8½ to 6½, 27s 6d to 28s. 50 tons landing at 26s 4½d, refraction 20 to 22 per cent. Fine is nominally unaltered.

IMPORTS and DELIVERIES of SALTPETRE to Feb. 18, with STOCKS on hand.

	1871.	1870.	1869.	1868.

Total delivered	1500 ...	2940 ...	1560 ...	1570
Stock	2490 ...	3920 ...	3370 ...	7720

Deliveries last week, 320 tons.

COCHINEAL.—The sales yesterday were large, comprising 3,014 bags, the bulk as usual being Teneriffe, viz., 2,711 bags. Prices were rather easier for silvers, 2s 4d to 2s 8d; blacks went at full rates to 1d advance, from 2s 5d to 3s 5d. 238 bags Honduras went without change: silvers, 2s 4d to 2s 10d; blacks, 2s 4d to 3s 4d. 65 bags Mexican: silver, 2s 5d: black, 2s 5d to 2s 7d per lb. The deliveries of Teneriffe have been greater by 1,120 serons, &c., than in the previous year, and the stock is still large, viz., 10,500 serons, &c.

INDIGO.—The sales concluded on the 21st inst., and prices did not show any further change. About 6,000 chests sold out of the 9,660 brought forward. On the first day of the sale prices ruled, as compared with October, at 3d to 4d advance for good ordinary and middling shipping qualities of Bengal, only mixed and undesirable lots selling from about par to 2d advance; these rates were firmly maintained throughout. No parcels of really fine Bengal sold, but the few chests of good middling to good realised fully 4d recovery. Oudes and plant Oudes of tender coloury kind met a ready sale at 3d to 4d advance, but hard and mixed sorts, which at first sold freely at par to 2d advance, during the last few days went irregularly. Kurpahs, as the most desirable class of low priced indigo, were in very strong demand, and frequently realised fully 6d above the cheap part of October sale, the average as follows:—middling to good, 4d to 6d advance; good ordinary, 6d; ordinary and low, par to 3d advance. Dry leaf Madras, good qualities being scarce sold readily at 3d to 4d advance, middling at par to 2d advance, and ordinary and low, of which there was an abundance, at 3d to 4d decline.

OTHER DRYSALTERY GOODS.—Stocks of Gambier continue large. At auction a parcel of cubes sold at 20s 3d. The market is quiet. Fair block last sold at 15s 7½d, and business has been done at 15s 6d, ex ship. Cutch remains dull and quoted 21s to 22s for good to fine. There have not been any public sales of safflower. 945 bags Bengal turmeric by auction were withdrawn. Privately a parcel of Bengal has sold at 18s 9d per cwt. cash.

SHELLAC.—There is less inquiry, and prices remain unchanged. 396 chests by auction part sold: Native and reddish orange, 6/ 2s 6d to 6/ 7s 6d; liver, 6/ to 6/ 2s 6d per cwt.

METALS.—Prices have been generally steady, but with quiet markets. The chief exception is copper, which shows some advance, and the English smelters have raised quotations 3/. Several contracts have been made in Chili at 65/ to 66/ 10s, according to terms. Wallaroo and Burra quoted 74/ to 75/. Tin has been depressed. Straits sold upon lower terms, viz., 129/ to 130/; to arrive, 128/. English may be bought at a reduction on last week's rates. Spelter steady, at 17/ 17s 6d to 18/ 5s, with a few sales. For delivery, 17/ 10s to 18/. The prospects of peace have as yet but slightly influenced the iron trade. Rails continue in demand, and the requirements will, sooner or later, be extensive. Scotch pig is quiet at 52s 6d cash, and 53s per ton one month. Lead has been steady at last week's quotations.

JUTE.—The business for arrival has been moderate in extent, chiefly at prices ranging from 19/ 10s to 23/, and some fine marks as high as 26/ 7s 6d. On the spot the transactions by private contract are limited. 3,950 bales at auction about two-thirds sold at 21/ to 25/ 15s for good ordinary to good, the latter qualities being dearer. The stock of jute here is further reduced to 13,600 bales, against 57,600 last year, 88,220 in 1869, and 93,800 bales in 1868, at the same date.

HEMP.—Manila is quiet, with small sales at 42/ to 48/, and 52/ for Sorsogon. 38 tons Petersburg clean by auction part sold at 33/ 15s to 34/ per ton.

LINSEED.—The market is very firm and rather tending upwards. Calcutta now quoted 61s to 61s 6d. Sales to arrive are reported at 62s to 62s 6d. Black Sea off the coast has sold at 61s 6d to 61s 9d per cwt.

HIDES.—At the public sales yesterday 220,850 East India hides, &c., went at steady rates for the better qualities and rather in favour of buyers for the common. Buffalo, of which the supply was small, met a steady demand.

OILS.—Olive quiet. The crop is less than had been expected. A cargo of Ionian Island has sold at 45/ 10s for United Kingdom. Sperm steady, at 84/ to 84/ 5s. Common fish oils as before, and prices partly nominal. Pale seal, 36/ 10s; cod, 35/ 10s to 36/ per tun. Linseed oil firmer: on the spot, 31/ 5s: April to June, 32/ 10s. English brown rape quiet, value on the spot, 44/ 10s to 45/, being lower. Refined, 47/ to 47/ 10s, foreign, 50/. Cocoa-nut has been steady. Ceylon, 40/ to 40/ 10s. Cochin is dull and high in proportion, viz., 45/ to 48/. Fine very scarce. A good business has been done in Ceylon for arrival at 41/ to 41/ 5s. Palm remains dull. Fine, 38/ 10s per ton downwards, according to quality.

TURPENTINE.—American spirits, 37s; French, 36s 6d per cwt.

PETROLEUM is very dull, at 1s 5d to 1s 5½d per gallon for refined. The stock keeps large.

TALLOW.—Quotations of Petersburg experienced further depression since last Friday, but a firmer tone now prevails, and prices have partly recovered with a steady demand. This morning prices are as follows:—44s 6d to 44s 9d on the spot, and March-June 44s 9d to 45s, and last three months 46s per cwt. The public sales to day will contain about 1,800 casks, the bulk being Australian.

POSTSCRIPT. FRIDAY NIGHT.

SUGAR.—The market closes flatly. 183 casks W.I. sold, being the business of the week. A few lots crystalised Demerara by auction sold at 35s 6d to 38s. 449 bags Madras were taken in. 2,080 bags Jaggery withdrawn. 502 bags brown Bengal taken in at 24s 6d to 25s 6d. 795 bags refined grocery Barbadoes were mostly bought in. A floating cargo of Bahia sold at 25s per cwt.

COFFEE.—641 casks 41 barrels 366 bags plantation Ceylon sold without material alteration from previous rates. 535 bags yellowish native Ceylon at 57s 6d to 58s. 48 casks 320 cases East India part sold at 63s 6d to 74s for greyish to colory. 925 bags Rio were taken in. 448 bags Jamaica bought in at 57s 6d to 58s per cwt for good ordinary. 400 bags St Domingo taken in at 53s to 56s.

RICE.—5,777 bags Rangoon by auction.

WHITE PEPPER.—A large demand for white, and 6¼d per lb paid for Singapore.

SAFFLOWER.—205 bales Bengal were chiefly taken in.

OILS.—762 casks cocoa-nut by auction chiefly sold. Ceylon, 40s 3d to 41s 6d; Sydney, 33s to 37s 6d. 273 casks palm sold at 37s 6d per cwt for good.

TALLOW.—1,380 casks Australian by auction, chiefly sold at about last Friday's prices; mutton, 41s 6d to 43s 6d; beef, 40s to 41s 6d. 463 casks South American were chiefly taken in.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market continues quiet, with little doing. Dutch crushed is without any particular change, buyers holding back at present.

GREEN FRUIT.—The report of Messrs Keeling and Hunt states that on account of the limited stock of St Michael and Valencia oranges they have further advanced in price, and which is likely to be maintained. Lemons of good quality in demand. Seville sours scarce. Barcelona nuts in request. Black Spanish and Brazil without alteration. Large arrivals of West India cocoa-nuts, and prices well supported.

DRY FRUIT.—The market for currants has been active all this week, and shows 1s to 2s better prices, with prospect of further improvement, owing to the continued reduction in stock. Raisins are very firm.

COLONIAL WOOL.—The sales are closing without much change in any way; competition continues active.

FLAX.—Market firm.

HEMP.—Market for Russian very quiet. Manilla, good quality, scarce, and commands high prices. Since last week's sales of common quality, several parcels have been sold at an advance of 2/ to 3/ per ton, in some cases even higher prices have been obtained.

SEEDS.—The seed trade is not very active, but prices are firmly maintained.

TOBACCO.—There has been rather more business doing during the past week in North American, but the total sales have only been of a limited character. Prices continue steady, and holders of good descriptions demand full market rates. In other growths there has been a fair business done. Prices of some descriptions have advanced considerably.

LEATHER.—There was again a small supply of fresh leather at Leadenhall on Tuesday, and although the transactions were not on a large scale, the demand continued good for the articles which have recently been the most wanted. Light crop hides, light English butts, bellies, English and foreign, light dressing and shaved hides, and heavy calf skins were especially scarce and in request. Prices were well supported.

METALS.—We have somewhat stronger prices generally, but not a great deal of business. Copper has improved by about 2/ a ton all round. Tin has been rather neglected, and prices are a shade easier. Iron is steady. Spelter is a trifle dearer upon a good home demand. Lead is firmer by about 2s 6d per ton. Tin plates are well maintained.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	45	0
Fat by ditto	2	1
Yellow Russian ditto	46	0
Melted stuff	33	6
Rough stuff	17	0
Greaves	19	0
Good dregs.....	6	0

Imports for the week, 2,228 casks.

PROVISIONS.

A very inactive feeling has prevailed in the trade during the week, and prices of most goods have had a drooping tendency. Prime sizeable Waterford bacon we quote 1s less, being 63s, f.o.b.; heavy, 60s; ditto Cork and Limerick, 60s, landed. Butter trade very limited. Fine English cheese sells well at high prices. Cheddar, 92s. Cheshire, 90s. Hams are very quiet.

METROPOLITAN CATTLE MARKET.

MONDAY, Feb. 20.—The total imports of foreign stock into London last week amounted to 3,952 head. In the corresponding week in 1870 we received 3,426; in 1869, 6,612; in 1868, 843; and in 1867, 4,118 head.

There has been a want of animation in the cattle trade to-day. Increased supplies of stock have been on offer, and prices have favoured purchasers. The supply of beasts has been more liberal, owing to the arrival of a fair number of Spanish. In all breeds sales have progressed slowly, at a reduction of 2d per 8 lbs. The best Scots and crosses have been disposed of at 5s 6d to 5s 8d per 8 lbs. There has been a fair show

of sheep in the pens. Trade has been dull; but prices, although tending downwards, have not been quotably lower. For the best Downs and half-breds the extreme quotation has been 6s per 8 lbs. Lambs, of which a fair supply has been on offer, have sold at 8s per 8 lbs. Calves have been in limited request, and the demand for pigs has been inactive.

SUPPLIES ON SALE.

	Feb. 21, 1870.	Feb. 20, 1871.
Beasts	3,289	3,020
Sheep	18,580	15,720

Veal	5	0		5	4	Small pork	4	8		5	0

Lamb, 7s to 8s.

HOP MARKET.

BOROUGH, Friday, Feb. 24.—A decidedly quiet feeling has pervaded the hop market. The business transacted has been less extensive; nevertheless full prices have been realised. Mid and East Kent, 40s to 140s; Weald of Kent, 40s to 75s; Sussex, 35s to 70s; Farnham and country, 75s to 112s; olds, 20s to 50s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Feb. 24.—Fair supplies of potatoes have been on sale. There has been a moderate inquiry, and prices have ruled as under:—English Shaws, 80s to 110s; ditto Regents, 70s to 90s; Scotch Regents, 75s to 90s; and Rocks, 65s to 75s per ton.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Feb. 24.—There is no change to report in our market this week. The inquiry for home consumption continues fair, but the lightness of stocks precludes transactions from assuming any importance.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Feb. 24.—At this market to-day wheat was 1d to 2d dearer, with a good consumptive demand. Flour was a shade better. Indian corn and beans rather worse to sell.

WAKEFIELD, Friday, Feb. 24.—At this market to-day wheat was held firmly for last week's prices, but the demand was chiefly for fresh reds. Barley in less supply, and fine qualities fully as dear. Other articles unchanged.

The Gazette.

TUESDAY, February 21.

BANKRUPTS.

Thomas Hutchings, Alwin road, Lewisham road, contractor.
Alexander Van Praag, Crown street, Soho, tobacco dealer.
William Davies Beckwith, Bury, Lancashire, wine merchant.
Edwin Crossley, Halifax, boiler maker.
Thomas Davies, Merthyr Tydfil, innkeeper.
Frederick Bailey Egan and Walter Raynham, Manchester, comedians.
David Goldthorp, Cleckheaton, Yorkshire, cardmaker.
John William Higgins, Exeter, cheese dealer.
William Howard Irwin, Northam, Devonshire, butcher.
Frederick James Roberts, Birmingham, accountant.
Percival Frederick Spear, Warsash, Hampshire, cement manufacturer.
Jane Stow, Nelson, Lancashire, plumber.
Maximilian Whatman, Northiam, Sussex, farmer.
William Sproston Wood, Oxford, victualler.

SCOTCH SEQUESTRATIONS.

Adam Lumsden, North Middleton, Edinburghshire, builder.
Alexander Rattray Brown, Govan, hatter.
John Pattison, Glasgow, calenderer.
Andrew Steuart M'Allan, Glasgow, commission merchant.
William Haggart, Dundee, wine merchant.
John Henderson, jun., Helensburgh, ironmonger.
James Strang, Bathgate, Linlithgowshire, spirit merchant.

THE GAZETTE OF LAST NIGHT.

BANKRUPTS.

John Hamilton Glassford, Great St Helen's, merchant.
John William Malam, Mount Ephraim road, Tunbridge Wells, Lieutenant in Her Majesty's 5th Regiment Royal Irish Lancers.
James Henry Eden, Albion hotel, Edinbridge, hotel keeper.
Thomas Wood, Warryfield farm, Walford, farmer.
John Carroll, Chapel street, Bedford Leigh, draper.
William Lesley, Portobello works, Sheffield, pearl and ivory dealer.
Christopher Pickering, Thirsk, butcher.
James Redfern, Kingston-upon-Hull, fish dealer.
Thomas Stevenson Usher, Yeadon, doctor of medicine.

SCOTCH SEQUESTRATIONS.

John Gordon, Glasgow, potato merchant.
William Barry, Bernard street, Leith, photographer and artist.
James Moon, Dundee, merchant.
Frank Simpson, Glasgow, bookseller and stationer.
Richard Craig Falconer, Dalkeith, tinsmith and plumber.
Andrew Reid, Trochrie, by Dunkeld, turner.
Margaret Wilson and Sons, Hawick, wool merchants and skinners.

Forward an ILLUSTRATED CATALOGUE free on application.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—
"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

H. J. NICOLL'S SPRING OVERCOATS, of Waterproof Tweed Cloths. 20s.; do., with silk lapels, 21s.

H. J. NICOLL'S SPRING OVERCOATS, of Waterproof Melton Cloths, 42s.

H. J. NICOLL'S SPRING OVERCOATS, of Waterproof Cheviot Cloths, with silk facings, 52s 6d.

H. J. NICOLL'S SPRING CHEVIOT TROUSERS, 14s.

H. J. NICOLL, Merchant Clothier to the Queen, the Royal Family, and the Courts of Europe, Army, Navy, and Civil Outfitter, 114 to 120 Regent street, and 22 Cornhill, London; 10 Mosley street, Manchester; 50 Bold street, Liverpool; No. 39 New street, Birmingham.

DINNEFORD'S FLUID MAGNESIA.—The medical profession for thirty years have approved of this pure solution of Magnesia as the best remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion; and as the best mild aperient for delicate constitutions, especially adapted for ladies, children, and infants.

DINNEFORD and CO., Chemists, 172 New Bond street, London, and of all other chemists throughout the world.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Umbilical ditto, 42s and 52s 6d; postage, 1s 10d. Post-office orders to be made payable to John White, Post-office Piccadilly.

NEW PATENT

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS &c. They are porous, light in texture and inexpensive and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

TEETH.—MR WEBB (MANY years with Mr Eskell, of 8 Grosvenor st., Bond st.) supplies ARTIFICIAL TEETH which cannot be surpassed for use, comfort, appearance, and durability. Painless treatment guaranteed throughout, as with all other operations; all consultations free. Terms moderate. N.B.—Any number of teeth made in two or three hours, and repairs effected whilst waiting. At home daily until eight, at 27 New Bond st. His treatise, which is well worthy of perusal, free for two stamps.

MESSRS GABRIEL'S extraordinary improvements in ARTIFICIAL TEETH and PAINLESS DENTISTRY, Patent No. 562, improved Jan., 1871, afford the following advantages:—

1stly. EXTREME LIGHTNESS (being completely self-supporting), combined with greater efficiency, durability, and comfort, thus avoiding the covering to the palate hitherto considered an indispensable adjunct to Artificial Teeth.

2ndly. MODERATE CHARGES, accounted for by their extreme simplicity of construction, while the highest class of mechanism and materials only are employed, combined with an experience of half-a-century in their adaptation.

3rdly. ABSOLUTE IMMUNITY FROM PAIN, the compressed NITROUS OXYDE GAS, after an experience of many thousand cases in hospital and private practice, ensuring this desideratum with an absolute certainty, the laughing gas being not only absolutely free from danger but positively pleasant.

4thly. So successful an imitation of nature (springs being entirely dispensed with) that detection becomes an impossibility.

MESSRS GABRIEL,
64 LUDGATE, CITY, and 56 HARLEY ST., CAVENDISH SQ., London.

MESSRS GABRIEL'S
CELEBRATED PREPARATIONS
FOR PRESERVING AND BEAUTIFYING THE TEETH
Are sold by all Chemists and Perfumers in every town.
Price 1s 6d and 5s.

MORE CURES (THIS WEEK) OF Coughs, Asthma, and Tightness of Chest, by Dr Locock's Wafers.—From Mr Fell, Chemist, 53 Dewsbury road, Leeds, Feb. 13, 1871.—"Having had occasion to use Dr Locock's Wafers myself for tightness of chest, I found them answer admirably, and I hear the highest eulogium from others who have tried them for coughs, asthma, &c., &c."—They give instant relief and a rapid cure of asthma, consumption, coughs, colds, and all disorders of the throat and lungs. They have a pleasant taste. Price 1s 1½d, 2s 9d, and 4s 6d per box. Sold by all druggists.

HAIR DESTROYER.—248 HIGH Holborn, London.—ALEX ROSS'S DEPILATORY removes superfluous hair from the face, neck, and arms, without effect to the skin. Price 3s 6d, sent for 54 stamps. Had of all Chemists.

HAIR COLOUR WASH.—BY damping the head with this beautifully perfumed Wash, in two days the hair assumes it original colour, and remains so by an occasional using. 10s 6d, sent for stamps. ALEX. ROSS, 248 High Holborn, London, and all Chemists.

HOLLOWAY'S OINTMENT AND PILLS.—Order and Ease.—These remarkable remedies surpass every other medicine for general family use. The ointment has only to be perseveringly rubbed twice a day over any afflicted organ, to penetrate and sooth it; its action is alterative, anodyne, and healing. Its tonic properties are obtained through the wholesome influence it exerts when rubbed over the stomach and liver, on both of which it produces the happiest effects, by making their secretions abundant and natural. Holloway's pills should be simultaneously taken. The combined action of these safe yet potent remedies over the stomach, liver, bowels, kidneys, muscles, and nerves, is immediate, beneficial, and lasting. Holloway's preparations restore order, ease, strength, and happiness.

DANUBIAN PRINCIPALITIES LOAN OF 1864.

Notice is hereby given, that the Half-Yearly COUPONS due 1st March, 1871, and the BONDS DRAWN for Redemption at PAR may be presented for Payment, on and after that day at the IMPERIAL OTTOMAN BANK (London Agency), 4 Bank buildings, E.C. They must be entered on forms, which can be obtained on application, and be left three clear days for examination before payment.

WILLIAM W. LANDER, Secretary.

IMPERIAL BRAZILIAN FIVE PER CENT. LOAN of 1871, for £3,000,000.

His Majesty the Emperor of Brazil, having by decree of 16th November, 1870, authorised a LOAN of £3,000,000, in conformity with the Law, No. 1,764, of the 28th June, 1870, Messrs N. M. ROTHSCHILD and SONS have to announce that they are ready to receive at their office SUBSCRIPTIONS for this Loan.

It will be emitted in bonds to bearer for £100, £500, and £1,000 each, carrying interest from the 1st February, 1871, at 5 per cent. per annum, with coupons payable half-yearly in London, on the 1st February and 1st August each year, the first half-year's dividend being due on the 1st August next.

The price of emission is 85 per cent., payable as follows:—

£5 on application.
15 on allotment.
20 on May 18th,
25 on July 17th.
24 on August 21st.

£89 per cent.

The failure to pay the whole of the instalments subjects all previous payments to forfeiture. Subscribers who prefer paying the instalments by anticipation of the above periods will be allowed a discount at the rate of 5 per cent. per annum.

The redemption of this Loan will be effected by a sinking fund of 1 per cent. per annum, to be applied by purchase of Bonds in the market when the price is under par, and when at or above par by drawings by lot. The operations of this sinking fund will commence on the 1st February, 1873.

Applications for these Bonds must be made in the annexed form, and accompanied with a deposit of 5 per cent. on the amount applied for. In case the allotment should not require the whole deposit the surplus will be returned; and if the deposit be insufficient for the first instalment on the amount allotted, the balance required must be paid forthwith.

In case of no allotment being made the deposit of the applicant will be returned.

Scrip will be issued, which will be exchanged for the Bonds after payment of the last instalment, as soon as they are ready for delivery.

Lists will be opened on Thursday, February 23rd, and closed on or before Wednesday, 1st March next.

New court, St Swithin's, 23rd February, 1871.

FORM OF APPLICATION.

IMPERIAL BRAZILIAN FIVE PER CENT. LOAN of 1871, for £3,000,000.

To Messrs N. M. Rothschild and Sons.

GENTLEMEN,— request that you will allot to £ (say £) nominal capital of the above Stock, on which enclose the required deposit of five per cent., or £ , and agree to accept that amount, or any less sum that may be allotted to and to pay the balance of such allotment according to the conditions of your Prospectus of the 23rd February, 1871.—Gentlemen, your obedient Servant,

Name at length .....
Address.....

London, February, 1871.

EDUCATION IN GERMANY.— ANGLO-GERMAN ESTABLISHMENT, Bonn-on-the-Rhine, founded in 1847.—The Principal, Herr THOMAS, prepares Gentlemen's Sons for the Army, Civil Service, and Mercantile pursuits. German and French are constantly spken in his establishment, where the comforts of an English home are provided by an English lady (Mrs Thomas). The highest references given.—Apply to Herrn Director THOMAS Beer Strasse, Bonn-on-the-Rhine.—Frequent escorts

KINAHAN'S LL WHISKY.

This celebrated and most delicious old mellow spirit is the very

CREAM OF IRISH WHISKIES,

in quality unrivalled, perfectly pure, and more wholesome than the finest Cognac Brandy.

Note the words—

"KINAHAN'S LL WHISKY,"

on seal, label, and cork.

Wholesale Depôt, 6A Great Titchfield street, Oxford street, W.

DUNVILLE'S OLD IRISH WHISKY, BELFAST, of same quality as that supplied to the International Exhibition of 1862, Dublin Exhibition of 1865, Paris Exhibition of 1867, and now regularly to the House of Lords, the quality of which is equal to the finest French brandy, may be had direct from Belfast, in butts, hogsheads, quarter-casks, and cases.—Quotations on application to Messrs Dunville and Co., Royal Irish Distilleries, Belfast; or at their London offices, 4 Beaufort buildings, Strand, W.C

ALLSOPP'S PALE OR BITTER ALE.—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for their SEASON-BREWED PALE ALE, in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent, and at the Branch Establishments.

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Draught and Bottles, genuine, from all the most respectable Wine and Beer Merchants and Licensed Victuallers, on "S. ALLSOPP'S PALE ALE" being specially asked for.

Registered at the General Post Office as a Newspaper and for Transmission Abroad.

NOTICE.

COMMERCIAL HISTORY AND REVIEW OF 1870. *On Saturday next, March* 11, *will be published, in continuation of the Series commenced with* 1863, *a Supplement under the above title, containing a careful Digest of the leading Merchants' and Brokers' Circulars in the different branches of Trade, Returns of Prices, Accounts of the Banks of England and France, Appendices relating to special subjects of Mercantile Interest connected with the Year, &c.; the object of the Supplement being to place in possession of our readers a Commercial History of* 1870 *worthy of preservation and adapted for reference.*

On Feb. 25 was Published, No. II., New Series, Price 8d and 8½d,

THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL, for February, gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains a Financial Record of the Month; New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Finance, Insurance, and Miscellaneous Companies; New Companies and New Capital. Prices made up to February 22.

Advertisements for next Number, to be published on April 1, must be sent to insure insertion on or before March 30.

OFFICE—340 Strand.

THE EXPECTED FOREIGN DEMAND FOR MONEY.

The indemnity to be paid by France is 200,000,000*l*, less the share of the French debt to be apportioned to Lorraine and Alsace, and less also the value of the railways passing through those provinces (say 25,000,000*l*). This vast sum is to be paid—40,000,000*l* in this year, 80,000,000*l* in next year, and the remainder in the year after,—the value of the debt and railways of the ceded provinces being deducted from the last instalment, and the evacuation of the now occupied provinces being gradual, and proportioned to the payment of the indemnity. A report was circulated that the Germans would take stock, not money; but this is not so. Probably they feared that stock so issued might be tainted in the French mind, and being almost necessarily earmarked and distinguishable from other stock, might, in some contingency, be repudiated. And in this they were probably right. We, at least, should have much preferred other stock.

This information does not enable us to judge completely what the effect on the money market here will be, but still it gives considerable light. On the whole—judging both from probability, and from such information as we can obtain—we expect that the French will bring out a considerable loan in London—or rather partly in London—within a reasonable period, and as soon as they can; and a large part of this, though not the whole, they will pay over to Germany. Some they must keep for their own purposes. As to this loan, one thing, and perhaps only one, may be said very confidently, and that is, that the French will get very little abroad unless they subscribe very largely at home. If *they themselves* show a discouragement as to the state of their finance, or a distrust of their present Republican Government, no one else can be expected to lend. If those most interested, and those who ought to know best, in the least shrink, no others can be expected to aid.

The moment is indeed very perilous to French credit. The new charge, taking what they will have to borrow for themselves, and what they must borrow to pay the Germans, cannot be less than 17,000,000*l* or 18,000,000*l*. And this they will have to meet either by a reduction of expenditure, which on a huge scale is always difficult, or by an increase of taxation out of the peculiar and inelastic resources which a short time since we elaborately described. And they begin it with the worst omens. The proper remedy for French finance is Free-trade and Income tax; but M. Thiers and M. Pouyer-Quertier are Protectionists, as Mr Newdegate is a Protectionist. They will try to augment the Customs' duties, just as we tried in 1839, in the days of the additional 5 per cent. on Import duties, which brought in so little at the time, and though now forgotten complicated calculations so much. The expedients for setting right French finance will, we fear, be as miserable as the finance itself.

Still if the French largely subscribe themselves, they will obtain the money they require. Foreigners will act upon the wise faith that so great a nation and so rich a country will always pay and be solvent somehow—no matter what may be the temporary difficulty, or how detestable the nostrums of her financiers. Two questions then remain—What will be the effect here of this loan to France, in as far as we make it? and what will be the further effect of the payment of a great part of that money over to Germany?

The first effect, as we showed last week, will be some disturbance of the bullion market, and a consequent tendency to rise in the value of money. But how much that will be we

cannot yet say, because we do not yet know the state of the Bank of France. We have had no account of her interior since September, and till we know what available gold and silver there is in France, it is quite idle to consider how much we ought to send thither. Still we must assume that a considerable sum will soon go. The Bank of France before long will wish to resume specie payments, the more so as her credit has never been affected, and as her notes were at one time even at a premium in the motley currency circulating at Versailles. As soon as she does or as she thinks of so doing, she must accumulate a hoard of gold and silver to meet her liabilities; and, as usual, her wants and position will be a cardinal fact in the state of the money market.

When the money is paid to the Germans probably they will use most of it in three ways. First. In keeping a certain sum in bullion, to which, as we have said, both the military habits and the cautious matter-of-factness of the nation much contribute. Secondly. In paying off debts. In the recent loans of the North German Confederation an express power is taken of paying them off at par on giving six months' notice. And this power no doubt the Government will largely make use of. Thirdly. In making investments in saleable securities, to be used in case of future war or other difficulty.

Of these three uses of the money the cooping up of the bullion at Berlin is the only one which will tend to raise the value of money. For a moment it will be on a great scale what the transmission of bullion from the Bank of England to Scotland under the provisions of the Act of 1845 is upon a small scale. In that minor case, at critical times of the money market, it has been found that the transmission of gold from London, where it can be used, and its retention in Scotland, where it is not used, raises the value of money. And so here. If a large sum of bullion be taken from the great Exchange centres, London and Paris, and be forcibly fettered at Berlin, where there is no need for it, the value of money will rise, because much money is reduced to a state of comparative inefficiency. But this effect will be temporary only. Other bullion will be attracted to France and England by the high rate of interest, and so we shall have enough for our purpose. The uses of the indemnity in the repayment of the German loans, and in the purchase of foreign securities, are only ways of scattering through the money markets of the world the money which the collection of the indemnity drew together. Substantially it will send back the money to the place from which it came.

On the whole, therefore, the better opinion is that the effect of the indemnity will be much less than was thought, and even in that degree will be temporary. Still, looking to the immense demand on it for discounts, the Bank of England was indisputably right in raising its rate, both to suit the present emergency, and to provide for future contingencies.

THE GERMAN TERMS OF PEACE.

It is very difficult, it is perhaps nearly impossible, to write upon a subject like the terms of peace demanded by Germany from France, without admitting the intrusion of any prejudice. So many and so great results may flow from the treaty, so many principles are involved in its execution, so many interests will be affected by its details, that it is hard indeed for any publicist to be sure that he is absolutely fair. The object of the Economist, however, is to throw white light upon the subjects within its range, and we will try to explain without prejudice our reasons for believing that in the terms Count Bismarck has demanded and obtained from France, he, or the group of princes, generals, and statesmen whose mouthpiece he is, have been unwisely hard. To make this clear we must of course reject one or two considerations on either side, which with many of our readers will weigh very heavily indeed. We reject absolutely, for example, the idea of the unalterability of European boundaries. European boundaries have always been altering. Nobody objects to a "rectification of frontier" which affects only a few villages; and it is impossible to show that it is either immoral or illegal to sacrifice a province to the general welfare of the world. That argument, in the present case, applies in favour of the Germans; but, on the other hand, we must reject absolutely the argument drawn from previous possession. Nations have no more right to provinces they once held, because they once held them, than men have to properties they have once possessed, for which they have a sentimental regard, but which they have sold for a consideration. Sweden has *not* a moral right to take Pomerania from Prussia; Germany has not a moral right to take Courland from Russia; England has not a moral right to revindicate Calais; France has not a moral right to the Rhine. In the face of possession, in fact, only two rights can be pleaded—the will of the people, or the general welfare of the world, to be decided by the general verdict of the parliaments or public opinion of that world.

It follows that while we deny the right of Germany to claim Alsace as a previous possession, we equally deny the right of France to assert the absolute unchangeableness of her boundaries, and hold that Germany being victorious had a claim to such terms as would make her reasonably secure. It is for the benefit of the world that she, as clearly the greatest military power within it, should be so far reasonably secure as to be exempt from the necessity of perpetually preparing for war to ensure her security. It is also for the benefit of that world that she should gain this security at the cost of the Power which originally attacked her. Some fear of suffering there must be to keep the nations from unjust war or war would be endless; and experience proves that no fear is equal to the fear of amputation, of partial and localised death. Consequently it is for the benefit of the world that Germany should take as much of French territory as will add to her real security, and the only question to be discussed is how much will add to it? That is as favourable a method as it is possible to use for the consideration of the German claim, and still that method is far from favourable to the terms of peace exacted. It is very doubtful, to begin with, whether any territory obtained by force from a great nation, in opposition to the will of its local population, can be a security, whether the danger of treason thence arising is not greater than any geographical advantage. Supposing the dislike of German rule universal in the ceded territories, Germany would gain nothing, for the contribution of "Elsass" to her forces would be ultimately 60,000 men, and the desertion or revolt of that number of soldiers in the midst of a war with France would be far more injurious to her than the gain of revenue and position would be beneficial. Without, however, pressing that possibility, which Germans deny,—they holding in the teeth of all facts that the tie of race is stronger than the tie of sentiment,—it is certain that no geographical possession can outweigh the insecurity caused by the hatred of thirty-five millions of a neighbouring and highly civilised and wealthy people. It is certain that in claiming Metz the Germans have earned that hatred, and nearly certain that if they had adhered to the line of the Vosges they would not have earned it. The French no doubt would, as the Germans always say, have been very bitter at their defeat; but bitternesses of that kind die away, as we know from the example of Scotland and England, and England and France, while all other hatreds to be efficacious require the provocation of fear. *The possession of the line of the Vosges would have been no menace to France. The possession of Metz is.* Alsace might have been regretted, but Metz will be feared, and we hate those we fear. With Alsace Germany, though better situated for defence, and therefore less likely to be attacked by France, would have been but little better situated for offensive war, while France, left in possession of her impregnable stronghold could have stood on the defensive with a quiet mind. Now, with the German frontier thrust forward a hundred miles, with the strongest fortress in Europe garrisoned by its most powerful army within 180 miles of her capital, France will be perpetually anxious for her independence, perpetually seeking an opportunity of making herself safe, perpetually open to an alliance which may enable her to gratify her hatred. The Germans have in fact purchased the perpetual enmity of France at the price of a fortress, and France, after all her losses, is still a country of 35,000,000 of men addicted to military life, fertile in military genius, possessed of a singular power of propagating their ideas, and with firm though not numerous allies in the Alsatians and the Poles. Supposing, what is quite probable, that she ultimately secures the alliance of Russia, Germany will be placed between two fires,—two nations controlling together ninety millions of men and at least two millions of soldiers, with no frontier to the North East, and a frontier to the West honeycombed by treason.

That is no security. So little is it like security that Germany will be compelled for many years to remain perpetually under arms, with her commerce crippled by the expectation of war, and her people wearied by the impossibility of obtaining the liberty which when not at war they desire. The demand for Metz in fact turns what might have been a peace into an armed truce, and is therefore in the interest of Germany most unwisely hard.

So also is the demand for money. To some money we may at once admit Germany was entitled. France began the war, and it was reasonable to ask that the sum raised by Germany to defend herself should be repaid. But to demand four times that sum, and thus perceptibly to increase the national debt of France, was most unwise, inasmuch as it tends to prevent the prosperity which renders a declaration of war so difficult to rulers. The greatest and best security of Germany has been the fondness of the French peasant for increasing his hoards, for putting together franc after franc, and rood after rood of land; and a period of prosperity following a terrible defeat would have made this disposition irresistible. The excessive pecuniary demand now made will, however, prevent this prosperity, and compel the French Government not only to increase the debt, but to lay on new direct taxes, which will be popularly known as "the taxes for Prussia." The French peasant, already impatient of taxes to an unpatriotic degree, will regard this new contribution with loathing, as a tribute perpetually payable to the foreigner, and will be at the disposal of any Government which tells him that the way to remove the burden is to gain a victory over Prussia. He, the man in all France most inclined to peace, will welcome war as a possible source of pecuniary relief; and the strongest security against hostilities will be changed into a new provocation to undertake them. The indemnity, therefore, diminishes the indirect securities of peace without adding much, if anything, to the direct. Its receipt indeed may tend greatly to reduce the latter by removing the greatest difficulties in the way of a military policy at Berlin—namely, the reluctance of all Germans to bear taxation, and the reluctance of the Hohenzollern dynasty to encumber itself with debt. The German army can henceforth be kept at its fullest strength without money levied from the people; and an army thus self-supporting, confident of victory, and accustomed to war, is certain after a brief rest to long for new fields of enterprise. The indemnity therefore in its extravagant amount incites at once the French peasant and the German officer to war, and therefore diminishes directly the securities for peace, and especially for that kind of peace which commercial men desire. A truce, or condition of armed preparation for war, is worse for them than war itself, for it makes calculation nearly impossible and at last produces the feeling so general on the continent in 1869, that war itself would be almost a relief. In the interest of Germany itself, therefore, we cannot but pronounce the indemnity, like the demand for Metz, unwisely hard.

It is the more unwise because of a feeling which is possibly sentimental but is none the less powerful and widely diffused on that account,—namely, that the extortion of money, of actual cash, by battle is an unworthy use of victory. There seems to be no distinct reason why a victorious State, if willing to claim territory, should not also be willing to claim money; but there is no doubt that the instinct of mankind is against the operation. There is a sentiment about it akin to that which despises the mercenary soldier, though he is pursuing a trade always held in honour, and not in itself immoral. For a State to go to war to get money would be considered infamous, and to exact huge sums of money as the consequence of victory suggests a belief that money may next time be the object as well as the accidental reward of battle. A flavour of huckstering is introduced into the relations between States, which degrades the character of statesmen, and is sure sooner or later to infect the character of the people. The country which pursues or allows such a policy is certain to be looked upon with distrust or even hatred, the wealthy everywhere feel that its policy is a menace, and Germany will suffer for years from the suspicion of all nations, irritated by the idea that she is not only the strongest Power in the world, but is willing to use that power in order to fill her Exchequer. No such idea would have been created by a demand for the repayment of her loans, say 45,000,000*l.*, and in exceeding that limit the German chiefs have, we repeat, been most unwisely hard.

INDIAN FINANCE.

Mr Grant Duff made this year a very able and interesting speech on Indian finance. For its purpose it was perhaps the best of his speeches either here or in Scotland. In his former speeches there has been a little superfluous ornateness—a little tinge of the *litterateur*. Something of this is of course necessary to those who have to win their audience by the charms of expression, who know that they will not be listened to unless they speak pleasantly. But in the responsible and authoritative discussion of complex affairs, all important listeners are ready to attend. They do not wish to be often distracted, even by pleasant illustrations; they wish to be told the main things concisely, simply, and as they are.

On one point, and that the most cheerful, Mr Grant Duff's speech was, to us at least, most disappointing. He announced that for the current year "opium had come to "the rescue," and there would be a slight surplus; but as we have often explained, the opium revenue is far too uncertain to be dealt with in this manner. What man of business carrying on "a vast distillery" would ever think of saying at the end of a desponding year that "rum had "come to the rescue," and that he should have something to live on. All safe men in business live not on each year's maximum profits, but on the average profits of several years. They issue for "supply services" only the amount they are sure, or think they are sure, of for a continuance. They carry to a "rest," as the Bank of England calls it—to a fund for equalising dividends—all beyond that sum. Usually Governments do not need to use this precaution, because they live on the produce of taxation, or something analogous to a fixed income. But when Government goes into business, it must conform to the rules of business. In Bengal, the Indian Government is a monopolist manufacturer—the greatest perhaps that exists in the world. The revenue depends on the price of the articles which it sells. In consequence there is a panic when opium goes down, and excessive cheerfulness when opium gets up. Anyone—individual or Government—that lives up to the margin of a business income will live in chronic difficulties.

If it was only a matter of account we should not much care. Whether certain years are called years of deficit or years of equilibrium is not material. But the error affects policy too. Only last year some Government works were arrested, and the estimates of others were cut down, because the finances did not look as well at the end of the year as at the beginning, and a part of the change was due to a momentary fall in opium. But towards the end of the year opium got up, and there was a surplus after all. So that in whatever degree the change of policy was due to a miscalculation of the opium revenue, it was due to a blunder; and not to a casual and excusable blunder, but to an inevitable blunder inseparable from a bad system—the system of relying on a most variable income, depending on the sale of a commodity, as if it were the produce of a tax or a property.

We hope the committee just appointed will be able to set this right. It may be difficult for them to augment the Indian revenue, but it is at least far less difficult for them to ensure that the accounts of the actual revenue are rightly kept. Another point for their consideration will be the recent "decentralisation" of Indian finance. This may be described as putting the "provinces" on fixed allowances for special purposes—for what may be intelligibly, though vaguely, called "improving purposes." For education, for public works,—each province is to receive from the Imperial revenue only so much, and no more. The rest, if any, they are to find by new taxes of their own, which they are to choose for themselves, and impose on their own responsibility. We do not say or hint that this is wrong, but it is plainly a change of the first magnitude, and therefore to be investigated if anything is to be investigated. It creates "many Indias" for financial purposes, each with different revenues and different expenditures. To delegate an unlimited power of expenditure on condition of its being supplemented by an equal increase of income may be right or wrong, but it is a great thing to do. Suppose a sanguine Bombay governor engages in a course of outlay, practically permanent, in reliance on a precarious revenue? Suppose an efficient but dangerous Madras governor gains a great revenue for two years but by odious taxes that cause a rebellion in the

third year? These and many other such contingencies require the most careful consideration.

On most points of Indian finance, Mr Grant Duff, most wisely considering the approaching appointment of an influential committee, reserved his judgment. But he was emphatic and, as we believe, just in his repudiation of large loans for public works. Such money is obtained by such a country as India with such great ease, that it is sure to be spent with very little care. When it has all been borrowed, and all been spent, we shall have most of what is important still to do.

THE WESTMEATH COMMITTEE.

It was obvious before Monday night came that the Government had made a mistake in moving for a Committee (secret or otherwise) to investigate the state of a particular Irish county, and to find remedies for the unlawful conspiracy there existing. Mr Chichester Fortescue put the best possible face on the matter in replying to Mr Gathorne Hardy. So far as it was possible to justify so very unusual a motion, he justified it, and certainly made it look far more plausible than Lord Hartington had done in his laboured, and evidently up-hill speech. Mr Fortescue put the case not on the ill-success of the Government's legislation for Ireland, but on its marvellously good success in every part of the country except Westmeath and the borderland of the neighbouring counties. It was a curious local problem, according to Mr Fortescue, why a remedy which had succeeded everywhere, except in Westmeath, had failed there; there was evidently some special local condition altering the political and social circumstances of Westmeath which was absent in almost all other parts of Ireland. Here there seemed room for special inquiry, and for a careful analysis of the evidence of the best witnesses of all classes. Why should not such an inquiry be made by a Committee of the House of Commons, just as an inquiry into local finance, or local corruption, or local education would be made by a Committee of the House of Commons? The answer seems to us to be plain enough,—that in this case there is really nothing to investigate. The Government knows, and does not even pretend not to know, the peculiar features of the Westmeath crimes. It knows that there is a Riband conspiracy; knows perfectly well who are the members of that conspiracy, though it can get no good legal evidence against them; knows that they strike a certain terror into magistrates as well as proprietors and farmers; and knows that a suspension of the *Habeas Corpus* Act, for this particular district, would meet the difficulty. There is nothing for the Committee to report on except the extent of the terrorism and the extent of the conspiracy; and on both these points the Government is itself very well informed, while there is no particular advantage in the public being well informed as to the details. It is important that the public should know that Government is not exaggerating the facts of the case; but in this matter the general impression has rather been that Government has hardly ventured to appreciate them at their full significance. The use of a Committee or a Commission is to get at the less obvious symptoms and facts of a complicated case—a case not yet ripe for legislative or administrative action. There is, as far as we can see, in Lord Hartington's statement, and Mr Gladstone's amplification of that statement,—no sort of pretext for supposing that this is so now in regard to the crime of Westmeath. Neither of them pointed out one obscure feature which needs elucidation. Lord Hartington showed that there was a conspiracy, that the conspirators manage to hold their meetings within earshot and under the very eyes of the police without saying anything that can be proved to have a criminal object. He showed that the result was widespread terrorism. He showed that even the strong legislation of last Session did not cover the case, that what was wanted was the power to arrest without sworn evidence, and yet he did not venture to ask for that power without getting the authority of a Committee. Now surely that is not the purpose for which a Committee is useful. It is not the proper use of a Committee to break (to the country) the shock of the strong measures needed for the preservation of order. If the Government could honestly say that they do not know what to do to restore order in Westmeath without inquiry,—then a Committee (or a Commission) might properly be asked for. But they cannot say this. They intimate, in no uncertain terms, that the main duty of the Committee would be to receive formal evidence of facts already fully known to the Lord-Lieutenant, the Irish Secretary, and the Home Office. The only use of a Committee would be to back up the Government in asking for the power to do what the Government admits would, if done, be effectual. But this is rather the abuse of a Committee than its use. We do not want to see the administrative responsibility of a Government shaded off into vague recommendations of Committees of the House of Commons. The Government will get weaker and weaker if it is not to decide under full responsibility on all administrative measures. There would be great evil and no good in obtaining the sanction of one or two members of the Opposition, who are under no official responsibility, for the gravest recommendations of a Government that is.

We cannot doubt, then, but that Lord Hartington's motion was a blunder, and that the Government should itself have asked the House for such powers as would enable it to put down the Riband conspiracy in Westmeath. At the same time, errors of judgment of this sort will hardly affect seriously the position of the Government, while the only alternative still is a Cabinet headed by Mr Disraeli, and in which his must be the presiding mind. His very clever speech of Monday night contains a compendium of almost all the faults a Minister or candidate for the Ministry can make in treating a grave subject. It shows, above all things, a vastly stronger talent for demolishing an antagonist than for appreciating the grave duties and responsibilities of government. It indicates no steady grasp of the political situation, though a very clear grasp indeed of the party situation. Its highest cleverness consists in the shiftiness of a quick assailant who does not mind changing quite suddenly his picture of the true political position, in order to plant a new sting in his opponent. When the House would not endure his attempt to represent Lord Hartington's picture of the state of Westmeath as a picture of the state of Ireland, or of a very large part of Ireland, he turned round in a moment, and accepted the view that it was only a county which is thus disturbed, and asked if it were come to this, that the Government wanted a secret committee to devise means to govern a mere county. Now that was a very telling Parliamentary hit, but it threw a great light on Mr Disraeli's radically unministerial mind. He was not thinking or caring about the state of the island. He had not cared to form a true view of the Ministerial problem. He represented the state of all Ireland as utterly intolerable so long as he thought that view would go down with the House, and would be the greatest slur he could cast on the Cabinet. As it would not go down with the House he changed his point, insisted on the very *small* area of the disturbed district, and poured ridicule on the Government for asking a Committee to help it to govern such a wee district as that. Nothing could be sharper than the ready shifting of his position, and nothing better calculated to increase the distrust of his counsels. The late Sir Robert Peel in the same position would have shown that his whole mind was fixed on understanding the real state of the case,—would have taken pains to explain to the House what the exact limits of the administrative difficulty were. Mr Disraeli must have been taking pains to show how little he cared on this head, how much he cared for understanding the exact limits of the debating problem, how to make the existing Government ridiculous. The state of Ireland was a mere means to an end. He made it one thing while he thought it would throw most discredit on his antagonists, quite another thing the moment he understood that the weapon he had at first chosen would break in his hands. Then, again, he vilified the legislation of 1869 and 1870, calling it the "consecration of sacrilege" and the "legalisation of "confiscation," though he would be compelled to uphold that legislation if ever again he becomes the Minister of the Crown. In short, he availed himself of every device at the service of a Parliamentary Free Lance with as little scruple as if he had never known Ministerial responsibility, and would never know it again. If Mr Disraeli did but recognise it, his speeches are by far the most powerful speeches that could be made *against* a change of Ministry, for they are living pictures of the only political alternative before the nation,—an alternative far too deplorable to be adopted except in cases of extreme need. Mr Gladstone may commit errors, but Mr Disraeli speaks like the very spirit of error. Mr Gladstone may occasionally fear responsibility too much, but Mr Disraeli does not fear it at all. Mr Gladstone may endanger the Cabinet for the sake (as he thinks) of the

country, but Mr Disraeli would sacrifice the country for the sake of a momentary success against the Cabinet. The more damaging in one sense to his Opponents are the speeches of the leader of the Opposition, the more Parliament will shrink from displacing the Government; for these damaging speeches show how fatal is the only practical alternative to the support of the Government now in power. We may expect majorities of 81 or more for proposals even more objectionable than Lord Hartington's, so long as the moral result of a defeat would be the restoration of Mr Disraeli to power.

BUSINESS NOTES.

THE STAMP ACT.—Mr Crawford has given the following notices of amendments in the new Act, one relating to bills payable at sight, and the other to proxies:—

Mr Crawford.—In Committee on Stamp Act (1870) Amendment Bill:—To move the following Clauses:—

(Bills of Exchange at Sight.)

A bill of exchange payable at sight shall, for the purposes of "The Stamp Act, 1870," be deemed to be a bill of exchange payable on demand: provided that days of grace shall not be claimed and allowed in respect thereof.

(Stamps on Proxy Papers.)

In lieu of the Stamp Duty now payable under "The Stamp Act, 1870," there shall be charged, for the sole purpose of appointing or authorising any one or more persons to vote as a proxy at any one meeting at which votes may be given by proxy, for every person named as such proxy, one penny.

We have called attention to both the deficiencies in the Consolidating Act with which these notices deal, and there can be little doubt about the necessity for a prompt remedy. As respects bills payable at sight, the difficulty of alteration was due to the difference of practice in various parts of the country as to days of grace; but Mr Crawford's amendment gets over it by simply permitting the penny stamp to be used when bills at sight are in fact treated as bills on demand. The effect of the change will be that the stamp will denote the character of the bill. A bill at sight with a penny stamp will be a bill payable on demand: but where the stamp is *ad valorem*, it will imply that the days of grace are claimed. Possibly no harm would ensue to the revenue from treating all as bills on demand, but Mr Crawford's amendment anticipates any objection on that score. As respects proxies, there is a strong case for alteration, whether the law, as we think, and as those interested fear, has been most plainly altered by the Consolidating Act, without any real notice to the public; or whether, as we are informed, there is not possible a most ingenious construction, by which existing proxies containing more than one name will continue valid. In matters of important business there can be no dependence on such ingenious constructions. The revenue involved is insignificant, but there can be no complaint, at any rate, of Mr Crawford's amendment, which proposes to sanction a stamp of one penny for each person named in the proxy.

THE LONDON CHATHAM AND DOVER AWARD.—Lord Salisbury and Lord Cairns have now issued the second portion of their final award, which is principally taken up with the future form of government in the reconstructed company. The provisions, besides the interest they have in connection with so large an enterprise as the railway, are of still more general interest, as they are likely, from the magnitude of the reconstruction undertaken and the novel character of the arbitration, to form a precedent in similar cases. They provide very properly for changes in the mode of government, as the circumstances of the line may possibly change. At present the circumstances are that there is enough to pay the interest on the debenture stock and a small margin besides, though it is anticipated that this small margin will increase rapidly, so as to permit the full payment of the preference shareholders. It is accordingly arranged that the superior interest of the debenture and preference stockholders in the working of the line will be recognised—one vote being conferred for each 100*l* of debenture and preference stock, and one for each 300*l* of ordinary stock. The amount of each description of stock being nearly the same, it is clear that under this arrangement those who have the most present interest in the line will have the greatest power. But this arrangement will change on the occurrence of a defined contingency—viz., when the dividend on the preferential stock shall have been fully paid in each of two consecutive years. When that occurs it is evident that the debenture stockholders will have ceased to have much real concern in the working, and their right of voting is accordingly diminished to one for each 300*l* stock, the preference shareholders still retaining one vote for each 100*l*, and the additional interest of the ordinary stockholders being recognised by their receiving one vote for each 200*l* instead of each 300*l* of stock. There will be a third change when the ordinary stock receives a dividend of 2 per cent. per annum for two consecutive years—the preference and ordinary stockholders being then allowed equal votes, and the debenture stockholders altogether ceasing to vote. We are heartily able to commend the principle of the mode of government here prescribed. The preference shareholders ought perhaps to have more power at first as compared with the ordinary shareholders, while the latter should have more power in the last contingency, which we fear may not occur very soon; but the mistake is at least avoided of entrusting the management of the company either to holders of preference claims, who are so well covered that they have no practical stake in the working, or to holders of so-called ordinary stock, whose interest is so remote and contingent that they too have no practical interest in the working. The latter mistake especially is often committed in reconstruction schemes emanating from the Court of Chancery—the power being given to shareholders whose interest is quite shadowy, and the interests of the real shareholders being neglected. We know of one such line at the present moment, where the directors have no real stake themselves, and represent a body which is also without a tangible interest. The mischief of such arrangements is glaring, but the error is so common that the public have reason to be thankful to Lord Salisbury and Lord Cairns for setting a contrary precedent.

THE SIEGE OF PARIS.—We understand that the well-known French economist, M. Maurice Block, is at present engaged on what will undoubtedly prove a work of exceeding interest—the economic history of the siege of Paris. From an early period of the siege he devoted himself to the task of making notes and observations, and, besides what he himself observed, he has collected a mass of information on every point connected with the particular aspect of the siege which he will delineate. The work, we may say, will be none the less interesting, because the class of facts which M. Block will deal with has been rather overlooked by the generality of the "besieged residents," while some of them could hardly be stated until the close of the siege left time for computation. What work was still done notwithstanding the general suspension of industry, how municipal and governmental finances were managed in spite of the stoppage of revenue, what the losses of capital have been as distinct from the privations caused by the temporary diminution of the means of consumption—these and other points all require the illustration of a book such as M. Block will be sure to offer us. We hope that it will be possible to let the public have the result of his labours at a very early date.

THE TURKISH AGENTS AND THE TURKISH DEFAULT.—There has been some comment on the action of Messrs Dent, Palmer, and Co., the agents for the Turkish loan of 1858, in making the intimation they did this week as to the default of the Turkish Government. Instead of telling all the world that the Turkish Government had only provided 200,000*l*, whereas they should have provided 222,445*l*, it is argued that two other courses were open to them—either to pay the coupons and bonds drawn as they were presented so far as they had funds, or advance the small balance uncovered pending the receipt of the money from the Turkish Government. But we doubt if this complaint is at all reasonable on the part of the public, and it is apparently based on a misunderstanding of the position of Messrs Dent, Palmer, and Co. They are not the financial agents of the Turkish Government at all, having long since ceased to be so. They are merely the financial agency through which the interest and drawings of certain loans are paid, and as such it seems rather unreasonable on the part of the public to expect that they should have adopted either of the alternatives recommended. In the first place, to have paid some of the coupons and bonds drawn, leaving others unpaid, though the amount left might have been small, would have been doing a real injustice to the minority for whom the Turkish Government might *not* have made provision in proper time, and we are not sure but that to do so would have been a

breach of faith with the bondholders for whom Messrs Dent, Palmer, and Co. are in fact trustees. Having paid some, they would in equity have been liable to pay all. As regards the other alternative—that of advancing the balance themselves—the simple answer to the suggestion is, that not being the agents of the Turkish Government, they had no special call to take up the dishonoured engagements of that Government, and the public might just as well have expected any other financial house, not being the agents of the Government, to undertake the task. The wonder is what must be the state of the relations between the Turkish Government and its actual agents, when a default for so small a reason was permitted to occur.

NOVATION OF INSURANCE POLICIES.—The Lords Justices of Appeal—*re* the Medical Invalid and General Life Assurance Society, Spencer's claim—have affirmed the judgment of Vice-Chancellor Bacon in one of the "novation" cases arising out of the Albert amalgamation, the question at issue being the position of the policy-holders on this point. The circumstances relied on by the Medical Invalid to prove novation were that at the time of the amalgamation a circular was issued to the policy-holders, informing them of the fact, and recommending them to have their policies indorsed by the Albert Company, also informing them that that company would give a bonus in 1861, whereas the Medical Invalid would not give one till 1863; and that subsequently the claimant in the present case paid his premiums to the Albert, received due notice of the bonus, and accepted the benefit of it in the reduction of his annual premiums. These circumstances have been held by the Vice-Chancellor, and now by the Lords Justices on appeal, to constitute an acceptance of the new company by the policy-holder. Lord Justice Mellish, in giving judgment, remarked that "the cases of "'The Anchor Company' and 'The Times Company,' "established that, as a general rule, when notice of an amal- "gamation was given to a policy-holder, and he was told "that he had a right of election whether he would accept the "liability of the new company in place of that of the old, "and he did not expressly assent but acted upon the amalga- "mation, and took benefits to which he could only be entitled "on the footing of his assenting to the amalgamation, that "would be evidence from which the Court might infer that "he had assented;" and it was upon this principle that the judgment was given—the circumstances of the present case being even stronger than those in the cases referred to. The law has thus been distinctly laid down in respect to amalgamations. In a subsequent case—Griffith's claim—where the policy-holder had sent in a policy for indorsement, but it was not indorsed in consequence of his refusal to sign a form tendered to him; where the deed of arrangement also provided that even if the policy-holders declined to accept the arrangement, the premiums should still be paid to the Albert Company, and where the policy-holder had received no bonus—their Lordships decided that the bare payment of the premiums to the Albert Company did not constitute novation.

THE DEFAULT OF THE STATE OF ALABAMA.—The announcement of Messrs Clews, Habicht, and Co. that the Legislature of Alabama has unanimously passed a resolution to pay the interest on the Alabama and Chattanooga Railway bonds, is a welcome announcement to all who are interested in American securities. However independent of each other the States of the Union may be, it cannot be expected on this side that the distinctions between them should be thoroughly understood, or that the default of one should not be reflected on the others. So far as the public here are concerned, the securities of the various States all issue from the same financial circle, and are roughly classed together, though of course some distinctions are made. The only doubtful thing is whether the financial houses in New York are always as anxious as they have shown themselves to be in this particular case to prevent any tampering with the grounds of confidence in American securities. The Erie frauds are more a danger and cause of loss to all issuers of American securities than this special default of the Alabama State. The direct credit of New York State is not of course involved in the Erie mismanagement; but a State which provides no sufficient means for the security of private property is practically as guilty of repudiation as a State which repudiates its own debt, and the effect on public confidence is the same. American securities will never stand quite so high as they ought to do till these Erie frauds are got rid of. Possibly they may be rectified in time through the agency of the Law Courts, but respectable Americans would find it to be for their interest to promote more speedy and effective remedies.

THE PUBLIC REVENUE AND EXPENDITURE.

The following are the Receipts on account of Revenue during the week ending Feb. 25 :—

	Receipts of Week Ending Feb. 25.
	£
Customs	378,000
Excise	288,000
Stamps	199,000
Taxes	168,000
Income tax	326,000
Post Office	50,000
Telegraphs	50,000
Crown lands	nil.
Miscellaneous	67,625
Total	1,526,625

The total receipts of the previous week were 2,046,470*l.*

The Exchequer issues of the week on account of expenditure were 928,124*l*, viz. :—

	£
Interest of debt	400,000
Other charges on Consolidated fund	20,900
Supply services	507,224
Telegraph services	nil.
	928,124

During the week the cash balances have increased as follows :—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on Feb. 18	5,203,411	942,792	6,146,203
— Feb. 25	5,711,064	1,041,600	6,752,664
Increase	507,653	98,808	606,461

The other receipts to date were 8,860*l*, the other payments were 900*l.*

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, March 1.

The Government announced on Monday that the negotiations carried on at Versailles had resulted in the adoption of conditions of peace; but it did not say what those conditions were. It was known, however, that they were the cession of Alsace, of part of Lorraine, including Metz, and the payment of five *milliards*, or 200,000,000*l*, in three years. No doubt you will learn in London before this letter reaches you that such are the principal points in the Treaty of Peace; you will probably learn also, what we do not yet know here, how the Assembly has dealt with them. Harsh and even terrible as the conditions are, they have produced less impression on the Parisians than the news that the Prussians insisted on entering Paris, and on occupying a *quartier* in it, in order to demonstrate more clearly than the capitulation and the occupation of the surrounding forts have done that this city is at their mercy. The treating of the "capital of civilisation" as a conquered town is a deeper wound to the vanity of the Parisians than the taking of territory and of treasure. So much has it hurt them that not a few among them have seriously talked of opposing the Prussians when they appear at the gates; and yet it is manifest that resistance could have no other result than to occasion slaughter. Owing to the incomplete postal arrangements as yet established, this letter has to be posted at 10 a.m., the hour fixed for the entrance of the enemy; so that at this moment no one can tell whether the event will pass off quietly or be accompanied with bloodshed. Great efforts are being made to persuade the people to keep away altogether from the part of the town the Prussians are to occupy, but serious apprehensions are entertained that they will not be successful. The newspapers have resolved not to appear, the Bourse is to be closed, and most shops are to be shut up.

Apart from the agitation caused by the Prussian invasion of the town, the situation of Paris is really alarming. The working-classes think that the existence of the Republic is menaced by the National Assembly and by the Government of M. Thiers, and they are determined to defend it. They have for several days in succession made formidable demonstrations in favour of it at the column of the Bastille. They have violently possessed themselves of a great number of cannon, of mitrailleuses, and of a store of gunpowder, and the authorities have not dared to employ force to get those things back

again. Barricades have been erected in some of the populous parts, and the Government has not deemed it prudent to touch them. The prison of Ste Palagie was broken into on Sunday, and some political captives were released. In the afternoon of the same day a barbarous murder was committed by a mob. In the vicinity of the Place de la Bastille a man accused of being a police spy under the Empire was fearfully ill-treated, and then dragged to the Seine, tied to a board, thrown into the river, and drowned.

It was stated a few days back that the Prussians intended to demand a Treaty of Commerce favourable to the manufacturers of Germany, as one of the conditions of peace, but there is no information that they have done so. It has been also stated that of the indemnity imposed, a *milliard* (40,000,000*l*) are to be paid before the 1st April. Exhausted, however, as the country is, it is not easy to see how such a sum can be raised in so short a time, except indeed on very onerous terms. According to a report on the Bourse, *rents* will be accepted for it, but there is thus far nothing to confirm that.

M. Thiers has appointed M. Pouyer-Quertier Minister of Finance in his cabinet. The two, as is known, are the leaders of the Protectionist party, and profess its doctrines with a veritable fanaticism. If they remain in power, it is certain that the Treaty of Commerce with England, and the other financial reforms of the defunct Empire, will fare badly. M. Pouyer-Quertier is a practical man of business, has a comprehensive knowledge of commercial affairs—(in so far, that is, as a Protectionist can have)—possesses considerable talent and energy, and is an able speaker. No one, however, knew that he had made such a study of national finances as to justify him in taking the administration of them in a moment of unexampled gravity.

The National Assembly at Bordeaux has charged committees to examine into the state of the finances, commerce, &c. A newspaper letter from that city affirms that the financial committee has already ascertained that of the 250,000,000f loan raised in London, only 202,000,000f entered the coffers of the State; also that almost incredible abuses were committed in the purchases of arms and ammunition. As regards these purchases, for example, it is alleged that though a commission was specially charged to make them, M. Gambetta, in his capacity of Minister of War, employed numerous agents in England, the United States, and other countries, to buy also; and that the result was a competition, which caused a great advance in prices—in some cases of as much as 150 per cent.

The question of house and shop rent is exciting great interest in Paris. By successive decrees, the Government of National Defence authorised the suspension of payment; but now that the war is over, landlords (in this city they have the reputation of being a very rapacious set) have already begun to notify that they would like to have their money, or at all events part of it. But tenants urge that the siege has exhausted their resources, or prevented them from doing any business, and that they cannot pay. What is to be done? Some persons say that nothing can or ought to be attempted, and that the landlords and tenants should be left to arrange between themselves. Others think that in that case great hardship would be inflicted on the tenants, inasmuch as the landlords could go to law and the Courts could not do otherwise than decide in their favour, the rent being unquestionably due, and the codes having omitted to provide for cases of siege. Some persons suggest that a new delay ought to be granted by law; others that a reduction of a third or a half should be imposed; and men of the Socialist school hesitate not to say that no rent whatever ought to be exacted—some few adding besides that a general hanging of landlords would be of great public advantage. Similar difficulties exist with respect to commercial bills, the payment of which has, as you know, been several times suspended since the outbreak of the siege—bankers and discounters want the bills paid, and traders piteously declare that they have not the wherewithal. In presence of such a state of things, many persons are beginning to declare that it was a grievous error in the Government to have meddled at all with rent and bills. But it is just to remember that public opinion imperatively required its interference, because it was said that men, being compelled to take military service, could not follow the ordinary avocations by which they earn money.

The Bourse entertained the hope that M. Thiers would be able to obtain tolerably moderate conditions of peace from the Prussians; but the result has disappointed it greatly, and besides, it has been disquieted by the existing agitation. The consequence is, that there has been a reaction from the advance in prices that had commenced, and that transactions have become limited. The following is a comparison of Friday last and of yesterday:—

	Feb. 24. f	c		Feb. 28. f	c

Lyons-Mediterranean ditto	540	0	.....	...	
Suez Canal	242	50	.....	...	
Parisian Gas	785	0	.....	787	50

The Government has put an end to the selling in Paris of refined sugar at a fixed price, and has left commercial competition to regulate it as other things. For the moment the retail price is very high, the stock being small, and refineries having not yet been got to work. As regards other articles of general necessity, prices are approaching, or have already reached, the ordinary level, Fuel is, however, an exception; it is terribly dear. Owing to the difficulty of procuring coal, gas-lighting has not been resumed, and the appearance of the city after nightfall is consequently dismal.

To the people who were driven away from Paris by the siege, and have now returned, it is painful to see that little business is being done in the shops, and that there are few vehicles laden with merchandise in the streets. More painful still is it to encounter thousands of disarmed soldiers and Mobile Guards lounging about doing nothing. The sooner these men can be restored to industry and to agriculture the better.

Many of your readers will be interested in hearing that, notwithstanding the siege, the *Journal des Economistes* appeared regularly. In a hasty glance at the last number (February) I find that its cashier was killed by the explosion of a shell in the bombardment. The Society of Political Economy held its monthly meetings during the blockade, and discussed economic questions as usual.

A convention, dated January 8, but only recently published, between the Government and the Northern Railway, stipulates that the latter, notwithstanding the convention of June, 1859, is "authorised to carry to the capital account of its New Network all or part of the insufficiency of receipts which may arise in the years 1870, '71, and up to and including 1875," whilst the former is relieved from the necessity of advancing the sums necessary for making up the interest and the sinking fund guaranteed by it for the said network. The object of this convention is in reality to relieve the Government from the obligation of making heavy payments to the railway company on account of the past, the present, and succeeding years. It is under an engagement to it, as to other companies, to guarantee for the purposes referred to 4.65 per cent. per annum on the capital employed in constructing new lines. In normal times the revenue from those lines, joined to the levy made on account of them from the receipts of the main line, rendered its obligation of no great importance about (say) 12,500,000f per annum; but the war, by damaging the lines and interrupting traffic, has augmented it considerably. The necessity of postponing it for a few years is therefore apparent. It is to be presumed that an arrangement similar to that with the Northern will have to be made with the other railway companies.

The Comptoir d'Escompte has been paying since 1st Feb. 10f per share, being interest at 4 per cent. for the first half of the year 1870-71.

The Credit Lyonnais (Joint Stock Bank) is now paying 12f 50c on account of dividend of 1870—a sum which has already been distributed at Lyons and Geneva.

The Bank of Algeria has since 13th February been paying at the Comptoir d'Escompte 33f as interest and dividend of 1870.

The coupon due 1st January on the Danubian 8 per Cent. loan is being paid by Messrs Oppenheim, Alberte, and Co., as are also the bonds drawn in December.

A drawing of 4,372 bonds of the 1870 loan of the Viceroy of Egypt is to take place on 6th March.

The financial delegates of the Italian Government have announced that "all communications with the Government of Italy having been interrupted since the investment of Paris, the payment of the coupons is adjourned."

The Company of the French Transatlantic Cable informs shareholders in France that they can receive from 3rd March 20f per share as dividends of the third and fourth quarters of 1870, which have been paid at London since 1st December.

The Credit Mobilier announces the payment from 1st March of a coupon of the bonds of the Austrian State railways falling due on that day.

The Western Railway Company notifies that existing circumstances do not permit the annual meeting of shareholders in the month of March as in preceding years, but that it will be held in April.

The annual meeting of the Parisian Gas Company is fixed for the 23rd March, and that of the Suez Canal for 29th April.

In 1861, the Bank rate had been for several weeks at 8 per cent., and this week there was still a good demand at the Bank. There was also a renewed withdrawal of bullion. The effects of the bad harvest and the American troubles continued to be felt.

In 1868, money continued to be a drug at "2 per cent." Credit was only slowly reviving, and no improvement was anticipated for a long time.

In 1869, there was a little surprise at the Bank rate not having been raised in the face of the diminution in its reserve, and an early advance was anticipated. Mr Gladstone's plan for disestablishing the Irish Church was now under discussion.

In 1870, the market was sluggish, though the bill brokers were operating above the Bank rate. Business was improving rapidly.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 8,689,221*l*; in 1868, an excess of 2,402,115*l*; in 1869, a deficiency of 610,291*l*; and in 1870, a deficiency of 2,217,546*l*. In 1871, there is a deficiency of 2,189,626*l*.

Discount and Money Market.—The value of money has continued to advance during the past week, and on Thursday the Bank rate was raised from 2½ to 3 per cent. The advance was preceded by an unusually heavy demand at the Bank on Tuesday and Wednesday, the effect of which is shown in the week's account by the remarkable increase of the private securities from 20,261,000*l* to 24,755,000*l*, or 4,494,000*l*. The bill brokers and discount houses have steadily maintained their rates above the Bank for several weeks, and have been slowly raising them, avoiding also long-dated paper, and the result has been the heavy pressure of this week, which left the Bank directors no option but to raise their terms. At the same time the demand upon the Bank seems to have been excessive, as if people were over-providing themselves; but the impression that there must be a farther advance as the result of peace is a sound one, and the extreme variations will ultimately be less, in consequence of these precautions of the public. Yesterday and to-day there was a little more ease, which will probably continue a short time, as the natural reaction after the precautions taken this week. The terms for short-dated bills under two months are 3 per cent., or even a fraction under that for the very best paper; but otherwise though there has hardly been time to make a market since Thursday, the rates are very firm, the tendency being to exact a very high price for long-dated bills. Whether there will be a farther advance immediately will depend very much on the financial measures adopted in France, but the belief in the market is that a farther advance is impending. All the circumstances point to such a change, and even in the absence of French demands the foreign loans and new companies which are anticipated, coupled with renewed activity in trade as the result of peace, would almost be certain to increase the value of money for some time to come.

The amount of bills falling due to-morrow is stated to be unusually large, even for the 4th of March, which is ordinarily the heaviest 4th of the month during the year.

The principal changes in the Bank account for the week are the increase of 4,494,000*l* in the private securities, which we have already noticed, an increase of 2,824,000*l* in the private deposits, and a decrease of 468,000*l* in the reserve. It is obvious from the increase in the private deposits that the resort of the public to the Bank has been in a great measure precautionary. Still the reserve has been a good deal weakened, and although the position of the Bank is strong, and will probably improve during the week by the running off of advances, it is also probable that some portion of the private deposits will be so dealt with as to farther diminish the reserve, which is now 13,310,000*l* against 32,760,000*l* of liabilities.

We subjoin our usual quotations for mercantile paper having various periods to run :—

Bank bills—3 months	3 3¼	per cent.
Do 4 —	3⅜	per cent.
Do 6 —	4¼	per cent.
Trade bills—3 months	3¼ 3½	per cent.
Do 4 —	4 4¼	per cent.
Do 6 —	4½ 5	per cent.

The allowance for deposits at the joint stock banks and discount houses is as follows :—

Joint Stock Banks at call	2	per cent.
Discount houses at call	2	per cent.
Do with seven days' notice	2¼	per cent.
Do fourteen days	2½	per cent.

The allowances, it will be observed, have been increased ½ per cent. this week as compared with last.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent. 1870.	1871.	Open Market, per Cent. 1870.	1871.

	Bank Rate. Per cent. 1870.	1871.	Open Market. Per cent. 1870.	1871.
Madrid	5	5	5	5
Hamburg	...	...	...	3½ ¾
St Petersburg	5	8	5	7

Notwithstanding the advance in the London market, the continental rates still show a tendency downwards.

ENGLISH GOVERNMENT STOCKS.—The general course of the stock markets this week has been undecided. The occurrence of the fortnightly settlement on Tuesday, and of the monthly settlement in Consols on Thursday, necessarily occupied a good deal of attention, the settlements being rather heavy; and the apprehensions excited by the entry of the Germans into Paris, and some doubt as to the ratification of the terms of peace by the Bordeaux Assembly, checked the movements which might have been anticipated at the conclusion of peace. The immediate advance of the Bank rate, and the apprehensions of a farther advance soon, tended farther to keep prices nearly stationary. The great severity of the terms of peace also had a depressing influence. They must increase greatly the difficulties of home government in France, under circumstances which would in any case have multiplied these difficulties; and with France unsettled internally, even if she delays long to renew the war, there can be no great confidence in the European future. Generally, however, it may be said, that except in Consols and in foreign stocks until to-day, which for different reasons have been rather weak, the tendency of prices has been to improve. Home railways continue to advance slowly; the advance of the Bank rate, and the prospects of increased business, have had a perceptible effect on bank and finance shares; and there has also been an improvement among the principal miscellaneous companies. We should expect that notwithstanding the advance in the value of money, and the great demands that will be made for France, this general improvement will continue. Peace having been concluded, investors will have more confidence, and there is abundance of money not available for foreign loans to sustain the general markets. The intrinsic value of railway, banking, and similar property, cannot but improve greatly during the next few months, and there are no circumstances apparent to prevent the market value from approximating.

English Government securities, as we have noticed, have been weak. At first, on the approach of the settlement, there was, as we anticipated, a sharp turn upwards, in consequence of the great scarcity of stock. From being at 91⅝ ¾ on Saturday, they went to 92 on Monday; but the actual conclusion of peace putting an end to the suspense that has prevailed, and the great demand for money, subsequently produced their natural effect, and the figure of 91⅝ ¾ was again touched in the middle of the week. On Thursday morning there was a slight rally, but the downward tendency continued. To-day business has been comparatively limited, and there is hardly any feature to note, the final quotations for Consols being 91⅝ ½ for money, and 91 11/16 13/16 for the April account.

The immediate future of the Consol market will depend greatly on the strength of the demand for money which has begun, and the rapidity with which the requirements of France will be supplied. At present there is some uncertainty, but the ruling influence in the market is a belief in the speedy announcement of heavy demands from France. Such demands, and the rise in the value of money, will cause Consols to be sold, and dealers are operating accordingly.

Subjoined is a list of the highest and lowest prices of Consols every day:—

CONSOLS.

	Money. Lowest.	Highest.	Account. Lowest.	Highest.	Exchequer Bills. Money.	June.

FOREIGN GOVERNMENT STOCKS.—The weakness in this market arises from the fact that France is becoming a large borrower. A new and formidable competitor with other foreign countries is introduced, and the existing securities suffer. The weakness is aggravated again by the necessities of more than one European country, which are likely to make them borrowers, or attempted borrowers, in a very short time. Russian and Turkish loans have both been spoken of this week, the former with some degree of authority, and it is probable that a Spanish loan will also be attempted as soon as the present dynasty and Government feel themselves firm in their seats. The downward tendency in the foreign market has of late however been discounted, and the actual changes to note are comparatively unimportant, there being also rather more firmness shown to-day. The weakness is especially perceptible in Italian, Egyptian, and Turkish securities, which were formerly largely dependent on the Parisian market, and will consequently suffer most from the competition in that market of the new French loans. So far as actual business goes, the attention of the market has been chiefly occupied with the French and German loans—both improving in consequence of the actual conclusion of peace, though the improvement is less than would have ensued from a really solid peace, instead of one that is felt to be a mere truce. To-day, as we have stated, there has been rather more firmness, principally in the French loan, which advanced to 93⅛.

We believe that the rumours respecting a Russian loan are well founded. We understand that the amount to be asked for is 12,000,000*l*, and it is asserted that the amount will not be taken in cash, because Russia owes money in England. Too much credit however should not be attached to the latter assertion. In any case such a loan could not but strengthen the present position of Russia as a Government which has cash balances in England, and may choose to draw from them for home use.

An unpleasant impression was produced on Tuesday by the posting on the Stock Exchange of an intimation from Messrs Dent, Palmer, and Co., the agents for the 6 per Cent. Turkish loan of 1858, that they had only received 200,000*l*, instead

of 222,745*l*, required to meet the coupons and drawings falling due, and that, as the amount was insufficient, they must postpone payment of all the coupons and drawings. An immediate decline in the 1858 loan was the consequence, and other Turkish securities were dull in sympathy, though the effect was mitigated by the smallness of the balance unprovided. On Thursday formal intimation was given that full provision had been made, and that the coupons and drawings would be met. The incident however will be most unfavourable for Turkish credit, though the peculiar nature of the default shows what we anticipated last week, that the Turkish Government, if it falls into arrear, as is but too likely, will only do so gradually. To fail in providing money exactly to the day, and to be short of small amounts to make up the full sum, are the characteristics of people who have considerable means, but who manage badly and are gradually getting behind; and this is apparently the position of the Turkish Government, though anything like a collapse may be comparatively distant.

The Brazilian loan has remained during the week at a premium, the closing quotation being ½ to ⅞. The subscriptions are stated to have amounted to about 17,000,000*l*, so that subscribers get only a fifth or sixth part of what they offered.

English Railway Stocks.—The majority of the English railways are this week quoted *ex div.*, and the new quotation, allowing for the deducted dividend, shows in most cases an improvement. The traffics this week have again been very favourable, and as we have noticed above, the actual conclusion of peace gives additional confidence to investors, which more than balances the unfavourable effect of the advance in the Bank rate upon speculative bull accounts. In Great Western especially there has been another important advance, in consequence of the very favourable accounts given of the prospects of the line at the meeting on Thursday. To-day the market has continued firm, Great Western especially again advancing, and altogether, as will be seen, there is a very material rise for the week. Caledonian and North British stocks also improved 1 per cent. to-day on rumours of a fresh working agreement. It is announced that the directors of the latter company intend to recommend at the forthcoming meeting the payment of dividends for the last half-year on all the preference stocks down to and inclusive of the Monkland preference stock, and to the extent of 2¼ per cent. per annum on the Edinburgh and Glasgow preference, carrying forward 325*l*.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices:—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.

Subscriptions are invited for 750,000*l* stock of the Magdeburg-Lausitzer Railway, the remainder of a total capital of 8,000,000 thalers, or 1,200,000*l*, in 80,000 shares, of 15*l* each. The prospectus states that the line is 106 miles in length, and passing through numerous town, forms an important link in the Prussian railway system, effecting a saving of 67 miles between Magdeburg and Breslau. The local traffic, it is anticipated, will be important, and the line will form a connection between the towns of North Germany, including the Baltic and North Sea ports, and the commercial centres of Austria and Russia. Statistics are given in the prospectus to show the exceeding profitableness of other Prussian lines and the probability of a return of 15 per cent. to subscribers. It is notified that subscriptions were invited for this stock in 1870, but no allotment was made in consequence of the war, and former applicants will have an opportunity of again subscribing.

American Securities.—The approaching announcement of the new funding scheme for the consolidation of the United States debt—which is expected to be made during next week—has attracted considerable attention. Much doubt has been expressed as to whether the issue can be successfully carried out, and considerable surprise has been manifesed that Mr Boutwell should again have had resort to time bonds rather than to a funding scheme, which would allow the redemption of the debt at convenience. The terms attached to the bonds are such as to lead to the belief that Mr Boutwell looks to the European market for the ultimate success of his scheme; but a farther considerable improvement must take place in American credit before any large sales of bonds bearing 5, 4½, and 4 per cent. interest in gold at par can be effected, when the old Five-Twenties bearing 6 per cent. can be bought at a relatively lower figure in the open market. The constant upward tendency in the quotations of the securities of the United States affords ground for the belief, however, that the ultimate success of the scheme is a matter of time only. Five-Twenty (1862) bonds closed to-day at 92⅛ to 92¾, against 90¼ to 90½ last

year, and 83¼ to 83⅜ in 1869. We give the changes for the week below :—

	Closing Prices last Friday.		Closing Prices this day.		Inc. or Dec.
United States 6 % 5/20 Bonds, exchng. 4/6	91 ¼	.....	92½ ¼	+	1¼
Ditto 1865 Issue	90½ ¼	.....	92½ ¼	+	2
Ditto 1867 Issue	89½ 90	.....	90⅜ 1½	+	1½
Ditto 5 % 10/40 Bonds, exchange 4/6 ...	87½ 8	.....	90 ½	+	2½

Erie Shares	18½ ¼	.....	18½ 19½	+	¼
Illinois Central Shares	108½ 9½	.....	109½ ¼	+	¼
Massachusetts 5 %, Sterling Bonds, 1900...	93 5	.....	93 5	...	...
Panama General Mortgage 7 % Bonds, 1897	93 5	... .	93 5	...	...
Pennsylvania Gen. Mort. 6 % Bonds, 1910	90½ 1½	.....	90½ 1½	...	...
Virginia 6 % Bonds	53 5	.....	54 6	+	1
Ditto 5 % Sterling Bonds	55 8	.....	57 9	+	1

The London arrangements for offering the new classes of bonds (5 per cents., 4½ per cents., and 4 per cents.) in substitution of the 6 per cent. United States Five-Twenties have been made with Messrs Barings, Rothschilds, J. S. Morgan and Co., Jay Cooke, M'Culloch, and Co., and Morton, Rose, and Co.

With regard to the question between the United States Government and the Pacific Railway a telegram announces :—

"Judiciary Committee reported to-day, 25th of February, Government must pay half earnings in cash : other half and 5 per cent. net earnings go towards subsidy. Interest otherwise not due till maturity of bonds. Pacific Railroad Committee report duty of Government to send all freight by Pacific Railroad."

JOINT STOCK BANKS.—The transactions in this department have been somewhat numerous, purchases having been stimulated by the advance in the value of money, and the improved prospects before trade generally now that hostilities have ceased on the continent. The movements have been chiefly of a favourable character, though some adverse changes were reported to-day in consequence of realisations. Anglo-Egyptian shares have advanced ¼ on the week ; Otago, Hong Kong and Shanghae, London of Mexico, London and County, London and Westminster, and Merchant, ½ each ; Union of London, 1. On the other hand, Bank of Egypt and Australasia close at a fall of 1, and Chartered of India ½ on the week.

J. J. de Lizardi, Esq., of the firm of P. de Lizardi and Co., has joined the board of the London Bank of Mexico South America (Limited).

The directors of the National Bank of Australasia have decided upon a dividend for the past half-year at the rate of 10 per cent. per annum, free of income tax, payable the 4th of April.

TELEGRAPHS.—A steady tone has prevailed in the market throughout the week, and the upward movement recently noticed has made further progress. Construction shares are also higher on the week. Hooper's show a rise of ½, and Telegraph Construction of 1½, while Silver's India Rubber are quoted at 43 to 44, ex dividend. Anglo-American have advanced 1½ ; Indo-European, 2 ; China Submarine, 1¼ ; Marseilles and Algiers, ½ ; Reuter's, ¼ ; but British Indian Extension shares are ½ lower on the week.

The last portion of the cable manufactured by the Telegraph Construction Company for the China Submarine Telegraph Company left England by the Kangaroo on Friday last. It is hoped therefore that through telegraph communication by submarine cable will be established between this country and Hong Kong by May or June next.

MISCELLANEOUS.—There is no especial feature to notice in the market. The reports of several companies having been issued during the week, but they call for no particular remark. The fluctuations in the quotations have not been generally favourable, the most important being as follow :—A decline of 3 in Foreign and Colonial Government Trust, 2 in Royal Mail Steam, 1 in City Offices, Crystal Palace 6 per cent. debentures, Madras Irrigation, and Tobacco (Italian) loan ; ½ in Ebbw Vale General Steam Navigation shares shows a rise of ½ on the week.

The Albert Reconstruction scheme came before the Lords Justices this week, but after a lengthened hearing they expressed their deep regret that the jurisdiction of the Court was not under the statute sufficient to enable them to deal with the case. They, however, intimated a strong opinion that the case was one for special legislation, in order to put an end to the enormous litigation and expenses which must attend the working out of liquidation. Notice of an Act in Parliament has already been given in anticipation of such a course being necessary.

MINES.—The dealings in British mining shares have not been extensive, and the changes have been limited in number. Devon Great Consols, however, have advanced 7, and East Caradon ¼ on the week. West Chiverton have declined 2, and Tin Croft ½. Colonial and foreign mines have ruled inactive, with a downward tendency in values. Cape Copper, Eberhardt, and United Mexican shares are ½ lower, but St John del Rey have been in fair request, at an advance of ½.

EXCHANGES.—The biddings for 400,000*l* in bills on India were held on Wednesday at the Bank, when the amounts allotted were—to Calcutta 300,000*l*, and to Bombay 100,000*l*. The *minimum* price was fixed at 1s 10½d on all the presidencies, being an advance of 1 per cent. on the previous terms, and tenders on Calcutta at 1s 10½d will receive about 12 per cent., and above in full, while on Bombay all at 1s 10⅝d will receive in full. These results show a further increase in the demand for means of remittance to the East.

BULLION.—According to the *Gazette* return, the imports of the precious metals into the United Kingdom during the week ended March 1 were—Gold, 693,521*l* ; silver, 852,694*l*. The exports were—Gold, 279,620*l* ; silver, 52,800*l*.

There were no bullion operations at the Bank of England to-day.

FAILURES AND EMBARRASSMENTS.—The following circular has been issued by Messrs J. and W. Jeffery and Co., of Liverpool, whose suspension was announced on Wednesday, with liabilities for 400,000*l* :—

"Compton house, Liverpool, March 1.

"You will have been informed by the circular of Messrs Reed, Phelps, and Sidgwick, that, under peculiar pressure, we have been compelled to submit to a temporary suspension of payment. Of course, we are extremely anxious to preserve intact our business connections, and it has been arranged that the goods necessary for our daily requirements shall be purchased on cash terms, to be paid for by Mr Honey, who has been appointed the receiver under our estate. We trust that only a short time will elapse before we shall have the pleasure of resuming our business relations as heretofore."

The suspension of Mr J. H. Glassford, tobacco merchant, of Great St Helen's, is also announced.

MEETINGS OF COMPANIES NEXT WEEK.

TUESDAY, March 7.

Lambeth Waterworks, special, Kennington.
London General Omnibus Company, general, Finsbury square.
North British Australian, general, London Tavern.
United General Gas Light.

WEDNESDAY, March 8.

Commercial Union Assurance, general, London Tavern.

THURSDAY, March 9.

New Brunswick and Nova Scotia Land.
Shropshire Union Railway, general, Shrewsbury.
Surrey Commercial Dock, general, 106 Fenchurch street.

FRIDAY, March 10.

Kemoan Iron, general, Westminster Palace Hotel.

PUBLIC COMPANIES.

STOCKS.

Danish 4 per Cent., 1850-61.—Bonds representing 2,000*l* have been purchased and cancelled.

Danish 5 per Cent., 1864.—Bonds representing 1,900*l* have been drawn for repayment at par.

Guatemala 6 per Cent. Sterling Loan, 1869.—Bonds representing 8,200*l* have been drawn for redemption at par on the 1st April.

Moorish Loan of 1862.—Thirty-five bonds have been drawn for repayment at par on the 3rd April.

Swiss 4½ per Cent. Loan for 15,000,000 *francs*.—This loan has all been taken up in Switzerland, 105,250,000 francs having been applied for.

Turkish 6 per Cent. Loan of 1858.—On the 1st instant the following notice was issued by the agents for this loan:—"Messrs Dent, Palmer, and Co. have received 200,000*l* for the service of the Imperial Turkish loan of 1858; but, inasmuch as the total sum required is 222,445*l*, in the absence of official instructions, they can make no payment until the whole amount is received."

Turkish 6 per Cent. Loan, 1858.—The balance of 22,445*l* required by Messrs Dent and Palmer for dividends was provided on the 2nd inst.

RAILWAY COMPANIES.

Atlantic and Great Western Railway Reorganisation Stock.—Messrs Bischoffschiem and Goldschmidt offer this 400,000*l* 7 per cent. stock for subscription at the price of 75 per cent., of which 5 per cent. is required on application, and 15 on allotment. The remainder to be called up as wanted, but only after the official reorganisation has been duly recognised by the States of New York, Pennsylvania, and Ohio. Should this not be obtained, the present instalments will be returned without deduction on the 1st September next. The half-yearly interest will be payable on the 1st September and 1st March, in London, in sterling; and the bonds will be redeemable in three years at par, or convertible at the holder's option into 7 per cent. first mortgage bonds of the reorganised company at the price of 80 per cent.

As it is probable that only part of the 75*l* per cent. (beyond the 20*l* paid on allotment) may be called up, the trustees for reorganisation, or (if they have ceased to act, the railway having been reorganised) the board of directors, will at any time have the right to consolidate the amounts paid up, plus the bonus of 25 per cent., and cancel the further calls.

The proceeds of this issue will be retained in London, to the order of the trustees, until after the decree of sale has been obtained, and will thereafter be applied in discharge of liabilities, for which first general mortgage bonds of the reorganised company are authorised to be created under the official scheme.

Blyth and Tyne.—At the meeting a 10 per cent. per annum dividend was declared.

Brecon and Merthyr Tydfil.—Half-year's gross revenue, 33,628*l*, showing an increase of 3,060*l*. The working expenses, 20,663*l*, have increased 862*l*. The accounts with Messrs Savin and Co. are still unadjusted.

Crystal Palace and South London Junction.—The chairman, at the meeting, said that the accounts from the Chatham and Dover Company had only just been received, and they showed the gross traffic at 8,878*l*, and the net profit at 1,784*l*.

Great Northern and Western of Ireland.—Dividend declared at the rate of 4¾ per cent. per annum.

Great Western.—The last half-yearly revenue accounts, compared with the corresponding six months of 1869-70:—

	1869-70.		1870-71.
	£		£
Gross revenue	2,170,662		2,214,301
Working expenses	1,009,798		1,019,619
Net	1,160,824		1,194,682
Add previous balances	18,099		15,375
	1,178,923		1,210,057
Deduct preference charges	975,362		974,710
Available for dividend	203,561		235,347
—on the ordinary stock at the rate of 3¾ per cent. per annum	188,815	(3¾ % p. a.)	216,315
Surplus	14,746		19,032

The figures for the 1869-70 half-year have been compiled from the old sectional accounts. The ordinary dividend for that half-year was augmented by the distribution of items belonging to the original section only, and the advance made has therefore been more than recorded in the above statement.

Capital Account.

	Expended.		Received.
	£		£
To 31st July, 1870	45,707,758		45,837,698
During the half-year	195,454		165,509
Total, 31st January, 1871	45,903,212		46,003,207

Nearly 200,000*l* in debenture stock has been issued during the six months. The principal increase in revenue was due to goods traffic. As soon as the requisite narrow guage rolling-stock has been provided it is proposed to convert all the broad guage lines on the South Wales route as far as Swindon. The rolling-stock is to be provided out of revenue, but the 226,000*l* for the alteration of permanent way will be charged to capital. To meet these and other payments it is proposed to issue 1,000,000*l* in 5 per cent. preference stock at par.

Great Western and Brentford.—Dividend declared at the rate of 2¼ per cent. per annum. Surplus, 32*l*.

Isle of Wight.—The profits for the year amounted to 7,750*l*, out of which the interest on the A debenture stock (3,711*l*) had been paid, the balance being applicable for the interest on the B debenture stock, and pressing claims upon capital account.

Llynvi and Ogmore.—A dividend at the rate of 1¾ per cent. per annum has been declared on the Llynvi ordinary stock.

London, Chatham, and Dover.—The gross receipts for the half-year amounted to 376,384*l*, as compared with 388,752*l* in the same half of 1869, being a decrease of 12,367*l*. The gross expenses amounted to 200,396*l*, as compared with 213,257*l*, being a decrease of 12,861*l*. The net result of the traffic for the half-year was a balance of 175,988*l*, earned at 53·24 per cent. of the receipts, as compared with 175,495*l* for the corresponding half of 1869 earned at an expense of 54·86 per cent. of the receipts. The continental war very seriously interfered with one of the most important and profitable branches of the traffic. After payment of the full half-year's dividend on the arbitration debenture stock, there remained a balance of 29,762*l* to be carried forward. Under the final award of the arbitrators, the tenure of office of the present board terminated with the half-yearly meeting, and the duty of electing the entire future board of directors and auditors devolves on the meeting. Capital expenditure, 17,542,903*l*.

London, Chatham, and Dover.—The final award of the arbitrators has been issued. By this all voting powers are determined; the number of the directors are fixed at eight; all rights and priorities are determined, together with the sums payable to the Kent Coast, Sevenoaks, and Crystal Palace lines.

London, Tilbury, and Southend.—The receipts for the half-year amounted to 40,296*l*, and the expenses to 27,540*l*, leaving a balance of 12,756*l*. The usual returns of passenger tolls and proportion of goods receipts were, for the Great Eastern, 13,944*l*, and for the North London, 2,327*l*, which, added to the above receipts (40,296*l*), made the gross receipts for Tilbury traffic for the half-year 56,567*l*. The capital account showed that 798,677*l* had been expended.

Madras.—The Toongabudra Bridge has been completed, and an engine has run through to Raichore, where the junction with the Great Indian Peninsula will be effected. The Bellary branch was to be opened on the 1st instant.

Swansea Vale.—Dividend on the ordinary shares declared at the rate of 1 per cent. per annum.

Trent, Ancholme, and Grimsby.—Dividend declared at the rate of 3¼ per cent. per annum.

Whitehaven, Cleator, and Egremont.—A dividend at the rate of 14 per cent. per annum has been declared. The half-year's gross revenue was 35,524*l*, and the net balance 23,429*l*.

BANKS.

Bank of Australia.—Half-year's dividend declared at the rate of 10 per cent. per annum, free of income tax.

Hongkong and Shanghai Banking Corporation.—A telegram from Hongkong announces that the corporation have declared a dividend of 4 per cent. for the past half-year, making, with the previous dividend, 10 per cent. for the year, and leaving a balance of 280,000 dollars.

ASSURANCE COMPANIES.

Liverpool and London and Globe.—The new life policies of the year were stated at 841, for 426,410*l*, yielding in new premiums 16,099*l*. The reserve fund for that department being 2,296,177*l*, showing an increase of 112,000*l*. The fire premiums of the year were 931,727*l*, and losses 528,384*l*. The general profit and loss account showed an available balance of 317,578*l*, out of which a dividend of 30 per cent. was declared, leaving 200,053*l*. The funds of the company, including 391,752*l* capital, amount to 3,859,392*l*.

Railway Passengers' Assurance.—Total income of the year, 130,024*l*, as compared with 122,360*l* in 1869. The balance to the credit of revenue account on the 31st December last, including that brought forward, was 73,071*l*, which, after the payment of interest on the paid-up capital at the rate of 5 per cent. for the half-year, will admit of a division of 20s per

share: 10s will be paid in cash, and the rest be added to the amount paid up on each share.

Rock Life Assurance.—A dividend of 2s 6d per share and a bonus of 1s 6d, both free of income tax, have been declared for the half-year.

MISCELLANEOUS COMPANIES.

Alhambra.—A dividend for the half-eyar at the rate of 25 per cent. per annum, free of income tax, is notified. It is intended to issue 30,000*l* in 10 per cent. debentures (14,300*l* has already been subscribed) to purchase the superior leases of the Alhambra Palace.

Burmah Company, Limited.—A voluntary liquidation has been resolved upon, and Mr J. Waddell is the liquidator.

East India Cotton Agency, Limited.—A further dividend of 15s in the pound (making 20s in all) is payable to the creditors by Mr. George T. Hart.

General Steam Navigation.—Half-year's dividend 10 per cent. per annum, with a bonus of 2s 6d per share.

Gray's Chalk Quarries.—Dividend 10 per cent. for the twelve months.

Indo-European Telegraph.—The adopted report stated that the gross revenue of the company amounted to 25,268*l*, and the expenses, including maintenance, to 25,286*l*.

Liverpool Exchange.—Dividend declared at the rate of 5 per cent. per annum.

London Tavern.—Year's profit 1,346*l*, out of which a dividend of 2¼ per cent. was paid.

Telegraph Construction and Maintenance.—At the meeting the year's dividend of 14 per cent., free of income tax, was declared, and trustees were appointed to distribute a bonus of 3*l* per share out of shares held in submarine companies.

AVERAGES OF GRAIN.

The following is a statement showing the quantities sold and the average price of British Corn (Imperial measure), as received from the Inspectors and Officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended Feb. 25, 1871:—

	Quantities Sold.	Average Price.

Wheat.....	76,592 4	53 9
Barley	50.528 1	35 10
Oats	7.456 0	24 5

COMMERCIAL EPITOME.

FRIDAY NIGHT.

There were strong symptoms of reaction in the grain trade to-day. A considerable demand was experienced for seed-wheat both on English and French account, and really choice samples advanced about 1s per quarter. Spring American wheat was held at 1s to 2s per quarter more money, there being a good enquiry for export. Flour showed an advance of about 1s per sack from this day week. Oats and maize have sold freely at a rise of 1s per quarter on the week, while barley, beans, and peas ruled firm in value. This week's imports of foreign and colonial produce into London have amounted to 11,330 quarters of wheat, 4,930 barley, and 420 maize.

At Liverpool and Wakefield this morning there was an active demand for wheat at an improvement of about 1s per quarter as compared with Friday last.

The Liverpool cotton market has been very quiet since Monday last, and only a very moderate business has been done at easier rates. The total sales for the week are 69,620 bales; of which the trade have taken 52,370 bales; speculators and exporters, 17,250 bales. The inports are 22,473 bales, the actual exports, 24,882 bales, and to-day's stock is estimated at 710,300 bales. Quotations for American descriptions have declined ¼d per lb, East Indian and Bengals, ⅛d per lb, since this day se'nnight. To-day the market closes very dull. Sales 8,000 bales.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended March 2, 1871:—

	Imported.	Exported.
American.....bales	20,941	15,425
Brazilian	2,323	2,209
East Indian	5,739	14,336
Egyptian	2,092	282
Miscellaneous	986	303
Total.....	32,081	32,555

At New York, on 2nd current, middling Upland cotton was quoted at 15½c per lb. Telegraphic advices from Bombay to February 26 report a fair demand for cotton at 185 rupees for new Dhollerah.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, Feb. 4:—The cotton market was very firm on last mail day, and extensive purchases were recorded before the day closed at prices somewhat fuller than those quoted in our last circular. On Sunday telegrams were received reporting that the Paris forts had surrendered, and when the intelligence became generally known, the greatest excitement prevailed among the holders of stocks, not lessened certainly by the strong inquiry which at the same time sprung up on account of a number of continental firms. Prices advanced rapidly, and when business was fairly resumed on Monday, dealers exhibited the utmost firmness, and succeeded in obtaining as high as 212 rs per candy for Akote, and 200 rs for Dhollerah. The culminating point, however, was then arrived at: on the afternoon of the same day telegrams were received advising a dull and heavy market in Liverpool, checking to some extent the desire to buy, but without shaking the confidence of stockholders, who continued to hold out for extreme rates. Tuesday's market opened weak, and with indications that rates were easier, and towards the afternoon a slight decline had been established. Later on, messages to the 30th ultimo came to hand, reporting the week's receipts at the American ports to be 151,000 bales, and an immediate cessation of demand took place, followed by gradually drooping rates, until yesterday evening the scale of quotations was just about on a par with that quoted at the same time last week. The week's sales exceed 4,300 candies. At the close of business the market has a declining tendency. Our latest telegram from home is dated 31st ultimo, and reports the Liverpool market

dull and heavy at 6½d per lb. In the up-country markets the excitement has been much more intense than here. The ryots and other holders of cotton, in the Berars especially, looking forward, as they have been, to an immediate termination of the war after the fall of Paris, received the news of capitulation with extravagant interest, and immediately concluding that a great advance was imminent in the Liverpool market, increased prices until, in some instances, as high as 220 rs was paid for first quality Oomrawuttee. The immediate effect was to stop business entirely, and late accounts from Khamgaum, Oomrawuttee, and Akote, advise that the reaction which has consequently taken place has already brought prices down to about the level of last mail's closing district rates. The future course of prices will almost entirely depend upon the movements of the Liverpool market, although no doubt the advent of the Broach crop should tend to make holders apprehensive that the present discrepancy between spot and home prices is not likely to continue when free arrivals shall have relieved the present scarcity of cotton. The holding power of the ryots, however, is no doubt very great, and it is impossible to foresee to what extent it will act in regulating prices on this side. Imports of cotton are somewhat heavier this week, but the export more than fully keeps pace with them. New Oomrawuttee is still very scarce, and arrivals are mostly taken up in fulfilment of contracts. No official information has yet been published regarding the late rains in Berar, but from further inquiries made we learn that the damage will be slight, and confined to the Khamgaum districts. From Broach we have received very cheerful reports this week, and the out-turn of the crop promises well, both as regards quality and quantity. Accounts from the Dhollerah districts also are favourable, and picking is being carried on vigorously in some of the districts. Messrs Robertson Brothers and Co., Dharwar, writing under date of 31st ultimo, state that the quantity of old cotton still remaining above ghaut is double that of last year, and that the new crop promises to be an excellent one. The appearance of the plants is all that could be desired. Tinnevelly—We have a telegram dated 2nd instant, quoting 118 rs per candy of 500 lbs.

EXPORT of COTTON from BOMBAY to Feb. 3.

Actual exports since last mail left, 6,751 bales.

Messrs E. B. Liddell and Co., of Alexandria, have furnished the following report, dated Feb. 17:—Our last advices were dated 10/11th inst. The activity and firmness we then noticed in cotton have since disappeared under the influence of daily unsatisfactory accounts from Liverpool, and our market has relapsed into a dull state, with a slight further decline upon the current descriptions. We quote to-day:—Fair, 7⅞d to 8d per lb, f.o.b; fully fair, 8⅛d, ditto; good fair, 8⅜d, ditto; fully good fair, 8⅝d, ditto; Gallin, 10d to 13d, ditto. Freight about ¼d per lb, for steam-pressed bales.

The colonial produce markets have ruled dull throughout the week, and the tendency of prices has been in favour of buyers, though a better tone prevailed at the close. Less money has been accepted for sugar, tea, and coffee, the transactions having been limited in each. Rice has been in moderate request.

The annexed is dated Havana, February 8:—Clayed sugars—The weather having for a long time been unfavourable, supplies of new produce continued throughout the past month on a very limited scale; and the demand for immediate shipment being on the other hand active, the market became quite excited, and prices gradually advanced to 10¼ rs to 10½ rs for No. 12. Since the beginning of the present month the arrivals from the country have become more important; they are not adequate, however, to the demand, in fact there is not as yet anything like an assortment to operate upon the market. We place our general quotations, based upon the last transactions, as follows, viz.:—Nos. 7 to 10, 25s 8d to 27s 4d, at 17 per cent. prem, f.o.b. per cwt; Nos. 11 to 12, 27s 11d to 28s 5½d, ditto; Nos. 13 to 14, 29s to 29s 7d, ditto; Nos. 15 to 17, 30s 3d to 31s 3½d, ditto; Nos. 18 to 20, 31s 10½d to 33s 6½d, ditto. Strong and dry sugars, having been relatively scarce, sold at ¼ rl over these figures, and the bright yellow kinds suitable for Spain, and sugars of the Derosne process being very scarce, commanded ¼ to ½ rl above these quotations. The stock here and at Matanzas amounts to 69,540 boxes, against 210,754 boxes in 1870. The exports from here, Matanzas, Cardenas, and Sagua la Grande, during the last month, were distributed as follows:—To the United States, 27,717 boxes 11,711 hhds; to Great Britain and a market, 3,294 boxes 468 hhds; to Copenhagen, 996 boxes; to Amsterdam, 250 boxes 38 hhds; to Marseilles, 850 boxes; to Spain, 691 boxes; to South America, 91 boxes 3 hhds—total, 33,889 boxes 12,220 hhds, against 75,699 boxes 6,145 hhds same month last year. The Crop—Planters in general complain of unfavourable yield of the cane, which, as it now appears, has been more seriously injured by protracted drought and the effect of the late hurricanes than at first anticipated. The crop will undoubtedly fall short, even from an average one, but it would be premature on our part to hazard anything like a correct estimate of the deficiency at this early date.

The annexed report, dated Jan. 23, has been forwarded by Messrs Fryer, Schultze, and Co., of Colombo:—The weather until within the last few days has been stormy, with frequent heavy falls of rain; this and a continued scarcity of tonnage for Europe led to a marked diminution in shipments of coffee during the fortnight, although the clearances outwards are still in excess of last year. The figures below show the distribution of exports:—

PLANTATION COFFEE.

	1870. cwts.		1869. cwts.
To Great Britain.....	208,068	.....	192,379
Foreign ports.....	8,602	.....	156
Australia and India ...	6,114	.....	4,329
	222,784	.....	196,864

NATIVE COFFEE.

To Great Britain	22,488	.....	19,552
Foreign ports.....	10,707	.....	2,388
Australia and India ...	1,206	.....	1,304
	34,401	.....	23,244

There has been a small amount of business transacted in parchment, chiefly of low grown, a few parcels only of superior bold having found buyers, the latter at an extreme rate, in one instance of 12s 4½d. The arrivals from estates are still liberal, and owing to scarcity of tonnage and consequent restricted shipments, Colombo stores are glutted with coffee. Very little has been done during the fortnight in native coffee, which does not come forward in any quantity. The value has advanced to 46s 6d and 47s for parcels ready for shipment.

* The stock of sugar in Holland is in first hands only; in all other countries in first and second hands.

Messrs Mohr Brothers and Co., of Rangoon, writing on Jan. 23, observe:—Supplies of new Natsain paddy, which have been very small hitherto, are increasing since a few days, and we look for a well supplied market after about a week. Prices have opened at 119 rs to 120 rs per 100 baskets, 5 to 6 parts

rice, equal to 5s 4½d per cwt. free on board, at the current rate of exchange. The new rice shows a fine quality. The demand is not pressing: the tonnage in the harbour to load rice for Europe amounts to only 8,800 tons burthen, against 23,000 tons at the same time last year.

Annexed is Messrs William Moran and Co.'s indigo report, dated Calcutta, Jan. 31:—Since our last report there have been three public sales, at which 1,360 chests were sold, exclusive of rejections from previous sales. Prices have been fully maintained, and at yesterday's sale the little indigo of middling and good quality which was offered sold decidedly dearer—the effect no doubt of the news of an armistice having been signed between the Germans and French, added to the fact of there being so very little of European manufacture remaining. The crop will apparently fall somewhat short of 95,000 maunds; quantity sold, 89,000 maunds. Exports of indigo from 1st November, 1870, to 28th January, 1871:—To Great Britain, 13,526 chests; France, 216; Trieste, 2,738; foreign Europe, 244; America, 1,498; Gulphs and Levante, 1,275—total, 19,497 chests.

Annexed is Mr Helmuth Schwartze's report on the public sales of colonial wool:—The first series of London public sales of colonial wool commenced on the 3rd and closed on the 27th, the catalogues having comprised 32,949 bales Sydney, 38,348 Port Phillip, 15,262 New Zealand, 14,529 Adelaide, 1,657 Van Diemen's Land, 840 Swan River, 26,022 Cape, 2,225 sundries—total 131,832 bales. Considering the first arrivals amounted to only 77,000 bales, and that the wools held over in first hand can hardly have exceeded 45,000 bales, the market must now be entirely cleared of old stocks. The series has throughout been characterised by great steadiness. It was preceded by frequent private transactions, in this case, as almost always, a sure sign of a healthy market. There can scarcely be a doubt but that the decrease in the regular consumption, consequent upon the war, has been more than counterbalanced by the exceptional demand for wool adapted for blankets, army clothing, &c. Hence the favoured position of certain descriptions, and more especially of Cape wools, the value of which has risen about 10 per cent. Snow whites, bought in preference to other sorts by the continental trade, have been 1½d to 2d higher than at the highest time in November, and relatively much dearer than Australian kinds—a rather anomalous position which is not likely to outlast its immediate cause, the war demand. In Cape fleece and grease the advance has scarcely been so great, but still sufficiently marked. As for Australian wools, prices, as compared with the highest November rates, have on the whole ruled in favour of sellers, but a distinct rise can only be quoted on some descriptions, as scoured Port Phillip and good combing fleece sorts, which sold ½d to 1d higher than in the preceding series. Greasy wools, though better paid at the end of the series than at the outset, are still comparatively cheap, and the same may be said of Sydney scoured, which, excepting the low faulty sorts, have throughout the sales been easy of purchase. At the beginning of the series, the market had chiefly to depend on the English and German trade, France being but thinly represented, but with the growing certainty of a speedy re-establishment of peace the number of French buyers increased, and during the last eight or ten days we have had the usual attendance, and almost the usual competition from that country. About 60,000 bales are estimated to have been taken for export. The series having been held so early in the year very little new wool had arrived from Australia, and excepting the cases of Port Phillip and Adelaide, no opinion can yet be formed of the condition of the new clip. From Victoria the wools offered have been mainly of the medium class; the condition of the greasy sorts appears rather lighter than usual. The commencement of the next series has not yet been fixed, but the date is likely to be the 13th of April.

The annexed is dated New York, Feb. 17:—The impediments to cartage, lighterage, and transportation having been to a considerable extent obviated, general trade has improved. The money market remains in the same easy condition as before noted. Call loans are freely offered at ½ to 5 per cent., with the bulk of business at the minimum figure. Indeed so great is the glut of National Bank notes, that they are in some instances loaned for a period of three to five days, without interest. The supply of mercantile paper at the banks and discount houses is moderate, and the rates are 6½ to 7 per cent. for first class, and 8 to 10 for second-class acceptances. Gold fluctuations have been a little wider than usual. On Wednesday the premium declined to 110¼, under large sales by a prominent banking house, against a negotiation of bonds at London. From this point there was a rally on Thursday to 111¾, though the Government sale of a million, together with a slight advance in our national securities at London, led to a reaction to 110¾ to 111. Yesterday the premium vibrated between 111 to 111¼, the market closing with rather a firm tone at 111¼. Foreign exchange continues strong, but the large amount of cotton and other produce, together with securities, corporate and national, to go forward, is likely to prevent any special irregularities in the market during the spring months. The imports of foreign merchandise are pretty heavy, but, owing to the backwardness of trade, they are not coming on the market very freely. This is indicated by the comparatively moderate demand for gold for duties.

Mr L. Th. van Houten thus reviews the Dutch tin trade of the last month:—We have to report a very quiet market for tin, and only very slight fluctuations have taken place in the value of the article. Banca tin was sold at 77½ fl in the beginning of the month, and when somewhat more demand set in, on the opening of the navigation, the price advanced to 78 fl. The English market remained quiet, with rather drooping prices, considerably lower than our quotations here, and the demand again fell off towards the end of the month, the nominal closing price being again 77½ fl. In Billiton tin very little has been doing, the stock on the spot having previously all been sold, and the parcels on ships' board arrived during the winter not yet being discharged. In parcels afloat no business has come to our notice. We quote to-day 77 fl ex ship arrived, and 76 fl for floating lots. The combined delivery of tin during this month has again been very satisfactory, being 11,400 slabs, notwithstanding the interruption in the navigation by the severe winter. The following statement shows the position of Banca tin in Holland on the 28th February, from the official returns published by the Dutch Trading Company:—

	1871.	1870.	1869.
Import in Feb.....slabs	7,413	2,839	8,406
Previously this year	10,357	13,229	6,719

Unsold stock.....	97,849	76,868	60,325
Total stock	146,949	120,243	127,797
Stock of Billiton	5,151	7,591	3,023
Import in Feb.	728	4,491	5,035
Delivered and shipped in Feb.	...	4,400	2,800
Quotation Feb. 28 ... Banca	77½fl	69½fl	76½fl
Quotation Feb. 28 ... Billiton	77fl	67½fl	75½fl

The quantity of Banca tin now afloat for the Dutch Trading Company is 16,400 peculs, equal to 1,025 tons, against 34,500 peculs, equal to 2,156 tons, last year. The estimated quantity of Billiton tin now afloat is 11,175 peculs, equal to 700 tons, against 9,825 peculs, equal to 614 tons, last year.

THE COTTON TRADE.

LIVERPOOL.—March 2.

The cotton market has been heavy throughout the week, the superabundant supply more than counterbalancing any influence of the anticipation of peace on the continent. During the last few days the pressure to sell has increased, and, with a limited demand, prices have given way in all descriptions. The Bank rate has this day been advanced to 3 per cent. Sea Island continues in limited demand, and the increased choice has given buyers some advantage in price. American has been pressed upon the market, and has fallen ¼d per lb. New York advices to the 1st inst. quote middling Upland 15½c, costing to sell in Liverpool 8d per lb, by steamer. Brazil continues neglected at a decline of ½d to ¼d per lb on last week's currency. Egyptian has participated in the general depression, and prices are quoted at ¼d per lb lower. East Indian has been very difficult of sale, and the common qualities have declined quite ¼d per lb; the better descriptions, owing to scarcity, are only partially ¼d lower.

In cotton to arrive a large business has been done, at receding prices. The latest quotations are—American, basis of middling, from any port, January-February shipment, 7½d; March-April, not below good ordinary, 7½d; March-April, 7½d; Mobile, not below good ordinary, ship named, not sailed, 7⅝d; ship named, 7⅝d; due, 7½d; at sea, 7½d; March-April shipment, 7⅝d; New Orleans, not below good ordinary, ship named, not sailed, 7⅝d; ship named, 7⅝d; February-March shipment, 7½d; March delivery, 7½d; March-April shipment, 7½d; New Orleans, not below low middling, March delivery, 7½d; New Orleans, at sea, 7½d; Texas, at sea, 7½d; low middling, Texas, not below good ordinary, March-April shipment, 7¼, 7⅛d; Bengal, fair new merchants, January-February shipment, Suez, 5½d; February-March, Cape, 5½d; Dholleral, fair new merchants, April-May shipment, Cape, 6¼d; Oomrawuttee, fair new merchants, January-February shipment, Cape, 6⅛d per lb.

The sales of the week, including forwarded, amount to 69,620 bales, of which 2,620 are on speculation, and 14,630 declared for export, leaving 52,370 bales to the trade.

March 3.—The sales to-day will probably amount to about 8,000 bales, with a dull market.

Stock, March 2. 1870 bales.	1871. bales.	Consumption from Jan. 1 to March 2. 1870. bales.	1871. bales.
291760	710300	438940	495240

The above figures show:—

	bales.
An increase of import compared with the same date last year of	466,140
An increase of quantity taken for consumption of	56,300
An increase of actual exports of	32,420
An increase of stock of	418,540

In speculation there is a decrease of 59,550 bales. The imports this week have amounted to 22,473 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to February 25) is 350,000 bales against 24,000 bales last year. The actual exports have been 24,882 bales.

LONDON.—MARCH 2.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

Only a moderate business has been transacted during the week; at the close the market is very dull, and prices show a decline of about ⅛d per lb on the spot, and ⅛d to ¼d per lb for for arrival.

NEW YORK.—FEB. 17.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, Feb. 17. From the figures thus obtained it appears that the total receipts for the seven days have reached 141,957 bales, against 161,095 bales last week, 154,482 bales the previous week, and 150,800 bales three weeks since, making the total receipts since Sept. 1, 1870, 2,653,339 bales, against 2,032,786 bales for the same period of 1869-70, showing an increase since Sept. 1, this year, of 620,533 bales. The exports for the week ending this evening reach a total of 75,185 bales, of which 51,386 were to Great Britain and 23,799 to the continent, while the stocks at all the ports, as made up this evening, are now 709,033 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:—

Week ending Feb. 17.	Exported to Great Britain.	Exported to Continent.	Total this week.	Same week 1870.	Stock. 1871.	Stock. 1870.
New Orleans	12112	18174	80286	32357	285504	237177

All other ports	...	...	...	500	35000	30000
Total	51886	23799	75185	64596	709033	546727
Total since Sept. 1	1294493	281650	1576133	1102510	...	...

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 10,639 bales, while the stocks to-night are 162,305 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to Feb. 10, the latest mail dates. We do not include our telegrams to-night, as we cannot ensure the accuracy or obtain the detail necessary by telegraph:—

RECEIPTS and EXPORTS of COTTON (bales) since Sept. 1, and STOCKS on hand

We have had another week during which the tendency of prices has been continually downward. To-day, at a decline of ⅛c on all grades below middling, and with the receipts at the ports footing up less than anticipated early in the week and more favourable private advices from Liverpool, there was a rather better feeling and more doing, the sales reaching 5,333 bales, the close being at 15¼c for middling Uplands and 14¼c for low middling. For forward delivery the transactions have been large, with a decline during the week of about ¼c, and the close was—for February, 14⅜c; March, 14½c; April, 14½c; May, 14 11/16c; June, 14 7/8d. The total sales of this description for the week (including 3,100 bales, free on board, but not including bales "exchanged") have been 59,150 bales. For immediate delivery the total sales foot up this week 22,592 bales, including 1,730 bales to arrive, of which 3,609 bales were taken by spinners, 1,361 bales on speculation, 17,322 bales for export, and 300 bales in transit. The following are the closing quotations.

	Upland and Florida.	Mobile.	New Orleans.	Texas.

Below we give the movements of cotton at the interior ports—receipts and shipments for the week, and stock to-night and for the corresponding week of 1870:—

	Week ending Feb. 17, 1871.			Week ending Feb. 17, 1870.		
	Receipts	Shipments.	Stock.	Receipts	Shipments.	Stock.
Augusta	4501	3876	21913	3399	2577	23617
Columbus	974	1809	12370	1233	2473	13460
Macon	1343	2886	15914	1200	2702	16693
Montgomery	1873	2356	10015	1847	4325	10447
Selma	1363	2217	9921	780	768	7857
Memphis	17224	20520	45673	10501	11900	28092
Nashville	3504	3977	8011	2834	2835	5264
	30781	35951	123897	21904	27580	105400

These totals show that the interior stocks have decreased during the week 5,169 bales (being now 18,497 bales more than for the same period last year), while the aggregate receipts are 8,877 bales more, and the shipments 8,371 bales more than for the corresponding period of 1870.

The exports of cotton this week from New York show a decrease since last week, the total reaching 17,475 bales, against 18,009 bales last week. Below we give our table, showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1870; and in the last column the total for the same period of the previous year:—

—*New York Commercial and Financial Chronicle.*

NEW YORK, Feb. 24.—According to Messrs Moffat, Dennis, and Co.'s report, the week's receipts of cotton at all United States' ports have been 137,000 bales, and since the 1st of September, 2,795,000 bales. Shipments to England, 70,000 bales; to France, none; and to the continent, 31,000 bales. Total since the 1st of September, 1,705,000 bales; stock at all ports, 595,000 bales.

NEW YORK, Feb. 28.—The receipts of cotton at all United States' ports during the last four days have been 72,000 bales. Exports to Great Britain, 51,000 bales; and to the continent, 15,000 bales. Middling Upland, 7¼d, cost and freight, to Liverpool.

NEW YORK, March 1.—The receipts of cotton at all United States' ports amount to 18,000 bales.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, March 2.—Our market still remains very tame, and the transactions of the past week are even less than the previous one. The weakness in the cotton market and the prospects of dearer money, the first step towards which has been made to-day by the advance in the rate of discount to 3 per cent., have made buyers very cautious in placing further orders, as the opinion is now pretty general that the present range of values for yarns and goods cannot be much longer maintained. The heavy engagements of spinners and manufacturers have as yet prevented any material reduction in prices, but they cannot now sell easily without making a concession. In yarns for the home trade only a moderate business is doing to supply immediate wants. Shipping qualities are not in demand, and prices are tending in buyers' favour. Cloth is in fair request, but the lots are small, and chiefly for early delivery.

Messrs Alexander Collie and Co. received the following telegram from Manchester yesterday:—Not much business going on, but prices are tolerably steady, owing to producers being still heavily under order. In exceptional cases, where contracts for shirtings are running out, threehalfpence per piece under current quotations is being accepted. Yarns are in very moderate demand.

BRADFORD.—There is a cheerful tone manifested in the wool market. The business done, however, is not above an average in amount, for staplers are again seeking an advance in price. A concession from the extreme rates effects business. Demi-lustre wools, especially wethers, are chiefly in request. Lustre wools are also in fair demand and realise better rates. Noils and brokes command ready sale at firm rates. In the yarn market there is less animation, though there is considerable inquiry on the part of export merchants, whose operations are interrupted by the advancing rates of spinners. In the piece market there is little change to note.

DUNDEE.—Our flax market continues very firm, and although the amount of business doing on the spot is not large, holders refuse to sell unless at full prices, being under the impression that the requirements of France and Germany will prevent any decline in the Russian markets, and may even lead to a farther advance in prices. In our market for goods on the spot there has been a fair amount of inquiry, but only a limited amount of business has been done. Meantime, however, holders are very firm, expecting that their stock will be all required before fresh supplies come forward, especially if the late unprecedentedly severe weather causes a late opening of the navigation of the Baltic.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, FEB. 17.

The flour market has been very quiet, selling only in small lots, but holders are pretty firm, demanding former prices. Sales include No. 2 at $4.50 to $5.50; superfine rye flour at $5.90 to $6.35; Wisconsin spring at $7.25 to $7.50; Minnesota spring at $7.50; Oregon at $9.75 to $10.25; St Louis family at $8.50; South American shipping at $7.65. For corn meal the market is rather less active. There has been a fair business doing in wheat, but prices are not strong. Sales are at $1.62 in store for choice amber Michigan; $1.52 to $1.52½ in store for No. 2, and $1.55 afloat for No. 1 new spring; old nominal at $1.38 to $1.45; Diehl Genesee $1.85 to $1.90; white Michigan $1.65 to $1.75; white Genesee $1.65 to $1.75; amber southern $1.52 to $1.55; red western $1.55 to $1.57; white California $1.85. The demand for corn has been light and mainly for export. Sales are at 81c to 83c on the track; 82c for bagged lots of yellow mixed western on the pier; 84c to 85c for western mixed afloat, 85c to 86c for high mixed to yellow afloat, and 86c for Pennsylvania yellow afloat. There has been a good demand for oats but largely speculative, and prices are very strong. Sales are 65½c to 66½c for western in store; Ohio white 67c in store and 69c afloat; Ohio on the pier, in bags, 66c to 67c.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The grain trade was again disappointing in its character until Wednesday last, when a revived export demand set in, which was freely continued to-day. Peace being now apparently assured on the continent, there has been a fair inquiry for wheat for shipment, which has resulted in an advance of 1s on choice English and American qualities. A considerable

quantity of the latter has been taken for export. Although it is late in the season, a large extent of land will be placed under spring wheat in France, and in England a more than average area is being prepared in anticipation of continued high prices. Dealings in wheat off the coast have been extensive, and the quotations have advanced 2s to 3s for choice wheats on the week, while a steady absorption of produce on French account is looked for. The number of wheat-laden vessels on passage from the East continues large, being 274, against 375 last month, and 111 at the corresponding period last year. The imports since January 1 have been 1,347,164 quarters, against 1,900,236 quarters in January and February, 1870. Flour ruled quiet, but firm in value at the beginning of the week; but to-day there was a good demand for sacks, at a rise of fully 6d.

Spring corn has remained steady in value and demand. Beans and peas have been in request for setting, and grey peas have been particularly scarce. Maize and oats have sold freely, at an advance of fully 1s per quarter on the week. Barley and malt are unchanged in value.

Mr Geo. Dornbusch thus reports the state of the floating grain and seed trade:—During the last eight days 172 grain and seed-laden vessels have been reported arrived at ports-of-call, viz.:—74, wheat, 20 maize, 30 barley, 5 rye, 3 beans, 20 linseed, 2 rapeseed, 12 cotton-seed, 2 millet-seed, 2 flour, 2 sundries. The floating grain trade has been steady in tone, with a good deal of business doing. To-day the demand has been very active. Wheat—At first business was limited, but later an active trade ensued, and prices of fine cargoes rose about 2s to 3s. Maize — At first in quiet demand, but later the tone improved, closing 6d to 1s dearer. Barley in active demand at 6d to 1s advance. Rye 6d to 1s dearer. The reported sales are as follows:—Wheat—28 arrived cargoes: Ghirka Odessa, 49s 6d to 52s; new ditto, 50s 3d to 52s 8d; Ghirka Nicolaieff, 52s; Berdianski, 51s 6d to 53s; soft ditto, 52s 6d to 52s 9d; Marianopoli, 52s 6d; new ditto, 53s; Ghirka Rostoff, 50s; Line Ghirka, 48s 7½d per 492lbs. No 1 Spring, New York, 56s 3d per 480 lbs; Californian, 58s 6d per 500lbs. On passage, a cargo Ghirka Taganrog, 50s per 492 lbs for Rotterdam. To be shipped—1 cargo Berdianski or Marianopoli, 53s per 492 lbs. Maize—7 arrived cargoes: Odessa, 35s 6d; Ibrail, 34s 6d to 35s 3d; Moldavian, 35s; Bulgarian, 35s per 492 lbs; Danubian, 34s per 480 lbs. Barley—10 arrived cargoes: Odessa, 27s 9d; Azow, 27s to 28s; Russian, 27s 9d; Ballchick, 27s to 27s 3d; Moldavian, 28s to 28s 6d; Wallachian, 28s; Salonica, 27s per 400 lbs. On passage: 1 cargo Danubian at 28s 10½d per 400 lbs. Rye—2 arrived cargoes: Azow and Taganrog, at 37s 6d. On passage: 10,000 quarters at 37s. To be shipped, 3 cargoes: Odessa, 87s 6d; Danubian, 37s 1½d to 38s per 480 lbs. Linseed in active demand for the continent, at 1s advance. Arrived, 3 cargoes: Azow, 62s 6d to 63s; Marianapoli, 62s 9d per 424 lbs; East India and Calcutta, 62s per 410 lbs. On passage: 300 tons East India and Calcutta, 62s 6d. Shipped or to be shipped: 100 tons ditto, 63s 3d per 410 lbs. Rapeseed irregular; in some sales 6d to 1s dearer. Arrived: 100 tons ordinary brown Calcutta at 68s per 416 lbs. Cotton-seed quiet at about late rates. Arrived: 440 tons Egyptian and Alexandria, at 9*l* per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—A very dull tone pervaded the market until yesterday. This cessation of business is difficult to account for with the present moderate prices and the greatly increased consumption going on, for according to the official returns just issued the duty payments for the past year exceeded those of 1869 by 84,000 tons. About 28,000 tons British refined was, however, exported. The business in West India to yesterday amounted to only 363 casks. Some parcels of low St Lucia offered by auction were withdrawn. A parcel of grainy yellow Berbice in bags sold at 36s to 37s 6d. Prices may be quoted about 6d per cwt. lower than on Friday last. Sales of refined have been effected upon further reduced terms, and the prices have now fallen more than 10s per cwt having passed without any revival of demand from the trade. This for dry goods from the late highest point. Landed last week, 4,750 tons; delivered, 3,260 tons; leaving the stock at the close 57,500 tons, against 68,500 tons and 67,000 tons in the two previous years at the same date.

Mauritius.—There have not been any public sales.

Bengal.—485 bags brown Gurpatta sold at 21s 6d to 26s 6d for low to good, being some decline upon late quotations.

Madras.—During the last fortnight about 4,000 bags Jaggery have sold at 18s 6d to 19s.

Foreign.—Privately 300 casks Porto Rico have been disposed of at 33s 6d. 2,410 boxes grainy Havana by auction were partly sold at 35s 6d to 36s 6d, the remainder bought in. A cargo of grainy Cuba of the new crop and close at hand has sold at 27s 9d per cwt.

Refined.—Further reduced rates have been accepted for dry goods, viz., 45s to 46s 6d middling to fine Titlers. Prices remain dull, and quotations favour the buyers.

Molasses.—A small parcel St Kitts sold at 13s per cwt.

RUM.—Several sales have been effected on West India this week, chiefly common kinds, at about former rates. Leewards, 1s 7d; Demerara in puncheons, 2s to 2s 1d, smaller packages in proportion; Berbice, 1s 10d to 1s 11d per proof gallon. The market is now rather quiet.

COCOA.—The demand is steady and the deliveries large. 4,616 bags Guayaquil from Brest were bought in at 50s to 51s, and since partly disposed of at 48s to 48s 6d. There has been an arrival of some extent direct from Guayaquil. 363 bags Caraccas part sold at 94s 6d to 96s. Small sales of foreign are reported by private contract. No change can be quoted in colonial. At the public sales of Trinidad on Tuesday 971 bags were partly disposed of at last week's prices: grey and common, 56s to 60s; good ordinary to good red, 61s to 88s; very superior quality, 110s per cwt.

TEA.—There have been further arrivals, and the market is without change. For the lower grades of Congou easier rates have been accepted. 2,303 packages green by auction went without material alteration, although some descriptions sold at prices in favour of the buyers. At the public sales of Indian tea on Tuesday 1,131 packages Assam Company's growth chiefly met with buyers. Pekoes went rather lower. Souchong and broken tea realised an advance of 1d per lb. Most of the tea imported by other companies was withdrawn owing to the absence of demand, some parcels selling at reduced rates with a few exceptions. By private contract, previous to the sales, business was transacted at easier rates.

COFFEE.—This market has been dull, and the importers have made sales at rather lower rates in many instances. 1,266 casks 178 barrels 655 bags plantation Ceylon by auction chiefly sold at 1s to 1s 6d decline on last week's quotations: pale and gray, 60s to 69s; colory, small berry, and low middling, 61s 6d to 65s; middling to good middling, 66s to 72s; superior and bold, 73s to 82s. 954 bags native were taken in: good ordinary, 57s; bold, 61s. There has not been any further business for arrival. 52 casks 384 barrels 169 bags Jamaica sold at 50s 6d to 59s for ordinary to fine ordinary. 325 half bales, &c., mocha part found buyers at 85s to 95s for common to fair mixed small berry. 1,377 bags Singapore were bought in at 59s to 64s. 1,530 bags washed Rio partly sold at 57s 6d to 63s for grayish and pale to middling colory. 754 bags ordinary qualities bought in. 406 bags Costa Rica part sold at 60s for pale. A floating cargo of Rio has sold at about 53s per cwt for the Baltic. The export deliveries last week were unusually large, viz., 2,600 tons, making the total clearances 3,065 tons. This is

of course due to the opening of navigation in some parts of Europe. The excess in stock now amounts to only 2,100 tons.

RICE.—The rather limited business done has been at easier prices, and the market continues flat. 3,686 bags Rangoon by auction sold at 10s with a few lots 10s 6d. By private contract a few parcels have sold. Fine white Bengal, 13s 6d, ex quay; Casla, 8s 9d, ex quay; Rangoon, 9s 9d to 10s. A floating cargo of Rangoon, spring shipment, reported at 10s 9d, continental terms. Two of Neemuncie, particulars not given.

IMPORTS and DELIVERIES of RICE to Feb. 25, with STOCKS on hand.

SAGO.—193 boxes small grain were bought in at 18s per cwt.

TAPIOCA.—464 boxes Singapore pearl sold at 18s to 18s 6d; a few lots 19s per cwt for medium and fine small grain. 325 bags taken in. 1,820 bags rough Penang and Singapore were disposed of at rather lower prices, from 1¾d to 2¼ per lb.

CINNAMON.—At the quarterly sales on Monday the following assortment was offered:—526 bales 1st sort Ceylon, 1,055 bales 2nd sort, 414 bales 3rd sort, 702 bales 4th sort—total, 2,897 bales, and 2,359 bags 84 cases chips. The sales showed a more favourable result than was generally anticipated, a very good demand prevailing. Common to middling quality sold at extreme rates; the good and fine sorts also met with fair competition at prices showing 1d to 3d advance on those ruling in November last. Of the above quantity, about 2,200 bales were sold in the room, the remainder, chiefly spurious, being withdrawn. The chips were principally bought in, very low offers only being made. The prices ranged as follows: good middling to superior 1st sort, 3s 1d to 3s 5d; very low to middling, 2s to 3s; good middling to superior 2nd sort, 3s to 3s 4d; low to middling, 1s 3d to 2s 11d; low to very good 3rd sort, 1s 4d to 3s 2d; middling to very good 4th sort, 1s 10d to 2s 9d. A few lots spurious and mixed sold at 6d to 1s 4d per lb.

OTHER SPICES.—There has been a good business done in white pepper at former prices. Singapore 7¼d. 1,000 bags July delivery at 7¼d. 272 bags by auction were taken in at 7¼d to 8d. 257 bags Penang part sold at 7¼d. Black is quiet. 3,208 bags Penang by auction were chiefly taken in. Damaged sold cheaper, also one lot sound at 5⅜d. 1,804 bags Singapore part sold at ⅛d decline, namely, 5⅜d, the remainder being taken in up to 6d. Privately, limited sales are reported. 1,000 bags Penang sold for delivery at 5¼d. Nutmegs meet a steady demand at easier rates. 27 cases Penang sold as follows:—100's, 2s 2d; 85's and 81's, 2s 4d and 2s 6d; 79's and 78's, 2s 7d to 2s 8d; 66's, 3s 5d per lb. Mace quiet. The supply of cloves has been large and prices in favour of the buyers. 3,572 bags Zanzibar, about two-thirds sold at 2¾d to 3d. Pimento steady. 2,140 bags found buyers at 1¾d to 2¼d per lb. Cassia buds have further declined owing to the ample supply. 140 cases by auction partly sold at 7/ 17s 6d per cwt.

SALTPETRE.—The market is flat, with very limited transactions on the spot, and prices are partly nominal. 50 tons Bengal reported for arrival at 25s 6d per cwt., refraction 18 to 25 per cent.

IMPORTS and DELIVERIES of SALTPETRE to Feb. 25, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imported.....tons	1000 ...	1200 ...	750 ...	1450
Total delivered	1820 ...	2620 ...	1750 ...	1700
Stock.....	2500 ...	3400 ...	3180 ...	7720

Deliveries last week, 317 tons.

DYE-STUFFS and GUMS.—Gambier and cutch remain quiet, and there have been few sales effected. The latter quoted 22s per cwt for fine. Bengal turmeric last sold at 18s 9d to 19s per cwt, the market being quiet with a large stock. 83 bales Bengal safflower were bought in. Business has been done in lac dye for arrival.

METALS.—The tone of business in these markets is rather quiet. Copper maintains the improvement last quoted. During the week sales of fair extent have been made in Chili, &c., chiefly at 65/ 10s to 66/ 10s according to conditions. Burra and Wallaroo 74/ to 75/. Spelter has met with some inquiry. The business is chiefly for delivery, Silesian selling at 17/ 17s 6d to 18/. A parcel of very fine on the spot realised 18/ 5s. The stock is 2,650 tons, against 675 tons last year, and 1,106 tons in 1869 at the same date. English lead continues in demand. A good business has been done in Scotch pig iron, the latest quotation for which is 52s 7½d cash. Manufactured iron remains without improvement. Tin has been depressed: Straits, 128/ 10s to 130/; to arrive, 128/ per ton.

HEMP.—All descriptions remain dull. 949 bales Manila by auction partly found buyers upon rather lower terms. Ordinary to good fair, 46/ to 49/ per ton; Russian, dull; Petersburg clean, 34/ to 35/ per ton.

JUTE.—The market continues firm, with moderate transactions at full rates, and the business is chiefly for arrival. Settlements have been made on some floating contracts of last year.

LINSEED.—Rather higher prices have been paid, with a firm market. Calcutta, 61s 6d to 62s 6d, to arrive, 62s to 62s 3d, according to date of shipment. Black Sea, &c., cargoes off the coast have sold at 62s 9d to 63s per quarter.

OILS.—Olive is firm, but quiet. Gallipoli quoted 49/ 10s to 50/; Zante Mogador, &c., 48/ to 48/ 10s. All common fish oils are dull. Pale seal 37/ 10s to 38/. A limited demand for sperm, at 84/ to 84/ 5s per ton. Palm remains quiet, at 32/ to 33/ 10s. Cocoa-nut firm. Ceylon 40/ to 40/ 10s; to arrive, about 1/ more required. Cochin, 45/ to 48/, and fine quality scarce. Linseed oil has been in rather active demand. Present quotations, 32/ 10s; April to June, 33/ 5s to 33/ 10s. Forced sales have been made in English brown rape oil at some decline, but the market is now firmer, at 44/ on the spot, 44/ 10s next four months, and 44/ to 44/ 10s per ton last four months.

TURPENTINE.—American spirits quiet, at 36s 9d per cwt.

PETROLEUM.—American refined 1s 5d to 1s 5½d per gallon, and the market dull. Stock, 28,588 barrels, against 5,306 barrels last year.

TALLOW.—Foreign has slightly declined, but is now firmer, and the full rate ruled. About 1,500 casks Australian are declared for sale to-day. The following are the quotations for Petersburg qualities:—44s 6d to 44s 9d on the spot and March; 45s to 45s 3d June, 45s 9d to 46s per cwt October to December.

POSTSCRIPT. FRIDAY NIGHT.

SUGAR.—The market has been without change, but there is a little more inquiry, especially for West India. 497 casks sold to-day, making 860 casks for the week. A few lots crystalised Demerara by auction obtained 36s 6d to 38s.

COFFEE.—164 casks 24 barrels and bags plantation Ceylon by auction went at about previous rates. 50 casks 250 cases 908 bags East India partly sold, including Courtallam, at 56s 6d to 70s. 1,167 bags washed Rio were chiefly disposed of at 60s 6d to 66s 6d. 41 casks 6 barrels Jamaica were chiefly taken in.

RICE.—No further sales reported.

SPICES.—The market without change.

SALTPETRE dull, and no sales.

OILS.—423 casks Ceylon cocoa-nut part sold at 40s to 42s, according to packages. 785 casks Sydney sold at 31s to 38s 3d. 401 casks palm were chiefly bought in. A few lots fine Lagos sold at 38s 9d per cwt. 60 tuns colonial sperm partly sold at 84/ per tun.

TALLOW.—1,520 casks Australian by auction chiefly sold. Sheep, 41s 6d to 43s 6d; beef, 36s to 41s 6d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—There is a better market, and good buying at rather better prices. Dutch crushed is steady, with more inquiry.

DRY FRUITS.—Currants are in very great request, and prices considerably advanced upon last week's. The clearances being heavy and position of stock light quite accounts for the enhanced value. Raisins are firm, with a good business doing.

GREEN FRUIT.—The report of Messrs Keeling and Hunt states that the market for Azores and Valenica oranges is improved, and prices likely to be maintained. Lemons of good quality firm. The supply of Seville and Palermo sour oranges is good, and have a ready sale. Barcelona and black Spanish nuts without alteration. Brazil quiet. Coker nuts in demand.

FLAX.—Market steady.

HEMP.—Market for Russian very flat. Manilla steadier, good quality bringing full prices at 53/ paid for Belwyan, and 52/ Sorsogon.

SILK.—Holders firm. Little business doing.

SEEDS.—The trade rules dull without alteration in prices.

TOBACCO.—There has been new activity in the market during the last week, but although the sales of North American tobacco have not been large, there have been numerous inquiries. In other growths there have been some considerable sales effected at full prices.

LEATHER.—The transactions in leather during the past week have generally been moderate in extent. The supply of fresh goods at Leadenhall on Tuesday was again limited, but a fair amount of business was done at full prices. Prime light English butts, light dressing and shaved hides, English and foreign bellies, prime calfskins, and English and foreign hides continue in request, and sell readily on arrival.

METALS.—The metal market has been in suspense all the week, and although prices have been mostly maintained, there has not been much life in things. Copper is steady at late improved rates. Iron is well maintained. Tin is a trifle easier to buy. Spelter rather tending to higher rates. Lead also is rather firmer. Tin plates continue firm.

PROVISIONS.

Bacon has fallen 1s per cwt all round. We quote sizeable Waterford, 62s on board; heavy, 59s; Cork and Limerick, 58s to 60s, landed, for sizeable, and 3s to 4s less for heavy. Business improving. French butter is arriving in fair quantities, and good quality prices ranging from 116s to 136s.

METROPOLITAN CATTLE MARKET.

MONDAY, Feb. 27.—The Total imports of foreign stock into London last week amounted to 4,477 head. In the corresponding week in 1870, we received 7,406; in 1869, 11,181; in 1868, 1,866; and in 1867, 11,286 head.

Quietness has been the feature of the cattle trade to-day. The receipts of beasts have been moderate, but the quality has been indifferent. In all breeds the transactions have been restricted, at about late rates. The seed Scots and crosses have been disposed of at 5s 6d to 5s 8d per 8 lbs. The show of sheep has not been extensive, but some fair stock has been on sale. The trade has been quiet, on former terms. The best Downs and half-breds have changed hands at 5s 10d to 6s per 8 lbs. A few lambs have been on sale, and have sold at 7s 6d to 8s per 8 lbs. Calves have been in limited request, at about late rates. Pigs have changed hands at previous quotations.

SUPPLIES ON SALE.

HOP MARKET.

BOROUGH, Friday, March 3.—The business transacted in this market has been of a limited character, but prices have shown much firmness, more especially for choice coloured Kent, which have been exceedingly scarce. Mid and East Kent, 40s to 140s; Weald of Kent, 40s to 75s; Sussex, 35s to 70s; Farnham and country, 75s to 112s; olds, 20s to 50s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, March 3.—The supplies on sale have been good. The trade has been quite at our quotations:—English Shaws, 80s to 105s; ditto Regents, 70s to 90s; Scotch Regents, 65s to 95s; and Rocks, 60s to 75s per ton.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, March 3.—Our market continues but lightly supplied of all kinds, and of some descriptions, such as Peru and Lima, it is quite cleared out. Public sales of about 300 bags Egyptian and 200 bags unwashed Morocco were held on Monday last and brought full current rates. The next series of East India wool sales will commence here on the 21st instant.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, March 3.—At this market to-day wheat closes with a steady business at 1d to 2d advance. Flour 6d dearer. Indian corn 3d up.

WAKEFIELD, Friday, March 3.—At this market to-day the show of wheat gets quickly more meagre, and should the continental demand continue, and thus deprive this market of its needful supply, the consequences at the moment cannot be predicted. The advance of to-day checks sales; but a large business might be transacted at the currency of Tuesday, whilst the last coast advance of 2s is fully realised.

The Gazette.

TUESDAY, February 28.

BANKRUPTS.

William Bowler, Blechynden street, Notting hill, late victualler.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

H. J. NICOLL'S SPRING OVERCOATS, of Waterproof Tweed Cloths. 20s.; do., with silk lapels, 21s.

H. J. NICOLL'S SPRING OVERCOATS, of Waterproof Melton Cloths, 42s.

DINNEFORD'S FLUID MAGNESIA.—The medical profession for thirty years have approved of this pure solution of Magnesia as the best remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion; and as the best mild aperient for delicate constitutions, especially adapted for ladies, children, and infants.

DINNEFORD and CO., Chemists, 172 New Bond street, London, and of all other chemists throughout the world.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Umbilical ditto, 42s and 52s 6d; postage, 1s 10d. Post-office orders to be made payable to John White, Post-office Piccadilly.

NEW PATENT

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS &c They are porous, light in texture and inexpensive and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

Wanted wherever cash and books are used In quantities at wholesale prices. Milners Phœnix Safe Works, Liverpool, the most extensive and complete in the world. Depots: Liverpool, Manchester, Sheffield, Leeds, Hull; London depot, 47A Moorgate street, City, near the Bank of England. Circulars free by post

DR LOCOCK'S WAFERS.—More Cures this week (Feb. 27, 1871) of Bronchitis, Voice, Chest, Cough, and Throat Complaints.—From Mr Earle, M.P.S., 22 Market place, Hull "Your Wafers are invaluable for the voice, throat, and chest. All sufferers from bronchitis, hacking cough and deprivation of rest, should take them hundreds would find quick relief."—Sold by all druggists, at 1s 1½d per box.

TEETH.—MR WEBB (MANY years with Mr Eskell, of 8 Grosvenor st., Bond st.) supplies ARTIFICIAL TEETH which cannot be surpassed for use, comfort, appearance, and durability. Painless treatment guaranteed throughout, as with all other operations; all consultations free. Terms moderate. N.B.—Any number of teeth made in two or three hours, and repairs effected whilst waiting. At home daily until eight, at 27 New Bond st. His treatise, which is well worthy of perusal, free for two stamps.

MESSRS GABRIEL'S extraordinary improvements in ARTIFICIAL TEETH and PAINLESS DENTISTRY, Patent No. 562, improved Jan., 1871, afford the following advantages:—

1stly. EXTREME LIGHTNESS (being completely self-supporting), combined with great efficiency, durability, and comfort, thus avoiding the covering to the palate hitherto considered an indispensable adjunct to Artificial Teeth.

2ndly. MODERATE CHARGES, accounted for by their extreme simplicity of construction, while the highest class of mechanism and materials only are employed, combined with an experience of half-a-century in their adaptation.

3rdly. ABSOLUTE IMMUNITY FROM PAIN, the compressed NITROUS OXYDE GAS, after an experience of many thousand cases in hospital and private practice, ensuring this desideratum with an absolute certainty, the laughing gas being not only absolutely free from danger but positively pleasant.

4thly. So successful an imitation of nature (springs being entirely dispensed with) that detection becomes an impossibility.

MESSRS GABRIEL,

64 LUDGATE, CITY, and 56 HARLEY ST., CAVENDISH SQ., London.

MESSRS GABRIEL'S CELEBRATED PREPARATIONS FOR PRESERVING AND BEAUTIFYING THE TEETH

Are sold by all Chemists and Perfumers in every town. Price 1s 6d and 5s.

ISSUE OF SEVEN HUNDRED AND FIFTY THOUSAND POUNDS PRUSSIAN RAILWAY STOCK.

NOTICE.—Subscriptions were received for this Stock in London, Paris, and Brussels in 1870, but in consequence of the war no allotment was made. Having regard to the lapse of time, and to the fact that a portion of the Stock was subscribed for in France, it is now proposed, by the re-issue of the Prospectus, to afford to such of the former applicants as shall elect to do so the opportunity of again subscribing, and at the same time to invite subscriptions for any Stock which, for the reasons above referred to, may not be taken up.

The importance and remunerative value of investments in Prussian Railways will be best illustrated by the following Table of Dividends recently paid in this description of Stock, whilst it may be added that the constant control and close watchfulness exercised by the State in reference to all matters affecting the well-being of these enterprises, afford a sure guarantee to the Stockholder that his investment will be rendered both safe and highly profitable:—

Halle, Erfurt, and Guntershausen Railway pay 9 per cent.

Ludwigshafen Bexbach Railway pay 11½ per cent.

Berlin, Hamburgh Railway pay 9½ per cent.

Upper Silesian Railway pay 15 per cent.

Minden Lowenhagen Railway pay 9 per cent.

Berlin, Anhalt Railway pay 13½ per cent.

Magdeburg Leipzig Railway pay 19 per cent.

Leipzig, Dresden Railway pay 24½ per cent.

Magdeburg, Halberstadt Railway pay 15 per cent.

Berlin, Potsdam, Magdeburg Railway pay 17 per cent.

MAGDEBURG-LAUSITZER RAILWAY.

Direct Line from Magdeburg to Breslau, via Jüterbogk to Lubbenau; capital, 8,000,000 thalers, in 80,000 shares of 100 thalers each, or £1,200,000 in 80,000 shares of £15 each, of which 30,000 Shares, or £450,000, have already been subscribed in Prussia. Subscribers for the remaining 50,000 shares or £750,000, must pay £4 per Share on Subscription, then £2 per share on allotment, and the remainder at intervals of three months, in sums of £1 per Share. Interest will be paid during the construction of the Line at the rate of 5 per cent. per annum, payable in Magdeburg, London, and Brussels.

NOTE.—No Preference Shares and no Debentures will be issued for any part of the above Capital. The Shares, when paid up, will rank as Bonds.

DIRECTORS.

Herr Ernst von Kuehne, Knight of the Order of the Red Eagle, Wernigerode, and Berlin, Chairman.

Count von Hagen, Member of the Prussian House of Deputies.

Herr Hoffmann, Civil Governor of the Jüterbogk-Luckenwalde District, Member of the House of Deputies.

Herr C. Lüdemann, Magdeburg.

Herr Rudolf Rose, Director-General of Administration of Lower Lusatia at Muskau.

Von Gerlach, Royal President of Police, Civil Governor of the Magdeburg District.

Baron von Platho, Civil Governor of the District Merseburg, Province of Saxony.

Von Senfft-Pilsach, Civil Governor of the Zauche-Belzig District, Member of the House of Deputies.

Baron von Platow, Civil Governor of the Calau District.

Count [illegible] Civil Governor of the Luckau District.

[illegible] Royal Privy Councillor of Commerce at the Max-Hütte, near Saarau, Member of the House of Deputies.

[illegible] Lord of Wiesenburg, Member of the Reichstag.

Herr [illegible] Royal Councillor of Commerce, First Chamber of Commerce, Magdeburg.

Two Directors will be elected on behalf of the English Subscribers.

BANKERS.

London—The London and County Bank, Lombard street, and their Branches in Town and Country.

Brussels—Messrs. Bagwood & Morgan, 8 Rue Royale.

Hoggarth, Messrs. Coates & Hankey, 24 Gresham street, City.

Messrs. Reed, Wood, and Haynes, 9 Warnford court, Throgmorton street.

London Offices—10 Cornhill, City.

PROSPECTUS.

The Line of Railway, about 160 English miles in length, starting from Magdeburg and passing through the towns of Magdeburg, Loitzsch, Brietz, Wiesenburg, Belzig, Treuenbrietzen, Jüterbogk, Dahme, Luckau, and Lübbenau, forms one of the most important links in the great system of Prussian Railways, and whilst offering a saving of no less than 67 miles between Magdeburg and Breslau, as compared with the route via the East and West Prussians and more than 100 miles between the great high road between St Petersburg, Berlin, and Vienna.

In tracing the Line due regard has been had to its future extension, and the Line at present is so straight and level as is consistent with securing the great economy of the East to the West, and the West to the North; and, secondly, that the Line could be assisted by a ready means of communication.

The importance of this project, and the probability of a large traffic accruing to this Line of Railway, may be best estimated by the fact that the great imports and exports of the following places must pass over its rails:—On the one hand, Breslau, the Ports of the Baltic, with their vast Trans-Atlantic traffic, the rich Provinces of Silesia, Westphalia, and Northern France, besides Hanover, Brunswick, Magdeburg, and parts of the Rhine and of Germany; and on the other hand, the Silesian and Bohemian provinces, Dresden, with its manufactures, commerce, and [illegible] Saxony, with its Eastern and North-eastern trade, and the whole of Austria.

The principal coal traffic, which forms the chief element of profit, may be reckoned at the least expense, as it passes over a straight line from the following districts of the Province of Saxony, viz.:—

First—Aschersleben, with its important Starch and Syrup Manufactories, receiving considerable quantities of coal and raw material, and consigning their manufactures east and west.

Second—Weissenburg, with its storehouses and the large Breweries in its neighbourhood.

Third—Treuenbrietzen, with Paper Mills, several Cloth Manufactories, and other Mills.

Fourth—Jüterbogk, with Cotton Mills, five Cloth Manufactories, and Gasworks.

Fifth—Dahme, with its Distilleries, Factories, and large Wholesale Houses, through their travellers do a business far and near.

Sixth—Luckau, with twenty Spirit Distilleries, four Wind and Water Mills in a circle of a mile and a half, Carpet Manufactories, Cotton Mills, Manufactories of Glit Mouldings, Steam Saw Mills and Gasworks, and with an export business in Corn, Rags, and Bones; and the transport of coal for these works of industry.

Seventh—The conveyance of Gas Coal, which is transported from Waldenburg or Zwickau to the places where there are gasworks, such as Dhame, Treuenbrietzen, and Belzig, the demand for which will considerably increase as the cheaper carriage, and the facilities afforded for it, induce the construction of gasworks at those places along the Line where they do not at present exist.

Eighth—On the branch line Treuenbrietzen, Luckenwalde, and Frankfort-on-the-Oder near Speerenberg large salt mines have lately been opened.

Ninth—From the Spreewald, near Lübbenau, and from other stations of the Line, the export of Cattle to the West will, no doubt, assume large dimensions, the district near Lübbenau yielding Garden Produce of different kinds, of which now already more than Twenty Thousand tons annually are exported to England.

Tenth—The Ironworks in Lusatia, with the celebrated Lauchhammer, near Senftenberg. The well-known fine Pottery-ware of the latter place already finds its way to Holland, although it has to be brought to the nearest line of railway over the worst possible description of roads.

Eleventh—The several important Towns in Lusatia, with their world-famed Stuff and Cloth Manufactories in Cottbus, Spremberg, Finsterwalde, Forste, Guben, Peitz, Sommerfeld, &c., &c., having their markets as far west as France.

Twelfth—The other stations and towns on and in close proximity to the Line have a number of industrial establishments, consisting of large Distilleries, Breweries, Brick Kilns, and Potteries; in addition to which the Line cuts through large tracts of Royal and Private Forests, the rich stock of timber and firewood from which, as well as the produce of the Clay-pits and Peat-layers near Spremberg and Senftenberg, will be made available by means of this Line, and form sources of traffic not at present taken into account.

The following Extracts have been taken from the yearly Traffic Returns of the various Lines in the neighbourhood of the proposed Magdeburg-Lausitzer Railway, and with which such Railway will be in direct or indirect communication:—

	Thalers.	£
Magdeburg-Halberstadt-Thale Railway Traffic Receipts per German Mile	107,222, or	16,083
Magdeburg-Leipzig	116,447 „	17,467
Magdeburg-Potsdam-Berlin	125,572 „	18,836
Niederschlesisch-Märkisch	128,884 „	19,332
Cöln-Minden	165,054 „	24,758
Oberschlesische	176,057 „	26,408

The usual Decree has been obtained from the Prussian Minister of Trade and Commerce, and the final authority for the construction of the Works will be issued on the required Capital being substantiated. A firm of experienced Contractors have agreed to complete and equip the Line ready for traffic within the amount of the Capital, and arrangements made for depositing the necessary caution money, whilst it may fairly be estimated on the above basis that the traffic of the proposed Line from Magdeburg to Lubbenau, when opened, will yield an annual return of at the least 19,000 Thalers, or £16,500 per German Mile, calculated in the following manner:—

	Thalers.	£
Passenger Traffic	759,000, or	113,850
Goods Traffic	1,644,500, or	246,675
Miscellaneous	126,500, or	18,975
	2,530,000, or	379,500

From which deduct—

	Thalers.
General Management	56,925
Management of the Line	332,062
Traffic Management	521,812
Miscellaneous Expenses	37,950
To Reserve and Renewal Fund	100,000
Railway Duty	275,405
5 per Cent. Tantieme	99,295
	1,344,350, or 207,652

And there remains to the shareholders the sum of ... 1,145,650, or 171,848

Which, upon a Capital of Eight Million Thalers, will return a net Dividend of between 14 and 15 per cent.

In conclusion, it is only necessary to draw attention to the accompanying Map of the Line, by which it will be seen at a glance that a great and important undertaking has been left for this Company to accomplish, and that, although only one hundred and six English miles in length, it will command the traffic of the great trunk Lines of Central Europe.

The Statutes of the Company are open to inspection in London at the Offices of the Company, No. 10 Cornhill, City.

Subscriptions in the accompanying Form will be received by—

The London and County Bank, and their Branches in Town and Country.

Messrs. Bagwood and Morgan, Bankers, 8 Rue Royale, Brussels.

And at the Office of the Company in London, 10 Cornhill, E.C.

All Cheques to be crossed "London and County Bank."

No pledge can be given that the full number of Shares subscribed for will be allotted to each Subscriber.

Where no allotment is made the Deposits will be returned in full.

FORM OF SUBSCRIPTION FOR SHARES.
(To be Retained by the Bankers.)

MAGDEBURG-LAUSITZER RAILWAY COMPANY.

Capital, 8,000,000 Thalers, in 80,000 Shares; or £1,200,000, in 80,000 Shares.

Each Share 100 Thalers or £15 Sterling.

Having paid to the London and County Bank the sum of pounds, being £1 per Share on Shares, I hereby subscribe for Shares in the Capital of the Magdeburg-Lausitzer Railway Company, and I hereby request that my name may be enrolled on the register of members of the said Company for the said Shares, or any less number that may be allotted to me, and I agree to pay all calls thereon, on in accordance with the statutes of the said Company.

The reimbursement will be effected at PARIS, by Messrs de Rothschild Freres.

RAILWAYS OF SOUTH OF AUSTRIA AND UPPER ITALY.

LOMBARD BONDS, 1871-1878. PAYMENT OF HALF-YEAR'S INTEREST.

The holders of interest-bearing bonds called Bons-Lombards both of 1871-1874 and of 1875-1878, are informed that the payment of the half-year's interest, falling due 1st March, 1871, will be made from that date at PARIS, by Messrs de Rothschild Freres.

THE INSTITUTE OF ACCOUNTANTS IN LONDON.

PRESIDENT.
William Quilter, Esq.
VICE-PRESIDENT.
William Turquand, Esq.

The Council announce that this Institute is now duly constituted under rules and regulations settled and approved by Counsel.

It consists of two classes of members, namely, Fellows and Associates.

The conditions of admission are set forth in the rules and regulations, printed copies of which, as also of forms of application, may be had of the Secretary at the Rooms of the Institute, No. 30 Moorgate street, E.C.

Up to 1st July, 1871, the Council may admit as Fellows, if otherwise eligible, professional accountants in London who were in practice on the 1st January, 1866, and who have been in uninterrupted practice since that date. After the 1st July, 1871, Fellows are to be elected from among the Associates.

The scale of fees payable by members is as follows:

If admitted on or before July 1st, 1871—

	Entrance. £ s d	Annual. £ s d
Fellows	31 10 0	5 5 0
Associates	15 15 0	2 2 0

If admitted after the 1st July, 1871—

The entrance fee for Fellows will be £52 10s, and for Associates, £26 5s.

By order of the Council,
THOMAS A. WELTON, Secretary.

30 Moorgate street, E.C., 24th Feb., 1871

On Feb. 25 was Published, No. II., New Series, Price 8d and 8½d,

THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL, for February, gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains a Financial Record of the Month; New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Finance, Insurance, and Miscellaneous Companies; New Companies and New Capital. Prices made up to February 22.

Advertisements for next Number, to be published on April 1, must be sent to insure insertion on or before March 30.

OFFICE—340 Strand.

THE STATE OF THE MONEY MARKET.

There is no fresh news this week as to the mode in which the French indemnity will be paid; nor have we, as we at one time hoped, the Bank of France account made up to yesterday. M. Thiers has said that the Government is not now living on loans from the Bank: and that the present Government, for which he is responsible, have only contracted one loan with the Bank for 16,000,000*l*; but it does not appear from the short telegram how much of that money the Government has yet received, or what part the Bank itself is to supply, or what part is to be left to the public. Nor have we any precise account as to the financial proceedings of the Government of the National Defence, as to which there is much curiosity.

French credit has been a little damaged by the threatening state of Paris, and the apprehensions of an outbreak. But though it is dangerous to predict calm where the elements of confusion are so many and so fearful, we hope that nothing very dangerous will happen. The great insurrections in Paris have generally happened at a time when the population was mentally encouraged as well as physically distressed. There was an enthusiasm of ideas, an intellectual and hopeful excitement, in the minds of the leading few, as well as much misery in the bodies of the following many. But now there is no such hopeful confidence. No creed seems to be much believed in Belleville. There is no contagious enthusiasm in the minds of any intellectual persons. All is dull despair, caused by defeat, heavy and unbroken. Much physical distress, of course, there is; but this will not alone cause a first-class Parisian movement; that requires hope to guide as well as suffering to impel, and now there is no hope. Therefore, though we do not anticipate absolute calm, neither do we expect ruinous revolution.

The expected foreign loans have not much affected the money market this week. The Russian loan, *as yet*, is a failure. Lenders are hanging back till more is known of French wants, and the note of Prince Gortchakoff in November much injured the credit of Russia. She is thought or feared to be a Power with a dangerous policy—a Power likely to get into war, and therefore not a Power to whom to lend. Her resources, it is known too, though vast in time of peace, and quite ample for all loans for beneficial and industrial purposes,—for all loans which she ought to want,—would be very heavily tried by a great war. In many respects her revenue resembles that of India more than that of any European power; it is great, and it is slowly increasing, but it is not easily capable of great sudden augmention. You cannot put it up and down as you can put the English revenue. If the Indian expenditure were suddenly raised by many millions we know how great the financial difficulty would be, and that of Russia would be equal. Unless Russia can satisfy the money markets of Europe that she means to be peaceful, she will only be trusted with hesitation.

The American loan "operation" is one of conversion only, and therefore not likely to affect the money market much. But even this has not found much favour. As yet the period is one of suspense, and till the financial course of France can be predicted all the rest will be uncertain. The value of money during the week has shown the truth of our belief that the policy of the Bank was precautionary only. The value of money is certainly weaker than it was, and there is much less eager pressure for it. But if there was a sudden demand on the market for a popular foreign loan the rate of discount would rise quickly.

THE COMING DEFICIT.

The particulars are still dubious, but it is evident that the Budget which Mr Lowe must soon give us will be a very unpleasant one. This is not indeed at all Mr Lowe's fault. His estimates of the revenue last year were moderate and cautious, and will be more than borne out by the event. The reason is, that owing to the increase of the Army and Navy estimates he will have to provide for a much larger sum this year than last, and for that purpose he will need serious additional taxation.

As to the expenditure of next year, as we have the Army

and Navy estimates, an approximate estimate not very far from the mark can be formed. We do not indeed know the exact new sum which will be wanted, but we believe that the sum stated below is an under and not an over-estimate, and that more and not less will probably be wanted. The account of expenditure, we anticipate, will stand nearly thus:—

	£
Interest of debt, &c. (as in last year's Budget)	26,840,000
Consolidated Fund charges (as in last year's Budget)	1,820,000
Army estimates	15,852,000
Minimum estimate for abolition of purchase	858,000
Navy estimates	9,756,000
Civil Service and Revenue departments (as in last year's Budget)	16,417,000
Addition to Civil Service estimates for education	600,000
Total	72,143,000

Now, as in April last Mr Lowe only provided for an expenditure of 67,486,000*l*, it is plain that the increase is very great.

As to the state of the revenue the case is much pleasanter. Mr Lowe estimated last year for a revenue of 67,634,000*l*. But the result will probably far exceed it. We cannot judge of all the items on account of the irregularities of collection, but to take the two most important—the Customs and the Excise—we find that about 1½ millions is the excess over the Budget estimate already gained. The estimate for the Excise was 21,660,000*l*, or about 100,000*l* less than the actual yield of last year; but the yield up to the end of last week compares as follows with the corresponding period of last year:—

	£
Yield of Excise, from April 1, 1870, to March 4, 1871	20,205,000
Ditto ditto for corresponding period of last year	19,362,000
Increase over estimate	843,000

As regards the Customs, which come in with more regularity than the Excise, we may compare the actual yield to date with the proportionate period of the Budget estimate, viz.:—

	£
Actual yield of Customs to date	18,564,000
Proportion of estimate to date	17,925,000
Increase over estimate	639,000

These two items of increase amount together to 1,482,000*l*, which is very satisfactory, and if our expenditure had not been increased, would have been ground for expecting a fair surplus.

The usual practice of the revenue departments is to base their estimate of the coming year on the actual yield of the past one. They presume, in the absence of exceptional events, that the next year will yield much the same. They do not speculate sanguinely on improvement; they properly make such an estimate as will be realised if the country is not particularly prosperous, and if only it retains the happiness to which it has advanced. Supposing the estimate this year to be made on the same principle, the result will be something like this—

	£
Probable expenditure	72,200,000
Probable revenue from present sources of taxation	69,200,000
Consequent deficit	3,000,000

—a very serious sum, and plainly necessitating large additional taxation.

THE CHANGES IN THE CABINET.

The acceptance by Mr Goschen of the First Lordship of the Admiralty may not please Sir James Elphinstone, but it will give great satisfaction in the City of London. Mr Goschen is well known there to possess great industry, great decision, great discretion, and a strong plain mind. These qualities Mr Goschen showed in a remarkable manner when he was in business in the City, and these he may be expected to show in any new situation in which he may be placed. Up to the present time the political posts which he has occupied have not given him much opportunity of showing them, and have rather tested him in other qualities in which he is deficient, or which he does not possess in an equal degree. In 1866, Lord Russell was attacked by the *Times* day after day with political exclusiveness, and with confining his choice of Ministers to the old and aristocratic Whigs. Wishing to stop this daily accusation, Lord Russell, as his way is, took a short and sufficient step; he gave Mr Goschen the Duchy of Lancaster, with a seat in the Cabinet. As Mr Goschen was then fresh from the City, and quite unconnected with the Whig families, the appointment stopped at once the cry of exclusiveness. Here was "new blood," if it was possible to have "new "blood," and the result was good for Lord Russell's Government. But it was not equally good for Mr Goschen. So rapid a rise naturally caused some envy and some murmurs; and the post which was given him did not give Mr Goschen an extremely good chance of silencing them. Only two sorts of men perhaps can fill the Duchy of Lancaster—especially if joined to the Cabinet—with much usefulness or any great addition to their reputation. One is an old statesman, too old for great administrative labours, but still retaining a sure judgment and a tried sagacity. Such a man can at times interfere with weight and gravity in House of Commons' discussions, and can secure a right decision by the charm of moral dignity. And a different sort of man may at times, in an unoccupied office, be useful and conspicuous. This is a young, eager wit and orator, full of *bons mots*, retorts, and illustrations, and willing to let them off at any moment to the admiration of his own party and the confusion of their opponents. Good wit of this sort is often better than grave discussion; it gets down among the immense class who need to be amused, sticks in their memories, and is sure to rise to the surface and be quoted when the same subject recurs again. But Mr Goschen has not exactly either combination of qualities. No one could expect him to obtain in youth the moral ascendancy rightly given to the tested prudence of old statesmen; nor is he a very good hand at "Parliamentary fireworks." It would be easy to find men with not a fifth of his powers who could make five times as good jokes; nor is he particularly quick in light and versatile illustration. In consequence, Mr Goschen had not at the Duchy of Lancaster a good appropriate opportunity. The solid business powers which he possesses were not wanted, and others which he does not remarkably possess were much wanted.

At the Poor Law Board, Mr Goschen has been more fortunate. He has prepared, it is understood, a great scheme for "making you pay all your rates together," and for introducing at least some order into the perplexing confusion of our local taxation; but still he has not been very fortunate. As yet, owing to the "block of Irish Bills" for two Sessions, he has not been able to propose his plan. And the general work of the Poor Law Board affords little opportunity for making much reputation. It is like preparing a Bankruptcy Bill: you make the subject a little better, or a little worse; you may get the creditors a little more or less money; but you cannot make the subject really pleasant. A mess it was, and a mess it will remain; the creditors will always lose much, and will always be somewhat dissatisfied. Just so with Poor Law administration; there is nothing taking to be made of it: the best to be hoped by a good administrator is that pauperism may be a very little lessened in his time. Unless he remains some years in office, even this is not possible; but anyhow the great evil will in the main remain, and those who do not understand that it mostly comes from causes beyond the reach of administration will be sure to blame and censure the statesman they find in charge of it. But at the Admiralty Mr Goschen will find a different state of things. There is an opportunity for making a reputation. It is possible to give us a "*good fleet.*" And as the task requires above all things the practical and decisive powers which Mr Goschen possesses, we hope that he will give us one.

After our description of the Poor Law Board, Mr Stansfeld may hardly like us to congratulate him on his accession to it. Yet still we do so. It is true that of all Cabinet offices it is perhaps the most painful and the least desirable. But still it is a Cabinet office, and the difference between being in the Cabinet and out of it is like the difference, in Liverpool phrase, between an "inside" and an "outside" director. One knows all that goes on, and can apply his mind and judgment to it; the other only knows the detail of his particular department, and what he is told of general matters: upon the general policy of the Government he cannot bring his mind to bear. Now Mr Stansfeld has a cautious and delicate judgment, likely to be useful in Cabinet discussion, and he will also be able to defend in debate the decisions that have been taken—which is no small matter, for he is one of the very few rising men that have anything at all approaching to a genius for oratory. That the office is not one necessarily entailing extreme administrative labour, that it is not like the Admiralty or the Home Office, is, in this case, a very good thing. Mr Stansfeld, probably from the same delicacy of mind and temperament that makes him a

nice and persuasive orator, is a man the quantity of whose work cannot be extended without danger. He can do a little work exquisitely, especially if some of it be of a high quality; but he would certainly fail, perhaps even die, if he tried to struggle through huge masses of coarse labour.

THE PROSPECTS OF GOVERNMENT IN FRANCE.

The prospect of a strong Government in France can hardly be for a considerable time to come anything but meagre. The country has, it is true, given a very clear and decisive opinion in favour of giving in to the German demands, and obtaining peace at any price. It has also, if we understand it rightly, expressed a genuine hatred of the "Red" party, of the extreme Republicans, whether of Socialistic or only of violent tendencies. It has in fact pronounced, for the present at least, for a safe, Conservative sort of policy,—for getting rid of the Germans at any sacrifice, for keeping down the sensational politicians at any sacrifice, but for nothing else at all. As regards the form of Government, France is not really in any sense of one mind. There are said to be 150 Legitimists—*i.e.*, friends of the Comte de Chambord—in the Assembly; there are probably a good many more Orleanists; there is a very considerable section of moderate Republicans; there is an energetic left wing of extreme Republicans—Republicans of the Belleville species—and there is a bare handful of Imperialists. Amongst all these different parties there may, of course, be coalitions enough for the purpose of defeating each other; but no Government by coalition can really be safe against dissolution. The Government that is in is always accumulating resentments on its own head, and this is more especially the case when the Government that is in is associated with national humiliation and sore immediate distress. Directly the resentments which must necessarily accumulate against such a Government rise to a given height, of course the natural disunion between the different elements of an artificial coalition will show themselves, and the tie will break. The fear of this event must make a Government so constituted either nervous or rash; it may hope to preserve itself by audacity, in which case it will be rash; it may, more probably, hope to preserve itself by conciliation, in which case it will be weak; but take what line it may, it can never be able to decide on its measures with a simple, impartial consideration of the good of the country, unless it is quite prepared for an abrupt annihilation. M. Thiers, we may be sure, is not prepared for an abrupt disappearance from office. He has declared, it is said, very likely with perfect sincerity, for a moderate Republic as the form of Government which will divide France least. It is impossible not to remember that it is at all events the only form of Government under which he himself can hope to continue chief of the State. But M. Thiers will know very well that nothing but the most consummate skill can keep him in the position of chief of the State very long. France is stricken with poverty. France must be heavily taxed. France must settle a hundred deferred questions, which will raise a hornet's nest about the statesman who settles them. She must decide for Protection at the cost of the loyalty of the great wine districts and ports, or for Free-trade at the cost of the loyalty of the great manufacturing classes. France must decide on a new army policy, which will probably make enemies of hundreds of thousands. France must justify or impeach the chief actors in the tragedy of the last few months; and whatever she does, there will be hosts of grievances created. In a word, the French people are very naturally both extremely wretched and extremely sensitive to their wretchedness, and the first and most conspicuous object of aversion will, of course, be the Government. Before long every party will be beginning to think that the fearful evils left by the German conquest are aggravated by the policy of the administration,—it is human nature to think so,—and that a certain amount of relief would be gained by a change—by proclaiming Henri V., the Comte de Paris, or making the Duc d'Aumale president, or turning the nominal Republic into a real Republic, proclaiming the rights of labour, and establishing national workshops. The Government of a thoroughly divided and thoroughly suffering people can be nothing but weak. There must be a tendency towards a coalition amongst all the discontented parties to upset it; and in such a time as this, all parties, except the section actually in power, will be discontented parties. If the "Moderate Republic" is to continue, it can only be through the Legitimists and Orleanists waiving their views for the sake of peace. But people who have waived their views for the sake of peace are always exigeant to the last degree on all other points which they have not waived; and make their redundant merits a constant theme for expatiation. M. Thiers may get the Legitimists and Orleanists for a time to waive their views in his favour; but if they do, they will want him to govern precisely as they wish; and as they won't wish the same things that will be impossible.

Nor do we see any much better prospect, even if the Legitimists and Orleanists agree on a compromise and so carry a Monarchy. As the Comte de Chambord is childless, there might be a compromise to let him succeed now, on condition that the Comte de Paris, who is the next Bourbon heir, succeeds him. But we are sure that this would not make a strong Government. The Orleanists do not admit the principle of legitimacy. They hold that the Orleanist line was substituted by the will of the representative Chamber, and that Henri V. is the representative of a principle of Royal rights which overrides the will of the people and their representatives. The extreme Republicans would probably prefer the Comte de Chambord to the Comte de Paris,—as one of M. Gambetta's proclamations pretty clearly indicated,—on the ground that the Legitimist principle means something, and something which France will never accept for any length of time; while the Orleanists rest upon a pseudo-popular basis of right, which is neither the divinity of kings nor the authority of the people. However, we may be sure that the extreme Republicans would unite with either party, the Legitimists or the Orleanists, to upset the other, and then would do their best to prevent the winners from appropriating the spoil they had won.

The great difficulty of the position is made very much greater by the attitude of Paris, which will certainly be almost as hostile to the new Government as it was to that of the Emperor. The Assembly feels this so keenly that it seems likely to fix on Versailles rather than Paris for its place of meeting. This may be a prudent measure, but it will certainly be both a timid and an inconvenient one. The Government and the Administration must reside in Paris, where the threads of all political administration converge, and for the Assembly to separate itself from the Government will be ostentatiously timid. A Parliament absolutely at issue with the capital,—on which all the French papers which appeal to the opinion of the capital will pour their scornful witticisms with only the more lavish hand because it betrays its fear,—will, of course, be perceptibly the weaker for that hostility. Paris may be, and certainly is, at issue with France; but Paris is not the less likely to exert a great influence over France, and to predispose France to be discontented with her own choice. Paris will make the most of all the blunders of the Government it detests, and be only too skilful at turning that Government into ridicule,—ridicule which even the Conservatives of France will appreciate. Moreover, the Government itself, being, as it must be, in Paris, will be quite sufficiently susceptible to the opinion of Paris, quite sufficiently inclined not to ignore it absolutely. Altogether, we can hardly imagine a much more difficult task than for a necessarily weak Government, resting on a coalition of hostile parties, to set the opinion of Paris at defiance, and yet maintain its own dignity and independence. The best that can be hoped for the present is a prudent, weak Government, that will sedulously ignore the more difficult problems, and temporise for its life. Beyond that we cannot pretend to foresee anything.

THE AMERICAN PROPOSAL TO ASK FOR CANADA.

We ventured a fortnight ago to warn our readers against placing absolute confidence in the success of the Joint Commission on the disputes existing between Great Britain and America. The success of that Commission we said would depend as much on the acceptance of the Report as on the merits of the Report itself, and that acceptance would depend on the electioneering situation. The President might require the Irish vote, or a new President might be elected, or the Senate might have quarrelled with the President, and in any of these cases the Report might be disregarded. As yet everything has gone well with the Commission; the prevalent idea among its members is that the President is acting in thorough good faith, and difficulty appears to be anticipated rather from Canada than from the Government of the Union. Nevertheless, the use of the warning we gave has been

demonstrated with unexpected clearness, for Mr Sumner has supported, and politicians are discussing, one of those propositions which are only made in a country where men dare say anything, where political talk is loose, where no one is made reticent by the feeling that his utterance pledges the opinion or the action of his country. We do not profess to explain all the intricacies of American politics, which just now are singularly complicated by the intrusion of the Free-trade question, which runs right athwart the regular "party "lines," but we understand the situation to be something like this.

The two parties have this year to decide on the men whom they will next year "run" for President, and the Republican party has nearly made up its mind to accept President Grant. He is at the head of the Government, his military reputation is not yet exhausted, and he has no opponent of mark. There is Mr Horace Greeley, the editor of the *New York Tribune*, who is named as the Protectionist *par excellence* of the party; and there is a Western man, a Mr Gratz, governor apparently of Missouri, of whom we know nothing, but whose name is decidedly coming forward. No one, however, is suggested likely to rouse general enthusiasm, and President Grant is as yet the most prominent and most popular candidate.

It is, of course, therefore the object of his enemies within the party to frustrate his nomination; and their leader, Senator Sumner, is said to have decided that the easiest method of opposition will be to represent President Grant's foreign policy as too favourable to England. More, they wish to insist on it, could be gained if the Alabama claims were kept open, and more is angrily demanded; and they propose, as the demand most acceptable to the electors, that England should be requested, as the first condition of permanent peace, to retire from the American continent. Such a proposal, it is reported, has been gravely made by a Mr Howard, and gravely considered in the Senate; and although it had no chance of acceptance in that body, it may have a very great influence upon people outside. It is doubtful if the monstrous character of the proposition would be perceived at all in America itself. It is a fact throwing a curious light on the effect of democratic institutions, that great cessions of territory without the consent of the inhabitants do not greatly surprise, far less horrify, the inhabitants of the United States. They are accustomed to them. They themselves are there without the consent of the aborigines, and they have acquired at different times Louisiana, Florida, Texas, and California, without the consent of their white inhabitants. They have bought Alaska, they have made repeated offers for Cuba, they are in treaty for St Domingo; and it is natural, therefore, that they should regard the cession of British America as quite within the limits of diplomatic proposals. Moreover, their habit of erecting conquered territories into States with almost complete internal autonomy, so complete as to allow of enormous differences of civilisation—for example, free divorce exists in Connecticut, prostitution is legalised and made a source of revenue in a fixed district of St Louis, and polygamy is tolerated in Utah—conceals most of the oppressiveness of conquest, which seems to American eyes to partake rather of the character of absorption. And finally there is a belief, almost universal, in the Union, and not without a certain truth, that any honourable method of severing herself from her continental possessions in America would be welcome to Great Britain. It is by no means incredible, therefore, that a proposal to negotiate for the cession of British America might strike the people of the United States as a display of mere diplomatic skill, quite within the bounds of propriety, and involving no particular difficulty; and in that case President Grant would be, as it were, out-bid, and his chance of obtaining the party nomination very materially diminished.

The plan is worthy of attention, but it will, we believe, fail. In the first place, the political leaders will probably consider the election of their own man to the Presidency more advantageous than the addition to the ranks of the electors of vast numbers of new Canadian electors, with unknown sympathies, able favourites, and a tendency to make geographical rather than party alliances. The Dominion would make at least ten States, and that would upset almost all calculations, particularly if the new States were sufficiently out of temper at annexation to join some depressed section of the Union, such as the South or New England, or the Pacific Coast. This fear would of itself make Mr Sumner's proposition much less tempting to politicians, for the Canadians are strong enough to insist on their own terms of admission. In the second place, the Irish vote, which Mr Sumner would like to gain, would be lost at once. The Irish are ruled by men who hope ultimately for war with England, not for the removal of all causes of war, and of all probability of waging it successfully. They care for what they conceive to be the interests of Ireland, not for the increased grandeur of the Union. And finally, all Americans will reject the proposal as soon as they know that it would be entirely inadmissible, except as a result of the defeat of Great Britain. They do not want to wage a vast, doubtful, and dangerous war, in order to absorb a people who, as a consequence of that war, would be hostile for a generation. And there is no doubt that this is the fact. The Canadians may quit the Empire by vote whenever they please. When they have quitted it they may join whomsoever they choose. But any attempt to surrender them without their own consent, or to make their consent the makeweight in any treaty, would cost the Government which made the proposal to Parliament its existence. The British people are not anxious to retain Canada; but they will defend it as long as it chooses to remain a colony, and will neither cede nor sell it. The proposal is, therefore, rejected from the beginning, and the moment that is comprehended it will cease to stand in the way of the labours of the Joint Commission.

BOARD OF TRADE RETURNS.

The Board of Trade returns for February have been issued. We have already shown that, owing to the different mode adopted in compiling these statistics the comparison with former years does not hold good, more particularly with regard to the import trade. We give below the figures as they stand, subject to the necessary correction. The *declared* real value of the imports during the two months ended February of the current year was 50,986,815*l*, against a *computed* real value of 35,215,692*l* in 1870; and of 35,692,170*l* in 1869. The declared value of the exports of British and Irish produce and manufactures during the two months under review was, in—

	£
1869	27,106,140
1870	28,378,564
1871	26,356,815

Although this shows a falling off of about two millions sterling, the decrease, as we explained last month, is only apparent. At the same time there is a considerable increase in the value of unenumerated articles this month, caused by the large export of provisions to France.

BUSINESS NOTES.

The New American Loan.—The prospectus which has been issued of the funded loan of the United States, indicates that only a partial attempt is now to be made to carry into effect the scheme of Mr Boutwell. The whole loan was to comprise 1,500,000,000 dollars, in three classes of bonds—one bearing 5 per cent. interest, amounting to 500,000,000 dollars; a second bearing 4½ per cent. interest, amounting to 300,000,000 dollars; and a third bearing 4 per cent interest, amounting to 700,000,000 dollars, the whole redeemable in 10, 15, and 30 years respectively. And that this triple issue was seriously intended was shown by the announcement that subscribers for equal amounts of each class of bonds, and next subscribers for equal amounts of the 5 and 4½ per cent. bonds would be preferred to subscribers for the 5 per cent. bonds only. The present issue, however, is for 200,000,000 dollar only, and the 5 per cent. bonds, payable in 10 years, are exclusively offered. So far the change is wise. It was not reasonable to suppose that so long as American 6 per cent. securities were a little under par, or only slowly getting above it, the low rates of interest contemplated by Mr Boutwell could be realised, though the prospect of such a conversion at an early date, as American credit improved and the accumulation of money for investment increased, was not at all unreasonable—provided always the conversion scheme was properly baited. But the idea of converting at 5 per cent. exclusively is not so far amiss, as there is no doubt now that the American 6 per Cents. would go above par if they were not redeemable. We see many objections, however, to the particular method proposed by Mr Boutwell. Apart from the unfavourable circumstances of the present moment, it seems to be a mistake not to make the conversion a forced one, and apply to the

whole debt. Mr Boutwell making sure by offering a bonus, or in some other way, that all holders of the existing debt will convert, or that he will find money to pay off those who refuse to do so. The failure of the present experiment, if it should fail, ought not to be conclusive against the success of a proper experiment, adjusted carefully to the state of the markets, the present degree of American credit, and the likings of the investing classes.

THE PATENT LAWS.—The difficulty of amending these laws in any way is illustrated by the Bill which has just been introduced into the House of Commons by Messrs Mundella, Hinde Palmer, and Thomas Hughes. These gentlemen represent the party which advocates most strenuously a patent law of some kind; but they admit the present system to be full of abuses, and we think it will be evident that the scheme they propose to substitute will be equally indefensible. At present the theory of the law practically is that any person may obtain a "patent" at his own risk, subject to the obligation of afterwards defending its novelty in a Court of Law; and that having obtained a patent, he may use his monopoly as he pleases for a certain term of years. And this theory, though it works ill in practice, has some logical foundation. The object is to tempt patentees to publish their inventions by a monopoly for a certain term, and it is of course recognised that patentees might not be tempted by anything less than complete monopoly, while the privilege should be conferred at their own risk to prevent interference with the rights of others. The misfortune in practice is that manufacturers are put in conflict with patentees, and trade is crippled by all sorts of patents for useless, or trivial, or "old" inventions. The remedy proposed for these evils is to appoint special commissioners, who should have power to confer indefeasible patents after an interval of three years without dispute from the first concession of the patent right, or after its successful vindication in a Court of Law, and who should also have power to prevent the crippling of trade involved in the present absolute monopoly, by compelling patentees to grant licenses for the use of their inventions on the payment of royalties, to be fixed by the commissioners. But we fear such a law will leave abuses pretty much as they stand, if it does not increase them, while diminishing very much the value of the monopoly conferred. Patentees will still be exposed to litigation as at present, while the possibility of indefeasible patents being granted will increase indefinitely the danger of interference with trade. Many patentees will lie in wait to get an indefeasible patent. Manufacturers will perhaps be surprised at receiving information that an indefeasible patent has been granted for something quite familiar to them, and they will have no sufficient opportunity for redress. The only way for them to prevent the danger would be to make a special study of the proceedings before the special commissioners, and be constantly ready for litigation whenever an application touching their rights was made—a burden which it would be grievous to impose on the manufacturer. On the other hand, the proposal to compel patentees to charge royalties which the commissioners will fix diminishes their privileges, and consequently the temptation to publish inventions, very much. A patentee may say he could make something of a patent if left to work it himself; but the plan of compelling him to charge a royalty to be fixed by others might prove his ruin. How could he get a capitalist to make expensive machinery and be at all the risks and cost of introducing an invention, if in the end the profit is to be reduced or extinguished as the special commissioners may see fit? The theory we should like to see established is that there is no need to encourage inventions by the special machinery of patents, that inventors could deal with capitalists to whom priority of use would be a sufficient temptation, and that capitalists have a great interest in paying for "inventive faculty," if not for particular inventions; but if monopolies are to be given at all, they should be real and not illusory, as far as the patentees are concerned. According to the present Bill, the mischief to trade will remain by the interference of inventions, but the patentee's advantage will be diminished.

CLEARING-HOUSE RETURNS.—We noticed the apparent falling off in these returns at the beginning of the year, but for some time there has been a change, and it seems probable that the returns will again show a considerable improvement upon the figures of last year. The returns for the year, so far as it has gone, now compare with the last as follows:—

Week Ending—	1871. £	1870. £	Increase. £	Decrease. £
January 11	71,478,000	72,799,000	...	1,321,000
18	83,528,000	91,401,000	...	7,873,000
25	65,[illegible]000	64,[illegible]000	850,000	...
February 1	90,[illegible]000	95,[illegible]000	...	5,031,000
8	75,057,000	74,177,000	880,000	...
15	90,716,000	85,960,000	4,756,000	...
22	71,407,000	60,718,000	10,689,000	...
March 1	102,551,000	89,264,000	13,287,000	...
8	90,240,000	77,297,000	12,943,000	...
	710,870,000	711,696,000	43,405,000	14,225,000
			−14,225,000	
Net increase			28,180,000	

Here the diminution in the earlier weeks, and the increase in the later ones, is very palpable. Nor is the improvement altogether due to the Stock Exchange settling days, though the great amount of dealing which took place about the conclusion of peace doubtless counts for something, and is especially marked in the week ending March 1. With the advance of the year, therefore, the expansion of business has been renewed, and it is of good omen that they are the very last weeks which show the greatest improvement.

THE REDUCTION OF CAPITAL IN LIMITED LIABILITY COMPANIES.—A Parliamentary return which has just been obtained as to the effect of the Act of 1867, to enable limited liability companies to reduce their nominal capital, contains in itself very striking evidence of the expediency of the Act. It appears that in the 41 companies which have availed themselves of its clauses, the nominal capital before the Act was 43,470,000*l*, but that amount is now reduced to 15,706,460*l*, or as nearly as possible one-third. At the same time the paid-up capital in all the companies except four, possessing a nominal capital of 1,660,000*l*, which make no return, is stated to be 8,997,002*l*, and after an allowance for the amount paid up in these four companies, there would still be a large margin left between the aggregate of the paid-up and the nominal capital. Even as it is the farther liability of the shareholders is not insignificant, and the figures give us some notion of its enormous extent before the change was made. We much fear that many companies which ought to have done so have not reduced, dreading the danger to their credit; but the Act has at least done something to mitigate one of the most dangerous incidents of credit panics, and remove from promoters the tempting facilities they enjoyed of playing with the credit of shareholders, who fancied themselves protected by "limited liability." Shareholders at any rate will now have themselves to blame if they remain connected with or join a company where the liability is only limited in name.

THE LANDLORD'S RIGHT OF DISTRESS AGAINST COMPANIES WINDING-UP.—A case involving this question has arisen out of the winding-up of the Lundy Granite Company. Mr Heaven, the owner of Lundy Island, had leased it to Mr McKenna, who let the Granite Company into possession under an agreement to which Mr Heaven was not privy. The rent not being paid, Mr Heaven had put in a distress upon the company's goods on the island, and this proceeding was objected to by the official liquidator, both on the ground that the distress was altogether void against the company's property, and that the Court ought not to give leave for it under section 87 of the statute. To this view the Master of the Rolls adhered, holding that the consent of the Court was essential to the proceeding, and that it ought not to be given, the landlord being merely in the position of other creditors. An undertaking was, however, given by the liquidators not to remove the goods, so as to give the landlord an opportunity of appeal.

RAILWAY ACCIDENTS.—Some doubt as to the value of official railway statistics may justly be caused by a Board of Trade return of the railway accidents in the United Kingdom reported to that department in 1870. We have no doubt that the return includes all the accidents reported, but no effective means can have been employed to prevent any accident being overlooked. The result is that while 132 accidents have been reported, 51 have occurred to passenger trains exclusively, 8 to goods trains exclusively, and 73 to "collisions between passenger trains and other trains or engines;" and it is hardly credible that the real proportion between accidents to passenger

and to goods trains could have corresponded. No doubt passenger trains, as they are driven at greater speed, may suffer most from accidents, but this will not account for the low figure of *eight* accidents only reported as happening to purely goods trains. If such statistics are to be worth anything at all, an attempt should be made to ensure a notice of every accident; and though each railway company, we believe, does its best to hush up its own accidents, it would be the interest of all that the general truth should be known. At present the companies contend, and we think with justice, that if they were as careless as the public supposed, if they did not take the best measures possible for the safety of their traffic, they would soon be ruined, quite apart from the special compensation which passengers are able to obtain. But the Board of Trade statistics, if they are to be depended upon, would prove the contrary—that the carelessness of railway directors is compatible with comparative safety to property, and specially dangerous to passengers. The real statistics however would show that goods trains do not escape, and that a very slight relaxation of vigilance would derange traffic, and destroy property to an extent that would injure the companies. If the law could be altered so as to compel every railway company to report all its accidents under heavy penalties, the result would not only be good for the public, as furnishing a new stimulus to the vigilance of railway management, but it would benefit the railway interest in the long run, by proving the incessant care required to prevent the accidents which are always imminent, and which would easily be serious enough in the aggregate without those big catastrophes which occupy the public mind.

The National Debt.—Mr Lambert has obtained his annual debate on the National Debt rather earlier in the Session than usual, but his arguments on Tuesday contained nothing novel, and the discussion was not much advanced. The object in view is a good one, but what Mr Lambert and the fanatical opponents of debts fail to see is, that repayment of debt is only a mode of expenditure, and that when it is a question of imposing more taxes for one object of expenditure, all other objects of expenditure will come into competition with it. Now the country is rightly not very willing to be taxed much for the repayment of a debt which, compared with the debts of other nations, is not especially heavy in capital amount, and is borrowed at the lowest possible rate of interest. The best points, as usual, were made by Mr Lowe. His inquiry whether people would be willing to bear a shilling income tax for the repayment of debt put in the strongest way one of the answers to Mr Lambert's motion, and his demonstration of what had been done since the great war was also very effective:

> At the time of the peace (he said) our debt, instead of being 800,000,000*l*, was nearly 900,000,000*l*. Since that time we have added 80,000,000*l* to the debt—namely, 20,000,000*l* for the emancipation of the slaves, 30,000,000*l* for the Crimean War, 10,000,000*l* for the Irish loan, and 19,000,000*l* for the Abyssinian War. I have provided myself with an accurate account of the state of the debt at the present time. The funded debt is 738,000,000*l*, and the unfunded 4,000,000*l*. The terminable annuities, estimated at 11 years' purchase, amount to 50,000,000*l*—making altogether about 793,000,000*l*. It follows therefore that since the close of the war, and adding the 80,000,000*l* I have mentioned, the debt has been reduced from 980,000,000*l* to 793,000,000*l*—a reduction not very far short of 200,000,000*l*. Consequently it is not fair to accuse those who went before us of having done nothing for the reduction of the National Debt; nor can I admit that we are doing nothing in that direction, for we are paying off 50,000,000*l* or more by terminable annuities, and during the course of this year we have paid off 4,000,000*l* or 5,000,000*l* of debt, not including in that the payment of the 1,000,000*l*, which were advances made by the Bank of England.

These are good arguments for adhering to our present policy, and gradually enlarging our repayment of debt, without embarking in any extravagant course. We doubt however whether Mr Lowe's objection to the precedent of the United States was as correct as it might have been. He seemed to think that the only courses open to American financiers, besides paying off debt, were to restore the metallic basis, and then reduce the debt interest. The true thing to say was that the Americans, besides doing what he suggested, should have reduced taxation. In point of fact the restoration of the metallic basis can hardly have the importance assigned to it, for the simple reason that the prospect of a gradual return to a sound currency, if it exists, must always have great weight with a government which has issued an inconvertible currency. The hope of avoiding extreme shocks will encourage them to trust to gradual influences. And it would seem that this prospect exists in America. As we pointed out a year ago, the paper money of America had rapidly appreciated—the price of gold falling from 132 to 116; and the appreciation continued till the price was 111, about which it remains. The rapid growth of America causes a constant demand for new currency; and the circumstances of the country, from the great scattering of the inhabitants, are such that no banking expedients are likely to diminish the absorption of currency. The "legal tender" being limited, there is thus a prospect of the rapid approach of a time when no more paper will exist them is really required, and equality with gold will be established. There seems fair ground for arguing therefore that the reduction of the American debt should not have been postponed to the restoration of a metallic basis, though there were other objects to which it would have been wise to postpone it.

The Date of Bankruptcy.—Vice-Chancellor Bacon, as Chief Judge in Bankruptcy, has just decided—*ex parte* Duignan, *re* Russell—a question as to the date at which a bankruptcy is to be reckoned to begin, and the separate proceedings of creditors restrained. The material facts were that on the 4th of November the debtor in the case had signed a petition for liquidation, which was filed the following day; but that the day following the creditors whom the trustee is now opposing had recovered judgment against the debtor and immediately proceeded to a sale of certain of his effects, notwithstanding that they had prompt notice of the petition for liquidation. The Chief Judge now held "that the title of the trustee, when appointed, related back to the date of the petition, and that "a transaction void against a trustee in bankruptcy would "be equally void against a trustee under a liquidation. In "this case the execution was not levied by seizure and sale "until after notice of an act of bankruptcy, and that being "so, the goods appropriated by Messrs Duignan were distributable among the creditors." The law ought perhaps to be even stronger than this, equalising all creditors, not merely from the date of the step on which the bankruptcy is founded, but from a date which would include a certain period prior to the bankruptcy. Some such regulation as this is necessary to prevent undue favours to particular creditors on the eve of bankruptcy.

Foreign Correspondence.

(from our own correspondent.)

Paris, March 8, 10 a.m.

The entrance and departure of the German troops passed off without the popular outbreaks that were feared, though not without some painful incidents. But this unfortunate city finds itself in presence of a worse enemy than the foreigner—domestic discord. All its male population was armed to defend it, and the greater part thereof are showing a determination to use their arms against their fellow citizens. They have fortified the heights of Montmartre and Belleville with cannon and mitrailleuses and barricades, and employ entire battalions to defend them night and day. They are also guarding barricades in other parts of the town, and are going almost daily in hundreds and thousands to "demonstrate" in favour of the Republic before the column of the Bastille, from which the Red flag is flying. They do all this, they say, to defend the Republic, which they think is in danger by the Monarchical character of the majority of the National Assembly, and the placing of M. Thiers at the head of the Government. But of course their object is to prevent the establishment of a Republic that would maintain order and protect property, and to set up in its stead one of a Red and Socialist type. There is a strong desire among the part of the population who have anything to lose that such extravagant and wicked proceedings as these should be energetically put down. As long as they are tolerated it is hopeless to expect to see industry and commerce restored; and without them what is to become of the country?

We know nothing certain yet of what the Government intends to do with respect to the payment of the indemnity to Germany. It is strongly urged from different quarters to raise the whole amount at once at any cost and anyhow, so as to get the invaders out of the country as quickly as possible. The bankers and manufacturers of Lyons, among the latter M. Arles Dufour, are particularly energetic in making this recommendation; and the argument is that as long as the territory is occupied, and as long as a succession of loans may be impending, there will not exist that confidence which is indispensable for commercial operations. They add too that in the parts of France not invaded there is a mass of money, the savings of preceding years, and that the holders of it will be

more disposed to invest it whilst under the emotion produced by the disasters of the country than they will be in a year or two. But there are people of authority in financial matters who point out that it would be unwise for France to drain herself of all she has, when she needs capital to repair losses and to set her industries going again; and that by a little delay she would be able to raise many millions (francs) by selling forests, crown lands, palaces, &c., and might also, if she succeeds in establishing a Government presenting chances of stability, obtain greater assistance in foreign markets than is for the moment to be hoped for.

Whether the decision come to be for total payment at once or for payment in instalments, it is certain that a loan of some kind must be raised without any delay. One of a *milliard* (40,000,000*l*), or a milliard and a-half, appears to be generally considered absolutely indispensable; and regard being had to existing circumstances and to the price of *rente* at the Bourse, it is thought that about 6 per cent. will have to be offered for it. The expectation is that it will be offered for public subscription, as loans were in the time of the Empire, but that the co-operation of the markets of London and Amsterdam will be solicited.

Apart from the loan here referred to, it is said, but not officially, that the Government has scraped together, with the aid of some foreign capitalists, 500,000,000f, which it proposes to offer without delay to the Prussians as a payment on account.

As a specimen of the credulity of the French people in the matter of national borrowing, take this paragraph, which has appeared in some of the leading Paris journals, and will undoubtedly go the round of the provincial press:—"Landlords, bankers, and Members of the House of Lords in England, have offered the French Government immediate aid for payment of the indemnity, and have done so at such a low rate of interest, as will show the sympathy of the English for France."

There is nothing in the Treaty of Peace to show that the five *milliards* exacted by Prussia are to be reduced by the portion of the national debt of France appertaining to Alsace and Lorraine, by the value of the railways in those provinces which belong to a private company, or by the amount of war contributions levied in different parts. Neither has the Government announced that any deduction is to be made on these scores, and the assumption is that it could certainly not have maintained silence on matters of such importance if it had had anything pleasant to communicate. It is even said that Count Bismarck demanded seven *milliards* with deductions, and when M. Thiers protested against such an amount, he named and insisted on five without abatement. But in spite of all this people find it difficult to believe that when the definitive Treaty of Peace comes to be settled, a deduction in accordance with established usage, and with what was effected when Austria ceded Lombardy and Venetia to Italy, will not be made for the debt, whatever may be done with respect to the war contributions. As regards the railways the conviction is that the French Government will not be left to indemnify the Eastern Company. To have to do so would be a serious aggravation of the burden cast on it.

The financial committee of the National Assembly has not yet presented a report containing the result of the investigation it was charged to make into the public receipts and expenditure during the war; but if letters from Bordeaux can be credited, it has made discoveries which, without exaggeration, may be described as appalling. First and foremost is the fact mentioned last week—that of the London loan of 250,000,000f, only 202,000,000f, or as is now said 200,000,000f, were paid into the Treasury; secondly, that 900,000,000f were borrowed from the Bank of France, and that Treasury bills to the amount of 100,000,000f above the authorised issue were put in circulation; thirdly, that the Budget of 1870 presents a deficit of 500,000,000f, and that of 1871 for the months of January and February a deficit of 100,000,000f; and finally, that if the war had continued to the 6th March, the Treasury would have been unable to make any more payments whatsoever.

At the demand of M. Pouyer-Quertier, Minister of Finance, the National Assembly has ordered that a committee shall examine into and report on "all contracts entered into by public departments since the 18th July, 1870, and the manner in which they have been executed." This committee, it is not doubted, will have a startling tale to tell; for if only a tithe of what is said be true, it is certain that many of the contracts were tainted with corruption or irregularity, and that not a few were absolutely fraudulent:—it is certain also that large sums were paid for military stores and other things that were never delivered.

The new Assembly seems likely to be zealous in financial matters. It has already received propositions for cutting down salaries above 10,000f. for imposing a tax on all incomes, for suppressing the office of sub-prefects (an important living), for decentralising—in other words, letting citizens manage their own local affairs, and do so gratuitously, instead of having them treated by paid Governmental functionaries. Some of its members even proposed that a committee should be nominated to modify the Budget of 1870, and propose that of 1871; but M. Thiers said that that would be an encroachment on the functions of the Executive to which he could not consent on principle; and that besides it would not be possible until the reorganisation of the army, and other grave matters that would affect the finances, had been settled. In a Constitutional country, he added, the proposition of the Budget must be left to the Government; but the Parliament could accept, reject, or modify it as it pleased. The Assembly expressed approbation of his view, and the motion was withdrawn.

During the siege of Paris, the Bank of France abstained from issuing the weekly return of its situation, but now that communications are established with the provinces (though as yet, however, very incompletely), it is expected to resume the publication. Perhaps even it will do so this very week. A strong desire exists to see what the state of the bank is. The directors, as soon as they can get the necessary information from the branches, intend to call a meeting of the shareholders, and to present to it a report on the operations during the war.

It is affirmed by newspapers that a considerable number of forged Bank of France notes are in circulation, and that they were fabricated by Prussians. But the Bank has given no warning to the public on the subject.

Meetings of representatives of the different branches of industry of Paris have been held, to discuss what ought to be done with respect to commercial bills; and a body called the Union Nationale du Commerce et de l'Industrie, which is an assembly of the *syndicates* of each branch, has drawn up a project to be submitted to the Government and the National Assembly. This document proposes a new adjournment for 90 days from 13th March, but subject to the payment of interest of 5 per cent.—no interest to be accorded for the interval between 15th August from which suspension was authorised to the 13th inst. It will be seen that these traders of Paris do not take into consideration that the people to whom the bills are due are in want of their money. But the new Minister of Finance is not likely to overlook that point, he having, as President of the Chamber of Commerce of Rouen, more than once energetically pointed out that the delay was seriously injurious to manufacturers. The Chamber of Commerce of Roubaix has within the last few days passed a resolution, to the effect that interest of 5 per cent. ought to be allowed on bills delayed. The calculation is made that the total amount of bills due by Paris is not less than 1,500,000,000f. But the figure seems exaggerated.

We are still without any tidings of the Treaty of Commerce which Count Bismarck was said to have required from France; but the allegation is now made that he will bring it forward in the negotiations for the definitive Treaty of Peace at Brussels. If the war be not held to have put an end to the commercial conventions of France and Prussia and the Zollverein, that instrument has still about eighteen months to run, having been concluded for twelve years on 2nd August, 1860.

Newspapers ascribe to M. Thiers a declaration, to the effect that he "will raise Custom tariffs, as was done in the United States, in order to establish the financial equilibrium deranged by war." But, Protectionist though he is, it is hardly likely that he can have used such language, before ascertaining to what condition the war has reduced commerce, agriculture, and finance. At all events, no such statement has been made by him in the Chamber, or anywhere else in his capacity of chief of the Government.

In the territory wrested from France are cotton factories, iron works, glass works, and potteries, that counted among the most important she possessed. There are also coal-pits. Among the factories are the renowned ones of Mulhouse; in the iron works those of Windel and Co., at Hayange; in the glass works that of St Louis, the only establishment in France in which flint glass like that of England is made.

At the Bourse a placard has been stuck up, requesting Austrians and Alsatians, or naturalised Germans, always to carry on them papers proving their nationality. The object of this singular advertisement is not stated, but it is known to be to preserve such people from the illtreatment with which Germans are threatened if they venture to reappear in the Bourse. So strong is the animosity just now against these folk that some of the newspapers have published the names of several of the principal German bankers and speculators formerly of Paris, and have warned them not to return; and merchants and traders are publicly announcing that they will never again employ Germans.

When peace was on the point of being concluded, the Bourse took a hopeful view of the situation, and sent up the price of Threes, and of most other securities. But when it learned that one of the conditions of peace was the payment of the huge indemnity of 5,000,000,000f, it became seriously disquieted, not seeing clearly how such a sum could be raised in the short period of three years, and apprehending that the attempt to raise it would cripple seriously all the resources of the country.

Further reflection has increased its uneasiness on this subject. Accordingly transactions have been limited, and prices have fallen. The following are the quotations for cash :—

	Feb. 28.		March 7.	
	f	c	f	c
Threes	51	35	50	85
New Loan (Empire)	52	40	51	75
Bank of France	2605	0	2680	0

United States 5-20	106	0	108	0
Northern Railway	980	0	950	0
Western ditto	...		525	0
Orleans ditto	...		767	50
Eastern ditto	...		450	0
Lyons-Mediterranean ditto	...		825	0
Southern ditto	...		587	50
South Austrian Lombard ditto	375	0	...	
Suez Canal	...		250	0

The annual meeting of the Société Générale is called for 30th March.

The Suez Canal Company reminds subscribers to obligations and delegations that the time allowed for payment of calls long since expired, and it requests that they may be paid without delay.

The contractors for the Peruvian loan of 1870 announce that if all the calls due be not paid before 10th April, with interest thereon, those already paid are liable to be forfeited.

The Western Railway has been paying since the 1st two half-years' interest on the 1845 and 1847 obligations of the old Havre company. It is, tax deducted, 24f 26c.

The Banque de Belgique advertises in Paris that it has been paying since 2nd January 20f on account of dividend of 1870.

The Banque Federale of Berne, having been re-established on the basis of three new shares for five old ones, with payment of 300f, a call of 100f is now made.

Since the last letter was written, an official announcement has been made that the Italian Government will pay from the 6th, at Messrs Rothschilds, in Paris, the coupons due 1st Jan. last, on the Five per Cent. stock, deduction being made of the tax of 8.80 per cent. Out of Paris this payment has already been effected.

Italian advices say that a project for authorising the Meridional Railway Company to raise 40,000,000f by a new issue of obligations is under the consideration of the Government.

According to a return issued by the South of Austria and Upper Italy Railway Company, the receipts of 1870 were 137,339,033 *lire*, being 2,520,360 less than those of 1869. This company is now paying at Paris 7f 50c per share on account of dividend of 1870—a payment ordinarily made in November.

The Victor Emmanuel Railway Company makes known that from the 9th it will pay the interest on obligations guaranteed by the Italian Government due 1st October last, which, with tax deducted, is 6f 84c; also, that it will pay the obligations drawn at Florence on 31st August last, which are of 500f. These payments have been delayed at Paris by the siege of the city.

The North of Spain Railway Company notifies that a coupon of 1f 75c on what are called "obligations of variable revenue," which fell due on 1st October last, is now being paid at Paris.

P.S.—Bordeaux letters announce that in the National Assembly on Monday, the Minister of Justice presented a Bill for again postponing the payment of bills, but they do not state to what date.

PARIS, March 9, 9 a.m.

The principal enactments proposed by the Government to the National Assembly with respect to the payment of commercial bills are these :—"Bills subscribed before or after the law of the 13th August, 1870, and falling due after the 12th April next, shall not enjoy any prolongation of delay, and shall be payable according to the rules of common law. All bills due between 13th August and 12th November, 1870, shall be payable seven months after the date at which they fall due, with interest from that date. Bills falling due between 13th November, 1870, and 12th April next, shall be payable date for date from 13th June to 12th July. These enactments are applicable to bills that may have been protested. In the departments occupied entirely or in part by foreign troops, the Law Courts may accord moderate delays for the payment of bills."

We have not yet received information that the preceding *projet de loi* has been adopted, but there is no doubt it will be.

By decree of the Government, dated the 2nd, the decrees of 21st August and 12th October, which interdicted the export or re-export, bonding, and transit of oxen, meat, grain, flour, bran, and forage are abolished.

On the Bourse yesterday the Threes closed at 50f 90c for cash, and 51f for end of month; loan, 1870, 51f cash, 51f 80c time; United States Five-Twenties, 107½; Italian Fives, 53f 60c. The Bank of France was in demand, and most joint stock credit establishments were firm. In railway obligations there was an improvement.

Postal communications are still very dilatory and irregular. In consequence, the reports of the markets have not been received.

THE PUBLIC REVENUE AND EXPENDITURE.

THE following are the Receipts into and Payments out of the Exchequer between April 1, 1870, and March 4, 1871 :—

REVENUE AND OTHER RECEIPTS.

	Budget Estimate for 1870-71.	Total Exchequer Receipts			
		To March 4, 1871.		Same time last year.	
	£	£	£	£	£
Balance on 1st April, 1870—					
Bank of England	...	7,633,761		3,775,717	
Bank of Ireland	...	972,887		931,541	
			8,606,648		4,707,258
REVENUE.					
Customs	19,300,000	18,564,000		20,106,000	
Excise	21,600,000	20,295,000		19,362,000	
Stamps	8,589,000	8,250,000		8,536,000	
Taxes	2,850,000	2,408,000		4,228,066	
Income Tax	6,350,000	5,530,000		9,320,000	
Post Office	4,775,000	3,830,000		3,800,000

The following are the Receipts on account of Revenue during the week ending March 4 :—

	Receipts of Week Ending March 4.
	£
Customs	350,000
Excise	604,000
Stamps	169,000
Taxes	75,000
Income tax	243,000
Post Office	100,000
Telegraphs	nil.
Crown lands	nil.
Miscellaneous	31,411
Total	1,572,411

The total receipts of the previous week were 1,526,625*l*.

The Exchequer issues of the week on account of expenditure were 1,292,509*l*, viz. :—

	£
Interest of debt	205,229
Other charges on Consolidated fund	nil.
Supply services	1,087,280
Telegraph services	nil.
	1,292,509

During the week the cash balances have increased in the Bank of England and decreased in the Bank of Ireland as follows :—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on Feb. 25	5,711,064	1,041,600	6,752,664
— March 4	6,025,469	1,025,217	7,050,686
Increase	324,405	...	298,022
Decrease	...	26,383	...

The other receipts to date were 40,424*l*, the other payments were 932,304*l*.

COMMERCIAL AND MISCELLANEOUS NEWS.

The Board of Trade have been informed by the Secretary of State for Foreign Affairs, that a despatch has been received from Her Majesty's Consul at Havre, reporting that no impediment is placed by either the French or German authorities to vessels going up the Seine to Rouen, and that several vessels have gone up to that city and returned therefrom.

In a communication to the *Times* Mr R. Dudley Baxter thus sums up the position of the National Debts of the world:—Out of the 52 States and principal colonies of the civilised world, only three of the smallest appear to be free from debt—Servia, in Europe; Bolivia, in America; and Liberia, in Africa. The whole 52 States have a population of 606,000,000; Government revenues or taxation amounting to 596,000,000*l* being nearly 1*l* per head: and National Debts with an aggregate capital of 3,700,000,000*l*, and a total annual interest of 157,000,000*l*. So that the annual charge of the debts of the civilised world, even including British India and Japan, is 5s 2d per head of the 600 millions of population, and absorbs a quarter of the whole proceeds of taxation. The rise and progress of these debts is very singular, and the figures of capital may thus be summarised. At the breaking out of the French Revolutionary War the debts were, in 1793 :—

	£
Great Britain	270,000,000
Continent of Europe	203,000,000
United States	15,000,000
British India	8,000,000
Total	496,000,000

At the conclusion of that war, and on the settlement of accounts, the Debts were in 1815-20 :—

	£
United Kingdom	902,000,000
Continent of Europe	570,000,000
America	29,000,000
British India	29,000,000
Total	1,530,000,000

So that in 20 years the debts had trebled, and England owed 228,000,000*l* more than all the rest of the world. The period from 1820 to 1840 was one of peace, and the debts were not largely increased, standing thus in 1848 :—

	£
United Kingdom	820,000,000
Continent of Europe	746,000,000
America	114,000,000
British India	50,000,000
Total	1,731,000,000

But the debt of England was reduced to less than half the total aggregate. After 1848 a new era began, of immense armaments and a corresponding increase of debts, so that at the downfall of the French Empire the account stood, in 1870 :—

	£
United Kingdom	801,000,000
Continent of Europe	2,165,420,000
America	765,420,000
Asia	104,700,000
Africa	39,675,000
Australasia	35,744,000
Total	3,945,000,000

So that England sinks [if such an event can be called sinking] to one-fifth instead of one-half of the great total. In a few more years she will fall even lower to the second place in separate amount of indebtedness, and the first place be taken by France.

The following is a return of the number of paupers (exclusive of lunatics in asylums and vagrants) on the last day of the fourth week of February, 1871, and of the corresponding week in 1870 :—

	Paupers. Indoor. Adults.	Outdoor. Adults.	Outdoor. Children under 16.	Total. 4th week Feb., 1871.	Corresponding Date in 1870.
West district	5,389	9,347	6,789	21,525	20,623
North district	6,[illegible]	14,[illegible]	10,[illegible]	32,[illegible]	34,[illegible]
Central district	6,[illegible]	8,[illegible]	7,[illegible]	22,[illegible]	23,[illegible]
East district	7,643	11,[illegible]	10,[illegible]	[illegible]	[illegible]
South district	9,120	20,113	[illegible]	47,769	54,136
Total of the Metropolis	34,[illegible]	63,[illegible]*	53,[illegible]	151,629	161,001

* of these out-door paupers 17,[illegible] are men and 45,821 are women.

Total Pauperism of Metropolis.—Population in 1861, 2,802,000.

	Number of Paupers. Indoor.	Outdoor.	Total.
Fourth week of February, 1871	36,433	117,196	153,629
— — 1870	37,751	143,250	181,001
— — 1869	36,941	118,878	155,819
— — 1868	36,040	120,010	156,050

Vagrants relieved in the Metropolis on the last day of the fourth week of Feb., 1871.

Men.	Women.	Children under 16.	Total.
887	190	55	1,132

The Californian Miners' Convention proposed by Colonel Berton, the French Vice-Consul at Sacramento, appears to have excited great interest, and to have been successfully constituted on the 29th of January. It resulted in the formation of a body, to be called the "Bureau of Mining and Mining Statistics for the Pacific Coast," the directors of which were to hold their first meeting on the 8th ult. at San Francisco. All Consuls are directors *ex officio*, although only four of them have been elected active members of the Board. The Association will have a delegate in each county of the States of California, Nevada, and Oregon, and the territory of Arizona. No mining claims are to be registered by the Board of Directors and proposed for sale, either in the United States or abroad, except after having been investigated by a competent engineer and geologist, and reported favourably upon by the delegate agent of the Board. The registration of the mining claim will comprise its full description, approximate value, and location, and the estimated amount required for its development. Finally, agents will be selected in London, Paris, and other important cities in Europe, "who will keep at the disposition of capitalists a register containing all reliable information in regard to legitimate mining claims offered to the European markets."

The exports from the colony of Natal in 1870 amounted to 382,979*l*, being 19,708*l* more than in 1869. This includes 23,870*l* for goods "not colonial," under which category, however comes 9,000*l* worth of diamonds, the produce of Natal industry and energy on the Vaal River. The export of sugar, amounting to 111,023*l*, shows a considerable decrease, owing to drought and frost in 1869. The export of wool advanced to 120,778*l*, but the increase was more in value than quantity. Not fewer than 173,340 skins of "wildebeestes and quaggas" are in the list of the exports. The imports in 1870, amounted to 429,527*l* being 49,196*l* in advance of the preceding year. The Customs' revenue was 45,500*l* being an increase of 10,000*l*. There was an increased import of ready-made clothing, cottons, cabinetware, flour, beer, ironmongery, and gunpowder.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

An Account pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 8th day of March, 1871.

ISSUE DEPARTMENT.

	£		£
Notes issued	36,021,415	Government Debt	11,015,100
		Other Securities	3,985,900

— Hamburg(3months)	13 9¼ 9⅜	13 9½ 10	13 11 11½	13 10½ 10⅝	13 10⅜ 11½
Clearing-house return	...	60.348,000	68,294,000	77.297.000	90.240.000

In 1861, the demand for money was light, but the brokers were still restricting their operations, and the Bank maintained the rate of 8 per cent. Besides the general causes of the tightness of money—the American troubles and the deficient harvest of the previous season—there was for the moment some apprehension of a mass of cotton bills coming from America.

In 1868, the regime of 2 per cent. following the 1866 panic continued.

In 1869, there had been some expectation of an advance in the Bank rate this week, but money was easy in the open market. President Grant had just entered upon office, and his selection of a Cabinet was being discussed.

In 1870, money was comparatively easy, at 3 per cent. The Irish Land Bill was under discussion, and the Education Bill was anticipated.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 8,329,533*l*; in 1868, an excess of 2,753,929*l*; in 1869, a deficiency of 1,207,651*l*; and in 1870, a deficiency of 2,886,219*l*. In 1871, there is a deficiency of 2,414,051*l*.

DISCOUNT AND MONEY MARKET.—The money market is a good deal easier this week. The rates in the open market for Bank bills under three months are still quoted nominally the same as last week, viz., 3 to 3¼ per cent.; but two months' bills are not done above 3, and there are transactions in the very best short paper at a fraction under that figure. The rates for long-dated paper again are a good deal easier than they were last week, and there is no longer the same disposition to avoid it. There is plenty of money in the market, and only a moderate demand. The comparative ease this week however is greatly caused by the superabundant provision previously made; and the apprehensions as to the effect of the foreign and other demands which must come with the conclusion of peace have not passed away. Only the market is somewhat in suspense till something more is known of what these demands will be, and in what shape they will be introduced. To-day there was a fair demand at the Bank.

The Bank account this week shows a decrease of 996,000*l* in the private deposits, which is a comparatively small deduction from the great increase of previous week, and indicates that the great pressure upon the Bank for discounts was mainly precautionary. The private securities have diminished 771,000*l*, and the reserve has increased by 313,000*l*, so that the changes of the week leave the Bank a good deal stronger. The bullion in both departments has increased 102,000*l*.

We subjoin our usual quotations for mercantile paper having various periods to run :—

Bank bills—2 months	3	per cent.
Do 3 —	3 3¼	per cent.
Do 4 —	3⅜	per cent.
Do 6 —	4¼	per cent.
Trade bills—3 months	3¼ 3½	per cent.
Do 4 —	3¾ 4	per cent.
Do 6 —	4¾	per cent.

The allowance for deposits at the joint stock banks and discount houses is as follows :—

Joint Stock Banks at call	2	per cent.
Discount houses at call	2	per cent.
Do with seven days' notice	2¼	per cent.
Do fourteen days	2½	per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent. 1870.	1871.	Open Market, per Cent. 1870.	1871.
Paris	2½	6	2	...
Vienna	5	5	5	5
Berlin	4	4	3¾	3½
Frankfort	3½	3½	2¾	3¼
Amsterdam	4	3½	4½	3
Turin	5	6	5	5
Brussels	2½	4	2¼	3½ ½
Madrid	5	5	5	5
Hamburg	...	...	3	3½
St Petersburg	5	8	4½	7

The Bank of Berlin has reduced its rate this week ½ per cent.

ENGLISH GOVERNMENT SECURITIES.—The markets this week have continued in much the same state as at the close of last week. English Government securities have been dull, in consequence of apprehensions as to the increasing value of money; foreign securities have also been flat, both from the circumstance of the threatened competition of France, and the reports of other new loans—the actual issue of a Russian loan increasing the dulness; but home railways, banks, and other progressive securities have remained steady or advanced, subject to the usual market fluctuations consequent on realisations.

As regards English Government securities, Consols, which closed last week at 91 11/16 13/16, went to 91½ ⅝ on Monday, and 91⅜ ½ on Tuesday, at which point they left off on Thursday, after a slight farther decline early on that day, which was immediately checked by the early opposition manifested to the Russian loan. To-day the market, after being weak, closes rather better, and the final quotation is 91⅝ ¾, and which is only a fraction under the closing price of last week. There is however a fall of 6/16 for the week in Reduced and New Threes.

Subjoined is a list of the highest and lowest prices of Consols every day :—

	CONSOLS. Money. Lowest.	Highest.	Account. Lowest.	Highest.	Exchequer Bills. March and June.
Saturday	91⅛	91⅛	91⅛	91¼	par to 5s pm
Monday	91⅛	91⅛	91¼	91⅜	par to 5s pm
Tuesday	91⅛	91⅛	91⅛	91⅛	par to 5s pm
Wednesday	91⅛	91⅛	91⅛	91⅛	par to 5s pm
Thursday	91⅛	91⅛	91⅛	91⅛	par to 5s pm
Friday	91⅛	91¼	91¼	...	par to 5s pm

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec
Consols for money	91⅝ ¾	91⅝ ¾	... ...
Ditto account	91 13/16	91⅝ ¾	— 1/16

Queensland Government 6 % Bonds, 1884-5	108 9	107½ 8½	— ½
Victoria 6 %	111½ 12½	111 12	— ½
Ditto New 5 %	101½ 2½	101 2	— ½

FOREIGN GOVERNMENT STOCKS.—The weakness in foreign stocks early in the week was principally felt in Turkish and Egyptian, the latter on a statement that Messrs Oppenheim and Co. had negotiated an advance to the Viceroy on Treasury bills; but heaviness has prevailed generally—extending even,

towards the close of the week, to the French National Defence and North German loans, which exceptionally benefited at first by the conclusion of peace and have rather gained on the whole week. The event in the market was the issue by Messrs Rothschilds on Thursday morning of the prospectus of a new Russian loan for the sum of 12,000,000*l*, for which we prepared our readers last week. The proposal was received with the utmost coldness in the market, on grounds which are succinctly stated in the following protest:—

A prospectus having been issued by Messrs Rothschild and Sons, containing proposals for a loan of 12,000,000*l* sterling for Russia, the undersigned hereby enter their protest against such loan being introduced at present, for the following reasons:—1. The Conference is now sitting in London to consider the conduct of Russia in the matter of the Treaty of 1856. 2. The question raised by Prince Gortschakoff was, in the opinion of Her Majesty's Envoy, Mr Odo Russell, of a nature in its present state to compel us, with or without allies, to go to war with Russia. 3. Under these circumstances, as good citizens and loyal subjects of our Queen, we consider that to supply Russia with means which might be used for aggressive purposes is most unpatriotic, and until the Conference has concluded its sittings in every way to be condemned.

The protest we understand was not extensively signed, principally out of respect for the high position of the agents of the loan; but it undoubtedly expressed the feeling of the market at the appearance of the prospectus. The unwillingness to deal in the new loan extended to other departments, and on Thursday there was almost a suspension of business, especially in foreign stocks. To-day this depression in business has continued, the utmost unwillingness to deal in the new loan being manifested. Generally however the foreign market is rather better at the close to-day than it has been during the week.

Although Turkish securities have generally been weak, especially the 6 per Cent. loan of 1869, the 5 per Cents. of 1865 have been more firmly supported this week An artificial stimulus, it appears, has been given to this description of Turks by repurchases of dealers, to whom the Government had pledged a part of the stock for advances, and who, having sold the stock, have received notice that the advances will be repaid.

The prospectus of the new Russian loan states that the nominal capital will be 12,000,000*l*, in 5 per cent. bonds to bearer of 50*l*, 100*l*, 500*l*, and 1,000*l* each, with coupons payable on the 1st of March and the 1st of September in each year, at the offices of Messrs Rothschilds in London, Amsterdam, and Frankfort, in St Petersburg at the State Bank, and at Berlin and Amsterdam at the houses to be designated hereafter, the payment in London to be in sterling, and at the places named at the exchange of the day. The object of the loan is stated to be "to reinforce the railway fund, for the completion of "the railways belonging to the State, and to assist in the "future development of the network of the railways of the "empire, according to the concessions given to the following "companies, namely—Moscow-Brest, Riga-Bolderaa, Poti-Tiflis, "Tambow-Saratow, and Odessa." The price of issue is 81/10s, payable by instalments terminating on October 3, with liberty to subscribers to pay up instalments under discount of 4 per cent. per annum. A sinking fund is to reimburse these bonds at par in 81 years, by annual drawings; the first drawing will be made on the 1st of March, 1873, and the reimbursement six months later.

On the whole it seems doubtful whether any large part of the loan will be subscribed here. It appears that the private applications have been numerous, but the general refusal to deal on the Stock Exchange cannot but have a serious effect It remains to be seen whether the continental markets will be able at once to fill up the subscriptions. Much of the feeling here is dictated by the conviction that Russia has adopted an attitude specially hostile to England: but Russia, to some extent, has also lost character as a peaceful power, and the painful impression produced by the denunciation of the Treaty of 1856 cannot but alarm timid capitalists in all countries. The former feeling that Russia might be trusted not to plunge into an aggressive and exhausting war is gone, and if English capitalists in addition dislike lending to a possible enemy, foreign capitalists have enough reason to dislike trusting a Government which is likely, by a single rash act, like that of which it was so lately guilty, to depreciate its credit enormously, and suddenly ruin those who happen to have trusted it. There is also a feeling on the Stock Exchange that foreign issues of any serious amount are premature until it is seen what the French demands will be, and what terms France will offer. The offe by France of a high rate of interest will naturally depreciate the securities of other European States.

With regard to the arrangements between Messrs Oppenheim, Nephew, and Co., and the Khedive of Egypt, it is stated that they are for an advance of 6,500,000*l* on Treasury bills for about two years and a half, when the period will have elapsed during which his Highness is pledged not to contract any new direct loan. The bills are to be accompanied by an hypothecation of special securities.

The following are the changes for the week, taking the latest unofficial prices for quotation:—

Brazilian scrip, after being at a discount during the week, are finally quoted par to ⅛ pm.

English Railway Stocks.—The principal business in the railway market has again been in Great Western, London and Brighton, but South-Eastern Ordinary and Deferred, Great Eastern, and Manchester and Sheffield have also improved greatly,—especially Brighton and South-Eastern,—while the general tendency has been towards an advance. On Wednesday and Thursday there was a slight reaction, caused by realisations, and also to some extent, we believe, by the operations of dealers, who have been speculating largely for the rise, but are ill-supplied with stock and wish to supply themselves on good terms. The reaction, however, was very slight, owing to the great firmness of holders, and the steady pressure on this department for investment. The traffics this week have again been very favourable. To-day the slight reaction on Wednesday and Thursday was fully recovered from, and the market closes with steadiness.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices:—

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.
Caledonian	86½ ¼		86½ ¼	+ ¼
Great Eastern	37½ 8¾ xd		39½ ¼	+ 1½

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted, for the week ending March 4, to 699,221*l*, being an increase of 48,900*l* on the corresponding week of the last year. The aggregate for the current half-year now is 5,348,906*l*, being an increase of 272,287*l* on the corresponding period of last year. The principal increases for the week are—London and North-Western, 7,340*l*; North-Eastern, 6,683*l*; Midland, 5,599*l*; Great Western, 5,387*l*; Lancashire and Yorkshire, 5,133*l*; and South-Eastern, 2,511*l*. The following are the details of the increase in each case for the week and for the whole period :—

RAILWAY TRAFFIC RETURNS.

Great Western of Canada.....	16 ⅛	.....	16⅛ ⅜	+ ¼
Madras 5 %	102½ 3	.....	102⅓ 3	... ...

The most noticeable feature in this department for the week is the advance in Grand Trunk of Canada stocks. The traffics have improved greatly, and an advance of 7,200*l* is announced for last week as compared with the corresponding week of last year.

The quotation of the shares of the Magdeburg-Lausitzer Railway, the prospectus of which was issued last week, is 1¼ ½ pm.

The *Times* states that, according to a private telegram from Bucharest, the Commission of the Chamber had decided that the Government had no direct liability towards the holders of the 600,000*l* Roumanian State Railway bonds, the January coupons of which are now in default.

AMERICAN SECURITIES.—The prospectus for the Funded Loan of the United States is to the following effect :—

The undermentioned firms, with the sanction of the Secretary of the Treasury of the United States, are prepared to receive applications for the National Loan, authorised under the Act approved July 14, 1870, entitled "An Act to authorise the Refunding of the National Debt," and the Act in amendment thereof, approved January 20, 1871. Subscriptions will accordingly be opened at their respective offices, on Friday, the 10th day of March instant. The amount proposed to be issued is $200,000,000 (two hundred millions of dollars), redeemable in coin of the present standard value, at the pleasure of the United States, after ten years from the date of issue, and bearing interest at the rate of five per cent. per annum, from the 1st day of May next, payable quarterly in coin in the United States, at the offices of the Treasury, any Assistant Treasurer, or designated depositary of the Government. The bonds will be issued in the United States, where the principal will also be reimbursed. The bonds will be registered, or issued with coupons, as may be desired by subscribers. Registered bonds will be issued in amounts of $50, $100, $500, $1,000, $5,000, and $10,000; and coupon bonds of each denomination except the last two. The bonds, and the interest thereon, are exempt from the payment of all taxes and dues of the United States, as well as from taxation in any form by or under State, municipal, or local authority. After maturity, the bonds last issued will be first redeemed by classes and numbers, as may be designated by the Secretary of the Treasury. The price of issue will be par, or at the rate of 102*l* 7s 6d sterling (being the equivalent of 91 at ex. 4s 6d to the dollar) for each five hundred dollars. Subscribers will be required to deposit, at the time of application, 2*l* on every $500 applied for, and the balance will be payable on the 1st day of May next. The subscriptions will be transmitted to the United States, where the bonds will be delivered. Payment may be made, either in cash or in bonds of the United States known as "Five-Twenty" bonds, also at their par value—viz, at the rate of 102*l* 7s 6d sterling for every five hundred dollars, allowance being made for accrued interest at the exchange of 4s 1d per dollar. Forms of application and copies of the Acts of Congress authorising the issue, may be obtained from either of the undermentioned firms :—

Baring Brothers and Co., 8 Bishopsgate street Within; Clews, Habicht, and Co., 5 Lothbury; J. Cooke, McCulloch, and Co., 40 Lombard street; J. S. Morgan and Co., 22 Old Broad street; Morton, Rose, and Co., Bartholomew lane; N. M. Rothschild and Sons, New court, St Swithin's lane.

Dated in London, 9th day of March, 1870.

It is understood that half of the issue is at present reserved for applicants in the United States.

The applications for the new bonds have been unimportant in extent, and the nominal quotation on the Stock Exchange at the close of business to-day was 1¼ to ⅜ discount. The prospect before the new loan is not considered encouraging. The special exemption from taxation which is accorded to the new issue has not had the effect of inducing purchasers to any important extent, as it is reasonably held that the American Government are under a moral obligation not to lay any impost upon the foreign holders of the old issues. The quarterly payment of interest is a step in the right direction, but the fact that no provision has been made for the payment of the coupons is Europe will militate against the success of the loan.

In consequence of the issue, American securities have been weak, and there is a noticeable decline in 5-20's and 10-40's :

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.
United States 6 % 5/20 Bonds, exchng. 4/6	92¼ ⅜	.....	91 5/8 ⅞	— ⅜

Ditto 5 % Sterling Bonds	57 9	.....	57 60	... ...

JOINT STOCK BANK SHARES.—The changes in this department have not been of great extent, but they have been generally reactionary, as usual after any important or long continued upward movement. Hong Kong and Shanghai shares, and Land Mortgage of India debentures are 1 lower; Alliance and Union of Australia ½; Anglo-Hungarian and Metropolitan ¼ on the week. On the other hand, British Columbia, Imperial, London and County, and London and Westminster have advanced ½.

The German Bank of London (Limited) has been constituted by some leading German capitalists, with a capital of 2,000,000*l*, in shares of 10*l* each, fully paid up, of which 600,000*l* will be first issued. Mr Otto Nestle is to be the managing director, and the London Joint Stock Bank are to be the bankers here. The whole of the first issue has been subscribed by the founders and their connections, and there are consequently no shares to be offered to the public. The number of members constituting the board is ten, of whom four belong to London, and six to German cities.

The petition to Parliament by the clerks and others in the banks of London, &c., for provision for bank holidays, and with reference to bills of exchange and promissory notes, has been issued. It is to the effect that when the 1st day of June and August shall fall upon a Sunday, the following Monday shall be a bank holiday, and that Easter Monday in every year shall likewise be a bank holiday.

A general court of the proprietors of the Bank of England is called for the 16th instant, "to consider of a dividend." Another court will be held on the 4th of April, for the election of a governor and deputy-governor for the year ensuing, and on the following day twenty-four directors will be elected.

TELEGRAPHS.—No little activity has prevailed in the

demand for telegraph shares resulting in a general rise, with some unimportant exceptions, of ¼ per cent. on the average. Anglo-Mediterranean shares show a rise of 1 as compared with last week. British Australian and French Cables have advanced ½; China Submarine, Falmouth and Gibraltar, and Great Northern, ¼; British Indian Extension, ⅛. There is, however, a decline of ¼ in Reuter's, ½ in Mediterranean Extension, and ¼ in Indo-European.

The report of the Anglo-American Telegraph Company (Limited) has been issued. The total receipts for the past year accruing to the undertaking were 233,822*l*, while the charges for completing buildings, purchasing ship and stores, and repairing cables with the ordinary working and other expenses, and income tax, amounted to 76,121*l*, leaving a balance of 157,700*l*. Out of this amount three interim dividends of 2 per cent. each, free of income tax, have already been paid, absorbing 94,424*l*, and leaving a balance of 63,276*l*. The directors recommend the payment of a further dividend of 3 per cent., leaving 16,026*l*, which it is proposed to appropriate towards the repair of the 1863 and 1866 cables, in addition to 13,800*l* obtained by the resale of 60 miles of cable to the French Company, and 9,214*l* appropriated from the reserve fund, making a total of 39,04*l*.

Miscellaneous.—In this department there has not been much activity. Telegraph Construction shares are unchanged, but Silver's Indiarubber Works are 1 lower. Foreign and Colonial Trust 5 per Cent. bonds have given way 1: Baugparah Tea Estates, City of London Real Property, and City Offices, ½; but British American Land and Canada Company have advanced 2, and General Steam Navigation ½.

A prospectus has been issued of the Dominion of Canada Oils Refinery Company (Limited), capital 150,000*l*, in 30,000 shares of 5*l* each fully paid, of which 13,000 are now issued to the public at par, the remainder to be issued rateably to the original shareholders should farther capital be required. The company is established to purchase and work the patented still and machinery of Messrs Houghton and Howell, of St Catharines, Ontario, for the manufacture of the crude oils of the Dominion, and to extend the business. The patent, it is stated, produces the finest lubricating oil, not only from the crude oils of the Dominion, but from a residuum which is now treated as waste, and overcomes all the objections which have hitherto existed to the use of Canadian oils. The refined article is stated to be largely in demand for railway and other purposes in Canada and the United States, and large profits are expected.

Messrs Henry Kingscote and Henry Grissell, the committee of supervision in the liquidation of Overend, Gurney, and Co. (Limited), have addressed a circular to the shareholders, to ascertain if they would be disposed to sell their remaining interest in the liquidation for a certain sum per share (such, for instance, as 2*l*), or would prefer to form a company to take over the whole of the remaining assets, so as to stop the expense of liquidation, or would desire that the liquidation should be continued. We fear this attempt is more well-meaning than judicious. It is difficult to see for what purpose a new company could be formed, or what business it could do. Any new company taking over a quantity of unrealised assets would begin with so much dead capital; and if it is to start fair at all, must charge a proportionate price for doing so to the owners of these assets, so that they would have little advantage.

Mines.—The dealings in British mines have not been extensive; nevertheless, some important fluctuations have taken place on the week. The leading movements consist of an advance of 4 in West Seton; 1 in Margaret, Uny Lelant; and ½ in Great Wheal Vor. Wheal Mary Ann shares have declined 2; Tin Croft 1½; East Lovell 1; and North Wheal Crofty ¼. In foreign mines there is an advance of 1½ in St John del Rey; ¼ in Almada Silver; and ¼ in Linares. Colorado shares have given way ⅜, and United Mexican ¼.

Exchanges.—There are no particular changes to note this week, but there appears to be a slightly increased demand for the means of remittance to Holland and Belgium, and also to Frankfort and Berlin.

Bullion.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week:—

Gold.—The demand for gold, although sufficiently good to absorb all arrivals, is not quite so active, and there have been no withdrawals from the Bank this week. The amounts to hand comprise 100,000*l* from New York, per City of Washington, and 4,840*l* per Nubia, from Alexandria. The Candia has taken 8,600*l* to Alexandria; and the La Plata 2,000*l* to the Brazils. Silver remains without animation, and the prices are without alteration. The City of Washington has brought 36,000*l* from New York, the Colorado has brought 32,200*l* from New York, the City of Brooklyn has brought 69,500*l* from New York, the Main has brought 26,000*l* from New York, the Nubia has brought 45,000*l* from Bombay—total 208,700*l*.

Mexican dollars.—The amounts to hand during the week have been but small, and the price remains without alteration at 58⅜d per ounce, at which rate those brought by the West India steamer were taken, and chiefly for refining purposes.

The Candia has taken 55,000*l* to China and the Straits.

Exchange on India for banks' drafts at 60 days' sight is 1s 10¾d to 1s 11d.

Indian Government loan notes are without alteration. We quote 4 per Cents., 91¼ to 91⅝; 5 per Cents., 99¼ to 99⅜; and 5½ per Cents., 106⅜ to 107½.

Quotations for bullion.—Gold—Bar gold, 77s 9d to 77s 9½d per oz std; ditto fine, 77s 9d per oz std; ditto refinable, 77s 11d to 78s per oz std; South American doubloons, 73s 8d to 74s per oz; United States gold coin, 76s 3d to 76s 3½d per oz. Silver—Bar silver, 5s 0⅝d to 5s 0½d per oz std; ditto containing 5 grains gold, 5s 0⅜d to 5s 0⅝d per oz std; Mexican dollars, 4s 10¾d per oz, last price.

According to to-night's *Gazette* the imports of the precious metals into the United Kingdom during the week ended March 8 were—gold, 307,284*l*; silver, 305,347*l*. The exports were—gold, 304,013*l*; silver, 137,264*l*.

There were no bullion transactions at the Bank to-day.

NOTICES AND REPORTS.

STOCKS.

Egyptian—Khedive's 7 per Cent. Loan, 1870.—The numbers of 4,375 bonds of 20*l* each have been drawn for redemption at par on the 1st April.

Funded Loan of the United States.—See Money Article.

Portuguese 3 per Cent. Dividends.—These will henceforth be paid quarterly at the Portuguese Financial Agency, the first quarterly distribution being made on the 1st April.

Russian 5 per Cent. Consolidated Bonds of 1871.—See Money Article.

RAILWAY COMPANIES.

Cambrian.—There was an advance of 2,930*l* in passenger and of 3,290*l* in merchandise and mineral receipts during the second half of 1870. The net income of the inland section was sufficient to meet all the fixed charges thereon (22,769*l*) and leave a balance of 1,822*l* to be carried forward.

Glasgow and South-Western.—Dividend announced at the rate of 5½ per cent. per annum. Surplus, 3,096*l*.

Kettering, Thrapstone, and Huntingdon.—Net profit, 5,680*l*, from which the directors declare a dividend at the rate of 5¾ per cent. per annum on the A stock, and of 1 per cent. on the B or deferred stock.

Midland Great Western of Ireland.—The receipts for the half-year amounted to 154,433*l*. The expenditure in working the railway and canal was 76,960*l*; the rents of other lines, the interest on loans, and loss on working the Athlone and Galway line were 27,725*l*, making together 104,686*l*, which, deducted from the 154,433*l*, left a balance of 49,747*l*. To this was added 11,663*l*, surplus from the preceding half-year, making 61,210*l*, out of which the directors recommended a dividend at the rate of 5 per cent. per annum on the preference stock and 4 per cent. per annum on the ordinary consolidated stock, which would absorb 50,643*l*, and leave 10,566*l* for the next account. There has thus been an advance of ½ per cent. in the dividend. The Navan and Kingscourt line is in a forward state, and the Great Northern and Western line was handed over to this company on the 1st November.

Monmouthshire.—Dividend announced at the rate of 6 per cent. per annum.

Penbroke and Tenby.—Half-year's gross traffic, 13,021*l*; net receipts, 7,244*l*. Ordinary dividend recommended at the rate of 1 per cent.

BANKS.

London Bank of Mexico and South America.—The report shows an available total of 17,419*l*, including a previous balance of 2,612*l*, and recommends a dividend for the half-year of 16s per share, or at the rate of 8 per cent. per annum, which will absorb 14,409*l*, and leave 3,010*l* to be carried forward.

London and San Francisco.—Year's gross profits, 132,749*l*, and after deducting charges and rebate, 102,978*l* remains as net surplus. A dividend of 10 per cent. (the first instalment of which was paid in September) is announced; surplus, 7,978*l*. Of this, 5,000*l* belongs to the founders as bonus, leaving 2,978*l* to be carried forward.

Royal Bank of Ireland.—A six months' dividend at the rate of 12 per cent. per annum, free of income tax, is recommended.

ASSURANCE COMPANIES

Lancashire Insurance.—Year's fire premiums, 102,283*l*; surplus, 30,639*l*; life income, 47,227*l*; life reserve, 198,804*l*; fire reserve, 82,390*l*.

MISCELLANEOUS COMPANIES.

Anglo-American Telegraph.—The total receipts for the past year, including 1,258*l* carried over from the last account, were 233,822*l*, while the charges for buildings, purchasing ship and stores, and repairing cables, with the ordinary working and other expenses, and income tax, amounted to 76,121*l*, leaving a balance of 157,700*l*. Out of this amount three interim dividends of 2 per cent. each, free of income tax, have already been paid, absorbing 94,424*l*, and leaving a balance of 63,276*l*. The directors recommend the payment of a further dividend of 3 per cent., also free of income tax, leaving 16,026*l*, which it is proposed to appropriate towards the repair of the 1865 and 1866 cables, in addition to 13,800*l* obtained by the re-sale of 60 miles of cable to the French Company and 9,214*l* appropriated from the reserve.

Danubian Navigation.—Half-year's available balance, 1,577*l*, out of which a dividend of 4 per cent. (making 6½ per cent. for the past year) is recommended.

Dominion of Canada Oils Refinery, Limited.—Capital, 150,000*l*, in 30,000 shares, of 5*l* each, to be fully paid at once. 13,000 shares now offered at par. For the sum of 50,000*l*, of which 38,000*l* is in shares, Messrs Houghton and Howell have agreed to sell their works, patents, and processes to the new company, and it is proposed to greatly extend the works and machinery. The processes of this firm are stated to be unrivalled for the manufacture and purification of Canadian oils, and large profits are looked for.

London General Omnibus.—The report stated that although the gross receipts showed a decrease, the number of passengers carried during the half-year considerably exceeded that of the corresponding half of last year. The account showed a profit, including 6,014*l* brought forward, of 29,600*l*; from which it was proposed to add 2,500*l* to the reserve fund, to write 2,500*l* off the first establishment account, to apply 22,460*l* to the payment of a dividend of 3s per share, equal to 7½ per cent. per annum, free of income tax, and to carry forward 2,140*l*.

Mediterranean Extension Telegraph.—At the meeting a dividend at the rate of 3 per cent. per annum, free of income tax, was declared. Surplus, 703*l*.

North British Australasian.—Year's profit, 5,735*l*, making, with the balance brought forward, a total of 7,093*l*. The war between France and Germany has exercised a prejudicial influence upon the realisation of the company's produce.

Surrey Commercial Dock.—A dividend of 2½ per cent., free of income tax, for the half-year, has been declared. Owing to the war there has been some falling off in revenue.

Witt and Williams's Brewery, Limited.—Capital, 50,000*l*, in 5*l* shares; payable, 10s on application, 2*l* on allotment, and 2*l* 10s in six months. This new undertaking is formed to purchase the English Brewery, Hohenfelde, Hamburgh. The freehold covers, 25,543 square feet, with buildings and plant on the newest principles. The purchase price is 26,200*l* in shares, and large profits are looked for "free from all risk."

MINING COMPANIES.

Alamillos.—Dividend 2s 6d per share.

Fortuna.—Dividend 2s 6d per share.

Linares Lead.—Dividend 5s per share.

Pestarena United Gold.—The year's produce was 22,399*l*, and a small profit of 661*l* was made.

Taquaril Gold.—A call of 2s per share is payable on the 24th March, in consequence of returns having been less than were anticipated.

The Commercial Times.

POST OFFICE ANNOUNCEMENTS.

In addition to the regular mails for Buenos Ayres which are made up for d spatch by the packets leaving Southampton on the 9th and Liverpool on the 20th of each month, arrangements have been made with the Pacific Steam Navigation Company for sending extract mails by their packets leaving Liverpool for Monte Video on the 13th and 29th of each month, the company having undertaken to forward such mails to their destination through their agent at Monte Video. As, however, these extra mails will not be conveyed the entire distance by packets under contract with this department, only such correspondence for Buenos Ayres as may be specially so addressed will be forwarded by the Pacific Company's packets.

The North German Lloyd having announced that they intend to resume the weekly despatch of their packets from Southampton to New York on Tuesday next, the 7th instant, the public are informed that mails for the United States will again be made up in London every Tuesday morning (commencing next week) for conveyance by the North German Lloyd packets, according to the arrangement which existed previous to the suspension of the service in July last.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

There was a firm tone in the wheat trade at Mark lane to-day, though the transactions were not numerous. Supplies of English were short, and generally in bad condition, but the full rates of Monday last were demanded in all sales reported. Foreign was formerly held at extreme prices. Flour ruled steady in value and demand, while there was no change to notice in the quotations for barley, oats, beans, or maize. The weekly imports of foreign and colonial produce into London have amounted to 21,950 qrs of wheat, 13,670 barley, 3,[illegible] oats, 270 peas, 16,910 sacks of flour.

At Liverpool and Wakefield this morning the wheat trade ruled quiet, but prices showed firmness.

The Liverpool cotton market opened very dull and irregular. On Wednesday there was a better feeling, and on Thursday, with an increased demand, an advance of ⅛d to ¼d per lb from the lowest point was obtained. The total sales for the week are 72,[illegible] bales, of which the trade have taken 49,030 bales; speculators and exporters, 23,[illegible] bales. The imports are 132,[illegible] bales, the actual exports, 25,412 bales, and to-day's stock is 705,[illegible] bales. Quotations for American descriptions have receded ¼d per lb. East Indian, ⅛d to ¼d per lb; and Brazils ¼d per lb since last Friday. To-day, in consequence of received large receipts at the American ports, the market closes dull, sales 10,000 bales.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended March 9, 1871:—

	Imported.	Exported.
American bales	101,845	16,622
Brazilian	14,552	1,527
East Indian	16,124	16,177
Egyptian	5,129	695
Miscellaneous	1,881	88
Total	138,931	35,109

At New York, on March 9, middling Upland cotton had declined to 14⅞ cents per lb. Telegraphic advices from Bombay to March 4 report a dull market for cotton at 175 rs for fair Dholbrah.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, February 11:—When our last repor was written the cotton market was heavy and declining, and during the week a succession of dull telegrams from Liverpool has had the effect of lowering prices about rs 3 to rs 4 per candy. The decline is very trivial, looking to the cheerless prospects indicated by late accounts from home, and the rapid accumulation of stocks which must be taking place in the districts, but in so far as spot quotations are concerned, the off-take has been sufficient to prevent any surplus arising in new cotton, and dealers were thus enabled to resist any further concessions in prices. About 5,000 candies of all descriptions were contracted for or purchased by European exporters during the week, and the eagerness displayed to obtain delivery suggests the belief that a large proportion of the business done has been to cover in "bear" sales for February shipment. There is very little of importance to write about regarding the up-country markets. Prices in Oomrawuttee and Khamgaum fell to 200 rs per candy for full pressed bales, but latterly, we believe, ryots were holding off for higher rates. Arrivals of cotton on the green are increasing very slowly. Of new Oomrawuttee very little of first quality is procurable, but there are moderate supplies of Khandeish, Barsee, and Faizapoor, and of the large shipments which have been and are being made to Trieste, Venice, &c., the greater proportion has been in these descriptions. Small lots of new Broach are now coming into the market, and some of the M'Carthy-ginned Jumbooseer is excellent in quality. The colour is very bright, very little leaf is apparent, and the staple is both strong and lengthy. Clearances by steamer will, we expect, be very heavy this month. From Tinnevelly we have a telegram, dated 9th instant, quoting 116 rs per candy.

EXPORT of COTTON from BOMBAY to Feb. 10.

	1871.	1870.
London bales	950	50
Liverpool	58,031	41,222
Total, Great Britain	58,981	41,272
Channel for orders	...	...
Continent	12,227	8,823
China	4,043	3,874
Grand total	75,251	53,969

Actual exports since last mail left, 1,595 bales.

Messrs E. B. Liddell and Co., of Alexandria, have forwarded the following report, dated February 24:—A further concession by holders of about ¼d per lb upon fair and good fair descriptions of cotton has led to an active business during the week. Qualities above good fair (especially "Gallin" sorts), owing to their scarcity, have experienced little, if any alteration from previous values. To-day's quotations are—Fair, 7¾d to 7¾d per lb, f.o.b.; fully fair, 7¾d to 8d, ditto; good fair, 8¼d, ditto; fully good fair, 8⅜d to 8⅝d, ditto; "Gallin," 10d to 12d ditto. Freight about ¼d per lb for steam-pressed bales.

EXPORTS.

	Gt. Britain. bales.	Continent. bales.	Total. bales.
From Feb. 17 to Feb. 23, 1871	9,820	2,186	12,006
From Nov. 1, 1870, to Feb. 16, 1871	115,136	25,136	140,272
From Nov. 1, 1870, to Feb. 23, 1871	124,956	27,322	152,278
Same period 1869–70	97,979	30,473	128,452
— 1868–69	104,538	32,751	137,289
— 1867–68	99,730	31,682	131,412
— 1866–67	115,015	25,429	140,444
— 1865–66	74,982	19,379	94,361
— 1864–65	139,481	26,012	165,393

There has been more animation in the colonial produce markets this week. Sugar has improved in value, and closes firmly at the advance. Refined goods are also steady. Coffee has come forwards slowly, and the trade has ruled dull. There is no change to report in tea. Telegrams from Hong Kong to Feb. 22 state the total export (China and Japan) to that date, at 127,000,000 lbs. Rice has sold quietly on former terms.

The annexed is dated Akyab, February 2:—Supplies of Laroong rice have remained very small throughout the past fortnight, but the demand for this description being but light, prices have ruled steady at our last quotation of 42 rs for shipping quality, equal to 4s 9d per cwt free on board. The season for Laroong rice is nearly over now, although but

small quantities have reached our market. The cultivation of this kind has become very limited. Of Nakrenzie hardly any market grain has been brought in as yet, and the supplies consist still almost entirely of paddy formerly contracted for; but even these have remained unusually small, and some buyers that were in want of rice have again recurred to the bad system of sending boats into the district to fetch paddy down. This has had the effect of making the natives still more reluctant to sell at prices now being offered, which circumstance, together with pretty numerous arrivals of vessels, has caused rather an uneasy feeling on our market, and should the natives hold out for some time; it is to be feared that the demand for the tonnage in port (17,000 tons burthen, against 4,000 tons in 1870, and 18,000 tons in 1869) will become pressing, and force buyers to offer higher rates. For the few boatloads that arrive the same prices as quoted in our last, viz., 47 rs to 49s for shipping quality are still being paid, but these rates must be considered quite nominal, as there is almost nothing offering in the open market.

Annexed is Messrs Hunt and King's silk circular:—There is little to report this month in the state of the silk market. Considerable business has been done in nearly every description of silk, and most parcels to be had upon reasonable terms have been readily taken to a great extent in anticipation of the continental demand expected upon the regularity of transit being re-established. Prices have been very firm, but any slight advanee has been resisted, and a few of the most current sorts only are 2½ to 5 per cent. higher. The deliveries continue satisfactory. China and Canton silk have been fairly in request, but business in the latter class has been checked by the higher rates. Japan silk, withthe exception of medium to common mybash has had a better inquiry than for some time past. The telegrams from Shanghai to the 16th February report settlements upon a slightly increased scale, but nearly all taken out of the stock, which was reduced to about 1,500 bales. Prices in the proportion of 30s for No. 3 Tsatlee. In Japan extreme rates were paid for desirable sorts. Very moderate business, and stock 2,500 bales. In Bengal silk prices are again rather firmer with a fair demand. In European silk there is no change, prices appear to be steadily advancing.

Messrs A. C. Stewart and Co., of Port Elizabeth, writing on January 31, thus refer to the position of the Cape wool trade:—There is a decided improvement in the tone of our wool market, and prices are firmer than when we last reported. There are large orders for continental account, and all suitable wools are taken freely at our quotations. The early season is nearly over, and stocks are being considerably reduced. The wools most inquired for are good average fleece-washed and good country scoured. The demand for superior grease wool still continues; but this description of wool is now scarce. The prices current this day are as follows:—Grease, full grown, superior, 5¾d to 6¼d; fine light, for scouring, 4¾d to 5d; heavy and inferior, 3¾d to 4¼d. Fleece-washed—Superior, clean, 8¾d to 9¼d; good average, 8d to 8½d; inferior and seedy, 7¼d to 7½d. Snow-white—Prime Uitenhage scoured, 14¾d to 15¼d; second quality ditto, and country scoured, 12½d to 13½d; inferior country scoured, 10d to 11d.

Annexed is Messrs William Moran and Co.'s indigo report, dated Calcutta, February 7:—There has been but one small public sale since our last report was printed, and the season will be brought to a close probably in the course of this week. About 91,000 maunds have been disposed of, but in that quantity are included some of the old stock held over from the previous year. We have now ascertained the exact weight of the indigo made by Europeans, and if we allow for native the same proportions as they made last year, the crop would appear to be about 93,000 maunds, but as there has undoubtedly been much less made in the Doab, we may safely say the crop of 1869-70 will not have exceeded 90,000 maunds. This, however, cannot be ascertained until later in the year, when a few lots still to come forward will have arrived. The distribution of the crop will be about as follows:—To Great Britain (say), 10,500 chests; to France, 1,400 chests; to Germany, Holland, and Belgium, 4,500 chests; to Italy and Switzerland, 350 chests; to Russia, 3,100 chests; to America, 2,150 chests; to the Persian Gulf, 1,500 chests—total, 23,500 chests. Exports of indigo from 1st November, 1870, to 3rd February, 1871:—To Great Britain, 15,340 chests; to France, 216 chests; to Trieste, 2,758 chests; to foreign Europe, 244 chests; to America, 1,744 chests; to Gulphs and Levante, 1,532 chests—total, 21,834 chests.

We extract the following from Messrs Page and Welch's leather circular:—The demand for leather has continued active throughout the past month, and a satisfactory business has been done, generally at the late advance in price, but without in any case any further rise of importance. Supplies have been of moderate extent, and stocks remain limited. The peace that has at length been arranged between Germany and France has not as yet had much perceptible effect in checking the export demand, and there seems no reason to doubt that, with a revival of general trade at home. and a continuance of requirements for other countries, there will be a fair leather trade for some time to come. There has been some movement in the hide market in the values of South American, Australian, and Cape hides, which show an advance of fully ¼d per lb. East India kips have sold freely, with scarcely any alteration. Market hides have participated in the upward movement to a slight extent.

Messrs Churchill and Sim have published the following statistics:—

Stock of Timber, Deals, &c., at the Public Docks on 1st March.

	1871.	1870.	1869.
Foreign—			
Deals.....pieces	1,528,000	1,256,000	1,667,000
Battens	929,000	631,000	825,000
Boards.....	1,317,000	1,059,000	1,745,000
Fir timber.....loads	27,900	20,000	32,600
Colonial—			
Pine deals and battens.pieces	1,189,000	1,073,000	598,000
Spruce ditto	513,000	724,000	1,162,000
Pine timber .....loads	1,400	3,200	4,700
East Indian teake	8,500	10,300	5,900

The annexed is dated New York, February 24:—There is a slight increase in the volume of trade, both as regards the distribution of goods to the interior and the exports of some kinds of agricultural products, the accelerated movement of the latter involving an improvement in ocean freights. The heavy accumulation of cotton at the supply ports, and prospective increase of demand in Europe consequent upon the virtual close of the Franco-Prussian war, is at the bottom of the stronger tone of the European branch of the freight market. The imports of foreign merchandise continue on a liberal scale, but fortunately the balance of trade against us is kept within bounds, by the large exports from all the ports, and an increasing foreign demand for American securities consequent upon the glut of money at London and other European countries. The result is a steady ruling of gold and foreign exchange. There is no change from the extreme ease which has lately prevailed in the money market. The supply of currency is far in excess of the demand that rates favour the borrower. Thus on call the rates are down to 3 to 4 per cent., and in exceptional cases even 2 per cent. has been accepted. The discount rates for prime, short-dated paper are 6 to 7 per cent.

THE COTTON TRADE.

LIVERPOOL.—March 9.

The cotton market has further given way under the pressure of heavy supplies and continued large receipts in the American ports, and on Monday and Tuesday prices were very irregular, at a considerable decline; since then there has been more firmness, with an extended demand, but quotations of almost every description are reduced for the week about ¼d per lb. The demand for Sea Island is still limited, but prices show no change. In American a fall of fully ⅜d per lb was submitted to in the early part of the week, but on Wednesday holders showed more steadiness, and to-day prices have rallied in some degree, but are still about ¼d below the rates of Thursday last. New York advices to the 9th instant quote middling Upland, 14⅞ cents, costing to sell in Liverpool, 7⅝d per lb, by steamer. Brazil is still neglected, at a decline of ⅛d to ¼d per lb. In Egyptian the business has been moderate, and prices generally are ⅛d to ¼d per lb lower. For East Indian the demand has been limited, and as holders continue to press their cotton for sale prices have further given way ¼d per lb.

In cotton to arrive the transactions have been extensive, at declining prices, but with more steadiness at the close. The latest quotations are—American, basis of middling, from Savannah, at sea, not below good ordinary, 7⅛d; Mobile, February shipment, 7¼d; New Orleans, March-April shipment, not below good ordinary, 7¼d; May delivery, not below good ordinary, 7¼d; any port, April-May delivery, not below good ordinary, 7 1/16d; Dhollerah, fair new merchants, *via* Cape, May shipment, 5¾d; Oomrawuttee, fair new merchants, Cape, March-April shipment, 5¾d per lb.

The sales of the week, including forwarded, amount to 72,330 bales, of which 4,890 are on speculation, and 18,410 declared for export, leaving 49,030 bales to the trade.

March 10.—The market opens quietly, and the sales will probably amount to about 10,000 bales.

Imports, Exports, Consumption, &c.

The above figures show:—

	bales.
An increase of import compared with the same date last year of	574,300
An increase of quantity taken for consumption of	66,890
An increase of actual exports of	51,470
An increase of stock of	496,990

In speculation there is a decrease of 57,640 bales. The imports this week have amounted to 132,237 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to March 4) is 350,000 bales against 310,000 bales last year. The actual exports have been 25,412 bales.

NEW YORK.—Feb. 24.

Aside from a little more activity, the cotton market shows no particularly new features, exporters buying to a fair extent on positive orders, the spinning demand footing up to about the ordinary average, and buyers generally getting all the goods they want. Advices from Liverpool to-day report the position steady, and as the receipts at the ports are really comparatively small, and look like a probable falling off for the future, sellers have managed to sustain former rates. The only actual steadiness, however, is on the upper qualities, the common and ordinary grades still proving quite plenty, and offered with a very fair show of freedom at ruling prices, and frequently the holders will shade a trifle rather than allow an opportunity for closing a sale pass by. We quote as follows:—

	Upland and Florida.		Mobile.		New Orleans.		Texas.	
	c	c	c	c	c	c	c	c
Ordinary ..... per lb	12¼ @	...	12¼ @	...	13 @	...	13¼ @	...
Good ordinary	13¼	...	14	...	14¼	...	14¼	...
Low middling	14¼	...	14¾	...	15	...	15¼	...
Middling	15¼	...	15¾	...	15¾	...	16¼	...
Good middling	16¼	...	16¼	...	16¾	...	17	...

For future delivery the demand has been fair, and the market pretty firm, with some advance obtained on a few contracts, the smaller receipts at the ports helping matters somewhat, and the announcement of peace in Europe again reviving hopes of a better condition of affairs abroad. Sales as follows, on basis of middling, unless otherwise noted:—Last evening—March, 500 at 14 $\frac{9}{16}$c; April, 14 $\frac{11}{16}$c; May, 100 at 14$\frac{3}{4}$c; June, 200 at 15c. To-day—Feb., 400 at 14 $\frac{7}{8}$c; March, 2,700 at 14$\frac{1}{4}$c, 100 at 14 $\frac{9}{16}$c; April, 500 at 14$\frac{5}{8}$c, 600 at 14 $\frac{11}{16}$c, 600 at 14$\frac{3}{4}$c; May, 300 at 14$\frac{3}{4}$c, 100 at 14 $\frac{13}{16}$c; June, 700 at 15c; July, 600 at 15$\frac{1}{4}$c. The average quotations of yesterday's forward deliveries were:—Feb., 14.41c; March, 14.53c; April, 14.63c; May, 14.78c; June, 14.99c. Total receipts since Sept. 1, 1870-71, 708,994 bales; total receipts for the same time of 8869-70, 480,214 bales. The following shows the receipts, exports, and stocks at the principal cotton ports since the commencement of the cotton year:—Receipts at cotton ports since Sept. 1, 1870:—New Orleans, 933,359 bales; Mobile, 411,781; Charleston, 275,892; Savannah, 589,980; Memphis, 162,587; Galveston, 160,323; Wilmington, 68,368; Norfolk, 239,405; other ports, 23,579—total, 2,865,294 bales. Foreign exports at Southern ports and New York:—New Orleans, 605,835 bales; Mobile, 169,405; Charleston, 118,671; Savannah, 298,334; Galveston, 75,466; New York, 384,507; other ports, 23,608—total, 1,676,226 bales. Stocks at principal ports:—New Orleans, 294,648 bales; Mobile, 78,847; Charleston, 32,429; Savannah, 94,682; Galveston, 58,353; Norfolk, 5,446; New York, 98,000; Boston, 7,000—total, 669,405 bales.

NEW YORK, March 3.—According to Messrs Moffat, Davidis, and Co.'s report, the week's receipts of cotton at all United States' ports have been 127,000 bales, and since the 1st of September, 2,920,000 bales. Shipments to England, 99,000 bales; to France, none; and to the continent, 43,000 bales. Total since the 1st of September, 1,850,000 bales; stock at all ports, 560,000 bales. Middling Upland, 6$\frac{7}{8}$d, cost and freight, per steamer.

NEW YORK, March 7.—The receipts of cotton at all United States' ports during the last four days have been 82,000 bales. Shipments to England, 88,000 bales; to France, 3,000 bales; and to the continent, 19,000 bales. Middling Upland, 6$\frac{7}{8}$d, cost and freight, per steamer. Market depressed and very irregular.

NEW YORK, March 8.—To-day's receipts of cotton at all United States' ports have been 14,000 bales.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, March 9.—The past week has been one singularly devoid of interest; the business transacted has been insignificant, and almost entirely confined to orders from stock or quick delivery. No contracts for distant delivery have been recorded during the week. Prices are well maintained looking to the limited business, but the tendency is still in buyers' favour; and if producers would make concessions equal to the fall in cotton a large business would result, but they show great tenacity in adhering to quotations, and their deep engagements make them rather indifferent about selling. The daily transactions are sufficient to keep the market free of stocks, and this adds to the firmness of prices.

Messrs Alexander Collie and Co. received the following telegram from Manchester yesterday:—A steadier tone prevails in the market, owing to some extensive contracts having been entered into during the past two days, but there is not much doing to-day.

BRADFORD.—A fair amount of wool continues to change hands for immediate consumption, although some state that there is a quieter tone and less inquiry. In the yarn market there is still considerable inquiry in single 30's of both super and medium spinnings, and a large amount of business could be done if spinners could be induced to accept rather lower prices. There is little variation in the piece market. Home merchants are doing only a retail business. Prices are firm.

LEEDS.—The markets have not been very numerously attended by buyers, and the transfer of goods can only be spoken of as limited. In the coloured market meltons came in for the largest share of attention, but none of the parcels were of much importance. Victorias and hairlists in the white hall have kept up their position, and the inquiries have been pretty numerous.

BELFAST.—Flax—Supplies slightly in excess of those present last week. Purchasers were in fair attendance, and operated freely. Prices but little changed. Yarns—Business, though considerably restricted by the firmness with which spinners hold to their advanced price-lists, was to a fair extent. Bleached and finished linens—Home trade continues in a healthy condition; for assorted parcels fair orders have come to hand. There has been a still further reduction in stocks. Prices rule very steady, with a slightly upward tendency.

DUNDEE.—There has been increased firmness in the flax market, in consequence of the fresh advance in prices abroad; holders of goods on the spot not only demand full prices, but in some cases refuse to sell unless at a slight advance on previous rates. There has been rather more inquiry on the part of consumers, and some considerable transactions have taken place. Tows remain without change; the stocks of medium quality are now very light, and held firmly for full prices. The market for jute continues very firm. There has been considerable inquiry from France for some descriptions of flax yarns. The demand for some descriptions of linens and jute goods continues very active, and manufacturers generally have their hands full of employment for some time to come.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, FEB. 24.

There has been an improved demand for State and Western brands, and sales were made with greater ease than yesterday. Last evening after 'Change and this morning 9,000 bushels were taken for export at $6.60 to $6.85 for State extra, $7 in store and delivered for fancy State, $6.50 to $6.75 for Western shipping. There was an improved tone in the market for winter wheat flour. In sour No. 2, and superfines St Louis, Southern and Western Spring there was only a moderate business, but with a firmer tone. The general market closed quiet, steady. The sales include 450 barrels superfine at $6.10 to $6.15, 150 barrels No. 2 at $4.85 to $5.35, 350 barrels superfine rye at $5.80 to $6.25, 600 barrels rejected extra at $6.50, 3,500 barrels extra State, old to new wheat, at $6.65 to $6.85, 4,000 barrels fancy State at $7 in store and delivered, 800 barrels Western shipping at $6.50 for low grade, $6.60 dock, and $6.75 delivered, 4,585 barrels Ohio, Indiana, and Michigan, red, amber, and white wheat within the limit of the quoted extremes, 291 barrels Southern at $7.60, 350 barrels Minnesota spring at $7.25 to $7.60 to $7.85, 240 barrels St Louis and Southern Illinois at $7.90 to $8.50, 800 barrels city shipping at $7.50 to $7.65, 75 barrels Genesee at $9.25. The wheat market was more active and firmer, with sales at $1.48 for old and new No. 1 Milwaukee spring in store, taken together; $1.50 to $1.51 for No. 2 Milwaukee spring in store; 1.52\frac{1}{2}$ for ditto afloat; $1.63 for amber winter in store, including five loads for export and one load for milling; $1.85 for white Genesee; $1.45 for old spring; 1.92\frac{1}{2}$ for white Genesee to arrive; $1.51 to $1.52 for No. 1 Milwaukee in store. Closing firm at the advance. Corn is in fair demand and 1c better, with sales at 83c to 84$\frac{1}{2}$c to 85c for medium low to high mixed; 85c to 86c for yellow Jersey and Western, including two loads for export at 86c; 80$\frac{1}{2}$c to 81c for Western mixed on the track; white Southern nominal at 90c. The market closed steady at the advance.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Although the transactions in wheat during the past week have not been extensive, considerable firmness has prevailed in regard to prices. Stocks in the hands of millers have recently been much depleted, and holders of wheat and flour have been very firm in consequence. The arrivals of grain-laden vessels off the coast have been somewhat numerous, but prices have not suffered, owing to the continuance of the export demand. Last week about 200,000 cwts of wheat and flour were exported, against about 5,000 in the corresponding week last year, and several cargoes afloat have been diverted to France. The general impression being that the movement will continue for some time, the quotations for wheat are buoyant. The actual improvement on the week, however, does not exceed 1s per quarter for English, though an advance of 1s to 2s may be quoted on useful qualities of American. Supplies of English wheat have been short, and the condition of the samples has been generally inferior; but there has been a good show of foreign wheat

on the stands. We give below the total imports and exports of cereal produce from the commencement of the season (August 28 to March 4, last year's figures being added for the sake of comparison :—

	Imports. 1870-71. Cwt.		Exports. 1870-71. Cwt.		Imports. 1869-70. Cwt.		Exports. 1869-70. Cwt.

Barley	4,148,214	.....	34,625	.....	4,281,179	.....	11,865
Oats	4,102,287	.....	67,951	.....	5,570,612	.....	48,964
Peas	407,438	.....	35,488	.....	734,130	.....	8,700
Beans	858,047	.....	6,916	.....	986,171	.....	1,170
Indian corn	8,312,681	.....	54,723	.....	11,098,725	.....	12,457
Flour	2,367,325	.....	1,264,466	.....	3,502,196	.....	10,150

The estimated number of grain-laden vessels on passage to the United Kingdom is 312, against 380 last week.

Spring corn has ruled steady in value, though the transactions to-day were much restricted. Maize and oats have changed hands quietly, at the late advance. Barley is unaltered in price, and there has been less inquiry for beans and peas, the time for setting having now expired.

Mr George Dornbusch thus reports the state of the floating grain and seed trade:—During the last seven night 172 grain and seed-laden vessels have arrived at ports-of-call, viz., 60 wheat, 13 maize, 16 barley, 6 rye, 2 beans, 3 linseed, 1 rapeseed, 5 cottonseed, 1 flour, 1 oilcake, 2 ground nuts. The floating grain trade has been very firm in tone, and considerable transactions have been effected at improving prices. Wheat firmly held, and for fine cargoes an advance of 1s has been paid. Maize at first quiet; later the demand improved, and prices rose 3d to 6d. Barley has been in active demand, at 3d to 6d advance. Rye 6d to 1s dearer on the week. The reported sales are as follows :—Wheat—47 arrived cargoes: Berdianski, 52s to 53s; Marianopoli, 53s 6d to 54s; new ditto, 53s and 53s 6d; Ghirka and Taganrog, 48s 6d to 51s; ditto from Odessa, 47s to 53s 6d; ditto from Nicolaieff, 49s to 53s; new Ghirka, 51s to 53s; new Crimea, 53s; new Russoff ditto, 50s 6d; Moldavian, 41s 6d and 53s 6d per 492 lbs; Theodosian, 53s; Varna, 46s 6d; and Polish, 52s 3d per 480 lbs. On passage, 2 cargoes: Ghirka Odessa, 52s; East India Calcutta, 51s per 492 lbs. Wheat and rye—arrived: 2 cargoes wheat from Oran, 50s; and from Kertch, 55s per 492 lbs; rye from Oran, consigned, and from Kertch, 38s per 480 lbs. Maize—13 arrived cargoes: Odessa, 33s 3d to 35s 9d; Russ'l, 34s 3d; Fournian, 34s; Galatz, 35s 6d to 36s per 492 lbs; Danubian, 36s; Ismail and Sulina, 36s per 480 lbs. On passage, 4 cargoes: Odessa, 35s 3d; Galatz, 35s 6d and 36s. Shipping or about to be shipped, 1 cargo Odessa, 35s per 492 lbs. Barley—10 arrived cargoes: Russian, 27s; Russian, 28s to 29s; Baltschick, 27s 6d; Odessa, 29s; Taganrog, 28s 6d to 29s per 400 lbs. Rye—1 arrived cargo Odessa, 38s per 480 lbs. On passage, 1 cargo ditto, 38s 6d. Shipping or shipped, 38s per 480 lbs. Linseed dearer. Russian from St Petersburg, 59s 6d; Azow and Taganrog (3 cargoes), 64s to 64s 6d per 424 lbs; Egyptian (500 quarters), 58s per 416 lbs; Calcutta 2 cargoes, 63s per 410 lbs. To arrive, 50 tons Calcutta, 63s per 410 lbs. Rapeseed quiet, and cheaper. 100 tons mixed, 73s 3d per 416 lbs. Shipped or to be shipped, 3 cargoes: ordinary brown Calcutta, 67s; Guzerat, 74s per 416 lbs; Azow, 63s per 424 lbs. Cottonseed 2s 6d dearer. 4 arrived cargoes Egyptian from Alexandria, 9° per ton paid.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—There has been more inquiry by the refiners, who have chiefly restricted their operations to British West India, and 1,935 casks sold to yesterday (Thursday) at previous rates. A few lots of grainy Barbice by auction obtained 34s 6d to 36s for low to middling yellow, and 428 bags Barbadoes 27s 6d to 32s for soft brown and yellow. Other kinds remain unaltered. A few parcels of low brown qualities have changed hands upon former terms. Good descriptions generally attract more attention. Grocery Porto Rico has sold steadily.. There is little speculative demand, as the arrivals of cane sugar will during the next few months be rather large. No material change can be quoted in the refined market.

Mauritius.—560 bags fine grainy yellow have sold at 30s.

Madras.—1,000 bags Cheeny at 28s. 2,000 bags Jaggery are reported at 18s.

Penang.—1,600 baskets low brown have sold at 19s per cwt.

Foreign.—At auction, 403 casks 50 barrels Porto Rico sold steadily at 31s 6d to 35s for low to good yellow. 160 casks 220 barrels Surinam: brown to middling strong grey at 27s 6d to 32s 6d. Privately business has been done in both descriptions to the extent of 160 casks. 2,000 boxes grainy Havana, ex last week's sale, are reported at 35s 9d. 10,000 bags Ile Ile Manda at 21s 6d. 400 tons clayed, of low quality, at 23s per cwt.

Refined.—The market continues steady at the recent decline, moderate purchases being made by the trade. Dry goods quoted 44s to 46s, and very low rather less. No change in pieces.

MOLASSES.—Transactions have been upon a very limited scale this week.

RUM.—Sales of Jamaica are reported at 3s 8d to 3s 9d per gallon. The market is steady, with a fair inquiry for common kinds. Demerara in puncheons, 1s 11½d to 2s 1d. Business has been done in Mauritius at 1s 5d per proof gallon. The home deliveries are larger than at the corresponding date of last year, but the total stock shows an increase of 2,000 puncheons 3,220 hogsheads.

COCOA.—The market is freely supplied. At the public sales 3,967 bags Guayaquil were taken in at 52s. Since the sale 51s accepted for a portion good quality. 106 bags Surinam were chiefly bought in. 1,190 bags Trinidad partly found buyers: grey and mixed to good, 57s to 79s; very good to fine, 80s to 122s per cwt. Common qualities were dull, but good to fine met steady buyers. Recent arrivals of Guayaquil have caused a material increase in the stock. The export deliveries keep large, and for home consumption steady.

TEA.—There have been farther arrivals, but the market has not maintained the partial improvement last referred to. Low and ordinary grades of congou have become dull. At the public sales 3,352 packages have been offered, and the greater part sold "without reserve." Green teas went at about last week's rates, including the better grades of gunpowder at 2s 6d to 3s 0½d. 1,711 half-chests Oolong, of indirect shipment, and with all faults, sold heavily at 1s 0½d to 1s 5¼d. Several breaks of common to good common black leaf congou realised 9¾d to 11¼d, prices being in favour of buyers.

COFFEE.—A small supply has been brought forward and the market is very quiet, the buyers suspending their operations for the present; but when trade on the Continent is more settled a revival of demand may be expected. Arrivals from Colombo are now due. The only public sale of Ceylon to yesterday was 50 casks 12 bags, this small quantity being taken in. There has been a disposition shown to buy native to arrive at lower rates, viz., about 50s. No sales reported on the spot. 181 packages Mocha were principally bought in. A few lots of good small berry sold at 104s. Other kinds are dull. 923 bags Rio, part sold at 51s 6d to 55s per cwt for ordinary to good. 752 bags Sangapore partly sold: good Bontyne at 58s per cwt. The Netherlands Trading Company have not as yet declared their sale for the present month. A steady delivery last week reduced the stock here to 12,700 tons, being only 1,200 tons more than in the corresponding one of 1870. Many vessels will soon arrive from Colombo as well as from other producing countries.

RICE.—Transactions have been limited by private contract: yesterday rather more inquiry prevailed. At auction 2,345 bags Bengal part sold. Broken white, 9s 6d to 9s 9d; fine withdrawn at 13s 6d to 14s; 6,382 bags Rangoon obtained 8s to 9s 9d for sea damaged, the sound being withdrawn at 9s 6d to 10s. 600 tons sold to arrive, cargo and low Bengal at 10s; Arakoolie 10s 6d, ex quay terms. A parcel of

Ballam on the spot obtained 10s 9d, and some Necrancie Arracan 10s 6d per cwt.

IMPORTS and DELIVERIES of RICE to March 4, with STOCKS on hand.

Deliveries	19230	9450	10770	9960
Stock	51460	46350	36920	17900

SAGO.—A limited inquiry prevails. 636 bags by auction yesterday, chiefly sold, consisting of damaged. A parcel of fine small realised 18s 6d to 19s per cwt.

SAGO FLOUR.—580 bags Singapore were taken in at 15s 6d; 1,088 bags Borneo at 16s 6d; privately a parcel of the former sold at 15s 1½d per cwt.

TAPIOCA.—507 bags by auction were chiefly bought in at 2d to 2½d. A portion sold at 2¼d to 2½d; for good Singapore, rather small; 1,124 bags Tapioca flour bought in at 2d to 2½d per lb; 380 bags pearl tapioca part sold at 18s per cwt for medium grain.

SPICES.—The markets have been quiet. Black pepper shows a further decline, and is still unsettled. Privately, sales have been made in Penang at 5⅜d to 5⅝d; Singapore, 5¾d. 2,259 bags by auction were bought in above the value. The chief feature of the week has been the sale of 7,000 bags Singapore to arrive, at 5⅝d to 5¾d. White is quiet. 70 bags Singapore, of old import, were taken in at 8d. 39 bags common Penang sold at 7¾d. The sales privately are limited. 4 cases brown Penang nutmegs were taken in, 68 to the pound, 3s 6d. 10 cases low and shrivelled limed Singapore sold at 11d to 1s 1d. 123 bales Zanzibar cloves were bought in. Pimento has been quiet. 2,730 bags by auction partly sold at slightly easier rates, from 1¾d to 2d per lb.

SALTPETRE.—Prices have declined 1s, and for the lower qualities even more. 2,954 bags Bengal were taken in, but since partly sold, refraction 16½, 25s 6d; 8¼, 27s 6d; 6½, 27s 6d; 6 to 5¼, 28s to 28s 3d. 100 tons reported to arrive at 26s 6d, usual terms, and 24s per cwt without allowance, unless 20 per cent. refraction.

IMPORTS and DELIVERIES of SALTPETRE to March 4, with STOCKS on hand.

COCHINEAL.—At the public sales on Wednesday 1,694 bags Teneriffe were rather more than half disposed of, there being diminished competition. Teneriffe silvers sold from 2s 4d to 2s 6d, being rather cheaper. Blacks, 2s 4d to 3s 4d; fine as high as 4s 1d, and prices for these occasionally showed weakness. 74 bags Honduras chiefly bought in. 34 bags Mexican: silver, 2s 4d; black, 2s 6d per lb.

OTHER DRYSALTERY GOODS.—There is not any change to report in these markets, which are steady. 812 baskets cubes gambier were bought in at 21s 6d. Block is in better demand, with sales at 15s 6d to 15s 9d. 369 boxes cutch sold at 20s 6d to 21s 6d for middling to good quality, and there is more business doing privately. Safflower without alteration in price, and the market firm.

SHELLAC.—837 chests by auction only partly sold, including fine Garnet at 5*l* 15s. Fine orange 7*l*; button sorts were bought in, excepting a small lot fine, which sold at 135*l* to 137s 6d per cwt.

CAMPHOR.—A few sales of China have been made at 72s 6d per cwt.

METALS.—A want of activity is generally prevalent in these markets. Some few sales of foreign tin have been made at very low prices, but yesterday the tone of business was more steady. Straits, 128*l* to 129*l*; to arrive, 127*l* to 128*l* accepted. English has sold upon lower terms. Copper has not maintained the advance last referred to, and the market is now rather dull. Chili, &c., 64*l* 10s to 65*l*; Burra and Walaroo, 74*l* to 75*l*. Spelter, although quiet, is firm: Silesian, 18*l* to 18*l* 5s. The iron market has not experienced any improvement. Scotch pig is steady at 53s cash. Rather more inquiry prevails for lead. Spanish soft has sold at 17*l* 15s per ton.

HEMP.—There is very little business doing in these markets. Manila dull. Petersburg clean by auction sold at 33*l* to 33*l* 10s per ton.

JUTE.—The market has been steady, but the transactions on the spot limited in extent. Trade in Dundee continues good, and jute yarns support the late advanced rates. At the public sales held here only 2,478 bales were brought forward, and about half sold at steady rates, from 21*l* 15s to 25*l* 5s per ton. During the week a few parcels have sold to arrive.

LINSEED.—The market is rather higher, and a steady business has been done. Black Sea cargoes, 64s to 64s 6d; spring shipment, 63s; Calcutta afloat, 63s to 63s 6d; ditto on the spot, 62s 6d to 63s 3d per quarter.

OILS.—The demand for olive has been upon a limited scale. Sperm has sold at 84*l*. Other fish oils dull. Pale seal, 37*l* 10s; cod, 35*l* 10s per tun. A fair inquiry for palm. Good Lagos, 38*l* to 38*l* 10s. The price of cocoa-nut remains nominally unaltered: Ceylon, 40*l* 5s to 41*l*; Cochin, 45*l* to 46*l*. The export demand is restricted. Linseed oil has further advanced. On the spot, 33*l* to 33*l* 5s; next month, 33*l* 5s to 33*l* 10s; April to June, 33*l* 10s to 34*l*. Brown rape has advanced to 45*l* for English on the spot, and to the end of the year. Refined quoted 47*l* to 47*l* 10s. Foreign, 49*l* per ton.

PETROLEUM.—American refined, 1s 4¾d to 1s 5d, and the demand limited; forward, 1s 6d to 1s 6½d per gallon.

TURPENTINE.—American spirits, 36s 6d to 37s per cwt.

TALLOW.—The firmer tone which prevailed last week has been followed by a return of inactivity, and lower prices for Russian in all positions, viz.,—44s to 44s 3d on the spot and March, 44s 9d for June, and 45s 9d per cwt October and December. There will be only 1,200 casks offered by auction to-day, the bulk, as usual, consisting of Australian.

PARTICULARS OF TALLOW—Monday, March 6, 1871.

HIDES.—At the public sales of East India held yesterday 183,117 hides, &c., rather more than one-third part sold. The better qualities went at about previous rates. Common at some reduction.

POSTSCRIPT. FRIDAY NIGHT.

SUGAR.—The market is steady. Sales of West Indian 65 casks, making 2,592 casks for the week. 3,424 bags Mauritius by auction were chiefly bought in. Some crystallised sold at 37s to 38s. 928 bags soft brown Madras were bought in at 22s. 1,100 bags Natal, part sold at 27s to 33s for brown sorts. 146 casks crystallised Demerara were partly disposed of at 36s to 37s for fine grey and yellow. 100 bags at 37s 6d. Privately, 2,000 bags Madrid Jaggery sold at 18s. A floating cargo of Bahia has sold at 24s 10½d for the Clyde.

COFFEE.—The market is flat. 199 casks 168 barrels and bags plantation Ceylon by auction to-day, part sold, at rather lower prices, excepting for bright colory qualities. 223 bags Singapore were bought in at 57s for Boutyne. 1,500 bags native have sold afloat, no price given.

SALTPETRE.—A small parcel Bengal, refraction 4¼, sold at 28s 3d.

GAMBIER.—Business was done at 15s 4½d to 15s 6d ex ship.

TIN.—Straits further declined to 126*l* 10s to 127*l*, and business done to arrive at 126*l*.

OIL.—50 tuns colonial sperm by auction part sold at 83*l* to 84*l* per tun. 554 casks Sydney cocoa nut were chiefly sold at 33*l* to 38*l*. 81 casks Ceylon part sold at 40s 3d per cwt. Most of the palm was withdrawn.

TALLOW.—1,250 casks by auction to-day went at steady prices. About half sold, chiefly Australian. Beef, 37s 6d to 41s 6d; mutton, 42s to 43s 6d. South American bought in. A few lots Cape sold at 42s 6d to 43s. Town unaltered.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market continues firmly supported there being a fair business doing. Dutch crushed remains steady, without change in prices.

GREEN FRUIT.—The report of Messrs Keeling and Hunt states that St Michael, Terceira, and Valencia oranges are well supported. Seville sours scarce, and realised a high figure. Lemons maintain their value. Barcelona nuts advanced in price. Black Spanish and Brazil dull. Cocoa-nuts in demand.

DRY FRUIT.—Currants show an advance on low sorts and the market is extremely firm, and appearances show for an advance. Raisins are very firm, and prices rather advanced.

ENGLISH WOOL.—Prices very firm.

COLONIAL WOOL.—The market remains very firm. Since close of the public sales some good business has been done at very firm rates, chiefly in Cape and Sydney wool.

FLAX.—Market steady.

HEMP.—Market for Russian very dull.

SEEDS.—The seed trade is quiet, but prices are firmly maintained.

TOBACCO.—There is but little to report in the market for North American tobacco, the sales effected being only for small lots for the immediate necessities of buyers. In some other growths there have been very large operations, and prices for all descriptions are well maintained.

METALS.—We have had a very quiet week, copper ruling slow of sale, and a shade weaker in prices. Iron remains steady, but inactive. Tin is about 20s a ton lower all round. Lead and spelter have been in fair request at rather improving rates. Tin plates are well maintained

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	45	0
Fat by ditto	2	1
Yellow Russian ditto	45	9
Melted stuff	33	6
Rough stuff	17	0
Greaves	19	0
Good dregs	6	0

Imports for the week, 1,265 casks.

PROVISIONS.

Bacon market flat, at last quotations. Fine butter fetches a full price, but inferior qualities are offered at a reduction without buyers. Some fine parcels of American cheese have been sold at 78s. Lard dull, at 78s, f.o.b.

METROPOLITAN CATTLE MARKET.

MONDAY, March 6.—The total imports of foreign stock into London last week amounted to 6,201 head. In the corresponding week in 1870, we received 7,730; in 1869, 13,972; in 1868, 1,971; and in 1867, 11,725 head.

The cattle trade was moderately active to-day, though the increased supplies of beasts on sale had the effect of lowering values. In the sheep market a fair amount of animation prevailed. There was a good show of English beasts and a full proportion of foreign. The quality and condition of the animals were good, the market being above the average as to character and actual weight of meat. The attendance of butchers was good, but sales could only be affected at a decline of fully 2d per 8 lbs, the extreme top price for choice Scotch heifers being 5s 6d per 8 lbs. Large coarse beasts were neglected. The number of sheep in the pens was limited, but their condition was good. Sales progressed steadily at the full rates current on Monday last—namely, 6s to 6s 2d per 8 lbs for sheep in the wool, and 5s 4d for shorn. Lambs changed hands steadily at about 8s per stone. Calves ruled dull and drooping in value. Pigs were unaltered in price.

SUPPLIES ON SALE.

	March 7, 1870.	March 6, 1871.
Beasts	2,751	3,150
Sheep	21,110	15,650

Prime small ditto	4	10	5	0	Large pork	3	4	4	4
Veal	5	0	5	4	Small pork	4	8	5	0

Lamb. 7s to 8s.

HOP MARKET.

BOROUGH, Friday, March 10.—Fine hops continue in request, owing to their scarcity, and extreme prices are realised. Medium and inferior qualities are purchased only to a limited extent, at about previous currencies:—Mid and East Kent, 40s to 140s; Weald of Kent, 40s to 75s; Sussex, 35s to 70s; Farnham and country, 75s to 112s; olds, 20s to 50s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, March 10.—Fair supplies of potatoes have been on sale. The trade has been quiet at previous prices:—English Shaws, 80s to 110s; ditto Regents, 60s to 90s; Scotch Regents, 65s to 90s; and Rocks, 60s to 75 per ton.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, March 10.—There is a steady but limited business doing, at prices tending upwards; our local market, however, continues but indifferently supplied, otherwise there would be greater activity.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, March 10.—There was but a meagre attendance of millers, and the transactions in wheat were only limited. American spring was bought at a shade under Tuesday's rates; but generally speaking the prices of that day can be repeated. Flour was neglected, and value quite nominal. Beans, peas, and barley maintain previous rates. Oats and oatmeal steady. Indian corn was firmly held, but there was little doing.

WAKEFIELD, Friday, March 10.—At this market to-day wheat is firmly held for the full prices of Friday last, but trade is not active. There is an evident disposition on the part of buyers not to let the present lull pass without taking advantage of it, and they freely bid Tuesday's rates, which are refused by holders. There is a short supply of barley, and fine parcels are rather dearer. In beans and oats there is no material alteration.

The Gazette.

TUESDAY, March 7.

BANKRUPTS.

John Bartlett, Stamford road, Kingsland.

Charles Castleman, Westbourne park villas, Bayswater, and Kingston, Surrey, timber dealer.

Frederick Chadwick, Sellwood terrace, Fulham road, surveyor.

James Petrie Donald, Strand, clothier.

J. Sapsford, Chatham road, Surrey, coachmaker.

George Wood, Vorley villas, Upper Holloway, late brick merchant.

William Robert Bett, Quadring, Lincolnshire, grocer.

Benjamin Bentley, Holcombe Brook, Lancashire, cotton spinner.

Thomas Dunn, Devonport, cab proprietor.

Edmund Lindley Grundy, Manchester, accountant.

Sir John Jones, K.C.B., Dover.

Thomas Lushman and George Douglas Lenge, Stockton-on-Tees, iron-founders.

Fairhouse Long, Yeadon, Yorkshire, manufacturer.

John M'Cabe, Worcester, fruit dealer.

Giles Hawes Murrell, Norwich, auctioneer.

Joseph Seal and Joseph Everard, Nuneaton, Warwickshire, brickmakers.

Maria Seymour, Surbiton, Surrey, widow.

ROYAL ALBERT HALL,
KENSINGTON GORE.

Reserved seats for the opening of the Hall by the Queen may be obtained at the following rates namely:

	£	s	d
Boxes of eight sittings—each box...	25	4	0
Stalls—each	3	3	0
Balcony seats—each	2	2	0
Picture-Gallery Seats—each	1	1	0

After the opening a grand Miscellaneous Concert, conducted by Sir Michael Costa, will be given. Tickets may be obtained at the office of the Royal Albert Hall, Kensington Gore.

The Royal Horticultural Society's Gardens;
The Society of Arts, John street, Adelphi;
Mitchell's Library, 33 Old Bond street;
Messrs Keith, Prowse, and Co., 48 Cheapside;
Mr. V. Hayes, 4 Royal Exchange buildings;
Messrs Chappell, 50 New Bond street;
Handel Festival Ticket Office, Exeter Hall, Strand;
And of Mr Austin, St James's Hall, Piccadilly.

ROYAL ALBERT HALL.
OPENING CEREMONY, 29TH MARCH.

Reserved seats in best positions for the above, for all Theatres, Concerts, Fêtes, &c., may be secured of Keith Prowse, and Co., City Agents, 48 Cheapside.

ROYAL ITALIAN OPERA.
SEASON 1871.

City Offices 48 Cheapside.

Subscribers are respectfully requested to make known their wishes, without delay, to the City Agents, Keith Prowse, and Co., who are arranging subscriptions for one or two nights a week, or alternate weeks.

RAILWAYS OF SOUTH OF AUSTRIA AND UPPER ITALY.

The two Boards of Directors of Vienna and Turin having fixed at the sum of 7/ 50c (6 shillings) per share the distribution on account of dividend of 1870, shareholders who have not received it are informed that payment will be made from Monday, the 6th March.

At PARIS, by Messrs de Rothschild Frères.

MESSRS GABRIEL'S
extensive improvements in ARTIFICIAL TEETH and PAINLESS DENTISTRY, Patent No. 502, dated Jan., 1871, afford the following advantages:—

1stly. EXTREME LIGHTNESS (being completely self-supporting), combined with great efficiency, durability, and comfort, thus avoiding the covering to the palate hitherto considered an indispensable adjunct to Artificial Teeth.

2ndly. MODERATE CHARGES, accounted for by their extreme simplicity of construction, while the highest class of mechanism and materials only are employed, combined with an experience of half-a-century in their adaptation.

3rdly. ABSOLUTE IMMUNITY FROM PAIN, the entire process of which is performed by the aid of NITROUS OXYDE GAS, after an experience of many thousand cases in hospital and private practice, ensuring this desideratum with an absolute certainty, the inhaling gas being not only absolutely free from danger but positively pleasant.

Lastly, as an imitation of nature (springs being entirely dispensed with) that detection becomes an impossibility.

MESSRS GABRIEL,
64 LUDGATE HILL CITY, and 56 OXFORD ST., CAVENDISH SQ.) London.

MESSRS GABRIEL'S
CELEBRATED PREPARATIONS
FOR PRESERVING AND BEAUTIFYING THE TEETH
Are sold by all Chemists and Perfumers in every town.
Price 1s 6d and 5s.

HOLLOWAY'S PILLS AND OINTMENT.
The friends of the afflicted should not, in their travels, throw away their trusses. For many years the worst of a century have these medicaments been before the public, by which their merits have been universally recognised and continued, to all countries, to the present hour. In obstinate complaints, they will be found to discharge, and when combined have manifested themselves the afflicted can travel to any climate at once, no effect to be apprehended. They keep the blood pure, and preserve the stomach in a good state; they cool and cleanse the whole system. These medicaments should be present in every family, they will confirm good health, and prevent servitude under any calamity which can afflict mankind.

FRENCH GOVERNMENT 6 PER CENT. LOAN, 1870.

The undersigned Agents for the above Loan beg to notify, that on and after the 16th inst., they will be prepared to deliver Bonds in exchange for the fully paid English Scrip.

Three days will be required for examination.

J. S. MORGAN and CO.
22 Old Broad street, London, E.C.,
11th March, 1871.

BANK OF AUSTRALASIA.
Incorporated by Royal Charter, 1835.

No. 4 Threadneedle street, London, March 4, 1871.

The Court of Directors hereby give notice, that a DIVIDEND at the rate of 6 per cent. per annum, and a BONUS, as additional interest, at the rate of 4 per cent. per annum, both free of income tax, being together at the rate of 10 per cent. per annum, or £2 a share for the half-year, will be paid to the proprietors at this office on and after Tuesday, the 4th April next, between the hours of 10 and 3 o'clock.

The Transfer Books will be Closed on and after the 13th March and continue so until the Dividend and Bonus become payable.—By order of the Court,

WILLIAM MILLIKEN, Secretary.

THE MERCHANT BANKING COMPANY OF LONDON (Limited).

Notice is hereby given, that the Eighth Ordinary General Meeting of this Company will be held at the Company's Offices, No. 112 Cannon street, in the City of London, on Thursday, the 23rd day of March instant, at One o'clock in the afternoon precisely, to receive the Accounts to the 31st December last, with a Report of the Directors, to declare a Dividend, to elect Directors in the place of John Mathieson Fraser, Esq., and Felix Pryor, Esq., who retire by rotation (and being eligible offer themselves for re-election), to elect Auditors, and to fix their remuneration, and for general purposes.

And notice is also given, that the Transfer Books of the Company will be closed, preparatory to the Meeting, from the Ninth to the Twenty-third of March, both days inclusive.—By order,

B. W. BALL, Secretary.
Cannon street, London, E.C., 8th March, 1871.

FURNISHED APARTMENTS FOR GENTLEMEN.
—Beautifully situated. Omnibuses pass every 5 minutes. Terms moderate.—Mr Henry Wheeler, 24 Harrington square, N.W.

H. J. NICOLL'S SPRING OVERCOATS,
of Waterproof Tweed Cloths, 20s.; do., with silk lapels, 21s.

H. J. NICOLL'S SPRING OVERCOATS,
of Waterproof Melton Cloths, 42s.

H. J. NICOLL'S SPRING OVERCOATS,
of Waterproof Cheviot Cloths, with silk facings, 52s 6d.

H. J. NICOLL'S SPRING CHEVIOT TROUSERS, 14s.

H. J. NICOLL,
Merchant Clothier to the Queen, the Royal Family, and the Courts of Europe, Army, Navy, and Civil Outfitter, 114 to 120 Regent street, and 22 Cornhill, London; 10 Mosley street, Manchester; 50 Bold street, Liverpool; No. 39 New street, Birmingham.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER
TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d, postage, 1s 8d. Umbilical ditto, 42s and 52s 6d; postage, 1s 10d. Post-office orders to be made payable to John White, Post-office Piccadilly.

NEW PATENT
ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS &c.
They are porous, light in texture and inexpensive and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

TO BANKERS, MERCHANTS, AND OTHERS.
—Messrs JACKSON and GRAHAM have for Sale, and for Letting Furnished and Unfurnished, a variety of first-class FAMILY RESIDENCES of great merit in the Home Counties, offering great facilities for easy daily transit to and from London, particulars of which will be sent on application, and photographic views of many of them can be seen at their Estate Agency Office, 37 and 38 Oxford street, W.

SUFFOLK.—5 MILES FROM Newmarket.—SHOOTING TO LET.
2,000 acres in a ring fence, 300 of which are plantations. Complete furnished Lodge, delightfully situate in the centre of the estate, with servants' apartments, stabling, detached game larder, &c. The Manor commences one mile from the Kennett railway station.—Address Thomas Huskinson, Esq., Bury St Edmunds.

CAPITAL WANTED—£5,000 TO £10,000
—Participation in Profits, with Liability Limited.—A desirable opportunity offers for employment of the above sum in a London City Commercial business, where personal attendance is not essential, and a handsome return can be assured with perfect safety.—Apply, by letter, to A. L., I. Grugeon, 75 Old Broad street, City.

PARTNERSHIP.—A CITY FIRM IN
the Colonial Export trade is desirous to meet with a Gentleman of business habits, and an available capital of at least £2,500, with a view of PARTNERSHIP. Applications considered confidential.—Address M.P., care of Davies and Co., Advertising Agents, Finch lane, Cornhill.

PARTNER WANTED.—WANTED,
in a Foreign Export Business, doing a large and specially safe lucrative business, a WORKING PARTNER, with a capital of about £3,000. None but principals or their solicitors treated with. Address "P. W.," care of Henry Greenwood, Advertising Agent, Liverpool.

A GENTLEMAN, MOST
respectably connected, and of first-class education, who has had 17 years' experience of mercantile business, is desirous of meeting with some suitable employment. He is well qualified for a post of confidence, and would not object to a Secretaryship if the remuneration were adequate.—Address to M. M., care of H. Greenwood, Advertising Agent, Liverpool.

TO WOOLLEN CLOTH MANUFACTURERS AND CAPITALISTS.

FOR DISPOSAL, OR PARTNERSHIP,
a West of England Fine Cloth Business, which has been successfully carried on for many years, and is at present in full operation. The Mills are of modern build, well supplied with water and steam power, filled with the latest machinery, with loom shed, dyehouses, and freehold land attached. Every facility afforded for the transfer of the business or proposals for a Partnership with the present Proprietors might be made.—Apply, by letter only, to Messrs Wood, Streeter, and Hayter, Solicitors, 5 Raymond buildings, Gray's inn, London.

WHEELERS' GRASS SEEDS FOR PERMANENT PASTURE ON THE OLD RED SANDSTONE.
30s per acre, carriage free. 5 per cent. discount for cash.

WHEELERS' GRASS SEEDS FOR PERMANENT PASTURE ON THE LIMESTONE.
30s per acre, carriage free. 5 per cent. discount for cash.

WHEELERS' GRASS SEEDS FOR PERMANENT PASTURE ON CLAY SOIL.
29s to 33s per acre, carriage free. 5 per cent. discount for cash.

WHEELERS' GRASS SEEDS FOR PERMANENT PASTURE ON THE LIAS.
29s to 32s per acre, carriage free. 5 per cent. discount for cash.

WHEELERS' GRASS SEEDS FOR PERMANENT PASTURE ON THE OOLITE.
28s to 30s per acre, carriage free. 5 per cent. discount for cash.

WHEELERS' GRASS SEEDS FOR PERMANENT PASTURE ON THE NEW RED SANDSTONE AND MARLS.
29s to 32s per acre, carriage free. 5 per cent. discount for cash.

WHEELERS' GRASS SEEDS FOR PERMANENT PASTURE ON THE COAL MEASURES.
28s to 32s per acre, carriage free. 5 per cent. discount for cash.

J. C. WHEELER AND SON,
SEED MERCHANTS,
59 MARK LANE, LONDON.
Seedsmen to the Gloucestershire Agricultural Society, Cheltenham.

HUBBUCK'S PATENT WHITE ZINC PAINT
Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with sulphate of Baryte, in proportions varying from ten to thirty per cent. No workman can produce a good work with such material. Those who have obtained the Patent White Zinc Paint from grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—
"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"For, some seasons and in certain districts, chosen there will now be no excuse for using poisonous paints. Parents have remarked that those children returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

ROYAL POLYTECHNIC.—ENTIRE
Change of Entertainments. Professor Pepper on Astronomy, with Grand Orrery, and Select Music, on Thursdays, at 3.15. Capital Ode to the Passions, illustrated in Living Statuary, resembling White Marble, by Masaniello Brothers, daily. Mr Gresmith, jun., New and Humorous Entertainment, entitled Human Oddities. Valentine Vox ventriloquist by Mr Davies, and many other Entertainments. Open daily from 12 to 5 and 7 to 10.

DOMINION OF CANADA OILS

REFINERY COMPANY (Limited)—HOUGHTON AND HOWELL'S PATENTS AND PROCESSES.—Capital, £150,000, in 30,000 shares of £5 each, fully paid. £2 per share to be paid on application, and £3 on allotment. Only 13,000 shares will now be offered to the public at par. The remainder will be issued rateably to the original shareholders should further capital be required, at such premium as the Company may determine. Dividends payable half-yearly. Shareholders can obtain Share Warrants payable to bearer.

SECRETARY—B. Williams, Esq.

IN CANADA.

MANUFACTURING MANAGER—H. F. Howell, Esq.

GENERAL SUPERINTENDENT—Cornelius Stovin, Esq.

OFFICES.

St Clement's house, Clement's lane, London, E.C.

The improvements effected by the Patented Still and Machinery of Messrs Houghton and Howell, of St Catharines, Ontario, in the manufacture of the Crude Oils of the Dominion, are unrivalled. No Canadian Oils manufactured by the common process can compete with them. Their Carbon, Golden Machinery, and dark Lubricating Oils are the best manufactured, and the cheapest in the market.

The residuum, to the extent of 40 per cent., of the Crude Oil, which is wasted by all other makers, is not only utilised by Messrs Houghton and Howell, but the most valuable products are obtained therefrom by their processes. From this waste material a Lubricating Oil is produced which has no equal either in Europe or America, a fixed Oil that is not decomposed or oried up by the heat of engine cylinders, that is not injurious to iron, that will not oxidise, that produces no acid reaction, that remains perfectly limpid at 2 deg. below zero, and that is not explosive or inflammable.

For railways it has no equal for economy and durability.

The great objection to Canadian Oil has been the disgusting odour arising from the sulphur and arsenic contained in the Crude Oil, which other manufacturers have attempted to neutralise by chemical means; but the odour invariably returns, having been only temporarily neutralised or disguised.

In consequence of the offensive odour the Canadian Crude Oil sells at only 2 dollars per barrel, and there is annually a surplus stock unsaleable of about 350,000 barrels. The United States Crude Oil, being much purer, sells at about 8 dollars per barrel, showing a difference in first cost of 6 dollars, or 24s per barrel, in favour of Canadian.

By Messrs Houghton and Howell's Patent Still and Processes, the Canadian Oils are rendered superior to the American in all respects; and their Carbon Oils are manufactured at much less expense than the same description of Oils produced in Canada or the States by the common process of destructive distillation.

By the patented Safety Still of Messrs Houghton and Howell, the arsenic and sulphur are entirely removed from the Carbon Oils, and they manufacture from the Crude Oil Carbon Oils thoroughly deodorised, and rendered equal to the best American White, with a fire test of 120 deg.; they have also lately succeeded in producing a still higher quality of Carbon Oil with a fire test of 175 deg. Fahrenheit, suitable for head lights for locomotives and for signal lights.

They also produce the finest Lubricating Oils, having no smell, which mix well with olive, sperm, lard, and seal oils, improving the qualities of those oils for machine purposes, and consequently largely reducing their cost.

Next to the important object of deodorising the Canadian Oils is the utilising the Crude Oil to the greatest possible extent. The largest amount obtained by other Canadian refiners from the crude is 60 per cent., and their products are, even then, unfit for exportation; while Messrs Houghton and Howell, by their patent still, obtain a yield of from 90 to 95 per cent., each of their Oils at the same time possessing a greater money value than those obtained by other manufacturers by the old mode of distillation.

Messrs Houghton and Howell, requiring additional capital to erect the necessary works and machinery and purchase the surplus stock of Crude Oil, to enable them to meet the rapidly-increasing demand for their Lubricating and other Oils, have agreed to assign to this Company all their plant, patents, processes, and inventions for the manufacture of Canadian and other Oils, for the sum of £50,000, of which amount they have stipulated to retain an interest in the Company, in paid-up shares, to the extent of £38,000, and to continue in the management of the works, receiving in cash the sum of £12,000 only.

As the Company intend to continue the purchase of Crude Oil and Residuum, and not to become interested in Oil Wells or Lands, it will be manifest that this is not in any respect a speculation, but the mere extension of a certain and highly profitable business.

The following statement is furnished by Messrs Houghton and Howell:—

"The surplus Crude Oil of the Dominion, now unsaleable, is estimated at 350,000 barrels per annum, the whole of which can be controlled and manufactured by this Company. The following figures exhibit the ascertained profit upon the manufacture of this quantity, or any proportionate amount thereof.

350,000 barrels of Crude Oil will make

210,000 barrels of Carbon Oil, which at 1s sterling per gal., including barrels, will pay a profit of 16s per barrel, equal to	£168,000	pr.ann.
50,000 barrels of Golden Machine Oil, at 2s sterling per gal., including barrels, will pay a profit of	120,000	—
50,000 barrels of Dark Lubricating Oil or Grease, at 2s sterling per gallon, including barrels, will pay a profit of	132,000	—
Total profit per annum on manufacture of 350,000 barrels of Crude Oil	£420,000	

"The estimates upon which this profit is calculated include the Crude Oil at the present rates, freight, barrels, fuel, labour, salaries, and chemicals;" and it is confidently asserted by Messrs Houghton and Howell that the whole of the capital will be returned in dividends in the second year, and the available capital of the Company doubled for future operations.

In confirmation of the foregoing statement and estimate of profits the following facts are submitted:—

28th Feb., 1870. Offer from Wholesale House at Montreal to take 200 barrels of the Burning Fluid.—"The Burning Fluid you sell at 25 cents per gallon is of better quality than is sold here at 70 or 75 cents."—E. T. Taylor, 21-2.

"The profit upon this small contract alone would be £8,000 per annum."—H. and H. 2-3-70.

29th April, 1870. Offer from Philadelphia oil merchant to contract for 300 barrels of Dark Oils per week.—"At the advance price in that market the profit upon this amount (300 barrels) would be £1,000 sterling weekly."

The Royal Mail Line of Steamers, the Ottawa Steam-boat Company, the Quebec, and the Allan Line of steamers have offered to take the straw-coloured oils for all their vessels; and other orders from railway and steam-boat companies have been declined from the mere inability, at present to manufacture to the extent required.

The future works of the Company are to be erected at Port Sarnia, situated upon the river connecting Lake Huron with Lake St Clair, fourteen miles from the Oil Wells, with railway carriage direct into the works, and having competing lines of railway, as well as navigable water, for six months of the year, thus affording direct communication with all parts of the world. The estimated cost for the land, buildings, and additional machinery is £20,000. The price fixed by the Government for 23 acres of land, with extensive river frontage, is less than £800.

Certificates furnished to Messrs Houghton and Howell, showing the superiority of their Oils over every other used or tested by the respective parties, will be found in the prospectus.

HOUGHTON AND HOWELL'S LUBRICATING OIL TESTED BY THE GREAT WESTERN RAILWAY OF CANADA.

Extract from Test Book, or Record of Tests made of the various kinds of Lubricating Oils showing their relative value for lubricating purposes, by the Great Western Railway of Canada (W. K. Muir, General Superintendent), at their machine shops, in the City of Hamilton, Ontario, Canada, upon a car axle set in the Company's shops, and run by belts from a stationary engine at a speed of 30 miles per hour, with 2½ tons weight upon the single journal, equaling ten tons to the car.

(Signed) CORNELIUS STOVIN.

From the foregoing tests the following results are apparent:—

			£	
That one barrel of Messrs Houghton and Howell's Oil, costing	20 dols	or	4	0
is equal in durability to 13 barrels of John Rispin's No. 1 Machine Oil, at 10 dollars	130	—	26	0
to 6½ barrels of J. H. Fairbank's at 12 dollars	78	—	15	12
to 4½ barrels of West Virginia at 26 dollars	117	—	23	8
to 2½ barrels of Seal Oil at 33 dollars	84	—	16	16
to 2 barrels of Whale Oil at 32 to 40 dollars	76 to 80	—	16	0

Extracts from two letters addressed to Thomas Harvey, Esq., dated respectively 9th February, 1870, and 23rd March, 1870, from Cornelius Stovin, Esq., formerly the well-known traffic manager of the London and South-Western Railway, and now and for many years the General Manager and Superintendent of the Welland Railway in Canada:

Mr Stovin states in his letter of the 9th February last:—"Having had my attention drawn to the peculiar merits of the grease and lubricating oils of Messrs Houghton and Howell, with reference to railway machinery, car axles, &c., I made myself perfectly acquainted with their value, and so satisfied was I with the superior qualities of Messrs Houghton and Howell's productions that I was anxious to become the means of introducing them to my railway friends in this country. I have succeeded in doing so upon most of the railways in the Dominion. I assure you, as I have assured all my railway connections, that during my experience as a railway manager, which dates from the year 1839, I have never yet met with any lubricator so good or reliable. It is the only one I have ever found capable of standing the test of a hot cylinder without decomposing. It is my opinion the grease will be in great demand for car axles and heavy machinery, and will supersede the yellow grease in general use upon the railways of the Old Continent, which is, in reality, a soap compounded of crude palm oil boiled in a lye of soda and water.

"Our black grease is far ahead of the yellow soap before named."

On the 23rd March, 1870, Mr Stovin states:—"Every day brings forth some fresh proof as to the increased marketable value of Petroleum property dealt with, and adds to the wonderful results obtainable by the judicious employment of a large capital and rare manufacturing ability. Depend upon it, the oil trade of Canada is in its earliest infancy. The first monied company will have a clear field to work in, and will enjoy the first fruits justly the due of forethought and enterprise. The more I look towards the future, the more I am persuaded as to the vast amount to be realised, and I earnestly hope you may be the successful pioneer in causing this gold field, for it is nothing less, to be worked to the advantage and astonishment of capitalists of the old country. You are at perfect liberty to make use of this and my former letter in any way you think proper. I have thoroughly convinced myself there is no other grease, and no other oils in the market, burning or lubricating, that can compare with the productions of Messrs Houghton and Howell, and I am prepared to stand or fall by this opinion. Of course I speak of petroleum oils; although if price is taken into consideration, I know of no fish or vegetable oil which would not suffer by comparison."

Mr Stovin stated also on the 9th February:—"In order that you may test the value of my opinion, I refer you to the following gentlemen on your side of the Atlantic, who will vouch for my railway knowledge, experience, and standing:—Messrs Thomas Brassey and Alexander Ogilvy, the well-known railway contractors; C. Hutton Gregory, F. H. Trevithick, Sir Charles Fox and Son, Charles Kerr, and A. Fitzgibbon, civil engineers; George W. Horne; Joseph Beattie, Locomotive Superintendent of the London and South-Western Railway; and J. Strapp, the Resident Engineer of the same." Mr Stovin also referred to a number of railway authorities in Canada, and concludes thus:—"These gentlemen will convince you that I know something as to what is worthy your attention. In conclusion, I repeat you have the opportunity of testing the worth of my statements by the samples placed in your hands, and I risk my professional reputation upon the result of actual trial and comparison.

(Signed) "CORNELIUS STOVIN."

Certificates have been furnished by well-known firms in London and the provinces, affirming the great superiority of these Oils over all others used by them, which will also be found in the prospectus.

The manufacture of the Black Oil, under a separate patent, for which there is an enormous demand for railways in America, will be continued, under the superintendence of Messrs Houghton and Howell, from the residuum, while the new works are being erected for the distillation of the Crude Oil.

Mr Howell, who is now in this country, will take over with him to Canada the machinery for increasing the make of these oils, and he estimates that a profit of upwards of £100,000 per annum will be realised from the manufacture of 40,000 barrels of Black Oil only.

The residuum is purchased for one dollar, or four shillings, per barrel; the cost of manufacture and barrel is sixteen shillings; together £1. The selling price is £4, leaving a clear profit of £3 per barrel.

The Safety Deodorising Still, of which Mr Howell is the inventor and patentee, has been patented in Canada and is being patented in Great Britain, India, and on the Continent of Europe.

Licences to use the Patent Still where the Company's works are not in operation are expected to produce a very large revenue; as there can be no doubt that the old mode of destructive distillation of oils will be abandoned everywhere when the new and perfected safety process be ones known.

The following letters have this 9th of February, 1871, been received from Canada, per Nestorian:—

Welland Railway of Canada, St Catharines, Ontario, Jan. 26th, 1871.

To Messrs HOUGHTON AND HOWELL.

Dear Sirs,—Herewith you will receive a document from our superintendent, which I consider, knowing all the circumstances connected with the trial, the strongest you have ever received. Mr Pay gave your oil a trial with a great prejudice against it and a high opinion of the oil used upon this railway. I do not say the trial was an unfair one, because both your oil and Leavensworth and Parker's were subjected to the same ordeal. But it was a most severe one and intended to be such. The mail van came out of the shops with new brasses fitting tightly, one side of the carriage, that is the wheels on one side, packed with your oil, the other side packed with Leavensworth and Parker's. The journals on your side never got hot. At first, by placing the back of the hand against the end of the journal a very trifling alteration in temperature might be felt, but that was all. They worked themselves to their proper bearings without becoming

THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL, for February, gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains a Financial Record of the Month; New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Insurance, and Miscellaneous Companies; New Companies and New Capital. Prices made up to February 22.

Advertisements for next Number, to be published on April 1, must be sent to insure insertion on or before March 30.

OFFICE—340 Strand.

THE SPECIAL DANGER OF MEN OF BUSINESS AS ADMINISTRATORS.

THE retirement of Mr Childers and the discussions upon it suggest some considerations which we believe to be very important, and which are not generally perceived. And in what we are about to say we give no opinion on any particular case—Mr Childers's or any other. We deal with principles only. The class of our politicians is changing. Formerly they were generally, if not wholly, men belonging by birth to the aristocratic or connected gentry. They came early into Parliament, were not chosen for subordinate office, and acquired in office and in Parliament all the knowledge and habits of business which they ever obtained. But now, owing partly to the reform of Parliament, partly and probably more to the comparative rise of new classes and the comparative fall of old ones, our politicians are coming to be selected from quite a different race. Men trained in commercial business, men perhaps in commercial business still, are daily arriving more and more at Cabinet office. Mr Forster spoke the other day "of the school in "connection with my mill." That has a not unnatural sound at present, though perhaps not everyone would speak it out as plainly; but a few years ago no one could have said it. No one actively engaged in business would have been allowed to speak from the Treasury bench. Though there was no legal bar, there was a customary, quite as effectual. A London wit called office "the gentleman's preserve," and such in reality it was.

So great a change must necessarily entail other changes. Most of these are very good. A good practical man of business—of high education and various knowledge—is more likely to make a good statesman than a country gentleman whose education is really as good (which perhaps in the present day it generally is not), and whose life is much less diversified, and much less instructive. In point of knowledge, our new statesmen are likely to be at least equal to our old ones, and in discretion and judgment, which are more important to a statesman than knowledge, they are indisputably superior. The life of a man of business is an incessant discipline of judgment: if he exercise it well he succeeds, if he exercise it ill he fails. The fact of a man of business being eminent enough in business to be in the Cabinet is almost certain proof of his possessing a vigilant and highly-trained judgment. In what is called administrative capacity also, the new race is incomparably better than the old. They can "polish off" and get to the "other side" of an amount of work which formerly would have been thought impossible.

But exactly here is the danger. Being able to do official work they will be very apt to do too much of it; and in a Parliamentary Government such as ours, a strong propensity to excessive action is almost as great an evil as gross incompetence. It tends indeed to produce incompetence. A Parliamentary official is necessarily "a bird of passage:" he is in office to-day and out of it to-morrow, and that not mostly from faults of his own, but from the blunders of someone else, or from a change of national opinion upon legislative questions, or some change of general policy. He is borne into power by a tide of opinion which he did not create, and he is borne out by another tide which he could not prevent. How long he will remain neither he can say nor anyone else. But plainly such an official must not be the chief administrator and daily executive of the office. The common work must go on whether he is present or absent. If he makes himself essential to daily business, a day will come ere long when he is not there, and then that business cannot be transacted. His position is somewhat like that of a director of a bank. He must not fancy he is the general manager. He can only settle a few important things; he must let the permanent heads of the office settle all the others. As Sir G. Lewis put it, "the business of a Parliamentary Minister is not to work "his office, but to see that it is worked by others."

The neglect of this plain rule produces incompetence in this way. Under our system of changing Parliamentary heads, we require an excellent body of permanent official chiefs. And the position of these important persons is very peculiar. They are expected to work hard for the public, but they cannot expect to have any praise from the public, for their names are not known beyond their office—the

nation knows nothing about them. All the praise goes to their Parliamentary chief. Nor is the pay of the permanent high officials great. 2,000/ a year is a high salary in the public offices, though a merchant in the City is no one if he has twice as much. We offer to the heads of our national departments little money and no fame. Even under these circumstances, disadvantageous as they are, men may still be tempted to work, but in order to do so they must be delicately handled. They must be allowed to do their work as they like, and they must have real power. Otherwise they will let everything go to confusion. There is, within wide limits, no real check on them. They may do all the definite and tangible work of their office—all they can ever be taken to task for—quite right, and yet the whole result will be quite wrong. They need not—in nine cases out of ten they would not consciously—do anything blameable. If they cease to take an interest in the office, if it ceases to be the thing they think of first in the morning and last at night, the greatest errors may be made. All business of this sort, unless *someone's* heart is in it, will fail. There must be someone to suspect what is not seen; to investigate what is not patent; to apprehend what is yet distant. Even the best Parliamentary chief can hardly have this suggestive sort of mind. Only long familiarity with specific detail gives this sort of mental sense that there is something wrong, something new, something which must be looked to. And a common Parliamentary chief cannot be expected to have it. The whole success of the office depends on the permanent head, and unless he is working willingly it will fail.

A Parliamentary chief must therefore share not only the apparent power but the real power, not only the routine decisions but the important decisions, with his permanent subordinate. And to an ordinary man of business—eager, active, and perhaps a little irritable—this is an irksome novelty. He has been all his life accustomed perhaps to do what he liked in his own business, and only to be responsible for what he himself did or approved. But now, on a sudden, he is made responsible for, and has to defend in Parliament, the acts of a subordinate whom he cannot name, and whom the world does not know, even while he disapproves of those acts. And it is still harder, because he knows that his so doing will be turned against him, if not in the public debate, yet in the private gossip and conversation of the House of Commons. His depreciators will say—"Oh, he did not believe a word of what "he was saying. He did not do it himself; it is not often "he does anything. He only lets the permanent people act, "and then lets them put him up to defend them." And yet all the while, in so sharing his power with his department, the Parliamentary chief may have foregone his own wishes to what he thought the public interest, have resisted the impulse which impelled him to interfere, and for the sake of not impairing the permanent working of his office, have helped his detractors, and injured his own reputation.

The result is that the praise of a Parliamentary Minister for great industry is always questionable, and is in some cases even suspicious praise; that we must know what he left undone, as well as what he did, before we can estimate his statesmanship. The lesson of non-interference is harder for men of business to learn than for any others. They, with their trained ability, *can* do too much; whereas most others could not if they tried—the necessary work would fill up all their time.

THE WORK OF THE CONFERENCE.

The work of the Conference has not been very laborious, as it had only to agree on what, in spite of all protests to the contrary, was certainly from the first a foregone conclusion. In saying this we do not mean to blame Lord Granville, for every sensible man admits that the only duty of England in the matter was to keep her engagements to Turkey, and that an engagement from which Turkey was quite willing to release us, for the observance of which indeed Turkey seems to have had no desire at all to contend, was not one on which it would have been right or even quite sane for us to go to war. France, Austria, Prussia, and Italy had all intimated an opinion that the neutralisation of the Black Sea, imposed upon Russia by the peace of 1856, could only be a temporary provision, and that Russia was legitimately entitled to have the bearings of the case reconsidered, and the humiliation of that penal prohibition which prevented her from guarding her own coasts by her own ships, removed. Even Italy had expressed her opinion in this sense within three or four years of the signature of the peace of 1856, influenced, no doubt, by her wish to obtain the acquiescence of Russia in the bold policy of Count Cavour during the great years of 1859-60. Turkey, the only State deeply interested in the matter—for we cannot pretend to share the conviction of some of our contemporaries, that the interests of Turkey in the East are bound up absolutely with our own,—was ostentatiously languid in her opposition to the demands of Russia. Sir H. Elliot, in the first lengthened despatch in which he reports the opinion of the Sultan's Government, states indeed in due form that, as he had already intimated by telegraph, the Porte would, in his opinion, "be prepared to go any length that might be recom-"mended by Her Majesty's Government in resisting the Russian "pretensions,"—and, of course, to say less would have been to declare publicly that Turkey would not accept English advice to go to war, even though England was prepared to go to war in her support, or, in other words, to throw up all the advantages of the alliance;—but nothing can be clearer, we imagine, than that the Porte did not wish to be advised to go the length of war, for Sir Henry Elliot adds—"But as "they do not believe it possible to prevent by force the "realisation of the Russian desire for putting an end to the "neutralisation of the Black Sea, they do not think it "desirable to assume a very energetic attitude solely on "account of the manner in which the project has been carried "out." "I informed your Lordship at the same time," adds Sir H. Elliot, "that I had no doubt that the Turkish "Government would consent to recognise the cessation of the "neutralisation, if a formal acknowledgment could be obtained "that, with this exception, the rest of the Treaty remained "in force." The whole of the despatch is in the same tone. Sir Henry Elliot states that the first thing the Porte considered was, whether it was desirable "to resort to "extremities, with a view to enforcing the continuance of "the neutralisation; and even then it was questioned "whether it might not possibly be better it should be "abandoned at once rather than be kept hanging over them, "to be joined perhaps to still further demands on a future "occasion. But *any hesitation which may have existed in the "first instance in the minds of the Turkish Government* seemed "at once to disappear when they became aware that the "principle of the neutralisation clauses, to which they "clung, had long been condemned by all their allies, ex-"cepting Great Britain." When that is the language in which Sir Henry Elliot describes the attitude of the Power most closely concerned,—the only one whose interests were concerned in any question except the formal one of the *manner* in which the Russian Government chose to break loose from its engagements,—it seems to us simply idle for anybody to reproach Great Britain, as some of our contemporaries have done, with the desertion of Turkey. It is quite clear that Turkey *wished* to be advised by us on this occasion to take the matter quietly, that she did not think it for her own interest to make war, even in our company. Whether it would have been right for us to make war against Russia to compel the withdrawal of her declaration, if Turkey *had* appealed to us earnestly to abide by our engagement of 1856, is a different question. But hardly anyone in his senses will maintain that we ought to have done so when Turkey intimated so clearly her desire to be allowed to take the matter as pacifically as possible. As a matter of fact she has obtained an equivalent for her concession to Russia of the right to put her fleet into the Black Sea, in the concession to Turkey of the right to call upon friendly Powers to send their ships through the Dardenelles into the Bosphorus even in time of peace,—a measure by which, whenever she deems herself threatened, she may prepare to resist, in conjunction with her allies, any blow aimed from St Petersburg at Constantinople from the sea. We do not think this an equivalent for what she has lost. But we do think that Turkey at present prefers to lose something to tempting the fortunes of war, even with us for an ally, and we are quite sure that it is no business of ours to urge her to more bellicose dispositions. The engagements we have given her are by no means guarantees, in our view, for "English interests in "the East," and it would be foolish as well as wrong to press her to take an excited, and probably too a very mistaken, view of the urgency of the crisis with which she has to deal.

The only serious doubt we feel about the result of the labours of the Conference is as to the unconditional manner

in which the first protocol, signed by the various representatives of Europe, seems to commit the Great Powers to the theory that treaties can never become obsolete. No doubt the extremely cynical and alarming course pursued by Russia on the present occasion, of absolving herself from all responsibility for the engagement she took in 1856, rendered it necessary that the rest of Europe should refuse to concur in the wishes of Russia without some formal apology and confession of wrong on her part. To summon a Conference simply to register the declaration of the Russian Czar that a particular engagement which had become disagreeable to himself should no longer be binding, would have been absurd as well as humiliating. If the various Powers of Europe thought, as they seem to have thought, that the substance of the demands of Russia was *reasonable*, though the form in which it was made was as unreasonable as possible, there was no harm in their concurring in the substance if Russia could be made to apologise for the form; and this is what practically occurred. Nor can we take much objection under the present circumstances to the allegation accepted by all the Powers, that it is an essential principle of the law of nations that no Power can liberate itself from the engagements of a treaty, or modify its stipulations, unless with the consent of the contracting Powers by means of an amicable arrangement. All we have to object to is, not the doctrine (which is self-evident) that no Power can arbitrarily release itself from a solemn contract,—but rather the non-recognition of the principle that treaties do really lose their binding power on all who are concerned in them by complete change of circumstances, and the disappearance of the reasons which led to their negotiation. It would be, for instance, quite absurd to press the doctrine that our guarantee to Prussia of her Saxon provinces at a time when Prussia was a small Power and in great danger of losing these provinces, has any legitimate application to a time when Prussia is merged in Germany, when the Power of Germany is the greatest in Europe, and the Powers which Prussia formerly had to fear are all comparatively insignificant. Mr Disraeli, by merely urging this guarantee as still valid, has given us an illustration of the gradual loss of binding power in treaties by the mere lapse of time, and change of general circumstances, than which it would be impossible to find a better. It is much to be regretted, we think, that the Conference, in laying down the undeniable principle that no Power can be allowed to withdraw from definite and clearly valid obligations at her own arbitrary discretion, made no suggestion for the periodical revision of engagements, the binding force of which may have been undermined by the complete revolution of historical circumstances since the date of the signature of the contract. Of course this has no application to the engagement taken by Russia in the Treaty of 1856, since her relation to Turkey is almost or altogether the same now that it was then, and there is no kind of pretence that time has invalidated the grounds of the obligations then taken. But it is a dangerous thing to re-affirm the absolute bindingness of all treaty-obligations without reference to time or change, when it is notorious that old treaties are constantly disregarded as purely obsolete by all Europe; and when every day some great change is antiquating old engagements, and making it all but ridiculous to insist on the fulfilment of them. We do not say in what way the chains of obsolete obligations ought to be struck off; but that there are, and are notoriously, such things as obsolete engagements all Europe now recognises. Nor can it be denied that it was a mistake, while rivetting afresh so solemnly the binding character of old contracts, not to admit frankly that Europe needs some method of revising from time to time the international contracts on which the European nations have entered, and deciding which amongst them ought to be regarded as cancelled by the all-dissolving agency of historic change.

MR SUMNER'S DISMISSAL.

The dismissal of Mr Sumner from the Chairmanship of the Committee of Foreign Affairs in the American Senate, is a considerable event, more especially in its bearing upon the internal politics of the Union. It will, we are inclined to believe, render the re-election of President Grant extremely difficult, if not impossible. The dismissal was only accomplished by a dead heave of all the President's friends in the teeth of the Radical wing of the Republican party. They demanded his dismissal, as essential to the good conduct of foreign affairs, and indeed to their conduct in any way, as a dead lock was rapidly approaching. The control of the department is in America confided by the Constitution to the President and the Senate, and by long practice to the President and a Committee on Foreign Affairs, which is generally guided by its Chairman. The Chairman for some years past has been Mr Sumner, and Mr Sumner having quarrelled with the President so bitterly as to render reconciliation impossible, every plan suggested by the White House excited an uncompromising opposition, which nevertheless could not compel the President to give way. The consequence was a kind of suspension of the department, which became unable either to carry or to abandon plans of the last importance like that for the annexation of St Domingo. The President at last resolved to bear opposition no longer, and at a caucus, or formal meeting of the Republican Senators, his view was carried by a majority of four. Mr Sumner's friends then stayed away, and as the party even without them was supreme in the Senate, a motion for Mr Sumner's deposition was carried by 33 to 9. It is certain that this will cause a split among the Republicans, and as their numerical strength is on the decrease, the negro vote growing daily more doubtful, the party will either be compelled to fix on a candidate not detested by Mr Sumner's wing, or to run the risk of a severe defeat by the Democrats. The usual course in such cases in America is for the party Convention to select a "dark horse"—a nearly unknown man, not because he is the man most approved, but because he is the man least hated, and it is doubtful if in the present instance they will deviate from the precedent.

As to the effect of the dismissal on foreign politics, it will probably not be great. It is considered so favourable to England that Mr Sumner's friends attribute it to English intrigue; but any good to be obtained from the removal of an acrid and rather ignorant enemy of this country will be more than neutralised by the increased bitterness which the removal will impart to anti-English feeling. The transaction is indeed on the whole unfavourable to English prospects, for it reveals in a striking way the difficulty which always stands in the way of negotiation with America, the difficulty of finding the Government of the country. In Foreign Affairs the President has a bit of the Government, and the Senate has a bit, and the Secretary of State has a morsel, and the Chairman of the Committee on Foreign Affairs has another morsel more, and unless all these authorities agree negotiation is almost purposeless. Secrecy is impossible where so many are admitted to conference, and agreement is nearly impossible where so many interests other than those of the country have to be consulted. The report of the Joint Commission must not only be satisfactory to Britain and America, but must be of such a kind that its adoption will increase the chance of the President's re-election, and not increase the chance of such a split in the dominant party as will let in the Democratic candidate. How can any report satisfy claims so numerous and so diverse, or how can any negotiation succeed when it is liable to be impeded by influences so widely separated from the true issue—the good understanding between the two countries now negotiating? It is not popular feeling which makes the policy of the Union so vacillating, but the cumbrousness of the Constitutional machinery, which prohibits all certainty as to the reception any proposal will receive. The diplomatists may agree, and the Governments, and then the secession of a personal clique in the Senate may throw power into the hand of the opposite party, and all the work may be at once undone. In four instances within the last few years negotiations of the highest moment have been re-opened after settlement, because the Senate, or in one case the House of Representatives, have declined to endorse the action of the government of the country. Mr Reverdy Johnson's Treaty was rejected, the money for the purchase of St Thomas was refused, the money for the purchase of Alaska was refused for months, and the arrangements for the cession of St Domingo were annulled, the action in each case occurring after all diplomatic difficulties had been removed. The Union is fairly governed in home affairs perhaps, but in all matters of diplomacy its government is a game of blind man's buff, blinded diplomatists shuffling round in the vain effort to fix some one with responsibility.

THE DAYS OF GRACE ON BILLS OF EXCHANGE.

TO THE EDITOR OF THE ECONOMIST.

SIR,—It may not be amiss, now that the question of abolishing days of grace upon bills of exchange is under discussion, and will probably soon be again brought before the Legislature (the House of Commons having already, in 1868, passed a Bill to abolish them), to consider the arguments for and against the proposed change.

First. It is argued, and irresistibly argued, in favour of the alteration, that the original object for which days of grace were conceded has passed away, and that in these days of rapid communication they are useless.

Secondly. That England is behind other nations in this respect, all of the leading commercial people of Europe and America having long since abolished them, and found their advantage in so doing.

Thirdly. That a uniform practice between all commercial nations is beneficial.

Fourthly. That the change would prevent numerous mistakes which now arise from the fact of our practice being different to that of other nations—many bills, for instance, being remitted to England with the due date, according to foreign custom, marked in red or blue ink, and in distinctive and conspicuous figures,—and that the alteration would simplify all calculations depending upon the maturity of bills.

Fifthly. That it would do away with all legal questions as to the due date of bills at sight, the present custom of London and Liverpool (not to mention the question as to what *is* the custom in intermediate towns) being diametrically opposite, a distinction which has given rise to so much difficulty in the late Stamp Act.

The only arguments on the other side are :—

First. That it is a change; but this argument goes against all reform, and is worth nothing when the change, as in this case, is in the direction of simplification, and brings with it no concurrent increase of trouble or difficulty nor any necessity for interfering with current bills, as it may be applied to all bills maturing on or after a distant date—say 1st January, 1872.

Secondly. That it would make the first of the month, which is already a heavy financial day, still heavier by throwing back upon it bills which now mature on the fourth; but, as to this, it is to be observed that in the same degree it would lighten the fourth, which is beyond a doubt the heaviest bill day in the month, and there is no necessity for this change, as those traders who now draw their bills to mature on the fourth could, and probably would, continue to do so, either by drawing them at a different date, or by fixing their maturity on the fourth. I think this difficulty has been altogether exaggerated and would vanish in practice; but, even if not, it is a matter of detail which ought not to stand in the way of a necessary reform.

To sum up the matter, the arguments against the change are narrow and insufficient, while those in its favour are broad, comprehensive, and unanswerable. It follows, therefore, that days of grace must be abolished, and the sooner the better.—I remain, yours faithfully,

CHARLES A. PRESCOTT.

62 Threadneedle street, March 15, 1871.

BUSINESS NOTES.

THE FOOD PROSPECTS OF 1871-2.—In view of the interruption to agriculture by the war in a large district of France, the prospects of the harvest in this country and abroad may be expected to be an object of unusual attention during the coming spring and summer. As there may be a less area cultivated in France than usual, a deficient harvest here would occur at a most unfavourable conjuncture, while a good harvest would go far to make up for the inevitable deficiency, whatever it may prove to be, in the extent of French cultivation. And as a period of great prosperity in the country depends very much on a long continuance of cheap corn, the vital importance of a good harvest this year is apparent. It is satisfactory to find that though it is yet too early to judge, the season being so little advanced, the reports from the agricultural districts contain only favourable indications of what the future may be. The winter-sown wheats have not been unfavourably affected by the severity of the frost, having been well protected in most districts by the deep covering of snow. In the Southern counties the wheat plant is well above ground, and is looking strong and healthy, being neither backward nor forward for the time of year. The cold nights of the past week have checked vegetation, but this is rather desirable than otherwise, particularly as there is no material loss of colour apparent. In the Western districts, again, though there have been some large failures, the deficiency has been more than made up by spring sowing, and the outlook is now considered good. With regard to the Midland and Northern districts it is especially early to speak, but from the Midland counties, at least, the reports are beginning to come in favourably. Generally, large preparations have been made for the reception of spring wheat, and a more extensive area is being placed under "Talavera," from which the best returns are obtained, than has been the case for some time past. Thus the auguries are so far favourable, and the anxieties of the present year may be an excuse for noticing them somewhat prematurely. Of the other element in the question of cheap corn—the probable surplus from abroad—it is yet impossible to say anything; but with the progress of railways and agriculture in the valley of the Danube, this surplus is on the average of years an increasing one, and may as a rule be looked forward to with some confidence.

THE POST OFFICE CHANGES.—Mr Graves is to be congratulated on the speedy and decisive success he has obtained in the advocacy of concessions from the Post Office in the matter of small parcels and Post Office orders. His speech in Tuesday's debate conclusively demonstrated the public good that would ensue from greater liberality in the conduct of the business of the department, and the likelihood of the revenue sustaining no loss from the most important of the improvements suggested. We cannot suppose that this particular speech had the merit of convincing the Government, which must have resolved on its policy before the debate, but the cause has still been won in great measure by the former advocacy of Mr Graves, and the knowledge acquired beforehand that it would not be easy to resist his new onslaught. The Government have also acted very wisely in not delaying longer the announcement of concessions which are really very important. As regards parcels the change is to consist in the express introduction of a low tariff for all parcels under 12oz. The absurd and impracticable distinctions between "patterns," and "articles" sent for sale or use, will be done away with, and an avowed parcel post will be substituted. In principle the Government has thus conceded everything for which the advocates of a parcel post contended, though the limit of weight might perhaps have been enlarged; and the tariff is also to be moderate. It is as follows :—

"Not exceeding 1 oz, 1d; above 1 oz, but not exceeding 2 oz, 1½d; above 2 oz, but not exceeding 4 oz, 2d; above 4 oz, but not exceeding 6 oz, 2½d; above 6 oz, but not exceeding 8 oz, 3d; above 8 oz, but not exceeding 10 oz, 3½d; above 10 oz, but not exceeding 12 oz, 4d. Twelve ounces to be the limit of weight for letters."

And this change will be a gain as respects letters as well. It has been found practically as inexpedient to distinguish between letters and parcels, as between patterns and parcels; and the above tariff will apply to letters as well as parcels, which will be subject to no regulation as to being open or the reverse. As the limit of weight in the 1d charge for letters is thus raised to 1 oz, with other changes to correspond, the improvement will extend to a great mass of ordinary correspondence. The letter post is in fact made so cheap that it will compete a little with the book post, which has not quite so many facilities as letters have, and the gain to the revenue is likely to answer to the convenience offered to the public. Mr Monsell has dealt with this matter in a very business-like way. As respects Post Office orders the change is also important. The new rates are to be :—

For sums under 10s, 1d; for 10s and under 1*l*, 2d; for 1*l* and under 2*l*, 3d; for 2*l* and under 3*l*, 4d; for 3*l* and under 4*l*, 5d; for 4*l* and under 5*l*, 6d; for 5*l* and under 6*l*, 7d; for 6*l* and under 7*l*, 8d; for 7*l* and under 8*l*, 9d; for 8*l* and under 9*l*, 10d; for 9*l* and under 10*l*, 11d; and for 10*l* orders, 1s.

the reduction in the small charges is likely enough to facilitate the use of the Post Office for remitting small sums, though we are inclined to think that a 1d per £ would have been more simple and useful in the case of smaller amounts. We doubt, too, whether it would not be beneficial to extend the hours during which money-order offices are open, the present limits being most inconvenient to the poor. Still the concession granted is most important, and we are disposed to receive it ungrudgingly. The experiment, we

consider, is sure to lead to farther reductions as the wants of the public are better understood. Mr Graves's speech, we may add, was additionally valuable from his clear enunciation of the principle for which we have often contended, but which is much opposed to the traditions of the department—that the business of the Post Office should be looked on as a whole, and that a loss in a particular branch ought not to be necessarily avoided, if the convenience afforded to the public by the losing branch be very great, and the department gain on the whole. We should deprecate the sacrifice of any important charge which is not felt as a burden, but by which the country gains a net revenue—such as the penny unit for *letters;* but the revenue so gained should be considered specially available for the extension of the facilities of communication in other directions, even at a loss to the department.

THE GRAND TRUNK OF CANADA RAILWAY AND THE INTERNATIONAL BRIDGE AT BUFFALO.—It is understood that the bonds and preference stock which were issued for the construction of the International Bridge across the Buffalo river have now been placed, and the bridge is expected to be completed and opened early in 1872. The event will be of no small importance not only to the Grand Trunk of Canada shareholders, but to all who are interested in the prosperity of the Canadian Dominion. By means of the bridge, the Grand Trunk of Canada line, which now depends upon a ferry for the passage of the river, will be placed in perfect connection with the New York Central, the Erie, and other American railways; and, in effect, the whole of Upper Canada will obtain the means of immediate and easy railway intercourse with the New England States and with the port of New York. These are very considerable advantages, and are likely to advance materially the growth of the Dominion, which is rapidly pushing forward its enterprises of colonisation. We expect all the more from it, because of the meeting of the newly-elected Congress, which contains a great number of revenue reformers, and is likely to undo the artificial tariff obstacles to close commercial intercourse with a neighbouring community, which the construction of railways and bridges is intended to promote. The Congress has begun well by voting the abolition of the protective coal duties, and we look forward with some confidence to a series of similar votes.

LOCAL TAXATION.—A very interesting return has just been issued by the Poor Law Board, in preparation, we should imagine, for the report and proposals on local taxation which Mr Goschen has been maturing. The object of the return is to show first what was the rate in the £ in the various Unions of England and Wales of all rates on the rateable value in 1868, and next the increase in the expenditure for the relief of the poor between 1861 and 1869, distinguishing in each case rural from urban unions. It is a disputed point, in regard to the increase of local taxation, whether those who complain most are the greatest sufferers, or indeed have much cause to complain at all. The present return goes a long way to solve the question. The people who complain most being the representatives of the country districts, we find that as a matter of fact their rates are much lower than those of the town districts. This is how town and country stood in 1868:—

SUMMARY of the AMOUNTS LEVIED as LOCAL TAXES on RATEABLE PROPERTY in ENGLAND and WALES, and the RATE in the £ during 1868.

	Valuation in 1868.		Total Local Taxation on Rateable Property.	
	Gross Estimated Rental.	Rateable Value.	Amount.	Rate in the £
	£	£	£	s d
512 Rural Unions	64,045,322	55,624,624	7,705,260	2 9¼
155 Town Unions	54,339,677	45,001,968	9,023,588	4 0
Totals	118,384,999	100,626,592	16,728,848	3 4

In other words, the average rural rate was 2s 9¼d, or 6¾d less than the average of the whole of England, and the average town rate was 4s, or 8d above that average. A memorandum prefixed to the return explains that "mixed unions," that is, rural unions, which happen to contain a town population, have been classified with the country, which raises its average rate. A stricter reckoning of purely rural unions would give a lower average. A second part of the return shows that of the increased expenditure for poor relief between 1861 and 1869, amounting to 1,894,157*l*, only 594,753*l* is due to rural unions, while 1,299,454*l* is due to town unions. The former increased from 3,457,747*l* to 4,052,500*l*, or 17.2 per cent., and the latter from 2,320,196*l* to 3,620,600*l*, or 56.0 per cent. The number of paupers, again, increased in the former from 553,497 to 566,264, or 2.3 per cent., and in the latter from 330,424 to 451,876, or 36.8 per cent. The return is evidently a very important one, and may be commended to the earnest study of Sir Massey Lopez and his rural co-agitators on the subject of local taxation.

WHAT CONSTITUTES A SHAREHOLDER.—We have not yet done with the cases involving disputed questions as to the settling of shareholders or alleged shareholders on the list of contributories. An interesting question of this nature has just come before the Master of the Rolls—*re* Dagenham Dock Company (Evans's case)—which was stated to be a representative one. The material facts were that the alleged shareholders had applied for and received allotments of shares which were not really intended to be allotted to them. The contractors for the works were to receive part of the contract price in shares; but in order to obtain a settling-day the shareholders whose case was now in dispute, were induced to apply for and receive nominal allotments in respect of the shares thus to be paid to the contractors. Their names however were placed on the register of shareholders. Afterwards calls were made, but were not paid, on these shares, while all notices were sent to the contractors; and on the shareholder in the present case discovering that his name was on the register, he applied to the contractors, who gave him a form of transfer, which he executed, but the directors refused to register. Subsequently it was arranged that the contract itself should be terminated and the shares forfeited, and at one meeting the forfeiture was declared; but the resolution was not confirmed by a second general meeting, as the Act requires. The alleged shareholder was not afterwards treated as such till the winding-up of the company, but his name was not removed from the register, though the word "forfeited" was written in pencil opposite his name in the register. In these circumstances the Master of the Rolls held that the forfeiture was incomplete, and that the name must be retained on the list of contributories. The case is another illustration of the serious liability undertaken by an application for shares. The matter is not of a kind to be done lightly by one person for another any more than putting one's name on a bill. Shareholders should also be warned that if they wish to get quit of their shares by transfer or otherwise, they should always take care to see that the process is formally completed by the removal of their names from the register.

BANKERS' ACCOUNTS AND LIABILITIES OF PARTNERS.—A question of interest to bankers has just been decided by the Court of Queen's Bench, in the case of the Alliance Bank of London and Liverpool (Limited) *v.* Kearsley. The suit was brought by the bank to recover from Mr W. Kearsley, a coachbuilder in York, the balance of an account standing in their favour for 1,427*l*. The account had been opened by the brother of the defendant in his own name, but the bank gave evidence that it was for the purposes of a partnership between the defendant and his brother, and in September, 1869, the manager obtained from the brother the alteration of the name of the account to that of the firm. Evidence was also given that the money drawn from the bank was used for partnership purposes. The Court, however, directed the jury to find a verdict for the defendant, on the ground that there was not sufficient evidence of any assent by the defendant to the opening of an account in the brother's name by which the firm was to be bound, and that "a partner has no "authority to bind his firm to liability on a "banking account opened in his own name only." We are inclined very much to doubt the equity of this direction. The alteration in the name of the account was at least the act of the brother as a partner, acting in the partnership name, and coupled with evidence as to the money having been used for partnership purposes should have been held to constitute

a liability for the balance against both partners. As it is, according to the hypothesis of the Judge's direction, we have one of the partners obtaining benefit from money borrowed on account of the firm, and yet successfully disclaiming liability for it. The question of fact as to whether the partnership really had the benefit of the money might at least have been left to the jury. The case, however, is a warning to bank managers against any looseness of practice as regards the debtors on their current accounts. It ought to be closely seen to that no credit is given except upon a distinct and unmistakeable obligation of the parties to whom the manager supposes he is giving it.

GERMANY AFTER THE WAR.—The Berlin correspondent of the *Times* states that "even before the conclusion of peace, "uncommon financial activity has set in at Berlin. Scarcely "a day elapses without a shareholding company being founded, "or a loan announced by some established concern. In the one "branch of railway carriage building, three companies have "been formed since the signing of the preliminaries." It seems hardly to be doubtful that the result of the war will be to accelerate the advance of Germany to a much more important position financially than it has hitherto occupied, and this movement towards new companies is only a manifestation of the financial power which the Germans feel they possess. The mere fact of the constitution of the whole of Germany into a single State, with its money and banking regulated on a common basis, will be a great impetus to the movement, both directly and by the improved knowledge of the financial position of Germany with which it will familiarise the multitude both in that country and abroad. So long as Germany was divided, such knowledge was not readily attainable, and the magnitude of the principal groups did not give a proper notion of the monetary importance of the whole country. If it appears that from any cause peace is likely to be enduring, or even that Germany is not likely to suffer soon from a great invasion, the financial developments of the next few years will be most important. It is probable enough, however, from the Berlin news we have quoted, which we see confirmed in many ways, that Germany, like other nations of growing power in finance, is a little in danger of a "company "mania," which will not be without its mischievous results.

THE ERIE FRAUDS.—The telegram received this week by the Erie Shareholders' Protection Association shows that a very critical stage has been reached in the litigations they have commenced for the recovery of their property. The statement is that "Judge Blatchford (of the United States' "Court) has granted the committee's motion to dissolve the "injunction granted by Judge Barnard (of the State Court of "New York), and has ordered the return of the 60,000 shares "arrested, but that a new order has been issued by Judge "Barnard opposing this decision, and that there is a great "conflict on the subject." In other words, the contest which was foreseen between the pure judiciary of the United States, in which the committee place reliance, and the corrupt judiciary of New York State, which is in the pay of the conspirators, has begun. As we pointed out at the beginning, the latter body was not likely to be very scrupulous, and it might choose to set the United States' Court at defiance, which is in fact what it has done. We can hardly doubt, however, that in some way or other the United States' Judges will find the means to make their orders executive, as they represent a superior power to that of the State Judges. In this view it is perhaps fortunate for the Erie shareholders that the dispute has begun upon a side issue, and has not been postponed to the time when their main suit for redress can come before the Supreme Court of the Union. The corrupt Judges of the State may be got sooner out of the way. It would not be at all surprising to see the military power of the Union called in to enforce the wills of its Judges in New York State, just as it has lately been exercised in the reconstructed South. General Grant, whatever may be his defects, is not likely to tolerate the defiance of his power involved in the action of Judge Barnard.

THE RECENT RAILWAY RISE.—A very striking advance has taken place in the value of the ordinary stock of many of our home railways during the last fortnight. Comparing the prices a fortnight since with those now current, we get the following figures:—

	Price on Friday, March 3.	Price on Thursday, March 16.	Advance.
Great Eastern	37⅞ 38½xd	41¼ ⅝	3⅛
Great Western	80½ ¾	83⅝ 4xd	4⅜
Lancashire and Yorkshire	133 ½	135 ½	2
London and Brighton	43½ ⅜xd	51⅝ ¼	7½
London, Chatham, and Dover	14¼ ⅛xd	16¼ ⅛	2
London and North-Western	126¼ ¼xd	127¼ ¾	1¼
Manchester and Sheffield	47¼ ⅛	51¼ ½	4
Metropolitan	64⅛ ⅜xd	66½ ¾	2
Do District	29½ 30	35 ⅜	5½
Midland	126¼ ¼xd	127¼ ¾	1¼
North British	35 ⅜	36½ 7	1½
North-Eastern Consols	143¾ 4xd	146¼ ¾	2½
South-Eastern Deferred	43⅜ 4¼	52¼ ½	8¼

This is a remarkable rise, and is, we believe, a strong testimony to the strength of the conviction that another period of prosperity is beginning, now that peace has been quite settled and the Russian Conference is over. It is rightly argued that the business of the country must go on increasing, and that railway property cannot but improve. That the rise has something to do with the peace is also shown by the advance being greatest in the Southern lines, which suffered most by the war. The Northern lines kept on improving in spite of the war, and had previously reached a high point, but the Southern lines were stationary, and there was a disposition to avoid them. Now the current of public favour has changed, and, though there are also special causes at work, the effects of peace on these lines are being discounted at a high figure. One or two other lines, however, such as the Great Western, also participate in the improvement; the recent advance in the case of the Great Western being even more than it appears in the above table, as it began a little before the others. It remains to be seen how much of this great advance will be maintained. We notice some signs that speculation, as usual, has exaggerated the opportunity a good deal, the quotation of such stocks as the Chatham and Dover and Metropolitan District, which have as yet paid no dividend, and are not likely to do so for a good while, indicating a disposition to force up prices to the utmost.

LANDLORDS' DISTRESS AGAINST COMPANIES WINDING-UP.—We gave last week an account of the decision of the Master of the Rolls in the case of the Lundy Granite Company, as to the question of the right of a landlord to take the goods of the company for rent owing by a lessee from whom the company had obtained a sub-lease. The decision of the Master of the Rolls, it will be remembered, was to the effect that the landlord could not proceed with his distress without permission of the Court, and that the permission ought not to be given, the Court allowing him instead to prove in the winding-up. We have now to notice, however, that the Lords Justices of Appeal have reversed this decision, and hold the exact contrary of the Master of the Rolls. They hold that the distress being against the lessee, and not directly against the company, was not struck at by the 163rd section of the Companies Act, 1862, which declares that "every attachment, sequestration, distress, or "execution put in force against the estate or effects of the "company after the commencement of the winding-up shall "be void to all intents." These words the Lords Justices hold could not be construed literally. Lord Justice James said:—"The sole object of the Act was to make a sort of "equitable bankruptcy for the benefit of the creditors and "contributories, and to provide for an equitable division of "the property of the company among its creditors, but not to "interfere with any other rights which might arise during "the winding-up. Section 163 must be confined to proceed-"ings by a creditor of the company against the goods of the "company, otherwise there would be a monstrous injustice." And Lord Justice Mellish affirmed the same principle with like emphasis. Quite a different interpretation must therefore be put upon the Act from that given by the Master of the Rolls. The promptitude with which the appeal has been taken and heard is very creditable to the appellate jurisdiction in the Court of Chancery.

SET-OFF.—Lord Justice James, in the case of *ex parte* Ryder, *re* Douglas, has decided against a claim of set-off in the following circumstances. The claimants carried on business at Liverpool, under the firm of of James Ryder and Sons, and were partners of a Bahia firm of Ryder and Co., in which,

however, there were other partners. The defendant was the trustee of William Douglas, who carried on business at Liverpool under the firm of Douglas and Co., and at Bahia under the firm of Douglas, Latham, and Co., and who had granted a deed of assignment under the Bankruptcy Act of 1861—the question arising out of certain bill transactions between the Liverpool and Bahia firms. First, the Bahia firm of Douglas, Latham, and Co. had drawn for 1,000*l* on the Liverpool firm of Douglas and Co. in favour of Ryder and Co., who passed it on to their Liverpool firm; and afterwards the Bahia firm of Ryder and Co. drew a bill for 1,000*l* on their Liverpool firm in favour of Douglas, Latham, and Co., who passed it on to their Liverpool house. The bill on Douglas and Co., however, though accepted, was dishonoured when it became due on the 22nd January, 1870, Douglas having granted a deed of assignment on the 14th of December previous, which was registered on the 30th December. The bill on James Ryder and Sons was not accepted at first by them, but was accepted subsequently as of date the 15th December, 1869. In these circumstances James Ryder and Sons claimed to set-off the dishonoured bill of Douglas and Co., which they held, against their own acceptance; but the set-off was disallowed. Lord Justice James held that Douglas's adjudication of bankruptcy went back to the date of the deed of assignment, and there was no mutual credit subsisting at the time of the adjudication.

THE PUBLIC REVENUE AND EXPENDITURE.

The following are the Receipts into and Payments out of the Exchequer between April 1, 1870, and March 11, 1871 :—

REVENUE AND OTHER RECEIPTS.

	Budget Estimate for 1870-71.	Total Exchequer Receipts To March 11, 1871.		Same time last year.	
	£	£	£	£	£
Balance on 1st April, 1870—					
Bank of England	...	7,633,761		3,775,717	
Bank of Ireland	...	972,887		931,541	
			8,606,648		4,707,258
REVENUE.					
Customs	19,300,000	18,914,000		20,391,000	
Excise	21,620,000	21,018,000		20,086,000	
Stamps	8,850,000	8,451,000		8,700,000	
Taxes	2,850,000	2,488,000		1,908,000	
Income Tax	6,850,000	5,721,000		9,513,000	
Post Office	4,775,000	4,300,000		3,900,000	
Telegraph Service	675,000	500,000		...	
Crown Lands	385,000	375,000		375,000	
Miscellaneous	3,070,000	2,842,704		2,712,717

Bank of Ireland		1,083,217		862,137	
			7,097,472		9,415,267
Totals			74,882,230		77,462,618

The following are the Receipts on account of Revenue during the week ending March 11 :—

	Receipts of Week Ending March 11.
	£
Customs	350,000
Excise	811,000
Stamps	183,000
Taxes	75,000
Income tax	191,000
Post Office	100,000
Telegraphs	nil.
Crown lands	nil.
Miscellaneous	nil.
Total	1,710,000

The total receipts of the previous week were 1,572,411*l*.

The Exchequer issues of the week on account of expenditure were 902,464*l*, viz. :—

	£
Interest of debt	434,964
Other charges on Consolidated fund	7,500
Supply services	460,000
Telegraph services	nil.
	902,464

During the week the cash balances have increased in the Bank of Ireland and decreased in the Bank of England as follows :—

	Bank of England	Bank of Ireland.	Total.
	£	£	£
Balances on March 4	6,025,469	1,025,217	7,050,686
— March 11	6,014,255	1,083,217	7,097,472
Increase	...	58,000	46,786
Decrease	11,214	...	...

The other receipts to date were 1,250*l*, the other payments were 762,000*l*.

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, March 15, 10 a.m.

The grand question of the day is the payment of the war indemnity. Whether the huge sum to be provided shall be raised all at once or in instalments, and in either case whether exclusively by loan, or partly by loan, partly by sales of national property, and partly by taxation, are questions discussed with eager interest. That, however a greater part of the money, if not all, must be got by borrowing, is evident; but whether the loan shall be altogether voluntary or partly forced, whether it shall be in 3 or 5 per cent. stock, or both, whether any portion of it, and if so, what, shall be in annuities for a term of a series of years, are points on which much difference of opinion exists, and for or against which many important arguments are urged. As to the sales of national property—forests, domains, "Crown" jewels &c.—they may be made to produce a sum of a certain importance; but if effected immediately they would yield less than they would do in a few years after the establishment of a calm. As to taxation, it can hardly perhaps in the present state of the country be employed to raise any considerable amount of capital especially as it will in future have to be made very heavy to provide revenue. On all these points a decision may be expected very shortly, M. Thiers and the Ministers having quitted Bordeaux for Paris or Versailles, and the great bankers of Paris having, at their request, prepared the ground by conferring together and by consulting the leading capitalists of foreign countries, notably of England.

In addition to the measures for raising money above indicated, it is suggested that the Government might in some manner turn to account railways, which, after the lapse of a certain number of years are destined to become its property, and that it might also take into its hands fire and life assurances. But even if such acts were found to be good in principle, the settlement of the details of them would take more time than can be afforded. It need hardly be said that chimerical projects by the

score abound,—the chief of them being the paying of the national debt in paper, and the compelling owners of real property to lend the State a fourth at least of the value of it, accepting paper in return. But such schemes merit no attention. The idea has also been started that a large amount may be raised by voluntary donations, and some persons have set the example of offering to give different sums, whilst others at Paris are addressing earnest appeals, by means of placards on the walls, to the public to offer all they can afford to the country. It is possible that a few millions of francs may be got in that way, but experience has repeatedly demonstrated that nothing is more difficult than to induce the French voluntarily to give money for public purposes. With regard to public taxation, the only serious suggestion made thus far comes from the Society of Political Economy, and is that an income tax ought to be established.

In consequence of some observations made a few days back in the National Assembly, M. Thiers deemed it necessary to give explanations on financial matters. He said that the Bank of France, always ready to serve the country, had entered into a contract to furnish the Treasury with 400,000,000f. That was done under the late Government, and as the sum had not been completely absorbed by it, the present Government had profited by what remained. The balance however would soon be exhausted, but he undertook not to enter into any new contract with the Bank without the co-operation of the Assembly. In addition to what it had obtained from the Bank, the Government of National Defence, he said, had raised money by selling *rentes* belonging to what was called the dotation of the Army. Under the Empire the said dotation had been abolished, and the Government took possession of the *rentes* belonging to it, but under the conditions of paying the military pensions and allowances for which they were destined to provide. Blocked up in Paris, and in need of resources, the Government of National Defence had sold the greater part of those *rentes*. As to the remainder it was possible that part had been sold since he came into power; but, owing to delay in communicating with Paris, he could not say positively. In any case the *rentes* belonged to the State, and he thought that the preceding Government was justified in selling them to provide for the necessities created by the state of siege. M. Germain remarked that in his opinion the *rentes* in question ought not to have been disposed of without parliamentary authorisation; otherwise, he said, the Government could flood the market with hundreds of millions of *rente:* for example, it could take from the Caisse des Depots the 500,000,000f of Government stock placed in it as guarantee for the deposits of the savings banks. With respect to the Bank of France he said that, as he was informed, it was not 400,000,000f that establishment had furnished, but more than 900,000,000f. He added that as a matter of principle he could not allow that the Bank should charge more for its advances than they could be obtained for elsewhere: and yet it was taking 3 per cent. when money was only worth 1½. M. Thiers repeated that the *rentes* referred to were the property of the State, and that the Government of National Defence had commenced the sale of them in a moment of emergency, and in order not to raise money in a dictatorial manner. His Government, he believed, had continued the sale, but he said again that he was not certain that it had done so, not having documents in hand. He was sure, however, that if a sale had been made it was only for a limited amount. And now, enlightened by what had been said, he declared that he would request the Minister of Finance to renounce that resource in future. As regarded the Bank it was quite true that it had furnished the State with much more than 400,000,000f, but that was previous to the contract relative to the latter sum. After these explanations, M Thiers spoke as follows:—"At the present moment the Government is obliged to live on the resources it can procure. Taxes, which in France are generally paid so readily, have come in less rapidly in the midst of the misfortunes of the war; and yet I will say, in honour of the country, that there is not a State in Europe in which, even in spite of those misfortunes, taxes are recovered, I will not say so easily, but so spontaneously. You will admit, however, that taxes alone could not provide for expenses which, out of Paris and in the space of four months, have exceeded 1,000,000,000f (44,000,000*l*). The State therefore had several times recourse to the Bank, and besides obtained from it a contract for 400,000,000f. This contract leaves the Government a resource which is not very considerable—30,000,000f or 40,000,000f at the outside. The Government has been obliged to take the sums it needs on the same conditions as the preceding Government did. It could not ask them at any other. The Government has not acquired, with respect to the Bank, a right that no private individual can possess—that of changing the conditions of a contract. But at this moment Government is treating with the Bank, and the new contract will be sensibly different to the preceding one. You will be the judges of its stipulations, and I believe that you will not find them contrary to what reason and equity counsel." M. Thiers did not say what sum the Government of National Defence obtained from the *rentes* in question, but it is believed to have been about 70,000,000f.

In the course of a speech on the removal of the Government from Bordeaux to Paris or the neighbourhood, M. Thiers said that one of the principal reasons for which the measure was necessary was the necessity, under existing circumstances, of his being in constant communication with the Bank of France and with the leading capitalists of France and Europe; and he made this declaration:—"I can say that the credit of France, in the midst of all her misfortunes, has remained so solid that all Europe offers her the financial resources of which she may have need."

The Committee of the National Assembly charged to examine into the state of financial affairs, has not yet presented a report; but it is said that it has ascertained that of the Empire loan, 420,000,000f, and of the London loan 182,000,000f, have been spent—also that, when these sums were exhausted, M. Gambetta was about to "requisition" the Bank of France for a supply of notes, but was stopped in his design by an energetic remonstrance sent from Paris by pigeon by the Minister of Finance. It was to facilitate the requisition that he illegally appointed a new sub-governor to the Bank.

The *projet de loi* relative to the payment of commercial bills, of which the principal enactments were mentioned last week, has, after a brief discussion, been adopted by the National Assembly, and promulgated as law. It has caused great dissatisfaction among a large part of the commercial community, because it requires payment to be made at shorter dates than it is said is reasonable, considering that for six months past trade has been at a standstill, and that traders consequently have been making no money; because, too, payments are to be effected in the lump, whereas it is contended they ought, for the same reason, to have been allowed to be made in instalments. The enactment that bills that fell due between 13 August and 12 November are to be paid in seven months is particularly objected to, for the reason that it permits the payment of a considerable number of bills to be immediately exacted. So great is the irritation against the law, that petitions are being signed and meetings held to obtain a modification of it. But as it was drawn up in accordance with the counsels of the Bank of France and of the Comptoir d'Escompte, and as it is really necessary that regard shall at least be shown to people to whom bills are due—their interests having already cruelly suffered by the delays accorded—there is small chance indeed of any alteration being consented to. In the course of the debate the announcement was made that the Bank of France alone holds unpaid bills to the amount of 800,000,000f.

The Bank of France, contrary to expectation, did not publish last week any return of its situation. There is no certainty that it will do so this week, though strong hopes are entertained that it will. The greatest anxiety exists to see what amount of notes it has in circulation, what quantity of coin and bullion it has in hand, what advances it has made, and also whether or not its discounts stand at the figure stated in the Assembly.

The Bourse was depressed up to yesterday, when transactions all at once assumed a certain degree of activity in the Threes, and the prices advanced. To-day the advance has made new progress. This improvement is ascribed to the Assembly having consented to quit Bordeaux and to come, if not to Paris, at least to Versailles, which is close to it; also to the belief that a large co-operation of foreign markets in the forthcoming loan or loans may be confidently counted on; and furthermore, to the approach of the coupon. But the amelioration has not extended to railways, in which sales have been made, doubtless to provide for the payment of bills; and some of the other companies have fallen for the same reason. The following are the quotations, most of those of to-day being for time:—

	March 7.		March 15.
	f c		f c

Some of the credit companies have published accounts of their situation on the 28th Feb. The Credit Mobilier held at that date bills to the amount of 16,021,627f; had made advances to companies of 52,078,071f, held deposits of 10,322,317f, had in circulation with its endorsement bills, &c., 16,909,044f, and had cash in hand 3,901,222f. In the Credit Industriel discounts were 35,935,822f, advances 1,760,000f, deposits 9,935,782f, bills in circulation with endorsement of the Bank, 3,420,300f, cash in hand 5,401,130f. In the Société Générale, discounts were 2,633,233f, deposits 35,995,400f, advances to and participations in companies 23,592,972f, bills endorsed in circulation 4,405,000f, cash in hand 6,377,201f.

An announcement has been made by which the Germans give up, in the districts they occupy, to the French the working of railways (subject to the condition of being furnished with all the trains they may require), the administration of the post office and telegraphs, and of justice; by which they will accept for their troops provisions supplied by the French commissariat instead of making levies themselves; and by which they consent not to insist on the payment by communes and departments of war contributions, and of taxes left unpaid before the conclusion of peace,—the French Government undertaking to indemnify them. As to the taxes, they consist of one month's Direct, and of a sum equal thereto for Indirect.

The decree of 24th July, which prohibited the export or transit of "objects fit for war," is repealed.

The intention to establish an import duty on cotton and wool, and other raw materials used in manufactures, is ascribed to M. Thiers and M. Pouyer-Quertier. Such a measure would be in accordance with their Protectionist doctrines, but it would of course lessen production, and with reduced production, how are the working classes of the factory towns to be provided for?

The *Journal des Fabricants de Sucre* estimates the production of beetroot sugar in 1870-71 in France at about 250,000 tons, instead of 300,000, at one time counted on; the decline being caused partly by the stoppage of factories by the war, and partly by the plant having suffered from the severe frost.

This is the epoch of the year at which, in ordinary times, banking, railway, gas, and other companies make known the dividends they will pay. But for 1870, not a few of them will be positively unable to give anything; others will probably not think it prudent to distribute what they have earned; and others will give less than usual. The Parisian Gas Company is expected to pay 40f.

The Comptoir d'Escompte informs subscribers to the Mortgage loan of the Viceroy of Egypt of 1870 that if the calls overdue, with interest thereon, be not paid before 31st March the obligations will be sold at their risk and peril.

Messrs Stern and Co. announce the payment from the 16th of the half-year's interest on the obligations of the Italian Tobacco loan, due 1st January last, amounting, tax deducted, to 13f 65c; of the obligations of 500f, indicated in the last drawing; and of a coupon on shares, representing 8f 50c for dividend of 1869, and 10f 50c for interest of second half of 1870.

The Credit Mobilier is from 1st April to issue new sheets of coupons of the 4 per cent., second issue, loan of the Great Russian railways.

The Banque de Paris is to pay from 16th the coupon No. 2 of the obligations of the Meridional Railways of Italy, due 1st January.

The Gaz General de Paris has been paying since 1st March a coupon of 7f 50c on obligations.

The Société Générale is paying in Paris the dividends of the Egyptian 1868 and the Hungarian loans, due 15th and 17th January, delayed by the siege.

The Charentes Railway Company will pay from 1st April the interest on bonds 7f 50c falling due on that day.

The Company of the Railways of Turkey in Europe requires the payment of the fourth call of 25f before the 30th March.

The Company of the Etablissements Duval cheap eating-houses of Paris have announced that its receipts for 1870 were 6,204,616f, being 165,526f less than in 1869; and that the profits were only 329,566f, all earned before the war. They were, however, sufficient to give 35f per share.

The directors of the Salines Domeniales de l'Est notify that the annual meeting required by the statutes to be held on the 1st April must be postponed, it not having been possible, on account of the invasion, to make up the accounts of 1870. These Eastern salt works are among the most important in France, and are in the territory ceded to Prussia.

PARIS, March 16, 10 a.m.

From a report of the sitting of the National Assembly at Bordeaux on Saturday last, only published this morning, it appears that M. Leon Say, in the name of the Financial Committee, presented a summary report on the state of the finances, but that M. Thiers prayed that the printing of it might be delayed, because it was calculated to occasion "a certain degree of injury to the national credit," and France had an "immense interest" at the moment of treating with capitalists in not having her credit injured. The printing of the document was ordered to be postponed.

The statutes of the Bank of France interdict the establishment of branches out of French territory, and in consequence those of Strasbourg, Mulhouse, and Metz will have to be suppressed. In their place it is expected that, either by French, or Germans, or both, banks will be formed with power to issue notes, as in several other towns of Germany.

The Financial Commission of Portugal at Paris notifies that the dividends of the Portuguese Three per Cents. of 1848, 1853, and subsequent years, will henceforth be paid quarterly, and that coupons of the quarter falling due 1st January last must be presented before the 20th April.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 15th day of March, 1871.

ISSUE DEPARTMENT.

	£		£
Notes issued	35,981,630	Government Debt	11,015,100
		Other Securities	3,984,900
		Gold Coin and Bullion	20,981,630
		Silver Bullion	...
	35,981,630		35,981,630

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities	12,195,418
Rest	3,689,808	Other Securities	23,709,607
Public Deposits including Exchequer, Savings' Banks, Commissioners of National Debt, and Dividend Accounts	10,054,092	Notes	12,966,535
		Gold and Silver Coin	828,035
Other Deposits	20,753,247		
Seven-day and other Bills	649,458		
	49,699,595		49,699,595

G. FORBES, Chief Cashier.

Dated the 16th March, 1871.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	23,604,553	Securities	36,352,025
Public Deposits	10,054,092	Coin and Bullion	21,809,665
Private Deposits	20,753,247		
	54,471,892		58,161,690

The balance of Assets above Liabilities being 3,689,808*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

	Increase. £	Decrease. £
Circulation	...	197,496
Public Deposits	42,050	...
Other Deposits	...	816,456
Government Securities	...	727,998
Other Securities	...	274,137
Bullion	38,708	...
Rest	7,985	...
Reserve	170,683	...

The following is the official return of the cheques and bills cleared at the Bankers' Clearing-house:—

	Week ending March 15, 1871. £	Week ending March 8, 1871. £	Week ending March 16, 1870. £
Thursday	10,188,000	15,672,000	10,502,000
Friday	11,087,000	17,092,000	10,676,000
Saturday	12,305,000	17,528,000	12,325,000
Monday	12,261,000	13,475,000	8,885,000
Tuesday	11,480,000	13,183,000	10,584,000
Wednesday	30,713,000	13,390,000	29,658,000
Total	88,044,000	90,240,000	82,630,000

GEORGE DERBYSHIRE, Chief Inspector.

Bankers' Clearing-house, March 16, 1871.

The total since the 4th of January, 1871, is 829,814,000*l*, compared with 794,420,000*l* for the corresponding period last year, showing an increase of 35,394,000*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz.:—

At corresponding date with the present week.	March 20, 1861.	March 18, 1868.	March 17, 1869.	March 16, 1870.	March 15, 1871.
Circulation, including bank post bills	£ 19,485,007	£ 24,144,170	£ 22,145,912	£ 22,951,740	£ 23,604,553
Public deposits	8,235,234	5,927,254	7,892,757	11,472,176	10,054,092

Government securities	13,260,762	14,273,162	14,136,857	14,736,214	12,195,418
Other securities	19,178,779	17,777,440	20,334,057	22,736,873	23,709,607
Reserve of notes & coin	5,325,240	11,342,862	10,666,187	13,427,803	14,794,170
Coin and bullion	12,701,425	21,281,427	18,719,122	20,174,043	21,809,665
Bank rate of discount	7 %	2 %	3 %	3 %	3 %
Price of Consols	92¼	93¼	93¼	93	92¼
Average price of wheat	53s. 8d.	73s. 1d.	48s. 10d.	46s. 6d.	53s. 8d.
Exchange on Paris	25. 35. 42½	25. 12½. 25	25. 12½. 20	25. 20. 25	25. 12½. 25
— Amsterdam	11. 19. 12	11. 18. 18½	12. 0½. 1½	11. 18½. 1⅝	11. 19. 19½
— Hamburg	13. 8½. 9½	13. 9½. 10½	13. 10½. 11½	13. 10½. 10⅝	13. 10½. 11½
Clearing-house returns	...	72,854,000	78,390,000	82,630,000	88,044,000

In 1861, the Bank lowered the rate of discount to 7 per cent. from 8 per cent., at which it had stood for some weeks. The policy of the Bank in raising its rate in face of the American troubles and the deficient harvest of the previous year was considered to have done its work. There was a good deal of ease in the money market, arising, however, not from any great abundance of money, but from the contraction of business. The first heavy tariff caused by the Secession War had just been sanctioned.

In 1868, money continued easy at 2 per cent., but there was a little temporary activity, and improvement was shortly expected. Mr Gladstone had just announced the policy of the Liberal party for appeasing Irish discontent—pointing chiefly to the disendowment of the Irish Church. A Government Bill for having railway accounts prepared on a uniform plan had just been introduced in the House of Lords.

In 1869, money was abundant at 3 per cent. The Bill for disestablishing the Irish Church was in progress. In anticipation of some insurance scandals, proposals for auditing the accounts of companies were being discussed.

In 1870, money was abundant at 3 per cent., and no immediate movement was anticipated. The Select Committee on Elections had just made its report recommending the adoption of the ballot.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 8,255,045*l*; in 1868, an excess of 1,960,274*l*; in 1869, a deficiency of 1,365,561*l*; and in 1870, a deficiency of 3,157,080*l*. In 1871, there is a deficiency of 2,956,370*l*.

Discount and Money Market.—The value of money this week has again tended downwards, the rates for the best short-dated paper and for three months' bills being quoted ⅛ lower than they were last week. The open market price for short bills is now quoted below the bank rate, and there has been a corresponding reduction for long-dated paper. There is, moreover, a great deal of uncertainty in the market, which keeps the rates unsteady. The quotations we subjoin are in fact to some extent nominal, and there are many special transactions. The supply out of doors being so full, the demand at the Bank has fallen off.

Notwithstanding the momentary ease of the market, there is little confidence in its long continuance, which is one cause of the unsteadiness of the rates. The Russian loan as yet has had hardly any appreciable effect, there having been no pressure for means to pay the instalments on application and allotment, but the amount is too large not to have some effect before all the instalments are paid, while the reports as to the new French loan are daily becoming more definite. According to the best information the arrangements of the French Government for bringing out the loan will be complete in about a fortnight from this time, and the amount will be three milliards of francs (120,000,000*l*) to be issued either in 3 per Cent. or 5 per Cent. Rentes, the latter point being still under debate. It is obvious, however, that the loan will have to receive the previous sanction of the French Assembly, and that changes may take place at any time before its final issue in the intentions of the Government. The suspense in the money market may therefore continue for a little time longer, till it is publicly known what will be the terms of issue, the period over which the payment of instalments will be spread, and the date when future issues may be looked for. Apart from this great impending transaction, the number of new undertakings and loans rumoured as about to be brought out increases.

The principal changes in the Bank account for the week are a decrease of 816,456*l* in the private deposits, a decrease of 727,998*l* in Government securities, and a decrease of 274,137*l* in private securities. The changes in the amount of bullion and reserve are unimportant.

We subjoin our usual quotations for mercantile paper having various periods to run :—

Bank bills—2 months	.....	2⅞	per cent.
Do 3 —	.....	2⅞ 3	per cent.
Do 4 —	.....	3¼	per cent.
Do 6 —	.....	4	per cent.
Trade bills—3 months	.....	3 3¼	per cent.
Do 4 —	.....	3½ 3¾	per cent.
Do 6 —	.....	4¼	per cent.

The allowance for deposits at the joint stock banks and discount houses is as follows :—

Joint Stock Banks at call	2	per cent.
Discount houses at call	2	per cent.
Do with seven days' notice	2¼	per cent.
Do fourteen days	2½	per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent.		Open Market, per Cent.	
	1870.	1871.	1870.	1871.
Paris	2½	6	2	...
Vienna	5	5	5	5
Berlin	4	4	3⅛	3⅛

Amsterdam	4	3½	3¾	3
Turin	5	6	5	5
Brussels	2½	4	2½	3½
Madrid	5	5	5	5
Hamburg	...	...	2½	3½
St Petersburg	5	8	4½	7

The Stock Markets.—The characteristic of the week has been a strong upward movement in every department, but principally in home railways, in which the movement has extended to almost every stock. It will be understood, however, that though the movement is most striking in the latter case, yet it is very considerable in other departments—foreign stocks, banks, telegraph shares, and the leading miscellaneous companies having all advanced. The general causes appear to be a more settled feeling about the peace, and a diminution of the apprehensions of dear money—the peaceful close of the Black Sea Conference also increasing greatly the confidence felt. This change of feeling affecting a market where business has been in suspense for months, the opportunity has been a very important one for speculators to improve, and hence the great rise which has taken place, which cannot but be in many cases exaggerated. In many of the stocks affected, such as the better home railways, there was no doubt room for a material advance in almost any contingency. The increase of business and traffic throughout the country is sure to benefit the leading companies, which enjoy privileged opportunities. But this is not the position of other stocks which have improved, especially foreign securities, and a few of the railways, where the advance appears to be out of all proportion to any increase of traffic that may reasonably be looked for in the near future. As regards the general causes of the movement, again, though the better opinion, we admit, is that we shall have a lull in Europe for a few years, it cannot be disguised that there are also many elements of uncertainty and alarm. The future action of Russia is a problem of great doubt, and the revolutionary state of France may well give rise to uncertainties. There would seem to be very little good ground again for the cessation of apprehensions of dearer money. The subscription of the Russian loan notwithstanding the reluctance of the Stock Exchange to deal, the demands of France as a borrower, which are now very imminent, the other demands for foreign loans which are inevitable, and the general demand for peace purposes which will become very strong as enterprise and activity are resumed—are all causes tending to enhance the value of money at an early date, while some of them will have a specially prejudicial effect on a few of the stocks which have advanced—especially the weaker foreign stocks. We are exceeding doubtful therefore whether the general advance will be long maintained, though we should expect no fall, at least no material fall, in most of the principal railways, where the advance is kept within some reasonable proportion to the probable increase of traffic.

English Government Stocks.—There has been a steady advance in Consols this week, the price at the close on Thursday being 92⅛, which is an improvement of ⅜ on the closing price of last Friday, while there is a farther improvement to-day to 92⅛ ¼. Other Government securities as will be seen below, have likewise moved in sympathy. Last settlement it will be remembered showed the existence of a large bear account, and the continued ease of the money market, as the effect of the probable new demands is postponed, is apparently making some speculators anxious to close operations. This is somewhat difficult for them owing to the great scarcity of stock, and an additional advance within the next day or two is not unlikely; but the events which are expected to produce a decline in the value of Consols cannot now be long delayed.

Subjoined is a list of the highest and lowest prices of Consols every day :—

CONSOLS.

	Money. Lowest.	Highest.	Account. Lowest.	Highest.	Exchequer Bills. March and June.
Saturday	91¼	91⅝	91¼	91⅝	par to 5s pm
Monday	91⅛	91⅜	91⅛	91⅜	par to 5s pm
Tuesday	91⅛	91⅜	91⅛	91⅜	par to 5s pm
Wednesday	91⅛	91⅜	91⅛	91⅜	par to 5s pm
Thursday	91⅛	92	91⅛	92⅛	par to 5s pm
Friday	92	92⅛	92⅛	92⅛	par to 5s pm

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Consols for money	91⅝ ⅜	92 ¼	+ ⅝
Do. account	91⅝ ⅜	92⅛ ¼	+ ½
Reduced 3 %	90 ⅛ xd	90⅜ ⅝	+ ¼
New 3 %	90 ⅛ xd	90⅜ ½	+ ¼
Bank Stock, last dividend 4½ %	243 5	243 5	... ...
India Stock, 10½ %, red. at 300 Apl. 30, 1874	205 7	205 7	... ...
Ditto 5 %, red. at par, July 5, 1880	109¾ ¼	109¾ ¼	... ...

EXCHEQUER BILLS.—Par to 5s pm.

COLONIAL GOVERNMENT SECURITIES.—The following are the changes for the week in this department :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Canada 6 %	103¾ 5/8	104¼ 5/8	... ...
Ditto 5 %	97⅛ 8/8	98 9	+ ⅛

FOREIGN GOVERNMENT STOCKS.—In this department, as we have noticed, there has been a material improvement for the week, the tone having been given by the dealings in French securities, which are now taking the lead in the market. The French National Defence loan, on which the first half-year's dividend has nearly accrued, notice of payment having been given, moved up to 97⅛, an improvement of rather more than 2⅛ from last Friday. The 3 per Cent. Rentes, which were at 50⅛ last Friday, steadily advanced this week to 52 ⅜ ⅞, having touched 53 on Thursday, and the quotation from Paris having also been good. The advance is probably due to preparations for the coming loan, but the indications that France is getting into some sort of settled order are not without effect, and partly counteract the anticipated result of the competition of France on other foreign securities, which have also advanced. The buying has especially been in Turkish 5 per Cents. from causes which we described last week; in Spanish, on reports of new financial schemes, and the increase of confidence in the new Government; and Italians have also advanced a little. To-day the markets were good at the opening, and after being flat during the day in consequence of realisations, again rallied and close firm.

The scrip of the new Russian loan, which is stated to have been fully subscribed, notwithstanding the persistent opposition to dealings on the Stock Exchange, has been steady during the week at 1 to 1⅛ premium. The allotment letters were issued to-day, and from one-half to three-fourths of the amount applied for have in some instances been allotted, though in other cases there is a much less proportion. The premium is now ⅞ to 1.

Brazilian scrip has been at ⅛ dis to ¼ pm. Tuesday next, the 21st inst., is appointed a special settling day.

This afternoon there was a report of a new Portuguese loan being shortly brought on the market.

According to the *Times* advices from Vienna state that the Austrian Minister proposes an issue of 60 million florins, nominal, in silver metalliques, which will bring about 3,000,000*l* sterling to the Exchequer to meet past and prospective deficits, but that it is expected the measure will be strongly opposed, and that it may even compromise the stability of the Cabinet.

The Honduras Government have notified that in addition to the annual drawing of 3 per cent. on the 31st December next, as provided in the bonds of the loan of 1870, an additional drawing of 2 per cent. will take place on the 30th April next, and if circumstances admit another of 2 per cent. on the 30th September next. The bonds thus drawn on the 30th April will be paid off at par with the coupon due on the 1st July next.

The following are the changes for the week, taking the latest unofficial prices for quotation :—

ENGLISH RAILWAY STOCKS.—The general upward movement in the markets, as we have noticed already, has been most conspicuous in home railways, and here it is only a continuation of the steady advance to which we drew attention last week. We notice elsewhere the extent of the recent changes from its commencement, but most of the improvement is nevertheless due to the great advance of the present week, as will be seen from the usual comparative table which we subjoin. The principal stocks which have gained on the week are South-Eastern Ordinary and Deferred, Brighton, Chatham and Dover Preference, and Metropolitan District. Great Western however have also gained materially, and still show the greatest improvement, taking the last two or three weeks into the comparison. Apart from the general cause for the advance to be found in the increase of traffic, there are no doubt special circumstances affecting most of these lines. The Great Western is one of those companies whose stocks have always been well held, so that on a demand springing up there are few sellers, while the smallness of the proportion of Ordinary to the Debenture and Preference stocks makes it one of the lines in which an increase of traffic benefits the Ordinary shareholder most. The line has also a specially good prospect before it from the approaching completion of the plan of substituting the narrow for the broad gauge, by which a large accession of traffic with the mineral districts of Wales will be gained. As respects the other lines named, South-Eastern, Brighton, and Chatham and Dover, all participate in the advantages to be derived from increased continental business, while there are always expectations of closer working arrangements or amalgamations by which the Ordinary shareholders of each will be benefited. As regards the Metropolitan District, the proceedings at the meeting this week have been considered unusually favourable; but considering the present state of the line, the improvement in this case is purely speculative. The Great Eastern is another company which has improved greatly this week, and it will also gain much by the improvement of business with the continent, while the approaching completion of the Metropolitan Extensions will render productive a large amount of capital which is now only a dead weight, and otherwise add to the company's facilities for business. To-day, as in the foreign market, there was a good deal of realisation to secure profits, but the consequent reaction was only slight, and prices, as will be seen below, show an enormous advance from last week.

A dividend of 4¼ per cent. per annum on the ordinary stock of the Caledonian Railway—an improvement of ½ on the corresponding period of last year—was announced in the early part of the week. This dividend was not so good as had at one time been expected, but the general improvement of the company's position, and the later fears as to this particular dividend, had both been discounted beforehand, and the incident had no effect on the general course of the markets. Notwithstanding the relapse caused by the announcement, Caledonian close for the week at a fall of only from last Friday.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices :—

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.
Caledonian	89⅝ ¼	.....	88⅜ ⅜	— 1⅜

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), for the week ending March 11, amounted to 700,220*l*, being an increase of 47,306*l* on the corresponding week of last year. The aggregate for the current half-year now is 6,049,126*l*, being an increase of 319,591*l* on the corresponding period of last year. The principal increases for the week are—North-Eastern, 8,526*l*; London and North-Western, 7,957*l*; Midland, 6,087*l*; Great Western, 4,798*l*; Great Eastern, 3,259*l*; and Lancashire and Yorkshire, 3,021*l*. The following are the details of the increase in each case for the week and for the whole period :—

RAILWAY TRAFFIC RETURNS.

	700,220	+47,306	6,049,126	+319,591

* The aggregate in the case of these companies is reckoned from the 1st of February, 1870.

Foreign and Colonial Railways. — The principal dealing for the week has been in Grand Trunk of Canada stocks, the traffic returns of this line still continuing most favourable. As we state elsewhere, the bonds and preference stock issued for the construction of the international bridge across the Buffalo river, in substitution for the ferry now made use of, are understood to have all been placed, so that the completion of the bridge is now ensured at an early date. The Grand Trunk of Canada will thus obtain a good connection with the American railway systems, in place of its present imperfect one, and the result seems certain to be most beneficial to the shareholders.

The following shows the changes for the week in this department :—

The question of the Roumanian State Railway bonds has advanced another stage this week. A committee of the Roumanian Chamber, it appears, has advised that the bonds are not lawfully issued, and that the Government is not bound; and the Foreign Bondholders Association have this week drawn up a most energetic protest against the conclusion. The matter has now become somewhat scandalous, and we must say that it wears a very different aspect from what it did when it was supposed that the Roumanian Government was declining to acknowledge an absolute guarantee upon the failure of the parties who were primarily liable. The Roumanian Government are not so utterly without excuse. They say, in fact, that these particular bonds were not authorised, that the commissioner signing them had not power to bind the Government, and that the Government is not bound. This is a very different thing from repudiating an absolute guarantee. Two questions, however, will remain—(1) Whether, in point of fact, the allegations of the committee are true; and (2) Whether, if true, the Roumanian Government is not bound, for its own credit, to take up obligations which have the colour of legality, which were allowed to be publicly issued, although a disclaimer could very easily have been made known to all concerned, and from which, moreover, the Government has received some credit. As to the first of these questions, we apprehend there will be very little doubt that the Roumanian Government may not be technically bound. The fact that the Stock Exchange Committee refused a quotation shows that even at the time something was thought to be amiss. But, as regards the points in the second question, we do not think the Roumanian Government can be acquitted. By not disclaiming at the time the acts of agents who, at least, had some authority, they have come under an equitable obligation to the public, who can seldom inquire into such points minutely; and it is also a strong point against them that, even if the work of construction has not advanced as stipulated by the concession, they have received benefit from it. It would be very sharp practice, indeed, to repudiate the acts of agents, or *quasi*-agents, so far as they constituted an obligation, while accepting some benefit from these acts. There is at least a case for a compromise, if not for the concession to the bondholders of all their demands. As the matter has excited some attention, we think it will be interesting to give the text of the Committee's report, which is as follows :—

The Committee, as you may be persuaded, has faithfully submitted to you its investigations on the documents furnished by the Minister of Finance; it also lays before you its conclusions on the several questions it has been called upon to decide.

As regards the question as to whether Mr Ambron was appointed in conformity with the Constitution,—the Committee declares that he was not appointed in conformity with the Constitution.

As regards the conditions on which the commissioner of the Government was appointed,—the Committee declares that those conditions were not in conformity with the deed of concession.

As regards the form of the bonds,—the Committee declares that it was not in conformity with the deed of concession.

As regards the emission of the bonds,—the Committee declares that it was not in conformity with the deed of concession.

As regards the Commission of inquiry sent to Berlin—The Committee annexes the report of the Commission.

Here follows a conclusion making personal charges against parties connected with the concession, which we omit; and the report then proceeds :—

As regards the public declaration made by Mr Stuge, the Committee declares that the Government Commissioner exceeded his powers.

As regards the demand of Mr Strousberg that the January coupon should be paid by the Government, the Committee declares that the State of Roumania is under no direct engagement towards the bondholders.

The above being the unanimous conclusions of the Committee, the undersigned, its reporter, has the honour, Messrs the Deputies, to submit them to your deliberation;

American Securities.—There have been no transactions of importance in the new American loan, and the quotation is quite nominal. The probability of the introduction of a large French loan, for which good security will be forthcoming, and which will bear a comparatively high rate of interest, has had an adverse influence upon the attempted issue of the Funding loan. The moment chosen is inopportune for the suc-

cess of the scheme, but the agents on this side look forward to its ultimate success. Meantime the old bonds have again rallied, though the quotations are still below those current immediately before the announcement of the new issue. Atlantic and Great Western Mortgage bonds have been in active demand. The annexed shows the fluctuations for the week :—

	Closing Prices last Friday.		Closing Prices this day.		Inc. or Dec.
United States 6 % 5/20 Bonds, exchng. 4/6	91¼ ⅜	.....	92¼ ⅛	+	⅜

Ditto 5 % Sterling Bonds	57 60	.....	57 60	...	...

JOINT STOCK BANK SHARES.—The transactions in this department have been less numerous than for some weeks past; nevertheless, the quotations for the leading institutions have been fully maintained. A relapse of ¼ has taken place in Agra and Roumania; ⅛ in Alliance, New Zealand, and in Chartered of India; but the other movements have been favourable. Anglo-Austrian shares have advanced 1; Metropolitan and Anglo-Hungarian ¼; Hongkong and Shanghae (new), London Joint Stock, and Merchant ½.

A report of the meeting of the Bank of England this week is given below. A dividend of 4½ per cent. was declared.

The report of the Merchant Banking Company of London (Limited), to be presented on the 23rd instant, shows a gross profit of 56,286*l* 8s 5d. of which sum 20,000*l* is applied to the extinction of the balance upon the amalgamation account, and 11,188*l* 5s to the payment of a dividend at the rate of 6 per cent. per annum.

TELEGRAPHS.—Considerable excitement has prevailed in the market for cable shares, resulting in heavy occasional advances. Anglo-American and Anglo-Mediterranean have been in request, and close at a rise of 6*l* and 10*l* per share respectively. Submarine stock advanced 4, and the scrip ⅛ on the week. French Cable shares are 1 higher; Great Northern, China, and Japan Extension, ⅛; Falmouth and Gibraltar, ¼; British Indian Submarine, ⅛; Hooper's Telegraph Works have risen ¼; and Silver's India Rubber ½. Telegraph Construction shares have been in active demand throughout the week, and close with firmness at 25½ to 26 ex all.

MINES.—More animation has prevailed in the demand for British mines, and a rather considerable business has been concluded. West Chiverton show a decline of 3, and East Lovell of 2½ on the week, while Great Laxey shares are ½ lower. On the other hand Great Wheal Vor have risen 2, Grenville and Tincroft ½, and East Grenville ¼. The chief feature in the foreign market is the demand for Eberhardts, which closed to-day at an advance of 3. St John del Rey are 1, United Mexican and Vancouver coal ¼ better; but there is a relapse of ½ in Cape Copper.

MISCELLANEOUS.—A steady feeling has prevailed in the miscellaneous market, and the movements have generally been of a favourable nature. Ironworks shares have been particularly firm, Bolckow-Vaughan showing a rise of 3, Ebbw Vale of ½, and Rhymney of 1 on the week. Financial shares are without much change, but General Credits are ¼ higher. Among other alterations are an advance of 2 in Canada, ⅛ in City Offices, ⅜ in Hudson's Bay, 1 in Madras Irrigation, and 1 in Scottish Australian Investment.

A shareholders' requisition was forwarded this afternoon to the Directors of the International Financial Society, requesting them to call an extraordinary general meeting of the shareholders on the subject of the charges recently made by Mr Hope in the address which we described. The requisition states :—

We, the undersigned, being the holders of more than Ten Thousand Shares, require you, in conformity with the Articles of Association, to convene an Extraordinary General Meeting of the Shareholders, for the purpose of investigating—

1st. The matter pertaining to the management of the interest of the Society in the Metropolis Sewage Company.

2nd ly. The general management of the property and assets of this Society.

3rdly. And of taking such action and passing such Resolutions as may appear to the Meeting to be necessary to give effect to the objects for which the Meeting is convened.

A prospectus is issued of the Buenos Ayres National Tramways Company (Limited), capital 140,000*l*, in 14,000 shares of 10*l* each. The object of the company is to increase the tramway accommodation of Buenos Ayres not only for the conveyance of passengers, but also for the conveyance of produce from the various markets and depots to the wharves and railways. Statistics are quoted to show the recent growth of Buenos Ayres and the likelihood of a large traffic, the tramways already established having been successful. It is also stated that the company will enjoy the benefit of important concessions granted by the provincial Government of Buenos Ayres. A deposit of 1*l* per share is required on application, and the balance is payable by instalments, terminating on the 1st of September, 1871.

The list of applications for shares in the Dominion of Canada Oils Refinery Company will close on Monday, the 20th inst., for London, and on Tuesday, the 21st, for the country.

The directors of the Rio and Janeiro City Improvements Company have resolved to recommend a dividend at the rate of 6½ per cent. per annum.

The meeting of shareholders of the Anglo-American Telegraph was held to-day, when the report of the directors was adopted.

EXCHANGES.—The principal change in the week is in the rate on Paris, the short exchange being 25 12½ to 25 25, as compared with 25 25 to 25 45, which we quoted last week. The exchange on Belgian towns has also varied a little in the same direction. There is thus an increased demand for the means of remittance to France, though there has been hardly any shipment of bullion as yet. On the other hand, there has been a diminished demand for bills on Italian towns, the rates on which are now quoted 27 5 to 27 15, instead of 26 90 to 26 95, which was the quotation last Friday. It would appear from this that there has either been a fresh depreciation of the forced currency, or that Italy is indebted to this country, so that an attempt to raise a new loan becomes the more likely. The variation in the rate, however, deserves the notice of Italian bondholders in consequence of the sudden action of the Italian Government lately in altering the price at which its coupons would be cashed in London. On the principle of the former alteration, there is no reason why a fresh change to the prejudice of the bondholders should not now be made.

BULLION.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week :—

Gold.—There has been a small purchase of gold coin by the Bank, but the demand for bars, although not active enough to cause withdrawals from that establishment, is yet sufficiently so to absorb all arrivals. The amounts now on the way to this country from Melbourne are large, and may be expected here about the 20th instant. The Roquette has brought 10,000*l* from Africa, and the Neva 23,500*l* from the West Indies.

Silver.—We have had some further large arrivals from India and New York during the past week, amounting to about 290,000*l*. The demand has not been very active, and the market may be considered as fractionally lower.

Mexican dollars.—The Wisconsin has brought about 446,000*l* from New York, and further amounts will follow. There is a demand for China at present for the old coinage at 58¾d per oz. The new issue, however, will only be taken for refining purposes, at 58⅜d. The outgoing Peninsular and Oriental steamers of the 19th inst. will take a rather large amount of this coin for China and the Straits.

Exchange on India for banks' drafts at 60 days' sight is 1s 10⅝d to 1s 10¾d per rupee. The Council bills allotted yesterday realised the same prices as on 1st inst., the minimum as before was 1s 10¼d. Applications on Calcutta and Madras, at 1s 10¼d, received 12 per cent. and on Bombay, at 1s 10⅝d, 97 per cent. The sums granted were—to Calcutta, 298,000*l*; to Madras, 2,000*l*; and to Bombay, 100,000*l*.

Indian Government loan notes are higher this week; our quotations are 92 to 92¼ for the 4 per Cents.; 100 for the 5 per Cents.; and 107 to 107½ for the 5½ per Cents.

Quotations for bullion.—Gold—Bar gold, 77s 9d to 77s 9½d per oz std; ditto fine, 77s 9d per oz std; ditto refinable, 77s 11d to 78s per oz std; South American doubloons, 73s 8d to 74s per oz; United States gold coin, 76s 3d to 76s 3½d per oz. Silver—Bar silver, 5s 0⅛d per oz std, last price; ditto containing 5 grains gold, 5s 0⅜d to 5s 0½d per oz std; Mexican dollars, 4s 10⅝d to 4s 10¾d per oz, last price.

There were no bullion operations at the Bank of England to-day.

According to to-night's *Gazette*, the imports of the precious metals into the United Kingdom during the week ended March 15 were :—Gold, 160,581*l*; silver, 743,046*l*. The exports were :—Gold, 17,026*l*; silver, 125,476*l*.

MEETINGS OF COMPANIES NEXT WEEK.

Monday, March 20.

Bank of Australasia, general, 4 Threadneedle street.
Royal Sardinian Railway, general, *pro forma*, Florence.
City Offices, general and extraordinary, 28 Palmerston buildings, Old Broad street.

Tuesday, March 21.

London Street Tramways, general and special.
Van Diemen's Land, general, 31 Finsbury circus.
London Bank of Mexico and South America (Limited), general, 144 Leadenhall street.

Wednesday, March 22.

Glasgow and South-Western Railway, general, Glasgow.
Canada, general, 1 East India avenue.
City Terminus Hotel (extraordinary).

Thursday, March 23.

Brazilian Street Railway, general, 35A Moorgate street.
City of Buenos Ayres Tramways, general, 4 Great Winchester buildings.
Merchant Banking Company of London (Limited), general, 112 Cannon street.
Metropolitan and St John's Wood Railway, special general, 3 Old Palace place.

Friday, March 24.

Cagliari Gas and Water (Limited), general, 2 Moorgate street.

MARCH SETTLEMENT.

Ticket Day—March 30th.
Account Day—March 31st.

NOTICES AND REPORTS.

THE BANK OF ENGLAND.

A half-yearly general court was held on Wednesday, at the Bank, "to consider of a dividend." The Governor of the Bank, R. W. Crawford, Esq., M.P., presided. The minutes of the last court was read by Mr Hammond Chubb, the Secretary. The Governor said this was one of the half-yearly general courts appointed by law for the making of a dividend. The net profits for the half-year ending the 28th of February last were 659,994*l* 14s 3d, making the amount of rest on that date 3,667,626*l* 14s 7d; and, after providing a dividend of 4*l* 10s per cent., the rest will be 3,012,741*l* 14s 7d. The court of directors, therefore, proposed that a half-year's dividend be made on the 5th of April next of 4*l* 10s per cent. without deduction on account of income tax.——Mr William Botley said he begged respectfully to second the resolution for the adoption of the half-year's dividend. Looking at the period through which they had passed, at the war on the continent, and at the fact that the monetary state of this country had not been so sound as could be desired, he thought the proprietors might congratulate themselves upon the fact that the weekly returns of the Bank had been so steady and satisfactory; and that the stock maintained the price which it had done for some time past. There was another thing which, perhaps more than anything else showed the public confidence which existed in the Bank; there had not been, for the last two or three years, any of those self-constituted Doctors of Currency, with their pamphlets, for people were better acquainted with the financial condition of the Bank; and no doubt those self-constituted Doctors of Currency had thrown their pamphlets into the waste-paper basket, and their self-written diplomas into the fire. They had reason to be satisfied with the directors generally, and they had more especial reason to be pleased that they had a governor who occupied a seat in the House of Commons, and was enabled to express his opinion on those important questions relating to currency which were so often before the House. ——The Rev. M. J. Taylor thought that, in one important particular, the existing rules might be rescinded with advantage, namely—the rule relating to the non-acceptance of money on deposit. It appeared to him that, if this rule were rescinded, and the same advantages offered by the Bank of England to depositors as were offered by the joint stock banks, a vast amount of idle capital would flow into the coffers of the Bank of England, and afford increased facilities for the negotiations of loans, which, from the increased perturbation of the times, would no doubt be greatly in advance of the average of loans in late years.——Mr I. Gerstenberg said that the mere fact of the Bank of England taking money on deposit would not have the effect, with respect to the negotiation of foreign loans, which the last speaker seemed to think. No doubt it would concentrate in the coffers of the Bank of England a large amount of money, but he did not see how it could be made available for the purposes of foreign loans. The fact was that the private and public banks and the discount houses carried out the operation referred to by the last speaker, but there was a rule by which the Bank of England was excluded from advancing money on foreign securities. And that led him to make a suggestion to the court. No doubt, as the previous speaker had said, the proprietors were extremely satisfied with the manner in which the business had been managed, and no one would for a moment wish to suggest to the court of directors the mode or method in which they should carry on their business, or how they should employ their money. The court of directors, from their great practical experience, were the best judges of what was best to be done; but he would venture to make this suggestion—that the Bank of England should take upon itself the option of making advances upon foreign securities. He thought that it would be better for the Bank of England to take the power to do so under exceptional circumstances, and in cases where the court of directors thought it judicious to do so. In times of panic, large houses had been brought to the verge of stopping payment, when they had large assets in hand, simply because they could not raise money on foreign securities; and the Bank of England, which perhaps was the only institution which could have advanced the money, was forbidden by its rules from doing so. A similar rule existed in the Bank of Prussia, and in other continental banks; but when the late war broke out, and the rate of discount went up to 10 per cent., a large amount of American securities were thrown upon the market; but the Bank of Prussia saw the necessities of the moment, and they passed a resolution that they would make temporary advances upon such securities upon certain terms and conditions. The result was that the rate of discount fell from 10 to 5 per cent., and financial confidence was restored. He thought that the time was come when the Bank of England should no longer ostracise such foreign securities. Several of the foreign loans offered good securities, and he thought that advances might be made upon them with such margin and on such terms and conditions, as the court might prescribe. He certainly thought the time was come for the Bank to carefully consider the matter; and, if it could be carried out, he thought it would be looked upon as a graceful act of courtesy and justice to foreign nations, and contribute to the development of international good feeling.——Sir David Salomon, M.P., said he should be sorry to see the Bank of England turned into a pawn-shop. He thought that the Bank of England was established to assist trade and commerce, and to discount commercial bills; and he had never known those who had good security to offer to fail in obtaining the necessary accommodation. The directors of the Bank did not require the instructions of that court with respect to what securities they should lend upon; but he certainly thought it would very much damage the character of the Bank of England if it

were known that its money was locked up in loans on foreign securities, so that when the time of peril and trouble came it would not be in a position to render legitimate assistance to the merchants requiring it. He therefore protested against the doctrine that the Bank of England should advance money on foreign securities. He agreed with Mr Gerstenberg that it was desirable that the loanable capital of the kingdom should be distributed amongst the joint stock and other banks rather than concentrated at the Bank of England. He protested against the suggestion that this house should depart from the sound principles which it had hitherto adopted, and become a place for loans, whether upon Five-Twenties or any other sort of foreign securities. Mr Jones made some observations with respect to what he thought the policy of the Bank should be. Mr W. Smee having made one or two observations, the chairman, in reply, said he thought it desirable that any observations which were made should have reference to the business of the Bank; therefore, as much which was said by Mr Jones had no reference to the Bank, but referred to other matters, the proprietors would excuse him from following Mr Jones's remarks. With respect to the law influencing the balances at the Bank, that was a matter which had frequently been discussed, but he did not see any ground whatever upon which the course which was suggested could be successfully carried out by the Bank. With respect to the foreign business which Mr Gerstenberg alluded to, he thought that "sufficient for the day was the evil thereof," and whenever a day of pressure and peril arrived for the City, he hoped that the Bank of England would be found ready to administer such relief as might be consistent with its rules. For his own part, he had never known the Bank of England to refuse assistance to those in want of it, provided they had sufficient security to offer. With respect to the observations made by Mr Smee, as to the Bank undertaking trusteeships, such a duty would be foreign to the duty of the Bank, as administrator of the public funds, and he thought it would be inexpedient for the Bank to undertake such trusteeships. With respect to the Bank Holiday Bill, that was not the proper time or place to discuss that matter, the whole subject was now under discussion in the House of Commons, and no doubt there were a number of gentlemen in the House sufficiently acquainted with the wishes and feelings of the community at large to bring its advantages or disadvantages before the House. The resolution for the adoption of the dividend was then put to the meeting, and carried. Sir D. Salomon, M.P., proposed a vote of thanks to the governor and court of directors, and said it was exceedingly gratifying to see the accord which existed between the Bank of England and the various commercial classes of the city. There was no doubt that in July last the general opinion was that the Bank of England would be very much tried by the war which had then broken out, and it must be a matter of surprise to everyone to find that the Bank rate, instead of being exceedingly high, had been particularly low. There was no doubt that a great responsibility had fallen upon the Bank of England in conducting monetary affairs during the past few months; and there was no doubt also that the business of the Bank had been conducted with marked success, and that was the general feeling, not only in London, but throughout the country. The term of Mr Crawford's duty as governor of the Bank was now about to expire, and there was no doubt whatever that during the past year the governor's duties had been more onerous and responsible than the duties of the former governor; for, on the former occasion, the governor had the support of gentlemen eminent, in every respect, as Members of the House of Commons. He supposed that the City of London, and especially the Bank of England, was never more ably or better represented in the House of Commons than last Session; but in the present Session, the responsibility of answering for the Bank had fallen upon Mr Crawford, and everybody would admit that the duties were never better performed. He therefore proposed a vote of thanks to the governor and court of directors for the ability with which they had conducted the affairs of the Bank during the past six months.—The resolution was seconded by the Rev. M. J. Taylor, and carried unanimously.—The chairman said he could assure the court that he was very sensible of the kind manner in which the proposal made by his friend Sir David Salomon had been received. To be the governor of the Bank of England was the highest position in the mercantile world to which any commercial man could aspire; it was a position, no doubt, of fatigue, anxiety, and responsibility; and nothing could be more gratifying to anyone who had passed through his term of office as governor than to find such attention and assistance as he had been able to render to the establishment and its proprietors were acknowledged in the way in which his own services had been acknowledged that day. Happily, his own term of office had not been marked (as some of his predecessors' had been) by a period of disturbance in the commercial world; the anxieties of the directors in that respect had been few, and therefore they had been enabled to address themselves more than usual to matters of a commercial character, both with respect to the internal arrangements of the Bank and also the establishment by which the business was carried on. He had referred to the labour and fatigue connected with the duties of the governor of the Bank, but there were some considerations which made those duties comparatively light. He had had access to the counsels of those gentlemen who had preceded him in the chair; in the next place, he had had at his command the most able and experienced legal advice—advice which had never been known to fail the Bank at any time; he had also an able and competent staff at his command; and he ventured to say that there was not, in any public or private establishment in the whole kingdom, an establishment so thoroughly competent as the officers of this Bank, and upon whose experience, in the conduct of the business, the directors could so much rely. It was not an unimportant consideration that the business of the Bank of England was now conducted upon principles, and carried out in practice, upon rules which were thoroughly well understood by the community at large; and he ventured to hope that, so long as those principles were recognised and carried out in practice, the Bank of England would never lose one atom of the prestige which belonged to it, or its power of being possessed of such authority in the affairs of the country, and its capability of taking its proper part in times when the community looked to the Bank of England for its advice, counsel, and assistance. The meeting then broke up.

STOCKS.

Massachusetts 5 per Cent. Sterling Loan.—Special settling-day—the 15th March.

Peruvian 5 per Cent., 1865.—The bonds for 328,000*l*, which were drawn on the 1st January, will be paid off on the 1st April.

RAILWAY COMPANIES.

Cork and Limerick Direct.—At the meeting, a 2½ per cent. per annum dividend was declared; and the Bill for the transfer of the company to the Great Southern and Western was approved. The ordinary shareholders will receive 60 per cent. in Great Southern and Western stock.

Danube and Black Sea.—The capital account to the 30th of November, 1870, showed that 567,561*l* had been expended, leaving a balance against the company of 7,950*l*. The revenue account for the year ending the 30th of November, showed that 44,067*l* had been received as compared with 59,378*l* in the preceding year, showing a decrease of 15,311*l*. The expenditure, including 12,160*l* for interest on mortgage bonds, amounted to 44,956*l*, leaving a balance against revenue of 888*l*, as compared with 44,042*l* in the previous year, which left a balance of 15,336*l* in favour of revenue. The war had very seriously interfered with the traffic, and large accumulations of grain in Wallachia had been the result. A convention had been concluded with the Turkish Government, and Kustendjie would henceforth be a free port.

Dutch-Indian Railway 5 per Cent. Guaranteed Loan.—Messrs Samuel Montague and Co. have received applications for 189,000*l* in 100*l* bonds, at the price of 90*l* 10s per bond. The money is required to complete the Java lines; and the Dutch Government guarantees 64,830*l* to the Company, of which 11,440*l* is unappropriated, and is therefore assigned as security for this loan. The redemption at par will be provided by annual drawings between October next and 1906. Interest payable on the 1st of October and the 1st April.

Glasgow and South-Western.—Half-yearly revenue accounts contrasted:—

	1869-70. £		1870-71. £
Gross receipts	322,557		344,295
Working expenses	141,403		152,753
Net revenue	191,154		191,542
Add previous balance	4,121		2,611
	195,275		194,153
Preference charges	88,467		86,841
Available for dividend	106,808		107,312
—on the ordinary stock at the rate of 5½ per cent. per annum	102,623	(5½ % p.a.)	104,216
Surplus	4,185		3,096

Capital Account.

	Expended. £		Received. £
To 31st July, 1870	7,245,784		7,201,796
During the half-year	106,029		147,395
Total, 31st January, 1871	7,351,813		7,349,191

Estimated capital outlay during the current half, 98,406*l*. An exceptional interest item of 4,439*l* in the corresponding period caused the falling off in preference charges shown above. The branches between Cumnock and Ayr and the Dalmellington line are nearly completed; and the joint line to Kilmarnock has been partially opened, as well as a portion of the Glasgow Union railway.

Harrowdale.—Net balance, 1,920*l*; dividend announced at the rate of 7½ per cent. per annum.

Metropolitan District.—Capital expended, 4,677,040*l*; estimate further outlay, 965,000*l*, including the cost of new rolling stock to be paid for in ten half-yearly instalments. The termination of the agreement with the Metropolitan will

necessitate the Company's providing this rolling-stock; but the board express themselves willing to issue a thorough service between the two railways. The 300,000*l* debenture stock was all placed at 2 per cent. premium. The Cannon street extension is in progress, and is contracted to be finished by the beginning of July. The agreement with the London and North-Western, by which, in consideration of a contribution of 100,000*l* and certain tolls, the Company will be allowed to run trains to Cannon street is also referred to in the report. The trafic continues to increase.

North British.—The traffic receipts for the half-year amounted to 766.400*l*, and for the corresponding half to 762,400*l*, showing an increase of 4,000*l*. The expenditure amounted to 412,086*l*, and for the corresponding period to 408,262*l*, showing an increase of 3,824*l*. Out of the free revenue, the directors recommend the payment of dividends on the preference stocks, and on the Edinburgh and Glasgow preference (ordinary) stock, at the rate of 2¼ per cent., as compared with 1¼ per cent., which absorbs 182,337*l*, and leaves 326*l*. The capital expenditure amounted to 20,363,286*l*, including 100,960*l* during the half-year. The standing arbitrator has decided that the North British company had substantial grounds of complaint against the Caledonian and has awarded damages. On the completion of the Tay bridge the company will be relieved of ferry charges and tolls of nearly 25,000*l* a year, while the dividend of 5¼ per cent. on the reduced capital for the bridge of 335,000*l* will not absorb more than 17,587*l*, thus leaving a substantial saving of the company. The Coat bridge separated undertaking was partially opened for passengers on the 23rd of November last, and the traffic passing over it has more than justified the expectations of the directors. By the completion of the Midland line from Settle to Carlisle, the board believe they will be enabled to secure a fair share of the English and Scotch traffic.

Monmouthshire.—The report, which showed that the revenue for the half-year amounted to 84,025*l*, as compared with 79,055*l* in the corresponding half of 1869, and the net receipts to 41,019*l*, against 38,399*l* was adopted, and a dividend at the rate of 6 per cent. per annum was declared.

Scinde Railway.—The vacant seat at the board of the Scinde, Punjaub, and Delhi Railway, caused by the death of the late Sir Herbert Maddock, has been accepted by Sir Donald F. M'Leod, late the Lieutenant-Governor of the Punjaub, who has, at the same time, been elected deputy-chairman of the company.

Swedish Central Railway, Limited.—Capital, 165,000*l*, in 10*l* shares, and 495,000*l* in debentures; issue of 150,200 shares, The object is to purchase the concession of a line of 60 miles in length, which has already been commenced, from Frovi to Fahlun and Ludvika, running through a country very rich in iron and other minerals. Large dividends are looked for. The "Gelfe-Fahlu," a neighbouring line, already pays 14 per cent.

BANKS.

Ionian.—A dividend at the rate of 8 per cent. per annum is announced.

ASSURANCE COMPANIES.

London Assurance Corporation.—A dividend of 45s per share, free of income tax, is announced for the past half-year.

Reinsurance Company, Limited.—Creditors are required to send particulars of claims to the liquidator by the 1st of April.

MISCELLANEOUS COMPANIES.

Brazilian Street Railway.—The annual meeting will be held on the 23rd instant, when it will be proposed to make a further issue of shares. The report shows an increase in the receipts of about 14½ per cent. over the previous year, and recommends a dividend of 6¼ per cent. for the six months ended the 31st of December (making 12½ per cent. for the year), which will absorb 4,041*l*, and leave 744*l* to be carried forward.

City of Buenos Ayres Tramways.—The whole line, 962 miles in extent, was opened on the 18th October last; and all issued capital has been called up. The traffic is stated to be good and increasing rapidly. It is proposed to extend the lines, and to issue the 25,000*l* capital at yet unallotted.

City Offices.—The report announces a dividend of 1s 9d per share. All possible economies have been enforced. Some important additional lettings have recently been effected.

London and County General Agency Association, Limited.—Mr Barrow, of Gresham street, has been appointed official liquidator.

North British Australasian.—A special meeting will be held on the 31st instant, "for the purpose of renewing the authority of the directors to create and issue such portion as has not already been issued of the 32,565*l* Six per Cent. Guaranteed Stock of the company, authorised to be issued by resolutions of the special general meeting held on the 17th day of May, 1864."

Van Diemen's Land.—The report shows an available total of 2,292*l*, and recommends a dividend of 4s 6d per share, which will absorb 2,025*l*, and leave 267*l* to be carried forward.

AVERAGES OF GRAIN.

The following is a statement showing the quantities sold and the average price of British Corn (Imperial measure), as received from the Inspectors and Officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended March 11, 1871:—

	Quantities Sold.	Average Price.
	qrs bush	s d
Wheat	74,159 5	53 8
Barley	39,340 4	36 0
Oats	8,411 0	24 10

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The wheat trade ruled firm to-day, and the full rates of last week were more readily paid than on Monday last. The severity of the weather has had a hardening influence upon the quotations, and there have been large transactions in grain off the coast at extreme rates. Flour has been inquired after at very full currencies. The demand for seed barley has caused a slight advance in the value of all descriptions, while maize and oats have changed hands at firm prices. Beans and peas have ruled quietly. This week's imports of foreign and colonial produce into London have amounted to 8,720 quarters of wheat, 4,300 barley, 250 oats, 1,963 beans, 1,370 sacks and 8,460 barrels of flour.

At Liverpool and Wakefield this morning there was a steady demand for wheat, and the tendency of prices was in favour of holders.

The Liverpool cotton market opened dull on Friday last, and a slight decline in prices was submitted to. On Tuesday, however, the demand improved, and with smaller figures from American ports, there has since been a fair business done.

Quotations for American descriptions have advanced $\frac{3}{16}$d per lb. East Indian and Bengals, however, are not in such good request, and show a decline of $\frac{1}{16}$d to $\frac{1}{8}$d per lb since this day week. The total sales are 78,790 bales, of which the trade have taken 57,580 bales, speculators and exporters 21,210 bales. The imports for the week are 128,268 bales, the actual exports 34,880 bales, and to-day's stock is 804,500 bales. To-day the market closes firm. Sales, 12,000 bales.

At New York, on the 16th inst., middling Upland cotton was quoted at 15½ cents per lb. Telegrams from Bombay to March 11 report the cotton market dull at 170 rupees for fair Dhollerah.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, February 18:—The telegraph lines have been working well during the week, and we have been in almost daily communication with the home markets. Liverpool advices continue steadily to point to easier rates for cotton, and the public telegram of the 16th announces a further decline of $\frac{1}{16}$d, making spot Dhollerah 6¼d per lb, but from private messages of the same date it would seem as though that quotation were barely maintained. During the first half of the week no impression was made upon values in this market, as a demand existed, necessitated principally by the pressure of freight engagements, which absorbed nearly all the supplies received from day to day by rail and sea. On Thursday, however, the influence of the unfavourable home news began to show, and in yesterday's market quotations were generally 3 rs to 7 rs lower than those given in our last issue. The week's business sums up to a total of 3,500 candies, of which nearly one-half consists of second quality Oomrawuttee, Khandeish, and Barsee at prices varying according to quality. A few transactions took place in both new machine and Churkad Broach at prices ranging from 210 rs to 207 rs for the former, and 199 rs to 196 rs for the latter. In the up-country markets matters continue most unsatisfactory, although latterly holders of stocks have shown symptoms of a willingness to concede slightly in prices. Our latest telegrams from Oomrawuttee quote 195 rs to 197 rs for full-pressed bales, against about 201 rs per candy when our last report was written. Accounts from Broach report that arrivals of new cotton are on the increase, but holders still demand extravagant rates—210 rs for full-pressed machine-ginned, and 200 rs for best quality native-ginned, being the current quotations. Advices from the Dhollerah districts continue much in the same strain as those which have been reaching us for some weeks past. The crop will be an early one according to all accounts. From Tinnevelly we have a telegram, dated 17th instant, quoting 112 rs per candy.

EXPORT of COTTON from BOMBAY to Feb. 17.

Actual exports since last mail left, 15,331 bales.

The Imperial Ottoman Bank advises as follows:—The report is dated Alexandria, March 3.—There has been no business in cotton since Wednesday, owing to the Mahometan holidays of Courban Bairam. Previously there had been great dulness on account of the depressing advices received from Liverpool, and the few buyers offering were chiefly seekers of good fair, with staple, which is daily becoming more difficult to find. The stock on the spot is rapidly increasing, and may now be estimated at about 200,000 cantars. We quote as before, but the market will probably open a fraction lower if there is no improvement in Liverpool.—Good middling, 7¼d per lb, f.o.b.; fair open, with staple, 7¼d, ditto; good fair, with staple, 8¼d, ditto; fully good fair, 8¾d to 8¾d, ditto; fine, 11d to 13d, ditto. Shipments from February 24th to March 3rd:—England, 6,484; Italy, 551; America, 1,000—total, 8,035 bales.

There has been little animation in the colonial produce markets this week. Sugar has sold slowly, and the tendency of the quotations for both raw and refined goods has been in favour of buyers. Coffee has come forward in limited quantities, but the supply has been quite equal to the demand. Rice has been in moderate request on former terms. Cocoa is unchanged in value. The tallow market closed with steadiness.

Messrs J. D. Campbell and Co., of Port Louis, writing on February 10, observe:—Towards the end of January there was a considerable amount of business done in sugar, chiefly in whites for Australia, at from equal 15c to 20c advance on former prices. In a few days this advance was lost, and the market became dull. To-day, 8th (owing probably to the news per Thomas Brown), it has been somewhat active, at about our quotations below. Most of the finer yellows have passed from first hands, Fortesh and Labourdonnais at 87 25, and Esperance at 87 40. Fine yellow crystals are scarce, and rations somewhat neglected. In grey vesou there has been some business, but the market may be considered as about closed for the season for this description of sugar. The chief movement during the month has been in grey syrups. About a fortnight since heavy purchases—about forty thousand bags—were made, at prices fully equal to our last quotations (nominal) for the lower numbers, and for No. 11 up to $6.25, and for No. 12 as high as $6.50. The prices are, however, difficult to quote with exactness, many lots having been bought in assortment at a price overhead. Before the arrival of the Thomas Brown the sugar market might almost have been described as weak; but it seems firm at present, and there are several reasons why prices are not likely to be allowed to recede. The stock is not heavy for the time of year. There is a large quantity in regular shippers' and other second hands, and the accounts are good from all quarters except from Bombay, the demand for which market is always fitful, and may revive at any moment. Statement of sugar shipped from 11th January to 9th February, 1871:—To France, 897 tons; to United Kingdom, 2,863; to Bombay, 1,475; to Melbourne, 2,162; to Sydney, 387; to Adelaide, 934; to New Zealand, 578; to Cape Colonies, 317; to other places, 1,166 tons.

The following report, dated February 7, has been forwarded by Messrs Fryer, Schultze, and Co., of Colombo:—The shipping business of the past fortnight has been conducted with unabated activity, the weather having been highly favourable, and produce in Colombo stores abundant. A good deal of coffee is now afloat, and the clearances outwards during the fortnight have been numerous, showing the distribution of crops as under:—

PLANTATION COFFEE.

	1870. cwts.		1869. cwts
To Great Britain.....	253,487	.....	236,424
Foreign ports.....	10,580	.....	2,850
Australia and India ...	7,218	.....	6,519
	271,285	.....	245,793

NATIVE COFFEE.

To Great Britain	29,199	.....	23,320
Foreign ports.....	10,707	.....	4,233
Australia and India ...	1,262	.....	1,592
	41,168	.....	29,145

The receipt of telegraphic advices from Europe, quoting coffee at an advance of 4s, has had very slight influence on our market, and although our last extreme quotation of 12s 4½d has been since paid for very superior choice parcels, the general quotation for fine high-grown plantation coffee is 12s, at which some business has been done. The transactions in ordinary parchment have not been numerous, at 10s 9d to 11s 3d. We hear of very little business in ordinary native coffee, the arrivals of which from the interior continue on an insignificant scale.

The annexed is dated Rangoon, February 6:—The inquiry for Natsain rice has become very active, in consequence of the steadily-improving advices about our staple from the home markets; and as supplies here are not so large as they were expected to be by this time of the year, some shippers have become very eager buyers, and our market has taken an upward tendency. However, as most exporters are aware of the danger of raising prices at the beginning of the season, the nominal rate for paddy has only in a few instances advanced from 55 rs to 56 rs per 100 baskets, but purchasers have reduced the paddy-measure from 3 to 4 per cent., which makes, of course, the rice dearer. Our to-day's quotations are 121 rs to 123 rs per 100 baskets, 5 to 6 parts Natsain rice, equal to 5s 4¾d to 5s 5¾d per cwt, f.o.b., at the current rate of exchange, 1s 11½d per rupee. Tonnage has of late been arriving rather freely, and the vessels in port loading rice for Europe now aggregate 23,995 tons burden. The following are the exports of new rice up to date:—To Europe, 2,358 tons; to Straits and China, 1,902 tons.

Annexed is Messrs William Moran and Co.'s indigo report, dated Calcutta, February 14:—Since the departure of last mail, one public sale has been held, including about 100 chests of European indigo, the remainder consisting almost entirely of low and common gauds, rejections, and rubbish. The former sold briskly at full prices, but a large proportion of the latter was bought in, although very high prices were bid. Of the lower qualities a good deal is last year's indigo. Exports of indigo from 1st November, 1870, to 11th February, 1871:—To Great Britain, 15,641 chests; to France, 242 chests; to Trieste, 2,781 chests; to foreign Europe, 250 chests; to America, 1,827 chests; to Gulfs and Levante, 1,594 chests—total, 22,335 chests.

The annexed is dated New York, March 3:—The volume of trade is moderate for the season, with small margins of profit in all mercantile transactions, and less than the usual degree of speculative animation. As regards the home trade, buyers show a decided reluctance to anticipate their current requirements to any considerable extent, and as sellers are beginning to manifest a little impatience at the slow rate at which goods are passing into consumption, there is not that

degree of buoyancy in commercial circles that we have been accustomed to witness at this period of the year in more prosperous times. With regard to the export trade, the expectations of increased activity, as a result of the cessation of the European war, have not thus far been realised. Gold has ruled quite steady, though closing a shade firmer, under an increased demand yesterday for duties and anticipations of increased remittances, consequent upon the advance of half per cent. in the Bank of England rate. Foreign exchange also closed a shade firmer, in sympathy with the gold market. The recent revival of speculation in stocks, after a period of inactivity and depression, involves an increased demand for money on call, and rates of interest are the turn higher. The supply is so ample, however, that the demand is readily met at 4 to 5 per cent. Discounts remain 6 to 7 per cent. for prime short date mercantile paper, and from 8 to 10 to 12 per cent. for long dates and second class signatures. Some transactions in the new Government 5 per cent. bonds are thus early recorded.

THE COTTON TRADE.

LIVERPOOL.—March 16

The cotton market opened this week with continued dulness, but during the last few days there has been an increased demand, and prices have gradually advanced, closing for some descriptions ⅛d to ¼d per lb over last week's quotations. Sea Island has again been in limited demand, and in some instances rather lower prices have been accepted. American was freely offered, but as the week advanced holders have shown more firmness, and the useful qualities becoming scarce advanced ⅛d to ¼d per lb, whilst the inferior grades continue abundant and difficult of sale. New York advices to the 16th instant quote middling Upland 15⅛ cents, costing to sell in Liverpool 7⅛d per lb, by steamer. Brazil has been more inquired for, and has partially advanced ⅛d per lb. Egyptian in the early part of the week was pressed for sale at irregular prices; since Tuesday there has been an improved demand, and the quotations of last Thursday are resumed. East Indian has been in improved demand, but the market is very freely supplied, and the better sorts are ⅛d per lb lower.

In cotton to arrive the business continues extensive, at advancing rates. The latest quotations are—American, basis of middling, from any port, not below good ordinary, April-May delivery, 7⅛d; May-June delivery, 7⅛d; from Mobile, February shipment, 7⅜d; ship named, at sea, 7⅛d; low middling Savannah, March shipment, 6⅞d; Texas, March-April shipment, 7d; Mobile, stained, March shipment, 6⅞d; Orleans, from Memphis, *via* New York, not below good ordinary, 7⅛d; Dhollerah fair new merchants, Cape, April-May shipment, 5⅞d; Oomrawuttee fair new merchants, *via* Cape, March-April shipment, 5 1/16d per lb.

The sales of the week, including forwarded, amount to 78,790 bales, of which 6,700 are on speculation, and 14,510 declared for export, leaving 57,580 to the trade.

March 17.—The market opens with a general demand at full prices, and the sales will probably amount to fully 12,000 bales.

The above figures show:—

	Bales.
An increase of import compared with the same date last year of	640,950
An increase of quantity taken for consumption of	79,540
An increase of actual exports of	79,340
An increase of stock of	509,530

In speculation there is a decrease of 56,040 bales. The imports this week have amounted to 128,268 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to March 11) is 335,000 bales against 320,000 bales last year. The actual exports have been 34,890 bales.

LONDON.—March 16.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

Our market opened heavily on Friday last, with rather easier rates; but since Monday there has been an improved demand, and at the close prices are occasionally ⅛d dearer than last week for cotton on the spot. For arrival a large business has been done, the latest transactions showing an advance of ⅛d to ¼d per lb.

NEW YORK.—March 3.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, March 3. From the figures thus obtained it appears that the total receipts for the seven days have reached 126,935 bales, against 136,661 bales last week, 141,957 bales the previous week, and 161,095 bales three weeks since, making the total receipts since Sept. 1, 1870, 2,917,616 bales, against 2,189,513 bales for the same period of 1869-70, showing an increase since Sept. 1, this year, of 728,103 bales. The exports for the week ending this evening reach a total of 141,872 bales, of which 99,400 were to Great Britain and 42,472 to the continent, while the stocks at all the ports, as

made up this evening, are now 659,708 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night :—

Week ending March 3.	Exported to		Total this week.	Same week 1870.	Stock.	
	Great Britain.	Continent.			1871.	1870.
New Orleans	40418	28754	69172	24416	266324	254986

All other ports	1981	1646	3627	254	32000	32500
Total	99440	42472	141872	54522	659708	568764
Total since Sept. 1	1095715	352591	1848306	1228014	...	...

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 87,350 bales, while the stocks to-night are 90,944 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to Feb. 24, the latest mail dates. We do not include our telegrams to-night, as we cannot ensure the accuracy or obtain the detail necessary by telegraph :—

The natural result of the accumulating receipts has been reached the past week in a decline of ⅛c for middling Uplands, and of ¼c for ordinary. All other considerations have been lost sight of; even the settlement of the difficulties in Europe has had no influence, as the cotton which is pouring in at the southern ports is thought to furnish the surest proof that the supply is more than sufficient to meet any possible demand. Under this accumulation of stock, holders have lost heart, so that offerings have been largely attended with considerable pressure to sell. At the same time buyers have held off, spinners taking only to a limited extent, while shippers have been prevented from purchasing freely on account of the dullness and lower rates at Liverpool. The close to-night was without any improvement in tone, the market continuing depressed, middling Uplands being quoted at 14⅛c, and low middling at 13⅞c. For forward delivery there has been a corresponding decline on the earlier months, and from ⅛c to 1⅛c on the later rates, showing the prevailing sentiment as to the effect of the increased estimates of the crop. The closing quotations were for March, 13⅝; for April, 13⅞; for May, 13⅞; for June, 13⅞; for July, 14; and for August, 14⅛. The total sales of this description for the week (including 2,050 bales free on board, but not including bales "exchanged"), have been 101,750 bales. For immediate delivery the total sales foot up this week 18,965 bales, including 1,784 bales to arrive, of which 4,145 bales were taken by spinners, 288 bales on speculation, 13,771 bales for export, and 761 bales in transit. The following are the closing quotations :—

* A new count of stock was taken at Memphis this week, and 8,221 bales added to stock.

These totals show that the interior stocks have increased during the week 4,903 bales (being now 21,901 bales more than for the same period last year), while the aggregate receipts are 15,389 bales more, and the shipments 6,268 bales more than for the corresponding period of 1870.

The exports of cotton this week from New York show an increase since last week, the total reaching 19,010 bales, against 14,571 bales last week. Below we give our table, showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1870; and in the last column the total for the same period of the previous year :—

N.B.—Since the publication of the Return on the 8th instant it has been discovered that certain figures under the headings "American" and "East Indian" have been taken into account twice over, which necessitates the issue of this amended return.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, March 16.—There has been a fair amount of business done during the past week and extending to nearly all the departments of our trade. Prices, which for some time past have been in favour of buyers, have now steadied, and spinners and manufacturers adhere firmly to their quotations—the improved tone of the cotton market is the chief cause of the firmness in prices here. Buying for India and China is for the last few days in abeyance, as the latest telegrams from these places are not encouraging to increase the heavy contracts already existing. The demand for the smaller markets abroad is on a fair scale, and their is still a good business doing in home trade fabrics. Stocks of all kinds continue exceedingly light, the demand being apparently quite equal to the production. The market closes quiet, but very steady in tone.

Messrs Alexander Collie and Co. received the following telegram from Manchester yesterday:—Large business has been done this month, and spinners and manufacturers are again under contract; prices in consequence are very steady, but no advance has been established.

LEEDS.—The woollen cloth markets were only thinly attended by buyers. Small parcels of a miscellaneous character were purchased by the representatives of Leeds, Bradford, and other houses. In hair-lists and other plain cloths a moderate business was done. Wools, woollen yarns, and goods are alike firm in price.

BRADFORD.—A fair amount of business continues to be done in wool, with a slightly upward tendency in price. Rates which buyers would not have entertained a week or ten days ago are now readily obtained. Spinners who have entered into contracts are seeking to cover them with wool, and there is a fair consumptive demand, at slightly improved rates. Choice lots are the most eagerly sought. There is no appreciable change in the yarn market. Spinners are well engaged, and seek higher rates. There is also a rather better demand in the piece market, prices being very firm.

BIRMINGHAM.—In the absence of any large export demand the iron trade of this district continues very quiet. The firmness of the pig market has caused a slight advance this week in some of the cheaper descriptions of finished iron, though the only result thus far has been still further to check business.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, MARCH 3.

The market for flour and grain the past week has not been active, but prices have ruled very firm, with flour, wheat, and corn showing some advance. The receipts of flour have been moderate, and prices have ruled firm. During Saturday and Monday there was considerable speculation, but this subsided on Tuesday, and the market has since been somewhat unsettled, with buyers of lines of shipping extras at $6.75 to $6.85, and selling at $6.90 to $7, delivered, and this difference has been sufficient to prevent much business being done. The local trade has been active, and the medium and better grades have sold freely at full or better prices. To-day shipping extras were doing rather better, at $6.80 to $6.90, with some choice at $7. Wheat has been inactive since Monday, but at full prices. The stock on hand is much reduced, while fully two months must elapse before we can receive any supplies except such as come forward by rail; consequently holders show no disposition to give way in order to effect sales, and for the limited business going, they name their own prices. Two ship loads of amber winter were taken for the continent early in the week, at $1.63, in store, and the same quality sold at a considerable extent to-day at $1.65, in store; No. 1 spring was quoted at $1.58, with some holders not offering under $1.60. Corn has met with a large and pressing export demand, with a steady trade, and although supplies have been considerably increased, prices are higher. At to-day's market prime western mixed was taken quickly at 86c to 86½c, and yellow at 87c to 88c. Western and southern white corn dull and unsettled. The movement in breadstuffs at this market has been as follows:—

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The cold weather has had a strengthening influence upon the grain trade, and late rates have been more readily paid. On Monday there was great inactivity in the market, but the severe cold, accompanied by snow, which has since prevailed has again imparted a firm tone to trade. The transactions have not been very extensive; nevertheless the gradually diminishing quantity of wheat off the coast and afloat, and the diversion of several cargoes to the French coast, have caused holders to be very firm in their demands. Supplies of English wheat have been limited, but there is a noticeable improvement in condition. The show of foreign has been extensive, consisting chiefly of Russian and American descriptions, there being little fine Baltic wheat in granary. Prices were almost nominal on Monday, but to-day greater animation prevailed,

and sales were more readily effected at late rates. Now that the greater portion of the arrivals from the East has come to hand, it is expected that much firmness will prevail in the trade, particularly if the export demand continues. There are now about 170 grain-laden vessels afloat for the United Kingdom, against about 290 at the corresponding period last year, of which 110 are wheat, against 160; but the imports up to this period have been heavy. On the other hand, the shipments have been on a more extensive scale than for some time past. We give below the total imports and exports of cereal produce for the commencement of the season (August 28) to March 4, last year's figures being added, for the sake of comparison :—

	Imports. 1870-71. Cwt.		Exports. 1870-71. Cwt.		Imports. 1869-70. Cwt.		Exports. 1869-70. Cwt.
Wheat	17,548,773	.....	1,670,080	.....	24,880,214	.....	138,784
Barley	4,276,602	.....	46,106	.....	4,251,215	.....	11,898
Oats	4,167,484	.....	720,804	.....	5,564,190	.....	56,629
Peas	427,086	.....	35,886	.....	736,185	.....	9,145
Beans	903,234	.....	7,942	.....	1,027,202	.....	1,177
Indian corn	8,532,664	.....	55,436	.....	11,309,426	.....	12,402
Flour	2,497,624	.....	1,269,868	.....	3,658,823	.....	10,333

Notwithstanding the limited supplies of maize and oats, prices until to-day, when a slight rally took place) have had a drooping tendency. Barley has been in demand for seed, and all qualities have ruled firmer in value in consequence. Beans and peas have remained without change in price. Supplies of flour have been in excess of the demand, but to-day there was more inquiry, and lates rates were paid.

Mr Geo. Dornbusch thus reports the state of the floating grain and seed trade :—During the last eight days 24 grain and seed-laden vessels have arrived at ports-of-call, viz., 13 wheat, 3 maize, 1 barley, 1 rye, 2 cotton-seed. The floating grain trade has been firm in tone, but lacking activity. Wheat — Prices of fine cargoes have been firmly maintained, but secondary cargoes have been slow to sell to-day in increased demand. Maize firm, and 6d dearer. Barley —Fine cargoes steady, but inferior have been in slow demand. Rye — Two imperfect cargoes have this week been sold. The reported sales are as follows: — Wheat — 28 arrived cargoes: Ghirka Odessa, 48s 9d to 52s 6d; Ghirka Nicolaieff, 51s 3d to 53s; Ghirka Yeisk, 51s 6d; new crop ditto from Taganrog, 52s 6d to 54s 3d; New Rostoff ditto, 51s; Chernighosk and Berdianski, 52s 3d; Marianopoli, 44s and 53s 6d; Don Ghirka from Oran, 43s 10½d; Moldavian, 50s; Wallachian, 51s 6d per 492 lbs. Shipped, or to be shipped— 400 tons East India: Calcutta, 45s to 50s per 480 lbs, and 2 cargoes Odessa Ghirka, 53s 6d per 492 lbs. Maize—11 arrived cargoes: Odessa, 35s 6d to 37s 3d; Galatz, 35s 3d to 36s 3d; Roumanian, 35s 9d to 36s 6d; Wallachian, 36s 3d; Danubian, 35s 6d to 36s per 492 lbs. On passage, 1 cargo: Galatz and Sulina, at 36s per 492 lbs. Barley—8 arrived cargoes: Marianopoli, 27s; Taganrog, 28s to 29s 3d; Odessa, 27s 9d; Bulgarian, 29s 3d; Danubian, 25s; Varna, 29s 6d per 400 lbs. To be shipped, a cargo Black Sea, 29s 3d per 400 lbs. Rye—2 cargoes Taganrog, 30s 6d to 32s per 480 lbs. Linseed very scarce, and 6d dearer. Arrived: 500 tons, 63s 3d to 63s 6d per 410 lbs: 1,000 quarters St Petersburg, 60s 6d to 61s per 424 lbs; and 100 tons inferior yellow mixed, 69s per 410 lbs. On passage, 150 tons East India Calcutta, 63s 6d to 63s. Shipped or to be shipped, 200 tons ditto at 63s 6d per 410 lbs; 1 cargo Azow Taganrog, 63s; and 1 cargo Odessa, 63s per 424 lbs. Rapeseed quiet at last week's decline. 1 arrived cargo Taganrog, 37s per 416 lbs. Cotton-seed 5s to 7s 6d dearer, in active demand. 650 tons Egyptian; 9l, on passage, 2,850 tons ditto, 9l 2s 6d to 9l 7s 6d. Shipped or to be shipped, 9l to 9l 6s 3d per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

For Report of this Day's Markets see "Postscript."

Mincing Lane, Friday Morning.

Sugar.—The partial improvement in the demand last referred to having subsided, the market is flat, with prices tending downward. Transactions generally have been limited, especially so as regards brown sorts, the few sales made in these showing some decline, and the lowest qualities are neglected. The business in West India to yesterday amounted to 1,079 casks; good refining sorts are steady. A few lots of crystalised Demerara and Berbice were bought in. Crystalised white Mauritius sold at easier rates. Porto Rico was bought in at high prices for grocery kinds, but these did not meet with offers at the previous value. Refined is inactive, and will be influenced by foreign competition. The stock at this port has been further reduced to 55,400 tons, or about 13,000 tons less than last season's at the same date. Home deliveries continue large. According to official returns, the duty payments in two months were 107,000 tons, against 94,500 tons in 1870 during the same period.

Mauritius.—1,458 bags grainy white were bought in, but since partly sold at 38s for grainy white at 6s duty.

Natal.—2,216 bags principally low qualities were sold at moderate prices: brown, 23s 6d to 28s 6d; grey and yellow, 29s to 36s.

Java.—853 baskets dry grainy white were bought in at 37s 6d to 38s; duty 5s 8d per cwt.

Other Foreign.—430 casks 57 barrels Porto Rico were bought in at high prices. There have not been any transactions reported by private contract on the spot or for arrival.

Refined.—The market is without animation, and prices of dry goods rather drooping, as foreign can be delivered here upon terms relatively low. Titlers, &c., quoted 42s 6d to 45s, and finest goods up to about 47s. Pieces have not quite supported last week's rates.

Molasses.—Transactions in West India have been unimportant. 200 casks treacle from New York offered by auction were withdrawn.

Rum.—A few sales of West India have been effected at rather easier rates, including Demerara at 1s 11d to 2s, and 120 casks Mauritius at 1s 5d proof. Jamaica has obtained 3s 6d to 4s 6d per gallon. There have been some arrivals from the West Indies.

Cocoa.—The better qualities of West India are in demand at steady prices, but low and common rather dull. Of 1,105 bags Trinidad about one-third part sold: good, 73s to 80s; low grey and ordinary, 54s to 61s 6d; good ordinary to middling, 63s to 68s. Privately, a few sales of Guayaquil have been made at 46s to 47s 6d. 313 bags by auction were taken in at 48s to 50s per cwt. 3,007 bags saved from a vessel wrecked were chiefly bought in, only a few re-dried being disposed of at 41s to 42s 6d per cwt.

Coffee.—Although statistics as regards this port are favourable the market continues without much animation. About 250 tons native Ceylon have sold to arrive at some reduction, said to be 56s. 508 casks 55 barrels 167 bags plantation Ceylon all found buyers at and after the sales: grey, 60s 6d to 68s; colory, including a few parcels of the new crop by the steamer, realised high rates, ranging from 67s 6d to 83s; and small lots very fine sold at 90s to 96s 6d. A limited business has been done in other kinds by private treaty. Accounts from Colombo confirm the reports of a short crop this season as compared with last. 102,400 bags, including 90,000 bags Java, and 12,400 bags Brazil, are advertised for sale by the Netherlands Trading Company on the 22nd inst. The export deliveries here have already been 2,468 tons larger than in 1870, those for home use showing 800 tons increase, and the stock is now only 750 tons in excess.

Tea.—The market is without animation, and the trade have taken only moderate supplies. Common kinds of congou meet with some inquiry on former terms. The deliveries show a great increase upon those of last year, the stock is smaller, and the quantity now afloat much less than in 1870 at the same date. Indian teas have been depressed by the late heavy arrivals. At the public sales this week the

bulk of the quantity was withdrawn. Assam Company's growths realised fair prices. Of 6,300 packages in the catalogues, 2,000 sold previously, and during the last two days a few parcels have been realised at lower rates. Privately pekoe has sold as high as 2s 7d per lb for Darjeeling.

RICE.—Business has been upon rather an extended scale this week, and at full prices to a slight recovery. Rangoon, 9s 6d to 10s 9d; white Bengal, 10s 3d to 11s 3d; Ballam, 10s. 600 tons low Bengal afloat and just arrived at 9s to 9s 1½d. 200 tons white at 12s 3d to 12s 9d, ex quay terms. 716 bags 10,375 pockets Madagascar by auction sold at 11s to 11s 9d per cwt for the sound portion.

IMPORTS and DELIVERIES of RICE to March 11, with STOCKS on hand.

Deliveries.....	21930	11140	12220	11200
Stock.....	50350	45450	37850	17200

SAGO.—1,904 bags partly sold at and after the sales: small grain, Singapore, 17s to 18s; Borneo, 18s 6d; bold grain, 18s 6d to 19s per cwt.

SAGO FLOUR.—A parcel of Singapore has sold privately at 15s.

TAPIOCA.—1,165 bags partly found buyers at 2d to 2¼d for Penang, and a small parcel of very good Singapore at 2½d per lb.

BLACK PEPPER.—The large arrivals temporarily unsettled the market, but it is now firmer, owing to the revival of speculative demand. Penang, after selling as low as 5½d, closed yesterday at 5¾d to 5⅞d on the spot and in course of landing. The last sale of Singapore was at 5½d. 1,227 bags Batavia kind by auction sold at 5¼d, and a small parcel Alleppy from Bordeaux at 5⅝d per lb. The stock of black pepper is still unusually light.

WHITE PEPPER.—There have not been any public sales, and privately the transactions are very limited.

OTHER SPICES.—At the public sales mace sold 1d to 2d dearer. 76 cases from Rotterdam, chiefly red Java kind, realised 3s 1d to 3s 3d; a few lots very low broken, 2s 9d. 35 cases nutmegs principally found buyers: Penang—70's, 3d; 77's, 2s 7d; 94 to 87's, 2s 2d to 2s 4d; 106's, 2s 1d to 2s 2d. Low and defective in proportion. Cloves remain as last quoted, with limited sales. There have not been any public sales of pimento. 477 cases Cochin ginger chiefly sold: small and rough, 34s to 40s, including wormy; middling part scraped, 54s to 55s; ditto wormy, 43s. 80 cases cassia vera from Hongkong were taken in at 80s per cwt.

SALTPETRE.—Recent arrivals have supplied the consumers, and the market is now quiet. Fine Bengal continues scarce. By private contract 700 bags, refraction 12¾ to 10, have sold at 27s to 27s 6d. There have not been any sales made for arrival.

IMPORTS and DELIVERIES of SALTPETRE to March 11, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imported.....tons	2740	1500	980	1500
Total delivered.....	2270	3300	2000	2120
Stock.....	2560	3030	3160	7500

COCHINEAL.—Since the sales transactions have been limited. The deliveries have increased nearly 50 per cent. upon those of last year, but the stock is still very heavy.

OTHER DRYSALTERY GOODS.—There is a steady demand for gambier. Several sales have been made chiefly at 15s 6d to 15s 9d, ex ship, for block, and the same prices on the spot. Pressed cubes to arrive sold at 16s 9d. 200 bales block by auction were bought in at 16s. Bengal safflower meets with some inquiry, especially the better sorts. Sales of Bengal turmeric have been made at 18s 9d to 19s 6d. China galls by auction realised 47s 6d. 500 boxes pegue cutch were brought in at 25s. Several parcels sold privately at 21s 6d to 23s.

SHELLAC.—404 chests by auction were partly sold: fine native orange, 6*l* 7s 6d; garnet, 5*l* 15s; button, 4*l* 12s 6d to 4*l* 15s per cwt.

METALS.—There has been rather more doing, although a want of animation is still the prevalent feature in these markets. The conclusion of peace has not yet led to any extension of business in iron. It is yet too soon to expect affairs on the continent to settle down, meanwhile quotations remain steady. A good demand has existed for Scotch pig at higher rates, until 53s 6d cash was attained. Subsequently the price receded to 53s 4d. Tin was depressed in the early part of the week, but since recovered, 1*l* to 2*l* from the lowest prices accepted with a firmer market. Straits, 128*l* to 129*l*; to arrive, 127*l* to 128*l*. Tin plates continue to meet fair inquiry. Spelter steady. Sales of Silesian reported at 17*l* 15s to 18*l* 2s 6d, and forward delivery 18*l* 2s 6d. English lead is in good demand; present quotation, 18*l* 5s to 18*l* 10s. Some contracts have been made in Chili copper chiefly to arrive at 64*l* 15s up to 65*l*, but other kinds are quiet. Burra and Walaroo, 74*l* to 75*l* per ton.

HEMP.—Petersburg clean can be bought for arrival at about 1*l* under the price on the spot, and the market is quiet. In Manila transactions have been limited. 1,591 bales by auction part sold at 51*l* to 51*l* 10s for Boluzan, being 1*l* lower. The remainder taken in, including fine white, at 65*l* per ton.

JUTE.—There has been a moderate business done this week, but the prices of last are maintained for the few parcels sold. Sales reported for arrival at 20*l* 10s to 25*l* 5s. Manufactured goods command a ready sale in Dundee. Jute is without change, and the late arrivals have afforded the consumers a fair supply.

OILS.—Fish oils have been dull. Sperm, 84*l*, sellers; pale seal, 37*l* 10s to 38*l*; cod, 35*l* 10s to 36*l*. There is not any improvement to report in olive, sales on the spot being limited. 50 tons Malaga by steamer sold at 50*l* per tun. Linseed oil has further advanced to 33*l* 10s on the spot, and 34*l* paid for the next four months. Rape oil has been dull. English brown, 44*l* 5s cash—44*l* 10s usual terms; last four months, 44*l* 10s to 45*l* the quotation; refined, 46*l* 10s; foreign, 48*l* 10s to 49*l*. No change in palm. The best qualities of Lagos quoted 38*l* to 38*l* 10s. Cocoa-nut has been sold to a limited extent, owing to the impediments to shipments to the continent. Ceylon, 40*l* to 40*l* 5s; Cochin, 44*l* to 46*l*; and fine, which is scarce, 48*l* to 48*l* 10s; Ceylon afloat, 41*l* per ton.

PETROLEUM dull. Refined, 1s 4½d to 1s 5d per gallon. Stock large, viz., 32,000 gallons.

SPIRITS TURPENTINE.—A large business reported in American. Present quotation, 37s to 37s 6d per cwt.

LINSEED.—Prices are rather firmer, and the demand has been good. Calcutta, 63s 3d to 63s 6d; ditto to arrive, 63s 6d to 63s 9d; Black Sea afloat, 63s per quarter.

TALLOW.—There has been a steady market, with rather firmer prices, but these were not quite maintained yesterday. Petersburg now quoted 44s to 44s 3d; June, 45s; October to December, 45s 9d to 46s per cwt.

The usual report of the public sales to-day will be found in the Postscript.

PARTICULARS OF TALLOW—Monday, March 13, 1871.

POSTSCRIPT. FRIDAY NIGHT.

SUGAR.—The market was quiet to-day. 1,400 bags Jaggery sold privately at 17s 6d. 900 bags native yellow at 24s. 3,300 bags Guatemala at 22s 6d to 27s 3d. 120 casks West India sold, making 1,100 casks for the week.

COFFEE.—The sales were small, comprising 140 casks 150 barrels and bags plantation Ceylon, which went off at steady prices.

RICE.—A floating cargo of Necrancie sold at 10s 9d for the continent.

SALTPETRE.—700 bags Bengal, refraction 14¾ to 11¾, sold at 26s.

SHELLAC.—215 chests were chiefly bought in.

LAC DYE.—183 chests were nearly all taken in.

CUTCH.—1,000 boxes were taken in above the value.

TURMERIC.—1,367 packags Madras part sold at 21s 6d to 24s per cwt

TALLOW.—At auction 950 casks Australian two-thirds sold. Mutton, 41s 6d to 43s 9d; beef, 36s to 42s. 328 casks other kinds were taken in.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market remains quiet at easier rates. Dutch crushed is lower, and second-hand parcels change hands at 36s f.o.b., Amsterdam.

DRY FRUIT.—A steady and firm market for currants, with a decidedly hardening tendency. Raisins in fair demand. Valencia almost cleared from the market. Turkey fruit attracting more attention, although business actually done shows no great improvement. Of figs supply is almost exhausted.

ENGLISH WOOL.—The trade hardly so brisk as the last few weeks, but no alteration in prices.

FLAX.—Market steady.

HEMP.—Market for Russian very dull.

SILK.—Market quiet, but firm. Little business doing.

SEEDS.—The seed trade has ruled active for all varieties during the past week, and quotations have improved, especially for mustard and clovers.

TOBACCO.—There has been but little business doing in North American tobacco, and only retail sales have been effected, which have consisted of selections of fine quality, for which full rates have been obtained. In substitutes and segar tobaccos there has been a large business done, but for some growths extreme rates have been paid.

LEATHER.—The leather market has presented very little change during the past week. A fair amount of business has been done at previous rates. At Leadenhall on Tuesday the supply of fresh goods was limited, particularly of light crop hides, light English butts, English bellies, the lightest dressing hides, and shaved hides, calfskins of all weights, but especially those of 45 lbs and upwards, good kips, and English horse hides, for all which articles there was a brisk demand, without alteration in prices.

METALS.—Again a quiet week. Copper has been very little dealt in, but prices are not affected materially. Iron is pretty steady. Tin has shown some revival, and fully 20s per ton advance from the lowest has been paid for Straits. Spelter is a shade easier to buy again. Lead is in demand, and prices have advanced somewhat. Tin-plates continue firm.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	45	0
Fat by ditto	2	1
Yellow Russian ditto	45	9
Melted stuff	33	6
Rough stuff	17	0
Greaves	19	0
Good dregs	6	0

METROPOLITAN CATTLE MARKET.

MONDAY, March 13.—The total imports of foreign stock into London last week amounted to 9,564 head. In the corresponding week in 1870, we received 8,456; in 1869, 12,508; in 1868, 3,102; and in 1867, 10,305 head.

An increased amount of firmness has been apparent in the cattle trade to-day. Only moderate supplies have been on sale, and prices have risen. About an average supply of English beasts has been on sale, but the arrivals from abroad have been limited. Sales have progressed steadily in all breeds, and prices have advanced 2d per 8 lbs. For the best Scots and crosses 5s 6d to 5s 8d per 8 lbs. The supply of sheep has been only moderate. There has been a steady demand, and prices have ruled 2d per 8 lbs higher. The best Downs and half-breds, in the wool, have been disposed of at 6s 2d to 6s 4d, out of the wool at 5s 4d per 8 lbs. Lambs have been in moderate supply, and have sold at 7s 6d to 8s per 8 lbs. The demand for calves has been to a moderate extent, on former terms. Pigs have sold at previous quotations.

SUPPLIES ON SALE.

HOP MARKET.

BOROUGH, Friday, March 17.—Less animation has been noticeable in this market. Business in all descriptions has been limited, but choice hops have commanded extreme prices. Mid and East Kent, 40s to 140s; Weald of Kent, 40s to 75s; Sussex, 35s to 70s; Farnham and country, 75s to 112s; olds, 20s to 50s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, March 17.—Full average supplies have been on offer. The trade has been quiet, at previous quotations. English shaws, 80s to 110s; ditto regents, 60s to 100s; Scotch regents, 65s to 90s; and rocks, 60s to 75s per ton.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, March 17.—Our market continues firm, but the business doing is limited. East India wools, to the extent of 9,000 bales, will be offered at auction from the 21st to the 24th inst., to be followed by sundry other descriptions during the ensuing week.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, March 17.—At this market to-day wheat closes firm, with a good consumptive demand at Tuesday's prices. Flour quiet without change. Indian corn 3d lower since Tuesday.

WAKEFIELD, Friday, March 17.—At this market the show of wheat gets less every week, and the chance of increased supplies become more remote, as the continent takes pretty freely, and the sales within the last few days from the coast are very large at improved prices. Under these circumstances factors ask 1s to 2s more money than last Friday, and on the business transacted such advance was paid.

The Gazette.

TUESDAY, March 14.

BANKRUPTS.

Thomas Bromley, St James's square, late lieutenant in the Indian army.
Frederick George Rimell, Asylum road, Peckham, builder.
Francis Murrough Walsh, Spa, Belgium, gentleman.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—
"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET. "For outside colours, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have ascertained that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

ESTABLISHED A.D. 1700.

The MANSION, The VILLA, or The COTTAGE.

DEANE & CO. (46 KING WILLIAM STREET), LONDON BRIDGE.

FINE FLAVOURED, STRONG BEEF TEA at great cost a pint. ASK FOR LIEBIG COMPANY'S EXTRACT OF MEAT, requiring Baron Liebig the Inventor's Signature on every jar, being the only guarantee of genuineness.

MESSRS GABRIEL'S [illegible] improvements in ARTIFICIAL TEETH and PAINLESS DENTISTRY, Patent No. [illegible] dated Jan. 1871, afford the following advantages:—

1st. EXTREME LIGHTNESS (being completely [illegible] combined with great [illegible] efficiency, and comfort. This rendering the covering to the palate hitherto considered an indispensable adjunct to Artificial Teeth).

2nd. MODERATE CHARGES, accounted for by their extreme simplicity of construction, where the highest class of the Dentist and Mechanic only are required, combined with an experience of half a century in their application.

3rd. ABSOLUTE IMMUNITY FROM PAIN, the roots and [illegible] OXYDIZED, after an experience of many thousand cases in London and private practice, rendering the operation with an absolute certainty the handling [illegible] being not only absolutely free from danger but positively painless.

4th. The [illegible] an imitation of nature (springs being entirely dispensed with) that detection becomes an impossibility.

MESSRS GABRIEL,
CELEBRATED DENTISTS, 56 LUDGATE HILL, CITY, and 33 HARLEY ST., CAVENDISH SQ., London.

MESSRS GABRIEL'S CELEBRATED PREPARATIONS FOR PRESERVING AND BEAUTIFYING THE TEETH

Are sold by all Chemists and Perfumers in every town. Price 1s 6d and 2s.

TEETH.—MR WEBB (MANY years with Mr Eskell, of 8 Grosvenor st., Bond st.) supplies ARTIFICIAL TEETH which cannot be surpassed for use, comfort, appearance, and durability. Painless treatment guaranteed throughout, as with all other operations; all consultations free. Terms moderate. N.B.—Any number of teeth made in two or three hours and repairs effected whilst waiting. At home daily until eight, at 27 New Bond st. His treatise, which is well worthy of perusal, free for two stamps.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d, postage, 1s 8d. Umbilical ditto, 42s and 52s 6d, postage, 1s 10d. Post-office orders to be made payable to John White, Post-office Piccadilly.

NEW PATENT

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS &c. They are porous, light in texture and inexpensive and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

H. J. NICOLL'S SPRING OVERCOATS, of Waterproof Tweed Cloths, 20s.; do., with silk lapels, 21s.

H. J. NICOLL'S SPRING OVERCOATS, of Waterproof Melton Cloths, 42s.

H. J. NICOLL'S SPRING OVERCOATS, of Waterproof Cheviot Cloths, with silk facings, 52s 6d.

H. J. NICOLL'S SPRING CHEVIOT TROUSERS, 14s.

SERVANTS' LIVERIES—the best, at moderate prices.

ALLSOPP'S PALE OR BITTER ALE.—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now receiving orders for their SEASON-BREWED PALE ALE, in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent, and at the Branch Establishments.

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Draught and Bottles, genuine, from all the most respectable Wine and Beer Merchants and Licensed Victuallers on "ALLSOPP'S PALE ALE" being specially asked for.

EDUCATION IN GERMANY.—ANGLO-GERMAN ESTABLISHMENT, Bonn-on-the-Rhine, founded in 1847.—The Principal, Herr THOMAS, prepares Gentlemen's Sons for the Army, Civil service, and Mercantile pursuits. German and French are constantly spoken in his establishment, where the comforts of an English home are provided by an English lady (Mrs Thomas). The highest references given.—Apply to Herrn Director THOMAS Heer Strasse, Bonn-on-the-Rhine.—Frequent escorts

DINNEFORD'S FLUID MAGNESIA.—The medical profession for thirty years have approved of this pure solution of Magnesia as the best remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion; and as the best mild aperient for delicate constitutions, especially adapted for ladies, children, and infants.

DINNEFORD and CO., Chemists, 172 New Bond street, London, and of all other chemists throughout the world.

FUNDED LOAN OF THE UNITED STATES.

The undermentioned firms, with the sanction of the Secretary of the Treasury of the United States, are prepared to receive APPLICATIONS for the NATIONAL LOAN, authorised under the Act approved July 14, 1870, entitled "An Act to authorise the Refunding of the National Debt," and the Act in amendment thereof, approved January 20, 1871.

Subscriptions will accordingly be opened at their respective offices, on Friday, the 10th day of March inst.

The amount proposed to be issued is $200,000,000 (two hundred millions of dollars), redeemable in coin of the present standard value, at the pleasure of the United States, after 10 years from the date of issue, and bearing interest at the rate of five per cent. per annum, from the 1st day of May next, payable quarterly in coin in the United States, at the offices of the Treasurer, any Assistant Treasurer, or designated repositary of the Government.

The Bonds will be issued in the United States, where the principal will also be reimbursed.

The Bonds will be registered, or issued with Coupons, as may be desired by subscribers. Registered Bonds will be issued in amounts of $50, $100, $500, $1,000, $5,000, and $10,000; and Coupon Bonds of each denomination except the last two.

The Bonds, and the interest thereon, are exempt from the payment of all taxes and dues of the United States, as well as from taxation in any form by or under State, municipal, or local authority.

After maturity the Bonds last issued will be first redeemed by classes and numbers, as may be designated by the Secretary of the Treasury.

The price of issue will be par, or at the rate of 102*l* 7s 6d sterling (being the equivalent of 91 at ex. 4s 6d to the dollar) for each five hundred dollars.

Subscribers will be required to deposit, at the time of application, 2*l* on every $500 applied for, and the balance will be payable on the 1st day of May next. The subscriptions will be transmitted to the United States, where the Bonds will be delivered.

Payment may be made either in cash or in Bonds of the United States known as "Five Twenty" Bonds, also at their par value, viz., at the rate of 102*l* 7s 6d sterling for every five hundred dollars, allowance being made for accrued interest at the exchange of 4s 1d per dollar.

Forms of application and copies of the Acts of Congress authorising the issue may be obtained from either of the undermentioned firms.

THE

LEGAL & GENERAL LIFE ASSURANCE SOCIETY,

10 FLEET STREET, TEMPLE BAR (FOUNDED 1836),

Has taken a leading part in freeing Life Assurance Contracts from all needless restrictions.

The "Proposal Form" is most simple in its terms.

The Policies are "Indisputable"—that is, free from future challenge.

The Invested Funds bear an unusually high proportion to the Liabilities.

The Guaranteeing Share Capital of One Million (£160,000 paid up) is fully subscribed by 300 Members of the Legal Profession.

Nine-tenths of the Profits belong to the Assured.

Annual Accounts have always been published in full detail.

Settlement Policies in favour of Wife and Children now granted, in terms of the Married Women's Property Act, 1870.

Unreserved information on all points, on application to

E. A. NEWTON, Actuary and Manager.

OXYGENATED WATER HOLDS IN Solution pure Oxygen Gas, the vital element that sustains life. It is a decided tonic and alterative drought, and from its special action on food during the process of digestion and assimilation is peculiarly suitable for invalids. Price 4s per dozen half-pints.
Laboratory, 36 Long Acre, and all Druggists.

MORE CURES OF COUGHS, COLDS, and Hoarseness by Dr Locock's Wafers.—From Messrs. Fergyson and Son, the eminent auctioneers, Leek: "The beneficial effects we have derived from your Wafers make us feel it a duty to offer you our gratuitous testimony to their superiority over any other remedy we have ever tried for colds, coughs, and hoarseness, so peculiarly troublesome to our profession."—These Wafers give instant relief to asthma, consumption, coughs, and all disorders of the lungs, and have a pleasant taste. Price 1s 1½d and 2s 9d per box. Sold by all druggists.

HOLLOWAY'S OINTMENT AND PILLS.—Variable Temperatures.—After the unusual cold season which has just passed by, a mild damp atmosphere will probably succeed, and in its train will come fever, sore throat, diphtheria, chest complaints, and rheumatism. Holloway's ointment rubbed upon the skin near the affected part at once corrects the relaying and depressing effects of dampness on the constitution, and spares sickness. It penetrates to the internal textures, regulates the local circulation, assuages inflammation, soothes irritation, braces relaxed organs, and heals ulceration. Holloway's pills simultaneously taken expedite the cure. In all diseases of the throat and chest immediate recourse is recommended to Holloway's purifying and powerful preparations, which assiduously employed will prevent asthma, consumption, and other serious issues.

ROYAL POLYTECHNIC INSTITUTION (Limited).

The Half-Yearly General Meeting of the Shareholders in this Institution was held on Friday, the 10th inst., in the small Theatre of the Institution, the Rev. J. B. OWEN, M.A., Chairman of the Board of Directors in the Chair. The reports and accounts were received and adopted; the shareholders present also recommended a Dividend upon the paid-up capital of 3½ per cent. for the half-year, making with the last half-year's Dividend 5 per cent. per annum, which was accordingly declared by the Directors. The retiring Directors were unanimously re-elected, and the proceedings closed with a vote of thanks to the Chairman and Directors, Professor Pepper, W. King, the Secretary, and the other officials of the Institution.

HONGKONG AND SHANGHAI BANKING CORPORATION

Capital, $ [illegible] dols. Paid-up, $ 5,000,000 dols.

ABRIDGED PROSPECTUS.

The improvements effected by the Patented Still and Machinery of Messrs Houghton and Howell, of St Catharines, Ontario, in the manufacture of the Crude Oils of the Dominion, are unrivalled. No Canadian Oils manufactured by the common process can compete with them. Their Carbon, Golden Machinery, and dark Lubricating Oils are the best manufactured, and the cheapest in the market.

The residuum, to the extent of 40 per cent., of the Crude Oil, which is wasted by all other makers, is not only utilised by Messrs Houghton and Howell, but the most valuable products are obtained therefrom by their processes. From this waste material a Lubricating Oil is produced which has no equal either in Europe or America, a fixed Oil that is not decomposed or dried up by the heat of engine cylinders, that is not injurious to iron, that will not oxidise, that produces no acid reaction, that remains perfectly limpid at 2 deg. below zero, and that is not explosive or inflammable.

For railways it has no equal for economy and durability.

The great objection to Canadian Oil has been the disgusting odour arising from the sulphur and arsenic contained in the Crude Oil, which other manufacturers have attempted to neutralise by chemical means; but the odour invariably returns, having been only temporarily neutralised or disguised.

In consequence of the offensive odour the Canadian Crude Oil sells at only 2 dollars per barrel, and there is annually a surplus stock unsaleable of about 350,000 barrels. The United States Crude Oil, being much purer, sells at about 8 dollars per barrel, showing a difference in first cost of 6 dollars, or 24s per barrel, in favour of Canadian.

By Messrs Houghton and Howell's Patent Still and Processes, the Canadian Oils are rendered superior to the American in all respects; and their Carbon Oils are manufactured at much less expense than the same description of Oils produced in Canada or the States by the common process of destructive distillation.

By these patents the arsenic and sulphur are entirely removed from the Carbon Oils, and they manufacture from the Crude Oil Carbon Oils thoroughly deodorised, and rendered equal to the best American White, with a fire test of 120 deg.; they have also lately succeeded in producing a still higher quality of Carbon Oil with a fire test of 175 deg. Fahrenheit, suitable for head lights for locomotives and for signal lights.

They also produce the finest Lubricating Oils, having no smell, which mix well with olive, sperm, lard, and seal oils, improving the qualities of those oils for machine purposes, and consequently largely reducing their cost.

Next to the important object of deodorising the Canadian Oils is the utilising the Crude Oil to the greatest possible extent. The largest amount obtained by other Canadian refiners from the crude is 60 per cent., and their products are, even then, unfit for exportation; while Messrs Houghton and Howell, by their patent still, obtain a yield of from 90 to 95 per cent., each of their Oils at the same time possessing a greater money value than those obtained by other manufacturers by the old mode of distillation.

The present proprietors and patentees, in order to obtain additional capital to erect the necessary works and machinery and purchase the surplus stock of Crude Oil, to enable them to meet the rapidly-increasing demand for their Lubricating and other Oils, have agreed to assign to this Company all their plant, patents, processes, and inventions for the manufacture of Canadian and other Oils, for the sum of £50,000, of which amount they have stipulated to retain an interest in the Company, in paid-up shares, to the extent of £38,000, and to continue in the management of the works, receiving in cash the sum of £12,000 only.

As the Company intend to continue the purchase of Crude Oil and residuum, and not to become interested in Oil Wells or Lands, it will be manifest that this is not in any respect a speculation, but the mere extension of a certain and highly profitable business.

The following statement is furnished by Messrs Houghton and Howell:—

"The surplus Crude Oil of the Dominion, now unsaleable, is estimated at 350,000 barrels per annum, the whole of which can be controlled and manufactured by this Company. The following figures exhibit the ascertained profit upon the manufacture of this quantity, or any proportionate amount thereof.

350,000 barrels of Crude Oil will make		
210,000 barrels of CARBON OIL, which at 1s sterling per gal., including barrels, will pay a profit of 16s per barrel, equal to	£168,000	pr.ann.
50,000 barrels of GOLDEN MACHINE OIL, at 2s sterling per gal., including barrels, will pay a profit of	120,000	—
50,000 barrels of DARK LUBRICATING OIL OR GREASE, at 2s sterling per gallon, including barrels, will pay a profit of	132,000	—
Total profit per annum on manufacture of 350,000 barrels of Crude Oil	£420,000	

Full prospectuses, with certificates from Messrs Cornelius Stovin and Others, and forms of application for shares can be obtained from the Secretary, at the Company's Offices, St Clement's House, Clement's lane, Lombard street, E.C.

The Bonds for £328,000, drawn on the 1st January last (being the twelfth half-yearly drawing of this Loan), the numbers of which were duly advertised, will be PAID at par, together with three months' interest from the above date, at the rate of five per cent. per annum, on and after the 1st April next, at the Office of Messrs I. Thomson, T. Bonar, and Co., 57½ Old Broad street.

The Bonds, listed in numerical order, must be left for examination four days previous to payment.

I. THOMSON, T. BONAR, and CO.

London, 16th March, 1871.

GUATEMALA SIX PER CENT. GOVERNMENT LOAN OF 1869 FOR £500,000.

The Coupons for the fourth half-yearly Dividend, due on the 1st of April next, together with the Bonds drawn on the 1st inst., the numbers of which have been duly advertised, will be PAID on and after the 1st proximo, on application at the Offices of Messrs I. Thomson, T. Bonar, and Co., 57½ Old Broad street.

The Coupons and Bonds must be left for examination four days previous to payment.

Notice is further given, that the Receiver's Commission of 1 per cent. will continue to be deducted on payment of the above.

I. THOMSON, T. BONAR, and CO.

London, 16th March, 1871.

OVERLAND ROUTE.—

The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY book Passengers and receive Cargo and Parcels by their Steamers for—

	From Southampton.	From Brindisi.
GIBRALTAR ... MALTA	Every Saturday, at 2 p.m.	—
ALEXANDRIA.. ADEN ..... BOMBAY	Every Saturday. at 2 p.m.	Every Tuesday, at 2 a.m.
GALLE..... MADRAS..... CALCUTTA ... PENANG ..... SINGAPORE ... CHINA ..... JAPAN.....	Saturday, Mar. 4, 2 p.m. And every alternate Saturday thereafter.	Tuesday, Mar. 14, at 2 a.m. And every alternate Tuesday thereafter.
AUSTRALIA .. NEW ZEALND.	Saturday, Mar. 18, 2 p.m. And every fourth Saturday thereafter.	Tuesday, Mar. 28, at 2 a.m. And every fourth Tuesday thereafter.

And all Ports touched at by the Steamers of the British India and the Netherlands India Steam Navigation Companies.

An abatement of 20 per cent. from the charge for the Return Voyage is made to Passengers to or from ports eastward of Suez reimbarking within six months of their arrival, and 10 per cent. to those reimbarking within twelve months.

For Rates of Passage Money and Freight, WHICH HAVE BEEN MUCH REDUCED, and all other information, apply at the Company's Offices, 122 Leadenhall street, London, or Oriental place, Southampton.

BRINDISI OVERLAND ROUTE TO THE EAST.

—The Mails to and from Egypt, India, China, Japan, Australia, &c., are now forwarded viâ Dover, Ostend, Brussels, Cologne, Mayence, Aschaffenburg, Munich, Innsbruck, the Brenner Pass, Verona, Padova, Bologna, Ancona, Brindisi, and Alexandria.

A weekly Express Train leaving London from S. E. and L. C. and D. Stations every Friday—1st class service, 8.35 p.m.; 2nd class service, 7.40 a.m.

The PENINSULAR and ORIENTAL COMPANY'S Steamers leave Brindisi every Tuesday, at 4 a.m., and arrive at Alexandria on the following Friday, performing the passage in 75 hours (contract time).

Bevrouth, Jaffa, and Caifa regularly, viâ Brindisi and Alexandria.

The AUSTRIAN LLOYD'S Steamers leave Brindisi every Friday for Corfu, Sira, Athens (Piree), Smyrna, Constantinople, and the Black Sea, and every second Friday from the 10th March for Salonica, viâ Sira.

The shortest and quickest route to Naples, viâ Foggia, and Rome, viâ Falconara, is viâ Bologna and Ancona, by the SOUTH ITALIAN RAILWAY.

The Great East India First-class Hotel, at Brindisi, is now open.

For further information apply to the South Italian Railway Company's Sole Agents, Lebeau and Co., 6 Billiter street, London, E.C.

CAPE OF GOOD HOPE, ALGOA BAY, and NATAL.—

The UNION STEAMSHIP COMPANY'S ROYAL MAIL PACKETS SAIL from SOUTHAMPTON on the 8th and 23rd, and from PLYMOUTH on the 10th and 25th of each month, calling at Madeira. A surgeon and stewardess in each ship.

RATES OF PASSAGE MONEY.

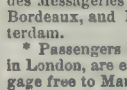
	First Class.	Second Class.
To Cape Town and St Helena..	30 guineas	20 guineas
To Algoa Bay and Mossel Bay	33 guineas	22 guineas
To Natal and East London ...	37 guineas	25 guineas

Including a free pass by rail from London to Southampton for passengers and baggage, also dock and agents' charges.

N.B.—The packet leaving Southampton on the 8th calls at St Helena; the packet leaving Southampton on the 23rd corresponds with Natal.

Apply to Falconer and Mercer, 23 Leadenhall street, London; or Thomas Hill, Southampton.

OVERLAND ROUTE viâ MARSEILLES.—



COMPAGNIE DES MESSAGERIES MARITIMES DE FRANCE.—French Mail Steam Packets leave Marseilles as follows:—

July 10	For	Port Said, Ismailia, Aden, Suez, Mauritius, Point de Galle (Ceylon), Pondicherry, Madras, Calcutta, Singapore, Batavia, Saigon, Hong Kong, Shanghae, and Yokohama (Japan).
July 24		
August 7		
August 21		
September 4		
September 18		
October 2		
October 30		
November 27		
December 25		
January 22		
February 19		
March 19		

To ALEXANDRIA fortnightly from December 8.

For passage, freight, and information apply to the Agents, 97 Cannon street, London; G. H. FLETCHER and CO., Liverpool; at the offices of the Compagnie des Messageries Maritimes de France in Paris, Lyons, Bordeaux, and Marseilles; or to Smith and Co., Rotterdam.

* Passengers Eastward of Suez, securing their berths in London, are entitled to the conveyance of their luggage free to Marseilles.

STEAM SHIPS.—

The GENERAL STEAM NAVIGATION COMPANY'S powerful and first-class STEAM SHIPS leave from St Katharine's Wharf for—

HAMBURG—Every Wednesday and Saturday. March 22 and 25 at noon. Saloon, £2; fore cabin, £1 5s. Extra vessels, carrying cargo only, leave also every Thursday and Sunday morning. For particulars of freight apply to F. Stahlschmidt and Co., 90 Lower Thames street.

HAVRE—Every Thursday. March 23 at noon. Saloon, 11s; fore cabin, 8s.

ROTTERDAM and the RHINE—Every Wednesday and Saturday at 11 morning. Chief cabin, £1; fore cabin, 15s. Return Tickets, 30s and 22s 6d.

ANTWERP, BRUSSELS, COLOGNE, and the RHINE—Every Tuesday and Thursday at noon. Chief cabin, £1; fore, 15s. Return Tickets, 30s and 22s 6d. Brussels, 17s 3d; Cologne, 30s 6d. Leaving Antwerp for London every Sunday and Friday at noon.

OSTEND, BRUSSELS, COLOGNE, and the RHINE—Every Wednesday and Saturday. March 22 at 2; 25 at 3 a.m. Leaving Ostend for London every Tuesday and Friday night. Chief cabin, 15s; fore, 12s. Brussels, 18s 10d; Cologne, 32s.

From Irongate Wharf for:—

BOULOGNE—Every Tuesday, Thursday, and Sunday. March 19 at noon; 21 at 1; 23 at 2; 26 at 4 a.m. Chief cabin, 11s; fore, 8s.

CALAIS—Every Wednesday and Saturday. March 22 at 2; 25 at 3 a.m. Chief cabin, 11s; fore, 8s.

EDINBURGH—Every Wednesday and Saturday at 10 morning. Fares: Chief cabin, 15s; fore, 12s; deck, 7s.

NEWCASTLE—Every Wednesday and Sunday at 10 morning. Saloon, 12s; fore, 8s.

YARMOUTH—Every Wednesday at 3 afternoon Saloon, 8s; fore cabin, 5s.

From Custom House Quay.

HULL—Every Wednesday and Saturday, at 8 morning. Chief cabin, 8s; fore, 5s.

Offices, 71 Lombard street, and 37 Regent's circus, Piccadilly.

Registered at the General Post Office as a Newspaper and for Transmission Abroad.

On Feb. 25 was Published, No. II., New Series, Price 8d and 8½d,

THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL, for February, gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains a Financial Record of the Month; New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Finance, Insurance, and Miscellaneous Companies; New Companies and New Capital. Prices made up to February 22.

Advertisements for next Number, to be published on April 1, must be sent to insure insertion on or before March 30.

OFFICE—340 Strand.

THE MONEY MARKET.

The preparations for the payment of the French indemnity, and the consequent improvement in the money market, have been arrested by one of those sudden and incalculable calamities which only come from France. Paris is in rebellion against the Government; Lyons has joined her; and it will be for M. Thiers and the National Assembly to put down both, and restore order. But this is a task of singular difficulty. In many French revolutions the insurrectionary party has been stronger; but never since 1791 has the Government been so weak. There is absolutely no army at present available on which they can depend, and without the support of a regular army it is difficult to believe that the efforts of the well-affected part of the National Guard can have much effect, or will subdue Paris.

For the moment the prospect is very gloomy. For some time everything in the money market has hung in suspense till the mode was settled in which the French indemnity was to be borrowed. And now this settlement seems postponed almost indefinitely, for nothing can be done till there is a fairly strong, durable, and stable Government in France, and at present certainly the Government of M. Thiers is not either. Not only does the suspense prevent the revival of a demand for money, but the Parisian confusion keeps money here which belongs to the continent, and would otherwise have been sent home. Till there is a change in Paris the value of money will tend downwards rather than upwards

WHAT IS A "MINISTER" OF COMMERCE?

A deputation from the Associated Chambers of Commerce waited lately on Mr Gladstone, and asked him to establish a Ministry of Commerce. Neither the reasons given nor the answer are clearly reported, but the point is of great importance.

Some reference was made to continental states—to France, Austria, and Prussia—where there is a Minister of Commerce always ready to listen to the mercantile public, and to whom they can at once say anything they want to say. "If," it is said, "these countries, with their little trade (in comparison), "find it necessary to have a Minister of Commerce, much "more must we want one with our immense trade. "If their merchants want a Minister to consult, surely ours "need one much more, for their number is greater, and their "business more complex." But there is a complete mistake in this argument. The only reason why continental men of business always need a Government department is that their Government makes, or tries to make, business for them. Under a paternal and protective Government, each branch of trade has been nurtured and fostered by special duties and peculiar privileges; and as the artificial trade so created is frail and unsatisfactory, as the advantages thus conferred are always needing an addition here and a correction there, the persons concerned perpetually visit the Minister's office. But as soon as Free-trade is established, the motive for such intercourse altogether ends. In England, the State no longer attempts to provide lucrative business for men of business. It knows that men of business will do that far better for themselves, and it leaves them to do so. They have no occasion therefore to visit a Minister's *bureau*, as continental traders have to visit it; they are happily freed from that necessity; they can employ their time better and more profitably. We do not want a Minister of Commerce such as there is in continental countries, because our trade is in a sounder state than theirs.

But it is said—"Though we have adopted Free-trade yet "all the rest of the world has not done so. Though a Minister "of Commerce would have nothing to do in regulating "business within the country, he would have much to do "in making commercial treaties for us with foreign nations, "and in so increasing our export trade." But unfortunately he would have very little to do. We are, as our readers know, not such rigid "economists" as to object to commercial treaties on principle; we are for Free-trade however brought about, whether by arrangement with others, or by single-handed action of our own. The more absolute the commercial freedom the better, no matter how it may be obtained. But in England the question no longer is whether commercial treaties are good, but

whether they are possible? In fact they are almost impossible—on any great scale quite impossible. A commercial treaty involves an interchange of equivalents: one nation engages to admit the products of another, on condition that the other takes its products in return. The old notion was that a country derived a profit from what it sold, and made a loss on what it bought, so that the more it exported and the less it imported the better. But we have in England long got rid of this nonsense. We have learnt that "trade is barter," and that the more we can have of it, either by way of export or of import, the better. We have arranged our tariff accordingly. We have settled it so as to admit as much of all foreign produce as we can obtain. We have done so for our ow ngood, and without regarding the interests of others. And therefore we have nothing to relinquish or to concede to foreign countries. We have no equivalent or scarcely a vestige of one to offer them in a treaty. And therefore, as far as we are concerned, commercial treaties are almost come to an end. We do not need a special Minister to make them, because upon a great scale we can no longer make them.

But if this be so, it will be asked—If a Board of Trade or a Minister of Commerce cannot swell our trade or augment our profits, why should we have either at all? And to this the answer is that Government has two functions with respect to trade, one of supervision and one of co-operation, and that both of these augment as civilisation grows and commerce increases.

First,—of supervision. It is in the nature of an augmenting civilisation to create privileged opportunities, which practically, and in the long run, amount to monopolies. Railways are an obvious instance. In consequence of the concession of certain legal privileges and advantages, the entire locomotion of the country is given over to a few boards of directors, who may, in some cases even violently, oppose one another, but who, on the whole, have a common interest and tend to understand one another. Gas companies are a similar example. There is no possibility of effective competition in lighting a city, because the limitation of the area of work diminishes also the number of competitors. In such cases there cannot be real "Free-trade"—there cannot be that healthy and elastic action by which in common cases the consumer is protected. If the price of the monopolised article is too high, if the terms upon which it is sold are inconvenient, no new producer can rectify the evil. The consumer will suffer unless some extraordinary remedy is given.

This remedy a Board of Trade must apply. That body ought to have full powers to supervise the dealings of all traders possessing legal privileges, to see that the public gain all the advantages in consideration for which those privileges were conferred—to see that those privileges are not stealthily and unduly extended—to see that no evils are incurred except those necessarily attendant upon the existence of such privileges.

This is the most important part of the necessary supervision of trade. Practical monopolies are so created and so multiplied by civilisation that the effectual supervision of them is hardly second in importance to any other department of the Government. But there are other needful kinds of supervision too. The Legislature has, rightly or wrongly, imposed various conditions on various kinds of contract. Thus nearly the whole law of merchant shipping is peculiar. There are unusual formalities required for the transfer of a ship, different in kind and in intention from those required in the case of any other chattel. There are special regulations as to contracts made by sailors, whom the law for some purposes regards as a sort of "perpetual minors," unable to contract freely, or to sell their labour wisely. There are other rules as to "pilotage," substantially fixing its price, and making the transactions relating to it different altogether from other transactions. Some of these rules may perhaps be erroneous, but while they exist they must be seen to. And the Board of Trade is the proper office for that purpose.

There are also certain general conditions which the law imposes upon all contracts—at least upon all those of bargain and sale. They must be expressed in the legal weights and measures, and for that purpose certain standard weights and standard measures must be kept and made accessible. Those who use false "weights"—that is, weights different from these—must be punished, and the Board of Trade should see to their punishment.

The regulations as to the currency are properly in its office too. The sovereign is only one of the "standard weights," circulating under a Government certificate that it really is that weight. In England the Mint used to be a separate department, and very lately it has been annexed to the Exchequer. But, on principle, the Finance Minister has no more to do with it than the Foreign Minister. It should be in the hands of a department that verifies all the trade-facts which the Government does verify, and in a logical division of the public offices, this would be the Board of Trade.

Perhaps in theory these latter functions should be said to be auxiliary to trade rather than to be parts of its supervision. But for the present purpose this is not material, as the modes in which Government aids trade ought to belong to the Board of Trade, just as much as those in which it supervises trade.

Secondly,—what is far less understood than its importance requires,—the auxiliary trade department is a very large and growing species of Government business. There are several kinds of trade which the Government finds it better to carry on exclusively, which it will not even permit others to carry on. Such is the Post Office, which is of ancient standing; such are the Government telegraphs, which were created the other day. And their justification is that the State has the advantage of ubiquity—that therefore, being already everywhere for its own purposes, it can serve the whole country in other ways cheaper and better than anyone else could serve it. Private companies would work cheaper and perhaps oftener between great centres of trade. London and Liverpool could take care of themselves. But without a national system it would take a long time to send a letter from Wick to St Ives, or from Chiselhurst to Donegal. The Government can provide the whole country with quick and regular despatches more certainly and more cheaply than private traders can do so. Some theorists have naturally said that the Government having this inevitable advantage should be content with it; that as the Government is sure to win in competition, it should permit competition; that private persons should be allowed to send letters and telegrams if they like. But this is a fallacy. Government can only serve the country cheaper if it has the whole country to serve. If private competitors were permitted to serve rich districts, where letter-carrying pays, the Government would be left only with the poor parts, where letter-carrying does not pay. It would for certain have all the debit side of the reckoning, and would have none or but little of the credit side.

In theory all these great national trades ought to be in the hands of a Minister of Trade. They would then be seen in their true light—as distinct exceptions to the general law that individuals trade better than their Government because in these cases a peculiar and inevitable attribute of Government helps it to trade better than scattered individuals not having that attribute can trade.

There are other branches of trade in a similar position too The State is the great banker of the poorer classes. And it would be much better if some large public department were charged with this immense business, and that it should not be left to an outlying board—a body "hanging," in American phrase, "on the verge of government,"—we mean, the National Debt Commission, to control and manage it. The multiplication of small boards and minor offices tends to increase expense, to multiply sinecures, and to impair and divide responsibility.

The English Government has also become the insurer of the poor, and Mr Lowe says it should also become the insurer of the rich. And to whatever extent the State engages in this business, it should entrust its management to the great department of business.

As we have before explained, we should like the English Government to become trustees or executors for such of the public as liked to make them so. The permanence of the State is a permanent inherent advantage, which would enable it to manage that business well. No creator of a long trust can now be sure who will execute, for the lives of trustees are as frail and as little to be relied on as his own. In real life such trusts are often in hands which the creator of them would never have trusted, and which he would have particularly disliked. For performing this duty the State might charge some moderate percentage, which would be valuable when the public came to value the privileges, and which would probably be less than the tribute which most trusts now pay to the lawyers.

We have also explained on many occasions that we do not believe that the collection of most bankrupts' estates will be, we do not say well managed, but even decently managed, until some responsible department of Government takes it in hand. Under the old law it was proved, what was plain enough, that the Courts of Law could not manage decently: the new law is proving that in most cases the creditors cannot and will not manage decently. The only remaining plan is, when the creditors desire it, to entrust the management to a Government, who shall collect the estate, and be remunerated by a percentage on the dividend. The creditors would not then, as now, be wholly in the bankrupt's hands; under the present law they have, in practice, to take almost any composition he offers. But if the Government undertook the task, the creditors could at least threaten the bankrupt that they would leave him to the Government.

If the entire superintendence of trade, the entire aid given by Government to trade, and all the trades carried on by Government, were collected in the hands of a single great Cabinet Minister, to be called the Minister of Commerce, the arrangement would be more efficient than the present aggregate of shifts. The work would in general be better done, and commercial men would feel that their affairs were in the hands of a first-class office, which now they do not feel, and which the recent deputation complained that they did not feel.

PARIS AND FRANCE.

The murders, the anarchy, and the massacre of the last seven days in Paris, have naturally brought to a focus that feeling of antagonism between the metropolis and the rural districts which every one of the last eighty years has more or less made clear to the minds of Frenchmen. One of the most curious specific differences between the French and Teutonic races seems to be this, that while the Teuton remains pretty nearly the same self-dependent, somewhat slow, being in great social masses that he is in comparative solitude, something like a real fermentation appears to take place in the nature of Frenchmen when associated in such masses, till the passions and vices and virtues of French society, as seen in great towns, become something positively distinct in kind from the passions and vices and virtues of Frenchmen sparsely scattered over the country. Lyons, and Marseilles, and Paris show Frenchmen in a form so far removed from that of the small proprietors and peasants of the departments, that there is nothing in what chemists call the "allotropic" states of the chemical elements, which can compare for a moment with the marvel of the transformation. The little French farmer or peasant-proprietor is a frugal, saving, timid, creature of quite exaggerated caution. In relation to the rights of property and the domestic duties, no one can be more tenacious or more conservative. He loves to see his little savings increase, and loves to exercise the proprietary privileges and domestic authority which he enjoys. He is afraid of change and detests war. His love for national glory is feeble beside his love for local prosperity. He is one of the least adventurous of God's creatures, a being of as modest expectations, as far removed from vaulting ambition, as it is possible to conceive. He has of course his own little vanity, but it only induces him to make a world for himself in the sphere in which he is predominant, and which he never really desires to quit. Turn to the great cities of France, and especially to the metropolis, and everything seems reversed. The individuality of the Frenchman is almost absorbed into that of the society to which he belongs. Each man's vanity is magnified into the vanity of a great social organism,—every true Parisian, for instance, feeling as if Paris herself were in some sense incarnate in his own person. The tenacious sense of proprietorship and individual importance disappears; and in its place there grows a taste for socialism and a vivacity of municipal feeling that to our cold eyes seems scarcely credible and even hardly sane. Look at the fury which the hesitation of the Assembly to remove to Paris has produced in the breasts of shopkeepers who, as shopkeepers, were probably never guilty of running a needless risk in their lives, but who, as Parisians, have risked gain, and order, and life itself to avenge the supposed insult which Paris has suffered. In the place of extreme caution appears rashness; in the place of eager acquisitiveness the most reckless spirit of destruction. It is literally true that no fermentation, no organic process known in nature, causes a change so startling as continued association with other Frenchmen in an active, keenwitted society seems to cause to the limited and conservative nature of a French peasant. He becomes quick, witty, aggressive, *exigeant*, rash, from being slow, dull, timid, humble, cautious to an extreme. His politics change their hue, and become impulsive, offensive, dictatorial. A Marseillese, or Lyonnese, or a Parisian, is more certain by far to be politically abhorrent to the French peasantry than a Londoner or a Berliner would be in his place. Strict association in large multitudes makes a newer being of the Frenchman than of the members of any other European race. The chasm between the people of the great cities of France and the people of the departments is so great as to cause a terrible political danger at all times; and in times like these, when dangerous stimulants have been administered both to the conservative and to the anarchical passions of Frenchmen, the chasm is, naturally enough, wider and more threatening than ever. No one can doubt that the Assembly at Versailles is more completely out of harmony with the rebel Committee in Paris than it would be with our own Parliament, or with the Parliament of Holland or Sweden. Is it possible that such a danger can endure without prolonged anarchy? Is there no remedy which might really prove, if not final, at least radical?

The obvious answer is that if the Parliament of France would govern France, it must remove from Paris, where the local influence is so powerful and is used to override the instructions with which the country deputies are charged. Just as in some federated States (though Switzerland is not amongst the number) it seems to be found desirable to place the capital in a comparatively insignificant place, like Washington or Ottawa, in order to avoid the jealousies which local influence would otherwise cause,—so in France, which must be considered for the future a kind of confederation between city and country, it may well seem desirable to remove the seat of Government from the overweaning influence exercised over it by the restless genius of the metropolis. And it is perhaps just conceivable that after this massacre and anarchy some such change might be possible. The country is by this time probably more fanatically anti-Parisian than at any time since June, 1848, if not even more than it was then. If ever this feeling is to rise into a spasm of fear and hatred, it will probably be now. And if the country could really resolve on so audacious a step, it is hardly to be doubted that the soldiers, who are recruited from the country, might be sufficiently loyal to the country to use their weapons freely for the reduction and conquest of Paris, while the Assembly adjourned to some little town where there would be no dread of overbearing influence. Persuade the small landed proprietors of France that the only chance for the safety of their proprietary rights is to protect the Assembly from the influence of Paris, and to render Paris unable to attack the Assembly, and there would at all events be a great —we do not say a successful—effort made in the course of the next few days to throw off absolutely the magic spell of Paris, and to make her feel for the future her strict political subordination to France. But the effort might well fail. What marvellous power Paris exercises over the rural districts is visible enough in the history of these few last days, when the soldiers —who are drawn from the country—have refused even to avenge the unprovoked murder of two of their Generals, and have reversed their arms on the first collision with the Paris mob. But besides this deep-rooted traditional feeling for Paris, which Frenchmen have so long identified with France in French history, there is the natural and intense eagerness of French deputies to live in the very centre of public life and popular amusement, and the clear knowledge that this can be managed only at the place where for centuries society has been organising itself so as to obtain these ends. Then there is the fact that the administrative machinery all centres in Paris, and that the railway lines all converge there. The very deep conservatism of the French rural districts will operate, too, against making any serious change such as would shock the national imagination, and it can hardly be doubted that to insist on permanently de-metropolising Paris *would* shock the national imagination. However bad are the politics of Paris, all France feels a certain pride in the exciting traditions of Paris, and would feel that to give the go-by to Paris would be practically to lose one great stimulus of life and that part of a Frenchman's inheritance, on which he is at least as apt to

pride himself as a mother on her own complete incompetence to tame the high spirit of her son.

Indeed, it seems not unlikely that the Assembly will produce no man equal to organising the military reduction of Paris, and its efficient Government from another centre; while, if such a man there be, the chance is very great indeed that he could govern and keep down Paris even better from inside than from outside. The enterprise of abandoning Paris, and of suppressing with a strong hand the discontent which that would cause, is evidently quite beyond M. Thiers' strength; and if a ruler can be found to undertake it, it is very likely that he would prefer instead to undertake the solution of the problem how to govern the country from within Paris, though without conceding too much to the violent influences of Parisian politicians. As it is, Paris is plainly a political volcano, from which every few years or so come fire and ashes and destruction for the neighbouring regions of France; and unless these periodic eruptions can be finally suppressed, the *safest* measure for the French Assembly would be, of course, to remove to some spot beyond the reach of the lava and ashes. Whether, however, the safest measure be a possible measure,—whether Paris would not attract the Government to herself with a force of quite irresistible magnitude,—we do not pretend to decide. If it be not so, we very much fear that the conditions of a real political equilibrium in France not only do not, but cannot exist.

THE BANK OF ENGLAND MEETING.

The conversation at the meeting of the proprietors of the Bank of England, a summary of which we laid before our readers last week, was not in most points either very important or very interesting. But two points are worthy of remark. First, that a protest was made by an enlightened proprietor against the rule of the Bank, which forbids advances on foreign securities. Such a rule ought to be unnecessary. When foreign securities are good, they ought not to be excluded by an arbitrary rule; and when they are not good, the management of the Bank ought to be well informed enough to find it out, and prudent enough not to lend on them. The second important point is the vote of thanks to Mr Crawford, the ex-Governor, in which all persons acquainted with the City will heartily concur. Mr Crawford showed, as Governor of the Bank, the strong sense, prudent ability, and capacity for labour, which have so long made him eminent among the men of business of the House of Commons.

Mr Crawford's speech, in returning thanks, was modest and straightforward. But perhaps it rather too much implied that everything about the Bank of England "is, and is generally "admitted to be, perfect." But from such unlimited praise we think there are many deductions. In some degree it is true, as Mr Crawford said, that the Bank of England has of late years been guided by recognised principles. After a great struggle, some ten years ago, it was definitely established that when the exchanges are unfavourable, and when their Bank reserve is unduly diminished, the Bank should rapidly and vigorously raise the rate of interest. And the admission by the directors of this cardinal principle makes the present government of the Bank far sounder and much more to be relied on than it used to be. But on the other hand, in some degree, in spite of what Mr Crawford says, the principles of the Bank are not "recognised," and are extremely uncertain. We believe that if the directors were suddenly and without concert made to write their opinion, they would write very discordant ones, even on two cardinal points.

The first is the amount of the reserve which the Bank directors think it right to keep in the banking department. There has been no distinct statement of this since the spring of 1857, when the then Governor said that 3,000,000*l* of bank notes in the Banking Department was in his judgment sufficient. After the events of the autumn of 1857 and the spring of 1866 no one would now maintain that. Everyone would admit that more is necessary. It will be said that the reserve should vary with the liabilities of the Bank, and with other circumstances; but then we should like to have some clearer notion than we have how the Bank views such changes, and what proportion of its banking liabilities it considers enough for a banking reserve.

Secondly—To what extent the Bank will lend during a panic? to whom and upon what securities? and to what extent by so lending they will take the certain responsibility of ensuring the breaking of the Act of 1844? are questions as to which the Bank has no certain knowledge. We could give a series of statements by Bank authorities very conflicting on this head, and even in the two last panics—1857 and 1866—much uncertainty was felt as to what would be their conduct.

On this last point it is the more necessary to have some fixed doctrine, because the Bank executive is fluctuating. One Governor may think one thing, and another another. No doubt, after adequate deliberation, the Board of Directors would favour some policy and agree to some decision. But panics move very rapidly; there is no room for much decision. Much in such cases may depend on the opinion, something even on the temperament, of the Governor for the time being; and as the Governor changes every two years, there ought to be some sort of fixed code to guide this changing executive. So long as there is not, panics may be seriously aggravated, and the public may be great sufferers.

MR DISRAELI'S SPEECH ON PURCHASE.

It is not quite fair that Mr Disraeli's speech of Friday week upon purchase in the army should pass without a word of appreciation from journalists interested rather in the working of our institutions than in purely party politics. There was something very fine about the speech, regarded as an intellectual effort, and something still finer about the view which it conveyed. It has chanced to Mr Disraeli once or twice to extricate himself by sheer intellectual vigour from a position of embarrassment which feebler men would have found hopeless; but even he has rarely had a more difficult part to play. It is not every man who can disown the most cherished prejudice of his party, and yet maintain his ascendancy among them; and Mr Disraeli on Friday accomplished this feat for the third or fourth time. Perhaps the most distinctive feature in the Tory leader's career has been his bold and persistent advocacy of the claims of his race; yet he had once to come down to the House, and while reasserting those claims in the strongest and most outspoken manner, to vote against them on party grounds, and assign reasons for his vote which should neither impugn his own consistency, nor imperil the future liberation of his race. He did it all. In the celebrated speech in which he resisted Jewish emancipation on the ground that the measure would also increase the power of the Roman Catholics, he asked if the Premier, Lord John Russell, had forgotten that he had recently attributed a great plan of aggression to the Catholics, and if he imagined "that the Papacy abandoned its "purposes with the facility of a Whig Ministry;" told the silent House that, however valuable Parliamentary institutions might be, "he could not forget that the Jews had seen, and "had survived, the Pharoahs;" and sat down perhaps more respected by the House than on any other day in his long Parliamentary career. In the discussion on the Army Bill he had the same task to perform, though in a somewhat different manner. It may be said broadly that the Tory party distrusts the Government Bill as a scheme of military reorganisation, and regards purchase with favour as a guarantee for the ascendancy of the propertied class in the State. They have not made much of this particular argument, because it is a dangerous one; but there can be little doubt that if they thought the new officers would be gentlemen in their sense of the word, their opposition to the measure would be comparatively feeble. That indeed is what they mean by repeating like so many parrots that purchase in theory and by itself is indefensible. Mr Disraeli, as their leader, was bound to express their general sentiment; but he was bound also, as Mr Disraeli, to express himself, and his self throughout his career has been definitely opposed to two foibles of his party—their belief in the English country gentleman as such, and their weak tendency to rely upon the power of money. In his books, in his speeches, in his measures, Mr Disraeli has steadily revealed his distrust of the landowners, his doubt if they are even the finest specimens of Englishmen, his conviction that they are at all events very stupid persons, who, though "acred up to the lips, consolled up to the chins," know "only one language, and never open a book." His well-known speech at Edinburgh about the "education" he was giving them was an outburst of almost fierce intellectual scorn for the whole class. Upon the subject of money he has been even more decided. It is probable that one of his few strong antipathies is to the influence of money, especially in politics, and that he dislikes the local magnates who enter by that claim rather more than any other class of men in the

House. At all events he proposed the only severe measure ever carried for the prevention of bribery in elections, and swept it through both Houses by an exertion of determined will and energy, which extorted acknowledgements even from his bitterest foes. The dislike extends, we feel convinced, to purchase, as the most striking and visible form which money-power has ever assumed in any country; and accordingly, in his speech of Friday, the leader of the Opposition, while criticising the Government Bill with some severity, gave up the defence of purchase altogether, and made the further maintenance of that system of entrance into the army virtually impossible. The views of his friends, his own popularity, even the interests of his party, were all set aside, in order that Mr Disraeli might pronounce the "doom" of a system at which every instinct of his peculiar intellect recoils. Why he also supported the Government plan of reorganisation—of binding the three divisions of the armed force—is more doubtful; but his conduct on this matter also is susceptible of an appreciative explanation.

Mr Disraeli is not, from our point of view, a man of principle, and certainly not from any point of view a man of administrative power; but he has, perhaps, in consequence of those deficiencies, a great admiration for administrative skill. He perceived that the Government plan, however imperfect, was, as he said, the first honest attempt to link together the disconnected forces of the country, and he uttered that opinion which, as he must have been well aware, placed the Government scheme almost out of the reach of serious attack. This was a generous thing to do, even if it is Mr Disraeli's conviction that the time for hard Parliamentary fighting is not come yet, as he recently informed the Conservatives of Lancashire; and its generosity may be measured by the extreme irritation it created among his party, whose chief organ next day hinted that it was only party discipline which prevented open remonstrance or rebellion. Such instances of generosity are rare, and when performed by a man whose reproach is that he is a party leader rather than a statesman, who is suspected of postponing everything to the delight of victory in the conflict of debate, they deserve to be specially and publicly acknowledged. If they reveal the chasm between Mr Disraeli and his followers, the contempt he feels for their intellects and prejudices and modes of thought, they also show that there are some few points upon which the Tory leader will not sacrifice his own opinions or the interests of the country to the necessities of leadership.

THE DEBTS AND PROPERTY OF THE "CORPORATION OF LONDON."

We presented our readers lately with an abstract of the annual accounts of the City of London for 1868 and 1869, with the simple object of showing the sums that were received and spent in each year by the City authorities. Such a simple account we believed would be very useful—a statement of the year's cash transactions being in fact the first thing necessary in local as well as Imperial finance. There are various problems in City finance, however, which cannot be so summarily dealt with, and one of the most important of these we propose to discuss in the present article, viz., the question of the City's debt. The frequent mention of the payments for interest throughout the accounts could not but be observed, and the City of London is in fact a large borrower in our markets. It becomes a question of interest therefore to two sets of people how the City authorities stand with respect to their debt—to the citizens of the whole Metropolis as a vital question in the affairs of their leading municipality, and to capitalists who deal in City of London bonds. It will be understood that we shall only deal with the debt of what is called the "Corporation of London." Though the accounts, of which we gave an abstract, are all published together, and profess to be all connected with the "Corporation,"* it appears that there are two *legally* distinct authorities—the Corporation and the "Commissioners of Sewers;" and at any rate the debt of the latter, which is besides comparatively small, is separately secured, and its surpluses, as we understand, are not available for the Corporation.

What then is the position of the Corporation with respect to its debt? The first observation which one makes in endeavouring to answer this question is the absence of any balance sheet of assets and liabilities in the Chamberlain's accounts. Though the Corporation in reality carries on a particular "business," having property to manage with varying charges upon it, and may annually have a surplus or a deficiency, or in other words make a "profit" or a "loss," the usual pains are not taken to ascertain from year to year how the business goes. The omission is very singular and mischievous. If the Corporation had even limited powers of increasing its taxation, as other local authorities have, there would be some excuse for it, as there would be a margin against financial disaster; but its estate on the contrary is strictly limited, capable of only internal development. The omission, in such circumstances, of an annual valuation, and of an account of profit and loss, may well give cause for astonishment.

We find, it is true, in the accounts something which has the semblance of a balance sheet, which it may be as well to look at. It is called a "Balance Statement of the Cash Assets and "Liabilities of the Corporation;" and the statement for 31st December, 1869, sums up as follows:—

Assets.	£	£
Cash balance in the Chamber on account of the City's cash ...	15,855	
Arrears due ...	50,317	
Debts due in relation to advances to certain funds	34,509	
Estimated value of property liable to meet bonded obligations, as per contra ...	4,476,100	
Sundry balances	472,387	
		5,049,289
Liabilities.	£	
Cash balance due to Chamberlain on library account ...	158	
Balance of arrears of interest due	8,289	
Bond liabilities	4,524,100	
		4,532,547
Excess of cash assets over cash liabilities ...		516,742

And this "Balance Statement" is superficially satisfactory. If it means anything at all, it means that there is a so-called "cash" surplus of 516,742*l*, while we are informed in a note that the statement is "exclusive of the value of the Corporation Freehold and Leasehold Estates, Market Sites, and "Buildings (other than the Metropolitan Cattle and Meat and "Poultry Markets), Vacant Ground, Public Buildings, &c." The inference is that the Corporation has assets of a certain kind, *by themselves* worth half-a-million more than its liabilities, and that it has a great deal of other property besides. But the mode of estimating the assets is as fictitious as it could well be. The only important item is "the estimated value of "property liable to meet bonded obligations, as per contra," and the estimated value is in each case the exact amount of the debt so secured. Just look at the items which make up the above sums of 4,476,100*l* of assets, and 4,524,100*l* of liabilities:—

Liabilities.	£	Assets.	£
Loans charged on Cattle Market ...	440,000	Value of Cattle Market ...	440,000
Ditto Coal Duty	1,560,000	Ditto Coal Duty	1,560,000
Ditto Holborn Valley Surplus Lands ...	440,000	Ditto Holborn Valley Surplus Lands ...	440,000
Ditto Meat and Poultry Market Site and Approaches ...	1,075,000	Ditto Tolls, Rents, and Surplus Lands of Meat and Poultry Market ...	1,070,000
Ditto Gresham Estate	85,000	Ditto City's sale of Gresham Estate	85,000
Ditto Bridge House Estate ...	661,100	Ditto sale of Bridge House Estates	661,100
Ditto General Revenues	43,000	Ditto surplus of General Revenues (no estimate) ...	...
	4,524,100		4,476,100

The only real difference between the two sides of the account arises in fact from the liabilities containing a sum of 43,000*l* not specially secured. In all other cases the so-called assets are identical with the amount of the liabilities. The idea seems to have been that the Corporation is entitled to debit each special security pledged with the amount of the debt against it; and as there is hardly any debt not specially secured, and the Corporation has a great deal of unpledged property, the account shows very well. But what if the securities are *not* sufficient, and the Corporation has little surplus of general revenue? The statement assumes the very things which only a careful valuation and balance sheet could prove.

Something however may be made of the materials before us. There is no valuation or balance sheet, but we may compare the annual burden of the debts (1) with the annual net income of each special security pledged after paying all charges except interest, and (2) with the annual net surplus of the general revenues of the City, exclusive of the special revenues pledged. For this purpose we take the gross and net income of the last account before us, viz., for 1869. We may at least ascertain whether all the charges of the debt could be met out of the surplus income, as it stood in 1869.

First then as respects the debt. We give below a detailed

* The title of the volume we summarised is—"The Chamberlain in Account with the Corporation of London, in respect of the City's Estate; also in respect of various Public and Trust Funds in the Chamber of London."

list of the loans due by the Corporation of London, with a calculation of the annual interest. The list is abridged from the appendices to the "Balance Statement," which we have already commented on, and is in fact an official statement by the Corporation of its own debt. We have also appended a summary, bringing together the sums of interest annually chargeable upon each special security pledged. The result is that at the end of 1869 there was—

		£	s	d
Charged annually on	(1) Cattle Market	18,127	10	0
— —	General Revenues only, but for Cattle Market	2,150	0	0
		20,277	10	0
— —	(2) 4d Coal Duty	81,637	10	0
— —	(3) Holborn Valley Surplus Lands	18,693	5	0
— —	(4) Meat and Poultry Market	47,487	10	0
— —	(5) Gresham Estate	3,612	10	0
— —	(6) Bridge House Estate	30,100	0	0
		*201,808	5	0

* This sum is considerably larger than the amount apparently shown in the abstract we published, but these accounts only showed the actual payments in 1869, there being large additional borrowings in that year, which would only become chargeable afterwards; and there are also some payments of interest mixed up with the charges on the markets and not shown separately on the face of the accounts.

Such is the annual amount for which the general revenues are mortgaged, and which must be met out of these general revenues if the special securities are deficient.

Second, as respects the special securitities, we have to compare the net income with the interest chargeable in each case. We may look at them in the order stated.

(1.) *The Cattle Market.*—The account of this market is included with the City's Estate, and it shows the following balance :—

	£	£
Total receipts in 1869		34,313
Gross expenditure in 1869	£39,038	
Less—interest paid	19,760	
Net expenditure, exclusive of interest paid		19,278
Surplus in 1869		15,035

The amount of interest chargeable, according to the above statement, being 18,127*l* 10s, or including the 2,150*l* chargeable on the general revenues only but for a debt incurred on account of the Cattle Market, 20,277*l* 10s—there is a deficiency on this head of 5,242*l* 10s.

(2.) *The* 4d *Coal Duty.*—There is a separate account of this duty, which shows the following balance :—

	£	£
Gross duty received		94,593
Gross expenditure	£93,264	
Less—interest paid, 57,757*l*; and debt repaid, 19,554*l*	77,311	
Net expenditure, exclusive of interest paid and repayment		15,953
Surplus in 1869		78,640

The amount of interest chargeable, according to the above statement, being 81,637*l* 10s, the deficiency on this head is 2,997*l* 10s.

(3.) *Holborn Valley Surplus Lands.*—There is a separate account of the Holborn Valley Improvement, with which that of the Surplus Lands appears to be mixed up; but there can be very little revenue. The *total* receipts in 1869, exclusive of loans and a sum withdrawn from deposit, were—

	£
Rents and old materials	5,035
Income-tax retained	431
Interest on sums deposited	379
Reimbursement for building vaults	299
	6,144

which is only one-third of the interest chargeable. There are however one or two items of expenditure—such as rents, rates, taxes, &c., 3,052*l*, and incidental expenses, 687*l*—which appear to be properly chargeable not to construction but to ordinary revenue, and which are of nearly equal amount with the above sums. In the meantime, to all appearance, there is practically *no* revenue to meet the above charge of 18,693*l* 5s.

(4.) *The Meat and Poultry Market.*—This is partly dealt with in the City's Estate, and partly in separate accounts. The account in the City's Estate shows the following balance :—

	£	£
Produce of market		35,191
Gross expenditure	£38,918	
Less—interest paid, 21,362*l*; and transfer to tolls account, 10,000*l*	31,362	
Net expenditure, exclusive of interest, &c.		7,556
Surplus		27,635

The other accounts relating to this market are three, viz. :—The Site and Approaches Account, the Western Approach Account, and the Tolls Account; and the *only* revenue receipt is in the latter, viz., Gross Produce of Tolls, 14,850*l*. As the ordinary expenditure in this account is 2,400*l*, the surplus remaining is 12,550*l*, which, added to the above surplus of 27,635*l*, makes a total of 40,085*l*, against a charge for interest of 47,487*l* 10s, or a deficiency of 7,402*l* 10s.

The deficiency however may be greater than this, as there are charges in the "Site and Approaches" and "Western "Approach" Accounts, which appear to be of a permanent nature, although there is no revenue in these accounts.

(5.) *Gresham Estate.*—On this head there is apparently a surplus. In 1869

	£
The receipts were	8,441
Expenditure, exclusive of interest and repayments	2,081
Surplus	6,360

The interest charged being 3,612*l* 10s, there is a net surplus of 2,747*l* 10s.

(6.) *The Bridge House Estate.*—In 1869

	£
The receipts from all sources were	45,427
The expenditure, exclusive of interest and repayments*	23,910
Surplus	21,517

* But including 9,150*l* paid to Exchequer in respect of advances towards rebuilding London Bridge.

The charge for interest being 30,100*l*, the deficiency here shown is 8,583*l*.

We have thus compared each of the separate securities with the debt charged; and we have now to look at the "General "Revenues" of the Corporation—in other words, the general account of the City's Estate. The revenue and expenditure, exclusive of loans and sales of securities in the receipts, and exclusive of construction expenditure, and loans discharged in the payments, were in 1869—

	£
Receipts	214,949
Expenditure	212,646

—showing a small surplus. But these totals include the account of the Cattle Market, and part of the accounts of the Meat and Poultry Market, which we have already dealt with. The receipts and expenditure, excluding the sums so dealt with, are—

	£	£	£
Receipts, as above		214,949	
Less—for Cattle Market, above accounted for	£34,313		
Do. Meat and Poultry Market	35,191		
		69,504	
Receipts			145,445
Expenditure, as above		212,646	
Less—for Cattle Market, above accounted for	£39,038		
Do. Meat and Poultry Market	38,918		
		77,956	
Expenditure			134,690
Surplus of net revenue			10,755

Summing up the above figures we obtain the following comparison of the annual interest of the Corporation debt with the surpluses of the Corporation revenues :—

COMPARISON of NET REVENUES of CITY of LONDON, with INTEREST on LOANS.

Special Security Pledged.	Amount of Annual Interest Chargeable.	Net Revenue of Security Pledged.	Surplus of Revenue to Pay Interest.	Deficiency of Revenue to Pay Interest Chargeable.
	£ s	£	£ s	£ s
(1) Metropolitan Cattle Market	20,277 10	15,035	...	5,242 10
(2) City's 4d Coal Duty	81,637 10	78,640	...	2,997 10
(3) Holborn Valley Improvements Surplus Lands	18,693 5	nil.	...	18,693 5
(4) Metropolitan Meat and Poultry Market	47,487 10	40,085	...	7,402 10
(5) Gresham Estate	3,612 10	6,360	2,747 10	...
(6) Bridge House Estates	30,100 0	21,517	...	8,583 0
	201,808 5	161,637	2,747 10	42,918 15
				— 2,747 10
Net deficiency of Special Securities				40,171 5
Deduct surplus of General Revenues				10,755 0
Net deficiency of Revenue				29,416 5

There is little necessity for comment on this account. Its unsatisfactory character will be self-evident. Whatever may be thought of the value of City property, it appears certain that the yield of property in the last year but one—the last year for which we have the accounts—was not enough to pay the ordinary charges of the present administration and the interest of the debt. The "Special Securities" are almost all deficient—in the aggregate to the extent of 40,171*l*—and the surplus of 10,755*l* in the "General Revenues" still leaves a total deficiency of 29,416*l*. If the Corporation is to pay its way, taking the debt as it stood at the end of 1869, though we believe there has been borrowing since, it must economise about 30,000*l*, or find somewhere that amount of new revenue. And there must be no more loans. Every such loan will of course increase the deficiency.

No doubt the free revenue of last year, for which we have not yet got the accounts, may have been greater than that of the year before, and the amount may be increasing. But the deficiency to make up is considerable. It is not agreeable to know that the net revenue of the last closed year was

insufficient to meet the interest of the debt as it stood at the close, whatever prospects of improvement there might be.

Nor is this all the account. The chief special security pledged is the 4d Coal Duty, but it is granted, we believe, only for a term, and is pledged for the capital as well as the interest. A sum should be laid aside annually to repay the capital, so that to the above deficiency we should add a deficiency of the amount annually due for the gradual repayment of the capital. The difference this would make would be enormous.

The practical conclusion is very simple. When the accounts of the Corporation itself appear to show a deficiency like this, it is the interest of the whole Metropolis and of the creditors of the Corporation to have a speedy investigation. It is the clear interest of both to have the value of the property and the necessary charges upon it correctly ascertained. Our impression is that the City, merely by obtaining better credit, could fund its debt at a cheaper rate; but this will not be the case until the Corporation gets rid of the idea that it has any money to give away, and until the accounts are both clear in form, and show a clear surplus.

List of Loans Due by the Corporation of London at December 31, 1870.

For what Purpose Borrowed.	Special Security Pledged.	Capital raised at: 4 per Cent.	4½ per Cent.	5 per Cent.	6 per Cent.	Total.	Amount of Annual Interest.
		£	£	£	£	£	£ s d
Purchase of Metropolitan Cattle Market	Tolls of Market	218,700	1,377,600	2,078,700	804,300	4,324,100	201,808 6

BUSINESS NOTES.

The Revenue.—According to the last weekly return of the revenue it is evident, as we have frequently pointed out, that there will be a great augmentation upon the Budget estimate:—

	£
Mr Lowe's final estimate was	67,634,000
He had received, up to March 18	67,201,295
Leaving to come in	432,705

And as on March 18 there was a fortnight all but one day remaining, and the revenue comes in at the rate of over a million a week, it may be considered tolerably certain that the estimate will be exceeded by from 1½ to 2 millions, if not more. At the same time it is becoming apparent that the Government have not been spending all the money voted last year.

	£
The amount voted for supply services was	40,466,000
The amount spent to March 18 is	36,290,972
Amount to spend	4,175,028

And as the expenditure is usually "regular," it is not likely that so much will go in the last fortnight of the year. There is thus some probability that whatever difficulties Mr Lowe may have with next year's Budget, he will still be able to begin the year with a flourishing balance in hand.

Bonds to Bearer.—Mr Westgarth, who states that he is chiefly interested in the bonds of colonial governments, has addressed a letter to the Secretary of the Stock Exchange, suggesting a way in which stock could be "registered" and "unregistered," at the holder's option. His scheme seems well worth attention, not only as regards the bonds in which he is interested, but as regards similar registered securities, as to which we have often pointed out the desirability of removing the obstacles presented by the Stamp Acts and otherwise to their conversion into stocks to bearer. Mr Westgarth's suggestion seems a very ingenious one for combining the security of registration for investors who mean to hold with the facility of dealing offered by bonds to bearer. What he proposes is in fact that all bonds should be to bearer, but that a holder should at all times have the option of presenting anyone for registration, in which case it should be impressed on the face with the words, "Registered as per endorsement," and the registration particulars would be endorsed on the back. When a holder of registered stock wished to sell, he would be able to present his bond, and get it discharged from the registry, the only precautions necessary being either that there should be an interval for postal communication with the holder at his registered address, or that the applications should be made through the Stock Exchange. Mr Westgarth adds that the agents for the respective colonial Governments could become registrars for each description of stock, or there could be a common agency; and he shews with the almost minuteness how his scheme would work. His suggestion, we think, is very useful, and so far as we can see there is no reason why the plan, or something very like it, should not be carried out. Much of the present delay in selling registered stock arises from the transfer; but Mr Westgarth dispenses with the transfer, enabling the intending seller first to convert his security into a saleable form, and then pass it to the buyer from hand to hand. At the same time the facility for any holder to register is so great that the numerous class of trustees and others who like that security will have no difficulty in obtaining it.

The Produce of French Indirect Taxes.—The *Journal des Economistes* has paid us the compliment of translating the article which appeared in our issue of the 11th ult. on the Financial Resources of France, and the translator has appended one or two interesting notes. In one case however he appears to have mistaken our drift, and as the point is of some interest in the comparative statistics of taxation, it may be useful to notice it. Speaking of the internal indirect taxes in France, we observed that their apparent amount, relative to other sources of French national income, was increased by the fact that they included the gross receipts of monopolies and not merely the net receipts. As compared at least with other countries which did not make a monopoly of tobacco, France seemed to get more from its indirect taxes than it really did. The translator has understood us to refer to the expensiveness of the collection of revenue in France, but this was not exactly our meaning. When of two Governments one makes a monopoly of an article, and another lays a heavy duty upon it, the former will have the larger gross receipt of the two, although the expense of administering the business or collecting the revenue, and the gain to the Treasury, may in both cases be exactly the same. This arises from the circumstance that the Government which owns a manufacture has to purchase the raw material of its manufacture; and this is an addition to its expenditure of a different kind from the mere cost of collection which a Government that imposes a duty has to look to. It is only the difference between the

amount of what is spent on the raw material and the gross receipts which can strictly be considered taxation. In comparing one description of tax with another in the same state, which was our object in the passage, it appeared only fair to advert to this peculiarity of the produce of a monopoly, and the propriety of doing so will be fully granted, we think, by French financiers and statisticians. We have not the figures at the moment of writing beside us, but our impression is that the cost of purchasing the raw material for the French monopolies of tobacco and powder is about 3,000,000*l*, and this sum would make an appreciable difference in the proportion of the indirect taxes to the whole income of the State. The question of the expense of getting in the revenue is a different matter, and raises most difficult issues, which we had no thought of touching in the passage referred to.

MINT REPORT.—Besides the report on continental mints with which the new deputy-master, Mr Fremantle, presented the public some time since, he has now made an elaborate first annual report, which will be both interesting and useful. This first report is indeed more creditable to the deputy-master than the masterly account of the continental mints, which we have referred to. Being a first report, it contains a complete historical account of the Mint, and an essay on the regulations, besides a full description of the operations and changes of last year, which have been most numerous. Such reports are most useful to Parliament, and we believe that the annual Mint report will extend information on the subject, and enable the House of Commons to keep a proper watch upon the operations. We need only notice at present the account which Mr Fremantle gives of the turn-out of his establishment. It appears that during 1870 coins of no less than twenty-four different denominations were struck at the Mint, viz. :—"*British Coinage.*—Gold—Sove-"reigns, half sovereigns. Silver.—Florins, shillings, six-"pences, fourpences (Maundy money only), threepences, two-"pences (Maundy money only), pence (Maundy money only). "Bronze.—Pence, halfpence. *Newfoundland.*—Gold—Two "dollars. Silver—Fifty cents, twenty cents, ten cents, five "cents. *Canada.*—Silver—Fifty cents, twenty-five cents, "ten cents, five cents. *Jamaica.*—Nickel—Pence, halfpence. "*Jersey.*—Bronze—Pence, halfpence." Mr. Fremantle then goes on to state that the total number of pieces struck was 24,339,621, and their value, real or nominal, 3,182,958*l* 9s 10½d. The value of British coin struck was—

		£	s	d
Gold—				
Sovereigns	£2,189,960 0 0			
Half sovereigns	579,772 0 0			
		2,769,732	0	0
Silver—				
Florins	108,064 16 0			
Shillings	73,373 11 0			
Sixpences	11,990 6 6			
Fourpences (Maundy)	76 3 0			
Threepences	16,096 6 6			
Twopences (Maundy)	44 11 2			
Pence (Maundy)	37 10 2			
		209,683	4	4
Bronze—				
Pence	23,729 5 2			
Halfpence	9,064 0 9½			
		32,793	5	11½
Making a total of		3,012,208	10	3½

The coinage of gold was below the average, which is considered to be 5,000,000*l* per annum, but there was an unusually large coinage of 9,000,000*l* in 1869, and a coinage of 6,500,000*l* is now in progress.

THE B LIST OF CONTRIBUTORIES.—We are glad to see that the case of Brett—*re* the Blakely Ordnance Company—which raises one of the most important questions as to the state of the law concerning the B list of contributories, has been reserved by the Lords Justices of Appeal in Chancery for hearing by the full Court. The peculiarity of the case, it will be remembered, is that Brett and some other ex-shareholders of a company in liquidation, fearing that they would become liable as contributories on the B list, in consequence of certain debts existing before they ceased to be shareholders not having been paid, preferred to buy up the debts themselves and cancel them, and so claim that they are not liable at all. The case appears to us to show a great defect in the Limited Liability Law, which makes the conditions of putting a creditor on the B list dependent upon a mere accident, instead of upon a definite limit of time; but the object and scope of the law may now be expected to receive some authoritative judicial interpretation. If the shareholders in the present case are to be held liable, a strong argument will be supplied for amending the law, and putting it on a proper footing.

THE LAW OF DISTRAINT.—The Scotch members were defeated on Wednesday in an attempt to obtain the abolition of their "law of hypothec," by the discovery of English members that the law of hypothec meant pretty much the same thing as the English law of distraint, and that its abolition was asked for on grounds which would have equally justified the abolition of the English law. The wrath of the country gentlemen was therefore aroused, and the Government sustained almost the most serious defeat they have yet met with. We do not think our English squires have been well advised in thus bringing into prominence the question of principle, and compelling Scotchmen, in reforming their own landlord and tenant laws, to reform the English as well. For ourselves we are inclined to rejoice at the incident. In this matter the intelligent people north of the Tweed, with the economical instincts of their race, are only seeking to reduce to practice a most sound economical doctrine, and we shall obtain its application to England all the sooner if Scotchmen find that the reform of English law must precede or accompany the reform of their own. The position of the advocates of the abolition of the "law of hypothec," as of the law of distraint, is unanswerable. The Scotch law is doubtless the more stringent and logical of the two; but they equally involve the principle of conferring special privileges on a landlord as respects his debtor, and there is no reason for giving such special privileges. The only effect of them is that they enable the landlord, with apparent safety, to trust an inferior man with the possession of his land. If he had no privileges he would be obliged, like other capitalists, to trust the man who offered the best security in character, farming ability, and the possession of capital; but as he has privileges, he can afford to take another man who offers a better nominal price perhaps than the superior farmer—either in money-rent, or submission to more stringent rules about game, or in some other way. But this diversion of the natural current of business which the landlord thinks for his advantage, is, like all other similar interferences of the law, a real obstacle to the welfare of the community. It places a premium upon bad farming, and checks the growth of a good farming class—the men with capital, character, and ability—who find themselves exposed to an artificial competition. The landlords say it is a good thing for the country that the farmer of small capital should be artificially retained in the business; but this is only the old doctrine of protection over again, which it is surely most unnecessary to answer. The State, in an advanced country like England, has no business to stimulate small farmers, or any other class, artificially. In the long run too, we are convinced the landlords make less of their land than they would if the business of farming was not tampered with. The only difference is that with perfect freedom the business which would yield the landlord more rent would also be more profitable to the country at large than the present restricted trade. We hope then to see the present agitation extend, and as it is promoted by an able and intelligent farming class who resent the law as a hindrance to them, and is supported by true economical theory, we do not doubt it will succeed much sooner than the members who voted in the majority so hastily on Wednesday imagine.

THE CHINESE SHIPPING TRADE.—Mr Alabaster, our Consul at Swatow, in a volume of Consular reports on China, just issued by the Foreign Office, calls attention to the growing importance of German shipping in Chinese trade, and the declining relative importance of English shipping. As regards Swatow, he says that in 1860 the British tonnage entering and clearing was 98,554, or $\frac{9}{10}$ of the whole tonnage of the port; in 1860 it was 309,975, or $\frac{3}{4}$ of the whole tonnage; but in 1869 it was only 476 vessels, of 226,601 tons, against 194 foreign ships, of a tonnage of 76,886, the foreign ships being principally German. Mr Alabaster assigns various reasons for this direction of the shipping trade. German vessels cost less, and are worked with cheaper crews; the ship owners of Hamburgh and North Germany have placed in the trade a class of vessels of light draught, more suitable for coasting than English vessels; and they are not

fettered by the English passenger law, which prohibits ships from carrying more than one person to every two tons, or with less than twenty-one days' provisions for the voyage between Shanghai and Singapore—the stipulations of the Chinese law, by which only foreign vessels are bound, being a maximum of three persons to every two tons, and only eight days' provisions. The matter is of some interest to the shipping trade in this country, and Mr Alabaster does good service by directing public attention to them, since a notice of that kind is not unnecessary, even for people who may be supposed to know the facts from the ordinary course of their business. Certainly no grudge will be felt here at the successful competition of German vessels, if there is a fair field and they can really do the business better. But besides the defects which the trade must remedy itself, Mr Alabaster points to others where there would seem to have been injudicious inteference on the part of the Legislature. The passenger laws will be defended on the ground of humanity; but it seems to be beyond the province of English law to legislate for ships trading between foreign countries, or between foreign countries and colonies. We should either enter into treaties with other countries for a common rule, or leave our shipping to the regulations of the countries and colonies with which they trade, which would of course be equally applicable to other foreign ships.

THE REVELATIONS OF WINDING-UP CASES. — The affairs of the Empire Assurance Corporation, Sir Henry Leeke's case, have now come before the Lords Justices of Appeal in Chancery, who have taken the same view as Vice-Chancellor Stuart of the extraordinary transactions by which the directors were qualified. The Empire Assurance Corporation had taken over the business of the British Union Insurance Company of which Sir Henry Leeke was one of the directors; and the transaction in question was an arrangement of the promoter, by which an article was included in the articles of association giving him a sum of 10,000*l* for promotion and preliminary expenses, and it was managed that when the money was "paid" he should immediately hand back the cheques as payment in full of the shares of such of the directors of the British Union as should come over to the Empire. In the winding-up the liquidator placed the names of the directors who had thus been qualified on the list of contributories for the full amount of the shares standing in their name, and he has succeeded in obtaining for this proceeding the approval both of the Vice-Chancellor and the Court of Appeal. While noticing the case chiefly for its revelations, we must repeat our former observation that, apart from the circumstances of this particular transaction, about which there was a good deal of concealment, we are doubtful whether so absolute a rule can justly be laid down in regard to the mode of paying shares as the Judges seem inclined to make. If the payment to a promoter is *bonâ fide*, and he chooses to employ a part of the money in enabling directors to qualify, there would seem to be no fair ground for cancelling the transaction. Of course it would remain for shareholders to decide whether they would trust such directors as are likely to qualify in this manner; but the matter is altogether for them and the creditors of the company, the Judges being only bound to interfere where the transaction is otherwise invalid. Another singularity of the present case was the way in which Sir Henry Leeke had been made to figure as chairman, though he had never distinctly consented to become a director, and his representatives vehemently contended that he was never even a shareholder. That such a question could arise is itself a proof of the loose way in which the business of forming limited companies was conducted before 1866.

THE PUBLIC REVENUE AND EXPENDITURE.

THE following are the Receipts into and Payments out of the Exchequer between April 1, 1870, and March 18, 1871:—

REVENUE AND OTHER RECEIPTS.

	Budget Estimate for 1870-71.	Total Exchequer Receipts			
		To March 18, 1871.		Same time last year.	
Balance on 1st April, 1870—	£	£	£	£	£
Bank of England	...	7,033,761		3,775,717	
Bank of Ireland	...	972,887		931,541	
			8,006,648		4,707,258
REVENUE.					
Customs	19,200,000	19,497,000		21,028,000	
Excise	21,670,000	22,134,000		21,241,000	
Stamps	5,850,000	5,636,000		5,616,000	
Taxes	2,850,000	2,541,000		1,571,000	
Income Tax	6,300,000	5,900,000		9,677,000	
Post Office	4,770,000	4,650,000		4,500,000	
Telegraph Service	675,000	500,000		...	
Crown Lands	385,000	375,000		375,000	
Miscellaneous	3,050,000	2,948,347		2,740,928	
Revenue	67,034,000		67,201,295		72,898,928
OTHER RECEIPTS.					
Advances under various Acts, repaid		1,083,240		1,941,643	
Money received for Fortifications		150,000		200,000	
Money received by Exchequer Bonds		...		1,300,000	
Temporary advances not repaid		...		...	
			2,083,640		3,441,643
Total			77,291,582		81,047,829

EXPENDITURE AND OTHER PAYMENTS.

	Budget Estimate for 1870-71.	Total Exchequer Issues			
		To March 18, 1871.		Same time last year.	
EXPENDITURE.	£	£	£	£	£
Interest of Debt	26,840,000	26,526,437		26,737,360	
Other charges on Consolidated Fund	1,820,000	1,987,428		1,648,797	
Supply Services voted by Parliament	40,466,000	36,200,272		36,991,743	
Telegraph Service	360,000	360,000		...	
Expenditure	69,486,000		65,164,837		65,377,849
OTHER PAYMENTS.					
Advances under various Acts	1,381,408		1,594,408		
Expenses of fortifications	150,000		100,000		
Exchequer Bonds and Bills, &c. paid off	770,000		3,434,000		
(Exclusive of 600,000*l* Bonds paid off with Surplus Income)					
Surplus income, to reduce Debt	2,483,700		...		
(Exclusive of 1,500,000*l* applied to repay Bank advances for deficiency.)					
		4,785,704			5,129,208
Balances on March 18th, 1871—					
Bank of England		6,723,791		9,554,035	
Bank of Ireland		1,217,220		986,137	
			7,941,011		10,540,772
Totals		77,891,552			81,047,829

The following are the Receipts on account of Revenue during the week ending March 18:—

	Receipts of Week Ending March 18.
	£
Customs	583,000
Excise	1,118,000
Stamps	203,000
Taxes	60,000
Income tax	189,000
Post Office	750,000
Telegraphs	nil.
Crown lands	nil.
Miscellaneous	104,191
Total	3,007,191

The total receipts of the previous week were 1,710,000*l*.

The Exchequer issues of the week on account of expenditure were 2,165,783*l*, viz.:—

	£
Interest of debt	200,000
Other charges on Consolidated fund	nil.
Supply services	1,965,783
Telegraph services	nil.
	2,165,783

During the week the cash balances have increased as follows:—

	Bank of England	Bank of Ireland.	Total.
	£	£	£
Balances on March 11	6,014,255	... 1,083,217	... 7,097,472
— March 18	6,723,791	... 1,217,220	... 7,941,011
Increase	709,536	... 134,003	... 843,539

The other receipts to date were 2,131*l*, the other payments were *nil*.

SAVINGS' BANKS RETURN.

THE following Return shows the amounts received from, and paid to, Savings' Banks, and Post Office Savings' Banks, in the United Kingdom, by the Commissioners for the Reduction of the National Debt, during the four weeks ending Saturday, March 18, 1871 :—

	Total Amount received by the Commissioners.	Total Amount paid by the Commissioners.
SAVINGS' BANKS:—	£ s d	£ s d
In money and interest credited	66.823 14 11	67,830 9 7
To transfer certificates from Post Office Savings' Banks to Savings' Banks	822 18 5	...
By transfer certificates from Savings' Banks to Post Office Savings' Banks	...	2,466 10 3
Total	67.646 13 4	70.296 19 10
POST OFFICE SAVINGS' BANKS:—		
In money and interest credited	152.423 14 0	16,158 10 1
To transfer certificates from Savings' Banks to Post Office Savings' Banks	2,466 10 3	...
By transfer certificates from Post Office Savings' Banks to Savings' Banks	...	822 18 5
Total	154.890 1 3	16.981 8 6

Total amount on March 18, 1871, at the credit of:—	£ s d
The fund for the Banks for Savings	37 847,560 9 4
The Post Office Savings' Banks fund	15,514,192 12 4
Total	53,361,753 1 8
Ditto—by last monthly account	53,226,494 12 5

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, March 22.

Last week the financial world was occupied above all things with the question of the payment of the war indemnity to Prussia, and was hoping that the solution of it would be prompt, and would be followed by the revival of commercial prosperity. But events have occurred that have turned its attention entirely from the means and mode of raising money, and have changed its hopes into despair. There has been a new revolution in Paris. The Red party have obtained the mastery, and have set up a Government of their own fashion. Representing and composed of men of the lowest class, this Government is repudiated by the respectable and the wealthy portion of the community, so that its existence exposes the city to the danger of civil war.

Heretofore in France, revolutions made in Paris have been accepted more or less willingly by the rest of the country. But this one can only count on sympathy and support at Lyons, Marseilles, Toulouse, and one or two other towns, where Reds and Socialists are in the majority: all the rest of the country is and will be against it. In former Paris revolutions, too, the Government upset disappeared at once, and nothing more was heard of it. But this time the dethroned Government is at Versailles in association with the National Assembly, and is actively organising resistance. Thus, then, in addition to having war in the city, the new *regimé*, if it stands, will be at war with the provinces also.

The primary object of the revolution, according to the proclamation of its leaders, is to establish in Paris the *veritable* Republic, by which they mean ultra-democracy and Socialism. They do not, they declare, want to impose their system on all France, because she is not yet sufficiently enlightened to accept it. But they pretend, on the other hand, that France has no right to impose her system, which is monarchy, on them. For years, they say, Paris, in spite of her intelligence, has been in thraldom to the provinces, which has given her kings, and emperors, and *plebiscites*, with heavy taxes, ruinous wars, and misery; and they will have no more of that thraldom. In order to accomplish their purpose, they propose to make Paris virtually a free town, separated from the rest of France: and the *modus* of effecting that object is to transform the capital into a commune—not a simple municipality, like any other commune—dealing only with mere municipal matters, but one which will regulate for itself in all things, shall tax itself and employ only its own taxes for its own purposes, shall elect every one of its officers from the highest to the lowest, andshall have its courts of justice with elected judges, &c. &c. ....

Thus, then, the events of the last few days have given Paris a Red revolution, have placed her in danger of civil war, have cut her off from the rest of the country, and have thrown her into the hands of a Government of which the object is to destroy entirely the basis on which society has heretofore been established. Rarely in the history of the world have events of such extreme magnitude and gravity occurred so rapidly. They, it is not too much to say, cause universal stupifaction.

The men comprising the new Government are entirely unknown, or are known only as workmen who got up strikes, or were turbulent under the Empire. They have installed themselves in the Hotel de Ville, and have hoisted the Red flag on it. They have taken possession of the different Ministries, but have not, contrary to custom, appointed new Ministers. They have, however, "delegated" one of their number to the Ministry of the Interior, and another to that of Finance They have barricaded all the approaches to the Hotel de Ville. and have that edifice guarded by National Guards and by a great number of cannon. They have erected barricades in a vast number of streets, all protected by armed men, and many by artillery. They have even placed cannon in the Place Vendome to sweep the Rue de la Paix. They have made armed men from the lowest part of the town occupy the Mayor's offices and other public buildings of the best and richest *quartiers*, thereby depriving respectable citizens of the privilege of protecting themselves and their homes. One of the districts thus occupied is that called the 9th *arrondisement*, and in it are several of the great banking establishments—Rothschild's, the Comptoir d'Escompte, the Société Generale, the Credit Industriel, &c.

One of the first acts of the new rulers of Paris was to pounce on the cash at the Hotel de Ville: it was not much. Their next was to go the Treasury, but their visit being expected all the funds were removed. They found, however, about 32,000 francs, and took them. They were excessively indignant at the deposed Government having left so little behind. They had, it appears, a deliberation as to what they should do for money. Having to pay the armed bands at their devotion, it was absolutely indispensable that they should get a supply somehow. At first they proposed to impose a heavy tax on the rich; but the fear that the latter would be exasperated prevented the execution of the design. They accordingly took by requisition 1,000,000 francs from the Bank of France, and called on the administrators of railway and other companies to make advances. In this way they got enough to pay their National Guards for three or four days. In addition, they distributed food amongst these men, and gave them written orders on bakers, grocers, butchers, and public-house keepers to supply their wants in future. In virtue of these orders rather large quantities of food have been obtained. In some cases levies have been made without the formality of orders—the men telling the tradespeople "the republic will pay."

In presence of such a state of things the commercial community is in dismay. What the French call "high commerce" is completely at a standstill, and many of the retail shops are closed altogether, the others are only open during part of the day, and do little or nothing. The cafés, the public houses, the dealers in articles of absolute necessity, and the hawkers of newspapers, are alone doing business. It is three o'clock as I write these lines, and all the shops in the Faubourg Montmartre and the Boulevard des Italiens, two of the busiest streets, are shut up. The deposed Government, that which is at Versailles, expressed the wish that the Bourse also should be closed; but the stockbrokers did not deem that expedient, and opened it as usual. Had they suspended business, it is not unlikely that the Red men of the Hotel de Ville would have arrested them on the charge of trying to disquiet the public. But though open, the Bourse has seen very few transactions, and those of small importance.

Although the loan the war indemnity will necessitate is for the present out of question, and there is no saying when it can be resumed, it may be mentioned that there is reason to believe that the Government was disposed to raise it, or at least a large part of it, in 5 per cent. stock. In so doing it would have adopted the recommendation of some of the principal bankers, who pointed out that 5 per cent. would present greater facility for conversion hereafter than 3.

The sad incidents that have occurred have rendered the dissatisfaction with the law relative to the payment of commercial bills greater than it was before. The Versailles Government, in one of its proclamations, reproaches the National Guard (the respectable part of it, that is) with not having displayed sufficient energy in opposing the Reds. The reproach is certainly well founded; but the traders say,—"Why did not the Government listen to us when we told it that we were under an absolute responsibility of paying out bills all at once and at a short notice? How could it expect us to expose our lives in the streets at the very moment at which *huissiers* were seizing our goods?" The complaints on this subject are so loud and general, that the National Assembly and the Government have seen the necessity of modifying the law recently adopted. It is certainly not creditable to either that a measure of such importance should have to be altered before being applied. The Red Government of the Hotel de Ville, disregarding the Assembly, has notified by a simple paragraph in the *Journal Officiel*, of which it has taken possession, that "the payment of bills is delayed for a month."

The question of rent must also be dealt with in some way by the Government. It is even more important than that of bills, since it specially concerns the most numerous and most dangerous classes of the community. To expect that part of the population, after six months siege, to pay rent now that

it has got arms, barricades, cannon, and a Government of its own, is absurd. On the other hand it would be unjust to deprive the landlords purely and simply of their money. Among the many projects to which this rent difficulty has given rise, is one that the municipality shall pay the whole, or part of the rents, below a certain amount, and recoup itself in course of years by taxes. *En attendant*, a decision of the Red men of the Hotel de Ville have forbidden landlords to expel non-paying tenants.

The Minister of Finance has decided that the paper, gold, and silver money of France shall be accepted in payment of taxes.

The Eastern Railway is to pay from 1st April 25f as interest on the 1843 obligations of the old Strasburg to Bale Company.

The La Vendee Railway Company is to pay 7f 50c on obligations from 1st April.

The Lyons to Mediterranean Railway Company announces that the coupons of the 1850 obligations of the St Etienne to Lyons line being exhausted by the payment of that of 1st January new stocks will be given in the course of the first six months of 1871, but at what precise date cannot yet be fixed.

The Company the Union des Gaz (Paris) is paying the interest on obligations delayed by the siege.

The Central Agency of Colonial Banks is now paying a dividend of the second half of 1870: 31f 5c for the Bank of Martinique, 22f 50c for Guadaloupe, 20f 24c Reunion, 27f 40c Guiana.

The Ottoman General Credit of Constantinople is giving through the Société Générale of Paris definitive shares for provisional scrip, and is at the same time paying 17f 15c as interest of 6 per cent. to 31st October last.

A coupon of 17f 50c, due 1st April on the obligation of the Viceroy of Egypt of 1870, is to be paid from that date.

The "Société Civile," which some time ago made a loan to the Spanish Government, payable in twenty annuities, is to pay from the 25th 19f 87½c for half a year's interest.

A notice of the Financial Commission of Portugal at Paris to the effect that the dividends in Government stock would be paid quarterly, was mentioned last week. But since then the commission has advertised that, "having received from the principal holders of the Portuguese debt, protests against the quarterly payment of dividends (announced on the 15th) which demonstrate the difficulty of negociating bonds from which coupons are detached, and in part paid, informs the public that the said measure, although adopted absolutely for the advantage of holders, but which was not compulsory, is in consequence of those protests, and in virtue of orders received from the Minister of Finance of Portugal, absolutely revoked."

The Financial Commission of Spain in Paris is now paying the coupon of the Three per Cent. Extension Debt, due 31st December last.

COMMERCIAL AND MISCELLANEOUS NEWS.

The Board of Trade have received from the Secretary of State for Foreign Affairs a dispatch from Lieutenant-Colonel Stokes, R.E., the British representative on the European Commission of the Danube, forwarding translations of enactments of the Commission relating to—1. The revised regulation of navigation and police for the Lower Danube. (2.) The revised tariff of dues to be levied at the Sulina Mouth on and after the 1st of March, 1871. (3.) The abrogation of the regulation made on the 20th April, 1869, for the registration of Lighters.

The Right Honourable the Lords of the Committee of Privy Council for Trade have received from the Secretary of State for Foreign Affairs an extract from the French *Moniteur*, in which it is stated that the term for the free admission of war material, extended by the decree of the 31st December, 1870, until the end of the war, has now expired, and that consequently, such importations, from the 2nd March, 1871, will be dealt with according to previous laws and regulations. Also a copy of a decree, by which the prohibition of the export, &c., of munitions of war is repealed. Another decree removes the prohibition of the export of cattle provisions, grain, flour, bran, and fodder.

The annual return relating to loan societies in England and Wales gives an abstract of the accounts of 670 of these societies for the year 1870. At the end of that year they had 41,650 members, and the sums in store was a trifle amounted to 417,165*l*. The number of borrowers to whom loans were granted in 1870 was 120,673*l*. The amount paid for loans of appreciation and property in that year was 2,342*l*, and for interest, 3,204*l*. The expenses of management in the year were 18,076*l*; also the net profits after paying those expenses, 21,153*l*. 11,198 summonses were issued in 1870, and 2,102 distress warrants; the amount recovered by proceedings was 18,345*l*, the costs incurred by the societies in proceedings 2,827*l*; the costs paid by borrowers or their sureties, 2,218*l*.

The annual account rendered under 48 George III., cap. 4, shows, at the beginning of the year 1871, 267,601*l* dividends on the National Debt due and not demanded. The sum of 3,875,730*l* had been advanced to the Government in pursuance of the statute above named, and 180,000*l* remained in the hands of the Bank of England. Between the beginning of April, 1870, and the end of that year, the amount of dividends due and not demanded was reduced by upwards of 50,000*l*.

The following shows the progress made in the reduction of the public debt of the United States:—

The Hon. David A. Wells, it will be remembered, was the "Special Commissioner of Revenue" of the United States, who began his investigations of that important subject, a Protectionist, and in spite of his predilections became, as the result of these investigations, a Free-trader, and whose office the Protectionists on the 30th of June last discontinued in order to get rid of him. No sooner had he left the Government service than the State of New York, anxious to avail itself of his knowledge of revenue questions, made him the chief of a Commission to investigate the New York tax system, its practical working, and possible reform. This Commission, which has investigated the systems not only of New York but of other States, has just reported to the Legislature. It shows a fearful increase of taxation in the last decade. Prior to 1861 the national Government never raised over 75 millions of dollars in any one year from taxation, but it has since raised over 550 millions in one year. New York in 1861 raised 20 millions, and in 1870 over 50 millions. The State and municipal systems of taxation in all the States are unsystematic, needlessly interfering with industry, uncertain of collection, in many cases oppressive, and often, especially in New York State, so burdensome as to drive away capital and make many industrial enterprises impossible. Mr Wells says:—"The word 'chaotic' is the only term to characterise the systems or the practices." There is no uniform system of valuations, even in the same State, and no settled principle on which valuations are made. The returns, especially of personal property, are notably inexact, and indicate a general absence of principle in those who make them. Personal property nevertheless pays an undue amount of the taxation of the country, while one-fifth of all such property—the national securities—is entirely exempt. The evasions of capital, and hence the partial and unjust character of taxation on personal property, have resulted in the failure of every system of raising revenue from this source. Different and opposing legal decisions are cited from various State courts concerning the place where personal property may properly be taxed, showing an astonishing degree of confusion. The practice of other countries—Great Britain, France, Prussia, and Holland—in not attempting to tax personal property in the manner in use in this country, is shown to exhibit the important results of such exemption in favour of the industries of those countries as compared with our own. This shows that the State and city taxes of New York press upon the building and outfit there of a steamship fleet to a fatal degree. The New York State and local taxes would be 2 and 27.100 per cent. on such a company's whole property or accessible capital, while if the company were English it would pay no local taxes on its property, but merely a tax on the rental value of its offices. Thus, without at all counting the taxes of the general Government, it is the local systems that fatally burden industry. For future taxation the Commission recommend the taxation of all corporations that are in the nature of a monopoly, such as gas, railway, trust, ferry, turnpike, insurance and banking companies, and savings' banks. Foreign insurance companies doing business in the State should also be taxed; also every private banker on his capital, and on at least one-fourth of his average deposits. No other personal property should be taxed. All lands should be assessed at one-half their value, and all buildings at their full value. A provision is recommended by which the corporations and others taxed upon personal property above enumerated may deduct from the sum upon which the tax is levied the assessed value of their real estate. Occupiers of real estate as owners or tenants, and not as lodgers, are to be assessed a sum equal to the assessed rental value of the premises, this sum to be added to their personal assessment. The adoption of these principles would revolutionise our present systems of State taxation.

The cost of the several colonies of the British Empire at the expense of the British Exchequer in the financial year 1868-69 was as follows: British North America, 1,023,990*l*, viz.—the Dominion of Canada, 1,005,203*l*; British Columbia, 1,907*l*, Newfoundland, 24,965*l*, Prince Edward Island, 1,125*l*; the Australian Settlements, 290,914*l*, viz.,—Western Australia, 110,273; New Zealand, 66,913*l*; Victoria, 62,559*l*; Tasmania, 28,362*l*; New South Wales, 14,162*l*; South Australia, 5,505*l*; Queensland, 2,840*l*;—the West Indies, 350,929*l*; Honduras, 19,074*l*; the Cape of Good Hope, including British Kaffraria and Natal, 286,245; Mauritius, 78,546*l*; Hong Kong, 276,238*l*; Ceylon, 23,450*l*; Straits

Settlements, 36,781*l*; West Coast of Africa, 103,918*l*; Labuan, 3,300*l*; Gibraltar, 372,444*l*; Malta, 387,390*l*; Bermuda, 235,457*l*; St Helena, 46,905*l*; Heligoland, 1,148*l*; Falkland Islands, 7,924*l*; sundry colonies, 11,130*l*. The total is 3,620,093*l*. The military contributions of the colonies have been allowed for in the above statements.

The following shows the average state of the rate circulation of the United Kingdom during the four weeks ending January 25 :—

	Dec. 31, 1870.	Jan. 28, 1871.	Increase.	Decrease.
	£	£	£	£
Bank of England	23,040,770	23 839,124	798,354	...
Private banks	2,589,785	2.714,157	124,372	...
Joint stock banks	2,267,059	2,350.753	83,694	...
Total in England	27,897,614	28,904,034	1,006,420	...
Scotland	5,279.585	5.002,232	...	277.353
Ireland	7,432,159	7,392,625	...	39,534
United Kingdom	40,609,358	41,298,891	1,006.420	316.887

And, as compared with the month ending the 29th of Jan., 1870, the above returns show an increase of 287,213*l* in the circulation of notes in England, and an increase of 1,098,717*l* in the circulation of the United Kingdom. On comparing the above with the fixed issues of the several banks, the following is the state of the circulation :—The English private banks are below their fixed issue 1,271,106*l*, the English joint stock banks are below their fixed issue 387,887*l*—total below fixed issue in England, 1,658,993*l*; the Scotch banks are above their fixed issue 2,252,961*l*; the Irish banks are above their fixed issue 1,038,131*l*. The average stock of bullion held by the Bank of England in both departments during the month ending Jan. 25, 1871, was 22,081,676*l*, being a decrease of 691,530*l* as compared with the previous month, and an increase of 2,849,089*l* when compared with the same period last year. The following are the amounts of specie held by the Scotch and Irish banks during the month ending the 25th of Jan., 1871 :—Gold and silver held by the Scotch banks, 3,253,309*l*; gold and silver held by the Irish banks, 2,972,822*l*—total, 6,226,131*l*; being a decrease of 123,879*l* as compared with the previous return, and an increase of 735,618*l* when compared with the corresponding period last year.

An account, pursuant to the Act 8 and 9 Vict., cap. 38, of the amount of bank notes authorised by law to be issued by the several banks of issue in Scotland, and the average amount of bank notes in circulation, and of coin held, during the four weeks ending Saturday, the 25th day of February, 1870 :—

Name and Title.	Authorised Circulation.	Average Circulation.	Average Amount of Coin held.
	£	£	£
Bank of Scotland	343418	574368	362413
Royal Bank of Scotland	216451	602460	503479

Ditto by canal and inland navigation		150	
			15,926
4. Sea-borne coal brought into port and exported in same ships			25
Total quantity of coal conveyed beyond limits of coal duty district during February, 1871			101,435
Ditto, February, 1870			88,219

According to a Parliamentary return just issued, the Act obtained in 1867 by the exertions of Sir Edward Watkin, to enable companies to reduce their nominal capital by resolution and without the previous requirement of winding up or practical bankrupicy, appears to have been attended by important and salutary results. Forty companies have availed themselves of the privilege, and a total uncalled liability has thus been reduced from about 32,000,000*l* to about 6,000,000*l*. The list includes some of the most respectable and prosperous undertakings, many of which would probably have been checked altogether, while they would certainly have been depreciated in price, if, after the experience of 1866, the shareholders had been subjected to the anxiety of having a heavy and needless responsibility constantly hanging over them. There are still some companies in the Stock Exchange list that will never recover to their proper price until they avail themselves of the powers of this Act, and which, perhaps, it would be for the advantage of the shareholders to cause to be wound-up for a division of assets, if the directors refuse to take in this respect the necessary steps.

It is stated that the Executive Council of the Association of Chambers of Commerce of the United Kingdom have resolved to bring a Bill into Parliament immediately for establishing in this country the continental system of partnership *en commandite*. By this measure it is proposed that one or more persons, not exceeding six in number, who shall themselves remain unlimitedly liable for the debts and obligations of the partnership, may lawfully enter into partnership in any trade or undertaking with one or more persons, not exceeding six in number, whose liability shall be limited to the amount to be agreed on. At present there is in existence an Act (28 and 29 Vict., cap. 86), under which persons may lend money to a business on condition of participating in the profits without incurring the liabilities of a partner, the only restriction being that in case of failure he shall not be paid until the other creditors have received 20s in the pound; but this Act is little known, and as it contains no provision for registration and other necessary safeguards, it has never been thought calculated to be materially useful to the commerce of the country. The measure now contemplated would probably be found far more efficacious.

The following is a return of the number of paupers (exclusive of lunatics in asylums and vagrants) on the last day of the second week of March, 1871, and of the corresponding week in 1870 :—

	Paupers.				
	Indoor.	Outdoor.		Total.	
	Adults and Children	Adults.	Children under 16	2nd week March, 1871.	Corresp'nding Total in 1870.
West district	5,854	9.003	6,541	21.398*	25,372
North district	7,050	13,060	10.212	30.322	32,949

In 1861, the demand for money was less than usual at this period of the year, in consequence of the contraction of trade. The American troubles were increasing.

In 1868, the *régime* of 2 per cent. continued. Attention had for some time been given to the securities of foreign Governments, and this week the prospectus of the Foreign and Colonial Government Trust was issued.

In 1869, the tendency of money for the moment was considered to be downwards. The new Bankruptcy Bill, which subsequently passed into law, was beginning to be discussed.

In 1870, money remained at 3 per cent., but there was increasing stringency. A great fall in the premium on gold in America had recently taken place, and it was interpreted to mean that the value of the paper money had advanced. There had been a general fall in prices.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 8,862,598*l*; in 1868, an excess of 462,388*l*; in 1869, a deficiency of 2,091,033*l*; and in 1870, a deficiency of 3,100,621*l*. In 1871, there is a deficiency of 3,315,182*l*.

DISCOUNT AND MONEY MARKET.—The fall in the value of money has continued this week, influenced very much by the unfortunate events which have occurred in Paris. There was some reason to believe last week that a farther fall in money would be checked by the preparations for a French loan, which were in a forward state, and other demands for France which were beginning to be felt, the exchange on Paris having already indicated an increase in the demand for the means of remittance to that city. But the excesses of the Red insurrection in Paris, the flight of the Government to Versailles, and the alarming news as to the state of Lyons, and probably Marseilles, have effectually put a stop to any calculations based on the continuance of a settled Government in France. It is evident that the loan will be put off, and we learn that a good deal of money which was immediately destined for France has been allowed to remain here. This is the natural consequence of the revived feeling of insecurity, and it is likely enough that some of the money which has already gone will come back. The quoted rates, it will be observed, are ½ lower than last week for short bank paper; but there is a great abundance of money, and, as was the case last week, the quotations are a little wide, the market being in rather an unsettled state.

The demand at the Bank has again fallen off, the private securities and deposits having diminished, the former by 513,000*l*, and the latter by 872,000*l*, while the notes unemployed have increased by 273,000, and the stock of bullion in both departments by 142,000*l*.

We subjoin our usual quotations for mercantile paper having various periods to run :—

Bank bills—2 months	2¾		per cent.
Do 3 —	2⅞		per cent.
Do 4 —	3⅛		per cent.
Do 6 —	3⅜		per cent.
Trade bills—2 & 3 months	2⅞	3	per cent.
Do 4 —	3½	3⅝	per cent.
Do 6 —	4	4¼	per cent.

The allowance for deposits at the joint stock banks and discount houses is as follows :—

Joint Stock Banks at call	2 per cent.
Discount houses at call	2 per cent.
Do with seven days' notice	2¼ per cent.
Do fourteen days	2½ per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent. 1870.	1871.	Open Market, per Cent. 1870.	1871.

Brussels	2½	4	2½	3½
Madrid	5	5	5	5
Hamburg	...	...	2½	3½
St Petersburg	5	8	4½	7

THE STOCK MARKETS.—The natural course which the markets appeared to be taking a week ago has been rudely interrupted by the proletarian insurrection in Paris. Many people were afraid that the Thiers Government would have a difficult task in suppressing the Montmartre mutineers, but it was not anticipated that the army would fail the Government completely, and the insurgents become masters of Paris. The shock to confidence has been very great, and instead of quiet progress in the markets under the condition of solid peace there was in the earlier part of the week a good deal of panic, while the old feeling of suspense which prevailed during the closing months of the war has revived. The net result of the changes for the week is somewhat contradictory. In French securities naturally there has been a great decline, and the first shock of the news on Monday produced a temporary weakness in almost every description of security; but subsequently, as the effect of the suspense in maintaining an accumulation of money in Lombard street became apparent, there was a general tendency upwards in Consols and other securities, which a settled peace and the demand for money it will bring would be likely to send down a little in value. In the railway and other home markets, and also to a less extent in the markets for colonial and American securities, the Paris events have had very little effect. The tendency here has for some time been towards improvement, notwithstanding dearer money; and though the first news of untoward events which prolong an unsettled state in Europe is always unfavourable, the after effect of suspense strengthens the current of investment towards these securities and supports the speculation for a rise. In home railways, as will be seen, the advance of the week has again been very striking. It may be considered that the new period of suspense which has begun will, in the best event, be of some weeks' duration. The National Assembly is obviously without ready means of overcoming the insurgents, and even if they should be beaten within the next few days, the disorganisation has been such that a week or two must elapse before the point to which matters seemed to have been brought a week ago is again reached. Possibly the Assembly may have to appoint a new executive before proposals for new loans are again launched, or the Assembly itself may give place to a stronger Government. There is, moreover, the chance of the insurrection holding out more than the next few days, and perhaps provoking complications with Germany, all which would of course prolong the existing suspense. It may be expected that some advantage will be taken of the cheapness of money to give attention to new schemes; but the unsettled state of France, and the possibility of farther difficulties in Europe, give rise to a vague state of alarm, which for the

moment at least prevent any such schemes being brought forward in numbers.

ENGLISH GOVERNMENT SECURITIES.—In Consols the fall on Monday, consequent on the Paris news, was about an $\frac{1}{8}$, the figure at the opening being 91$\frac{7}{8}$ 92, but afterwards the market was firm, and the closing price on Monday was the same as on Saturday, viz., 92$\frac{1}{8}$. On Tuesday there was again a decline, on additional news confirming the gravity of the affair; but on Wednesday and Thursday, notwithstanding the intelligence on the latter day of the insurgents having fired on the friends of order while they were making a peaceful demonstration, the price of 92$\frac{1}{8}$ was maintained. To-day prices have been better, and the closing quotation is 92$\frac{1}{8}$ $\frac{1}{4}$, or the same as last week. The continuously gloomy news from France, indicating the likelihood of prolonged suspense, seems partly to account for the improvement; but in addition there is understood to be a large bear account still open in Consols, and any downward movement caused by the first shock of bad news appears to be at once checked by the anxiety of bears to buy back.

Subjoined is a list of the highest and lowest prices of Consols every day:—

CONSOLS.

	Money. Lowest.	Highest.	Account. Lowest.	Highest.	Exchequer Bills. March and June.
Saturday	92	92$\frac{1}{8}$	92$\frac{1}{8}$	92$\frac{1}{8}$	par to 5s pm
Monday	91$\frac{7}{8}$	92$\frac{1}{8}$	92	92$\frac{1}{8}$	par to 5s pm
Tuesday	92	92$\frac{1}{8}$	92$\frac{1}{8}$	92$\frac{1}{8}$	par to 5s pm
Wednesday	91$\frac{7}{8}$	92$\frac{1}{8}$	92	92$\frac{1}{8}$	par to 5s pm
Thursday	91$\frac{7}{8}$	92$\frac{1}{8}$	92	92$\frac{1}{8}$	par to 5s pm
Friday	92	92$\frac{1}{8}$	92	92$\frac{1}{8}$	par to 5s pm

The following are the changes for the week, taking the latest unofficial prices for quotation:—

Ditto New 5 %	101$\frac{1}{2}$ 2$\frac{1}{2}$	102 3	+ $\frac{1}{2}$

The Bank of New South Wales this week invite tenders for a loan of 407,000*l* to the Government of New South Wales. The rate of interest is 5 per cent., payable half-yearly, and the principal is redeemable on the 1st July, 1900.

FOREIGN GOVERNMENT SECURITIES.—The first effect of the news of the Paris disturbances was to produce a heavy fall in French Rentes and the French National Defence loan; the fall in the latter on Monday being about 3 per cent. from the closing price of Saturday. Other securities in this department fell in sympathy, though there was subsequently an improvement, especially in non-European securities, as the effect of the events in Paris in causing an accumulation of money and postponing the threatened competition of French loans was perceived. The changes for the week, it will be perceived, have been of a very mixed kind. To-day there was a rather better tone in the markets than has prevailed throughout the week, but not much business was done. Spanish were favourably affected at the opening by reports of the favourable reception of the King and Queen in Madrid, and the announcement that the next budget would show a reduction of 5,000,000*l* in expenditure, but the advance was not maintained.

The Russian loan early in the week was steady at about $\frac{5}{8}$ pm., but advanced on Wednesday to 1$\frac{1}{4}$, and on Thursday to 1$\frac{1}{2}$ pm. To-day it is 1$\frac{1}{8}$ $\frac{3}{8}$ pm. Brazilian scrip, which has been rather heavy throughout the week at $\frac{1}{4}$ dis to par. The last quotation is $\frac{1}{8}$ dis to $\frac{1}{8}$ pm.

The following are the changes for the week, taking the latest unofficial prices for quotation:—

ENGLISH RAILWAY SECURITIES.—As we have stated, the Parisian events have had very little influence upon speculation and investment in this department. Last Friday there was some temporary dulness owing to the sales for realisation which were to be looked for after the heavy advance of that week, but since then the upward tendency has been renewed, and there is again a very important advance for the week to record. The favourite stock has again been Great Western, which improved 2 per cent. for the day on Thursday, though the final price was not the best price of the day, and has to-day advanced another 1 per cent., the closing quotation being 86$\frac{3}{4}$ 87. Brightons and South-Eastern Deferred have also been largely dealt in, and have again advanced; and there have been corresponding movements in Chatham and Dover Preference, and Metropolitan District Railway Debenture stock. On the other hand, the Northern lines have been somewhat weak, notwithstanding the favourable traffic returns. The continuance of the competition between the great companies is now popularly understood to have a prejudicial effect, and the high figures of the traffic are suspected—the companies being supposed to have obtained them by accepting less profitable traffic, so as apparently to make up the deficiency which the falling off in the coal receipts would have shown. Though it is difficult to believe that this suicidal competition can continue much longer, or cause a loss while it lasts which will not be recovered from before the end of the half-year, yet the uncertainty about its probable duration, and the suspicion of the traffics engendered, will no doubt make investors careful for some time to come. To-day the markets have been rather good, the tone being given by the advance in Great Western, which we have already noticed, and the closing prices, it will be seen, show a considerable rise for the week in the Southern lines.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices:—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Caledonian	88$\frac{1}{2}$ $\frac{5}{8}$	87$\frac{1}{2}$ $\frac{3}{4}$	− $\frac{3}{4}$

* The aggregate in the case of these companies is reckoned from the 1st of February, 1871.

FOREIGN AND COLONIAL RAILWAYS.—We noticed last week the completion of the arrangements for placing the bonds and preference stock issued by the Grand Trunk of Canada Railway Company for the construction of the international bridge across the Buffalo. This week public subscriptions have been invited by Messrs Laurence, Son, and Pearce, and the bonds and stock are understood to have been more than fully applied for by Thursday. The amount of issue, of which we give particulars below, is 205,000*l* in bonds and 66,000*l* in stock, bearing 6 per cent. interest, with annual accumulative drawings, the whole being secured by a preferential payment from the Grand Trunk of Canada, and the tolls of the bridge. The scrip has been firm to-day at 1⅞ to 2¼ pm. The ordinary stock of the line has again improved this week, the traffic returns continuing favourable.

The following shows the changes for the week in this department :—

Foreign.	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.
Antwerp and Rotterdam	12⅝ ¼	.....	12⅝ ½	— ¼

The Committee have appointed Tuesday next, the 28th inst., for the settlement in the scrip of the Atlantic and Great Western Reorganisation scheme.

JOINT STOCK BANKS.—The tendency of prices in this department has been unfavourable, sales having preponderated. Agra A shares have given way 1; Chartered of India, &c., 1; Imperial, London Joint Stock, London and Westminster, and Union of London, ½; and English, Scottish, and Australian Chartered, ¼. On the other hand, British North American have advanced 1, and Anglo-Egyptian ¼.

The report of the London Bank of Mexico and South America, presented at the meeting on the 21st inst., shows a net balance of 17,419*l* available for dividend, including 2,613*l* brought from the previous half-year. From this the directors recommend a dividend at the rate of 8 per cent. per annum, free of income tax, which will absorb 14,400*l*, leaving a balance of 3,010*l* to be carried forward. The dividend was declared as recommended, and the retiring directors and auditors were re-elected.

TELEGRAPH SHARES.—A decided reaction has taken place in this department, owing to realisations to secure the profits offered by the late important rise. Anglo-American stock shows a decline of 1; Anglo-Mediterranean of 3; Marseilles, Algiers, &c., and West India and Panama shares have given way ½; British Indian Extension, ⅜; British Australian, British India Submarine, and Falmouth and Gibraltar, ¼. The only favourable alteration to notice is a rise of ¼ in Reuter's. Telegraph Construction and Hooper's Telegraph Works are ¼ lower.

MINES.—Some important movements have taken place in the market for British mining shares. To-night's closing quotations show an advance of 3 in West Chiverton, 2 in Tin Croft, ¼ in North Wheal Crofty, ½ in East Lovell, Great Wheal Vor, and Tankerville. Devon Great Consols have given way 7; Assheton, ½; East Caradon, ¼; and Bronfloyd, ¼. In foreign mines, Eberhardts have been in active request, and close at a rise of 7½; but St John del Rey shares have given way 1, and Cape Copper, ¼.

MISCELLANEOUS.—A steady business has been transacted in the miscellaneous market, resulting in a slight improvement in the quotations. Credit shares have been good, English and Foreign Credits and London Financial having advanced 1 on the week. Foreign and Colonial Trust bonds are 2 better. British American Land have risen 1: Berlin Waterworks, ¼; Ceylon, ¼; Scottish Australian Investment, 2; Peninsular and Oriental shares, 1; but Crystal Palace debentures are 1 lower.

The liquidators of the Imperial Land Company of Marseilles have issued a lengthy report, in which they state that arrears of calls represent a large amount, and that unless shareholders respond more readily, another call will be unavoidable. In March last year unpaid calls were 266,600*l*, and since that period only 30,960*l* has been received. The fact of the close of legal proceedings with the Credit Foncier Company is referred to, but suits with other companies are materially increasing the expenses of the liquidation.

The directors of the Rio de Janeiro Gas Company recommend a dividend at the rate of 10 per cent. A similar payment was made in October last. The total profits of last year amount to 93,630*l*.

EXCHANGES.—The events in Paris this week caused a sudden turn of the exchanges against France—the rate rising from 25.12½ : 25 to 25.25 : 40. A good deal of money which was destined for Paris has remained in Lombard street. The exchange also turned slightly against Vienna this week. The rates against Italy advanced still farther on Tuesday than they did last week, the rates quoted being 27.15 to 27.25, but to-day bills have been in rather more demand, and the terms are 27.10 to 27.15, which, however, is fractionally higher than last week. The exchanges are also turning against St Petersburg, the rate being 30¼ ⅛, instead of 30⅜ ⅜ last Friday.

BULLION.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week :—

Gold is now not in so much demand, and although the supplies to hand during the week have nearly all been absorbed, we may look for an influx of gold to the Bank ere long, more particularly as there is a probability of some important sums being received from America shortly, the first shipment (either having been already notified. The Hippocrene has brought 11,000*l* from the Brazils; the Douro, 25,620*l*, from the Brazils; the Nemesis, 50,000*l*, from the Brazils; the City of Baltimore, 900*l*, from Halifax; the Great Britain, 164,500*l*, from Melbourne—total, 252,420*l*. The Nubia has taken 50,000*l* to Malta.

Silver.—We have received several amounts from New York and India, amounting in the aggregate to 217,000*l*. This sum has been sold

for the continent at prices varying from 60½d to 60$\frac{5}{16}$d; the demand not being now so active, the former price may be considered as the nearest.

Mexican dollars.—We have received about 65,000*l* from New York during the week, and these, together with previous arrivals, have been taken chiefly for the East; the Nubia having sailed with about 88,710*l* for China and the Straits.

Exchange on India for banks' drafts at 60 days' sight is 1s 10$\frac{5}{8}$d to 1s 10$\frac{11}{16}$d per rupee.

India Government loan notes show no alteration from our quotations of last week. The 4 per Cents. are 92¼; the 5 per Cents., 100; and the 5½ per Cents., 107¼.

Quotations for bullion.—Gold—Bar gold, 77s 8$\frac{5}{8}$d to 77s 9d per oz std; ditto refinable, 77s 11d to 78s per oz std; South American doubloons, 73s 8d to 74s per oz; United States gold coin, 76s 3d per oz. Silver—Bar silver, 5s 0¼d per oz std; nearest; ditto containing 5 grains gold, 5s 0$\frac{3}{4}$d to 5s 0$\frac{7}{8}$d per oz std; Mexican dollars, 4s 10$\frac{5}{8}$d to 4s 10$\frac{3}{4}$d per oz, last price.

The sum of 14,000*l* in gold was sent into the Bank to-day.

According to to-night's *Gazette* the imports of the precious metals into the United Kingdom during the week ended March 22 were—gold, 102,732*l*; silver, 234,811*l*. The exports were—gold, 24,034*l*; silver, 338,615*l*.

FAILURES AND EMBARRASSMENTS.—The following are announced:—

Messrs Brasch Brothers and Salenger, commission agents, in the Australian trade. Liabilities, 80,000*l*.
Messrs J. Bolton and Co., merchants, Alexandria.
Mr John Williams, silk mercer, Bold street, Liverpool.

MEETINGS OF COMPANIES NEXT WEEK.

MONDAY, March 27.

British American Land, general, 36 New Broad street.
Tournay to Jurbise, &c, Railway, general, Brussels.

TUESDAY, March 28.

Vale of Llangollen Railway, general, Denbigh.
Mutual Tontine Association, general.
Mauritius Land Credit and Agency Company, extraordinary, 28 Fenchurch street.

WEDNESDAY, March 29.

Corre's Railway, general, 7 Bank buildings.
British Gas Light, general, 11 George yard.
Canada, general, 1 East India avenue.
Rio de Janeiro City Improvements, general.
Certificate holders of the Foreign and Colonial Government Trust (first issue).
West Somerset Railway, general, 7 Lawrence Pountney hill.

THURSDAY, March 30.

Price's Patent Candle, general, London Tavern.
Crystal Palace District Gas.
Central Argentine Railway, general and special.
Tottenham and Hampstead Junction Railway, general, 2 Westminster chambers.
Wellington and Drayton Railway, general, Paddington.
London Tramways, general.

FRIDAY, March 31.

North British Australasian, special general, 49 Moorgate street.
Bedford and Northampton Railway, general, 2 Westminster chambers.
Belgian Eastern Junction, general, Brussels.
Caledonian Railway, general, Glasgow.
Ottoman Railway, general, City Terminus.
Varna Railway, general, London Tavern.
Midland and Eastern Railway, general, 9 Victoria chambers.
Norwich and Spalding Railway, general, 9 Victoria chambers.
Peterboro', Wisbeach, and Sutton Railway, general, 9 Victoria chambers.

SATURDAY, April 1.

Sambre and Meuse Railway, general, Brussels.

SETTLING DAYS.

Ticket Days—March 30th, April 13th and 27th.
Account Days—March 31st, April 14th and 28th.

NOTICES AND REPORTS.

STOCKS.

Chilian 3 per Cent. Loan.—The sum of 9,383*l*, set apart in September, has been employed in the purchase of 10,200*l* bonds.

New South Wales 5 per Cent. Loan for 407,100*l*.—The Bank of New South Wales offer these debentures in sums of 1,000*l*, 500*l*, or 100*l* each for public tender, to be opened on the 28th instant. The interest is payable in London on the 1st July and 1st January, the principal being redeemable on the 1st July, 1900. 5 per cent. is payable on application, and the balance on the 2nd May.

New Zealand 5 per Cent. Consols.—The third drawing of bonds has taken place, and the 48,200*l* bonds thus drawn will be paid off at par on the 15th April.

RAILWAY COMPANIES.

Arbroath and Forfar.—A 6 per cent. dividend has been announced. It is estimated that if the balance of the liquidation stock be gradually issued, and the mortgage debt paid off, the present dividend could be maintained till 1877, when the permanent dividend would be thereafter 5 5-6ths per cent. per annum.

Caledonian. — The railway traffic receipts during the half-year amounted to 995,061*l*, and for the corresponding half to 936,487*l*, showing an increase of 58,574*l*. The receipts on the canal amounted to 46,095*l*, against 48,166*l*, showing a decrease of 2,071*l*. The working expenses on the railway amounted to 454,423*l*, against 421,667*l*. The expenses of working the canal amounted to 12,724*l*, against 11,701*l*. The cost of maintenance and renewal of the permanent way and stations was 96,197*l*, but 103,837*l*, being at the rate of 300*l* per mile per annum, was charged. The difference has been carried to the credit of the renewal of way account, which now amounts to 12,510*l*. The amount charged for the repair and renewal of the rolling stock was 105,395*l*. The net revenue balance is 321,975*l*, and after payment of dividend on the preference stocks, amounting to 211,589*l*, there remains 110,386*l*, out of which the directors recommend a dividend on the ordinary stock at the rate of 4¼ per cent. per annum, leaving a balance of 1,177*l*. Capital expended 22,670,745*l*, including 264,619*l* during the half-year. Estimated outlay during the current half 370,311*l*. An agreement has been made with the Glasgow and South-Western and Greenock and Ayrshire Companies for the apportionment of the passenger traffic between Glasgow and Paisley and Greenock. The directors regret that it has been found impossible to come to terms with the directors of the North British.

Grand Trunk Railway of Canada—International Bridge Capital.—Messrs Lawrence, Son, and Pearce invite applications for an issue of 205,000*l* in 6 per cent. mortgage bonds, and 66,000*l* in 6 per cent. preferential stock. Principal and interest are secured by a payment of 20,000*l* a year from the Grand Trunk, and additionally by tolls and general traffic. The issue price of the bonds is nominally 93½ per cent., and of the stock 91½ per cent.; but by prepayment of instalments these prices are reduced to 91½ and 91½ per cent. respectively. The prospectus states:—

As the interest on the bonds and stock now proposed to be issued amounts only to 16,260*l* per annum, the balance of 3,740*l* (of the 20,000*l* per annum to be paid by the Grand Trunk Railway Company of Canada) will, with the additional receipts for tolls, &c., be applied year by year as a sinking fund for the redemption of the bonds at par, increased annually by the interest on the bonds redeemed. What these additional receipts may be cannot at present be accurately defined, but it is expected that the traffic which will pass over the bridge from the Great Western Railway of Canada, the New York and Erie, the New York Central, and other railways, as well as that arising from the use of the bridge as a public highway, both for passengers and

[CONTINUED FROM PAGE 356.]

vehicles, will yield a further revenue of over 10,000*l* per annum, which sum, with the above-mentioned balance from the Grand Trunk Company, would reimburse both the bonds and preferential stock, now offered, at par within 15 years.

The drawings for redemption (commencing July, 1872) will take place annually, at the offices of the Grand Trunk Railway Company of Canada.

Great North of Scotland.—The half-year's revenue, 97,228*l*; working expenditure, 49,380*l*; net revenue, 47,838*l*; showing an increase of 7,834*l*. After providing for the dividends on the guaranteed stocks in full there remained sufficient for a dividend at the rate of 3*l* per cent. per annum on the 5 per cent. preference stock, and of 2*l* 14s per cent. per annum on the 4½ per cent. A preference stock, with a balance of 1,627*l* as compared with dividends at the rate of 1*l* 11s and 1*l* 8s per cent. per annum respectively, and a balance of 419*l*. Capital expended, 3,026,122*l*.

Moscow-Jaroslaw Five per Cent. Bonds.—The numbers of twenty-seven bonds of 100*l* have been published for redemption.

Ottoman-Smyrna to Aidin.—The gross revenue for the past half-year amounted to 39,667*l*, against 41,156*l* in 1869, and the expenditure to 30,114*l*, against 28,408*l* in 1869, leaving a net profit for the past half-year of 9,554*l*. The rolling stock had been maintained in good order. Two fatal accidents occurred in January last, owing to heavy floods. The directors received from the Ottoman Government last November, on account of the guarantee, 42,953*l* in mandats, with interest added at 12 per cent. per annum. All the mandats falling due up to and inclusive of July last were regularly paid. The mandats maturing in August, September, and October had been settled by payment in cash of one-half, and the renewal with interest of the remaining half. The mandats which have become due since October had not up to the present been provided for.

BANKS.

Bank of Australasia.—At the meeting the year's profits were stated at 100,821*l*, out of which a dividend at the rate of 10 per cent. per annum, free of income tax, was declared.

Commercial Banking of Sydney.—At the half-yearly meeting held in Sydney a dividend and bonus, equal to 17 per cent. per annum, were declared. 10,000*l* was added to the reserve fund, increasing it to 130,000*l*, and undivided profit amounting to 4,633 was carried over.

Merchant Banking.—At the meeting this week the dividend for the year was agreed to at the rate of 5½ per cent. per annum.

ASSURANCE COMPANIES.

Briton Medical and General Life.—At the annual meeting a dividend was declared of 8 per cent., making a total distribution for the year equal to 16 per cent. The new premiums had amounted to 17,473*l*, and the total income to 246,477*l*.

Equity Law Life Assurance.—The new policies issued in 1870 were 180, for an aggregate of 300,150*l*, yielding in premiums 12,543*l*. Total income, 145,576*l*; expenses, 88,794*l*.

MISCELLANEOUS COMPANIES.

Brazilian Street Railway.—At the meeting a 12½ per cent. per annum dividend was declared, free of income-tax.

British American Land.—The report notifies a dividend of 1*l* per share, which will absorb 6,000*l*, and leave 2,102*l* as surplus. Business has shown improvement.

Constantinople and Alexandria Hotels, Limited.—Mr F. Algar has been appointed official liquidator.

Crystal Palace District Gas.—The usual maximum dividends are announced in the report.

Rio de Janeiro City Improvements.—The report announces a half-year's dividend at the rate of 6½ per cent. per annum; surplus, 8,658*l*.

Van Diemen's Land.—A dividend of 4s 6d per share has been declared, leaving 267*l*.

MINING COMPANIES.

Don Pedro North del Rey.—The receipts for the year were 39,204*l*, while the working expenses reached 39,352*l*. During the twelve months a considerable amount of prospective and unproductive work has been executed, and charged against revenue.

The Commercial Times.

POST OFFICE ANNOUNCEMENT.

On the 1st of April next, and thereafterward, the British rate of postage chargeable on letters to the Hawaiian Islands will be reduced from one shilling to sixpence for each half ounce. This postage must in all cases be paid in advance or the letters cannot be forwarded. No alteration will be made in the British postage on newspapers, books, and patterns for the Hawaiian Islands, which will continue to be as follows:—For every newspaper not exceeding 4 oz. in weight, 2d.; for every additional 4 oz., 2d. For a book packet or packet of patterns not exceeding 4 oz. in weight, 3d.; above 4 oz. and not exceeding 2 oz., 2d.; above 2 oz. and not exceeding 4 oz., 4d.; each additional 4 oz. 4d. As in the case of letters, the above rates must be prepaid. The foregoing rates do not comprise the Hawaiian postage, which will be chargeable, in addition, on the delivery of the letters, &c.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

Owing to the fine weather there was little animation in the grain trade to-day, though no change of importance took place in values. The supply of English wheat was limited, but fully equal to the demand, which ruled inactive. The sales were unimportant in extent. Foreign wheat changed hands slowly, at about late rates. Barley, oats, beans, and peas ruled dull, and unaltered in value. Flour was in little request. This week's imports of foreign and colonial produce into London have amounted to 2,310 quarters of wheat; 2,490 barley; 11,630 oats; 100 beans; 370 sacks of flour.

At Liverpool and Wakefield this morning the wheat trade ruled dull, and the tendency of prices was in favour of buyers.

The Liverpool cotton market has been very firm during the past week, and with a fair demand prices have advanced ⅛d per lb since last Friday. The total sales are 84,620 bales; of which the trade have taken 64,310 bales, speculators and exporters, 20,310 bales. The imports for the week are 78,219 bales; the actual exports are unusually large, amounting to 38,398 bales; and to-day's stock is 780,350 bales. Quotations for American descriptions have advanced ⅛d per lb; East India, $\frac{1}{16}$d to ⅛d per lb; and Bengals, ⅛d per lb since this day week. To-day the market closes steady. Sales, 12,000 bales.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended March 23, 1871:—

	Imported.	Exported.
American.....bales	54,432	27,112
Brazilian	8,961	3,661
East Indian	7,602	15,055
Egyptian	2,658	431
Miscellaneous	2,793	143
Total.....	76,446	46,402

At New York, on March 20, middling Upland cotton was quoted at 15½ cents per lb. Telegraphic advices from Bombay to March 18 report the cotton market firm at 175 rupees for fair Dhollerah.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, February 25:—In this market the aggregate of sales of cotton made, since our last report was issued, is large as compared with the business done in the previous weeks of the year, but relatively moderate when it is considered how far we are into the season. The pressure of requirements for February shipments has no doubt tended considerably to swell the total, but apart from this moderately large transactions have been entered into for 20th and even 31st March delivery, principally in machine-ginned Broach, Julgaum, Oomrawuttee, and Barsee. Added together, the week's business sums up to about 7,300 candies. Notwithstanding the increased inquiry the tone of the market has been dull, and prices on the spot are slightly lower all round. In the up-country markets also, rates appear to be tending downward; but so far holders of stocks have been able, with few exceptions, to maintain their position, and in the Berars only a rupee or two of concession can be noted. In Broach, machine-ginned is quoted at 205 rs to 208 rs per candy, in full pressed bales, according to quality. The arrivals of cotton by rail and sea are increasing weekly, but according to the Customs' returns published, the demand continues to absorb supplies, and any addition to stock is prevented. We fully expect, however, to see this market well provided in about a fortnight or three weeks, as by that time the united pressure of the Broach and Berar crops will, we trust, force the ryots to realise at prices relatively more favourable to exporters than those ruling at present. Small parcels of machine and native-ginned Broach and New Dhollerah are now arriving in the market. What we have seen of the native-ginned Broach is dull in colour and rather dirty, but no doubt it will improve as the season progresses. The Dhollerah is rather harsh to the feel, but possesses a very fair staple, is bright in colour and comparatively free from leaf. From Tinnevelly our latest telegram is dated 23rd instant, and quotes 6⅛d per lb, market very quiet.

Export of Cotton from Bombay to Feb. 24.

Grand total	114,191	85,273

Actual exports since last mail left, 23,609 bales.

Messrs E. B. Liddell and Co., of Alexandria, have furnished the following report, dated March 10:—Our preceding report was dated 24th ulto., the publication of last week's circular having been suspended in consequence of the Bairam holidays. The continued discouraging Liverpool accounts have produced a gradual further decline in cotton, amounting in the aggregate to about ⅛d per lb during the fortnight. Holders, however, show extreme unwillingness to sell at present figures, the lowest yet reached, and buyers on the other hand evincing small disposition to meet them by more acceptable offers, the result is a very small and irregular business. Qualities over good fair and the better Gallin descriptions have but slightly varied in proportion, their increasing scarcity naturally rendering them less liable to the fluctuations in value by which the ordinary grades are affected. We quote:—Fair to fully fair, 7¼d to 7⅜d per lb, f.o.b.; good fair, 7⅜d to 7½d, ditto; Gallin, 9⅜d to 11⅜d, ditto. Freight about ⅛d per lb for steam-pressed bales.

The colonial produce markets have ruled dull this week, and the tendency of prices has been downwards. Sugar has sold slowly, on rather easier terms for both raw and refined goods. Coffee and cocoa have ruled quiet, but unchanged in value. Rice has commanded late rates. There is no change to notice in the tea trade.

The annexed is dated Akyab, February 17:—Supplies of Nakrenzie rice continuing to come in very slowly, buyers were obliged to submit to higher prices, but this has had little or no effect as yet, as our market remains very poorly provided. Our to-day's quotation is 51 rs to 53 rs per 100 baskets, three parts shipping quality, 28 lbs per basket, equal to 5s 5d to 5s 7d per cwt, free on board. Arrivals of vessels have not been numerous of late, and should this continue so far some time, it will no doubt have a calming influence on our market, but lower prices are not probable this month, as purchasers show themselves eager to secure quantities at above rates. The tonnage in port amounts to 15,347 tons burthen, against 8,000 tons same time in 1870, and 24,000 tons in 1869. Exports up to date represent 2,201 tons, all to Europe.

Messrs Kilburn, Kershaw, and Co. report:—The silk market has become extremely quiet since the declaration of peace, but more especially so since the news of the fresh troubles in Paris; indeed, everything is very flat, and hardly any business doing. Prices are occasionally 6d lower where transactions occur; but as importers and holders generally maintain their firmness, there is an unusual absence of business. This disappointing condition of the market is entirely owing to the uncertainty regarding matters in France, and would no doubt at once give place to improvement and activity, if only the revolutionary spirit in Paris could be quelled, and confidence restored. Deliveries continue good, especially of Canton silk, which is now being largely taken for consumption. The clearances from 1st to 22nd instant were—China, 1,983; Canton, 738; Japan, 370; Bengal, 368—total, 3,459 bales.

Messrs Southey, Balme, and Co., report:—The interval which has elapsed since the close of the February wool auctions has been, until the last few days, marked by symptoms indicating a satisfactory condition of trade, and offering every promise of the firm maintenance of the value of our staple. Inquiry, both from home and continental sources, has been frequent, but particularly from Germany and Belgium, where the demand for military purposes still continues on an active scale. The supply of Australian wool available for sale by private treaty is excessively limited, the old stock having been almost entirely cleared out at the last series, and the principal transactions consequently have occurred in Capes, some considerable quantities of which have changed hands at full rates. The news, however, which has reached London of a Red revolution in Paris, forms an important element of danger in the

future prospects of our market. Let it be remembered that before the late war the proportion of wool taken by France for consumption abroad, as compared with that consumed in other quarters of the continent, stood in the relation of five to one, and the importance of any disturbing cause, whether in the shape of any political anarchy or protective duties (the adoption of which, as regards wool and other articles, after the expiration of the existing treaty with this country seems to have been seriously entertained), becomes immediately apparent. The next series is fixed to commence on the 13th April, the arrivals to date being as follows:—Sydney, 7,038 bales; Port Phillip, 53,451; Adelaide, 25,880; Tasmania, 62; New Zealand, 1,418; Cape, 22,876—total, 110,725 bales. It would appear doubtful whether the large accumulations of wool which will be forward for sale for the third series of the year will not, in the absence of any scheme for withdrawing some considerable portion—the difficulty of which on any equitable principle is very great, and the policy somewhat questionable—again force the readoption of the four serial arrangement, as was the case last season.

Annexed is Messrs William Moran and Co.'s indigo report, dated Calcutta, February 21:—In this market one public sale of indigo has been held during the past week, comprising 261 chests, of which 80 were withdrawn, and the remainder sold at about previous prices, all desirable qualities meeting with good competition. Exports of indigo from 1st November, 1870, to 18th February, 1871:—To Great Britain, 16,044 chests; France, 242; Trieste, 2,781; foreign Europe, 250; America, 1,978; Gulphs and Levante, 1,607—total, 22,902 chests.

The annexed is dated New York, March 11:—Financial and commercial affairs remain in about the same position as noted in our last. The supply of currency continues in excess of the requirements of legitimate trade, and speculation in securities is the main reliance of lenders. But as the season for a revival of business throughout the country is at hand, an increased demand for money is looked for, with possibly more remunerative rates to lenders. Gold touched 111¼ on Tuesday, under the hardening tone of the London money market, but as no further advance in the Bank of England rate is announced, the premium has since shaded a little. Foreign exchange remains strong, and bankers' sterling is now up to a point at which coin may be remitted at a profit. Trade in the aggregate is pretty large, but the movement in most departments is scarcely equal to expectations.

THE COTTON TRADE.

LIVERPOOL.—March 23.

The demand for cotton has continued good throughout this week, and the receipts into the American ports having been comparatively moderate, prices have again advanced about ⅛d per lb. For Sea Island the demand has been limited, and prices of the current qualities are 1d per lb lower during the past two weeks. The chief portion of the large returns this week consist of cotton forwarded unsold to French and English spinners. American has been in active request, and while the ordinary qualities continue comparatively heavy, the better descriptions are less freely offered, and have advanced about ⅛d. New York advices to the 22nd instant quote middling Upland 15½ cents, costing to sell in Liverpool 7⅛ per lb, by steamer. In Brazil there has been a fair amount of business, and prices are firmly maintained. Egyptian has been in good demand, and being less freely offered, prices of the current qualities have advanced fully ⅛d per lb. For East Indian there has been a good export demand, and prices are generally ⅛d per lb dearer.

In cotton "to arrive" the business has been considerable, at gradually hardening prices. The latest quotations are—American, basis of middling, from any port, May delivery, not below low middling, 7⅛d, not below good ordinary, 7⅜d; March-April shipment, not below good ordinary, with deposits, 7⅛d; New York, shipping or shipped, not below low middling, 7⅛d; Mobile, ditto, not below low middling, 7⅛d; low middling, New Orleans, March-April shipment, 7⅛d, 7⅜d; May-June delivery, not below good ordinary, 7⅛d; Savannah, shipping or shipped, stained, 6⅞d; Texas, shipping, not below good ordinary, 7⅛d; good ordinary, Savannah, February-March shipment, 6⅞d; scrub named, 6⅛d per lb.

The sales of the week, including forwarded, amount to 84,620 bales, of which 20,010 are on speculation, and 11,300 declared for export, leaving 64,310 bales to the trade.

March 24.—The sales to-day will probably amount to about 12,000 bales, with a firm market.

Saturday, the 8th, and Monday, the 10th April, will be street holidays in the cotton market.

NEW YORK.—MARCH 11.

On Wednesday the market for cotton on the spot showed more strength than for some days, and buyers operated quite freely. On Thursday there was a further improvement (the element of strength being the European advices), and holders were enabled to realise better prices for all grades. Yesterday the market was weak, on receipt of Liverpool advices, which represented the foreign market weak and declining. The receipts at the ports continue quite heavy, being 133,216 bales for the week, and if travellers correctly represent the amount of cotton yet on the plantations, it would seem that those who have placed their estimate of last year's crop at 4,250,000 bales will not be very wide of the mark. The amount of cotton under engagement for Liverpool comprises 22,000 bales. For forward delivery the market has been in close sympathy with that for current, closing quiet. The sales for forward delivery aggregate 64,900 bales, yesterday's transactions at 13⅜c to 13 5/16c—basis low middling—for March, 13 5/16c to 13 9/16c for April, 13 7/16c to 13¾c for May, 13½c to 13⅞c for June, 13¾c to 13⅞c for July, and 13 13/16c to 14c for August. Exchanges—¼c was paid to exchange 200 bales for April for 200 bales for June; 500 March for 500 for May, on even terms; ⅛c for 200 March for 200 for May; ¼c for 100 April for 100 for June; and 100 March for 100 for May, on equal terms. We quote:—

NEW YORK, March 17.—According to Messrs Moffat, Davidis, and Co.'s report, the week's receipts of cotton at all United States' ports have been 102,000 bales, and since the 1st of September, 3,160,000 bales. Shipments to England, 67,000 bales; to France, 1,000 bales; and to the continent, 36,000 bales. Total since the 1st of September, 2,076,000 bales. Stock at all ports, 545,000 bales.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, March 23.—We have again to report that a fair amount of business has been done during the past week, nearly equal to the production of the district. In India and China goods, however, the business has been but moderate, and the same applies to yarns for those quarters. In other departments, both for shipping and home trade, a large general business has been done. Printing cloths, madapallams, and T cloths have been in good request, and scarce. Home trade yarns have also been dealt in to a fair extent. Prices were rather weak till the last three days, when they have hardened, and are now slightly against buyers; this has been caused chiefly by the improvement in the cotton market, and owing to the greater firmness here, buyers who had orders on hand showed more willingness to place them. The market closes very firm, but without much inquiry to-day.

Messrs Alexander Collie and Co. received the following telegram from Manchester yesterday:—Spinners and manufacturers, being under contract for six weeks or two months ahead, are now attempting to establish an advance of one eighth to a farthing per lb. In this they do not succeed, as the more immediate wants of buyers are already supplied.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, MARCH 10.

The flour trade has been dull since our last, and with margins against shippers, the export grades of State and Western have declined 11 to 10 cents. The medium and high grades, such as are chiefly consumed at home, though relatively firm, are irregular and slow of sale. White wheat extras are scarce and firm, with about the usual jobbing trade. The stock of all kinds of flour, as usual at this period, is light, but this influence is offset by the dull and unsatisfactory foreign advices. Sales on the basis of $6.70 to $7 for shipping lines, according to brand, with some inferior Western as low as $6.65. Receipts of wheat flour, in Jan. and Feb., 1871, 484,311 bbls, against 372,749 in 1870, and 312,268 in 1869; corn meal, 38,832 bbls, against 79,518 in 1870, and 73,427 in 1869. The wheat market has ruled dull, and prices of spring growths irregular. On Wednesday there was a slight shading on spring, with light sales at $1.57 to $1.58. On Thursday an attempt was made to rally the market, but without much success, as shippers failed to respond, and prices remained substantially as on the preceding day. The cable advices have afforded little encouragement to sellers, and the absence of a pressure to realise has alone prevented a more decided decline. Millers have purchased only in accordance with the dictates of necessity, yet winter growths are relatively firmer than spring because of their comparative scarcity. The sales are $1.56½ to $1.58, in store and afloat, for No. 2 spring, $1.57 to $1.58, in store, for No. 1 do., $1.46 to $1.48, in store, for old spring, $1.50 for old and new mixed do., $.165 to $1.68, in store and afloat, for amber winter western, $1.67 to $1.68 for amber state, $1.92 to $1.95½ for white Genesee, and $1.80 to $1.90 for white Michigan. The demand for corn has fallen off, both for export and home use, leading to a decline of three cents since last Tuesday. At the abatement, shippers showed more disposition to operate, though the market closed tamely, under less favourable cable advices; sales closing at 85 to 86 cents for new mixed western, 86½ to 87 for white and yellow western, 92 to 93 for white southern, 88 to 88½ for yellow do., and 88 for yellow Jersey afloat.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Under the influence of genial weather, and the favourable reports received in respect of the growing crops, the wheat trade has ruled less active this week. Nevertheless prices have been well supported in consequence of the continued demand for export, which has again become heavy. The supplies of English wheat exhibited here have been limited, but the condition of the samples has been good. The show of foreign wheat has been large. Off the coast wheat has sold freely at enhanced currencies, while the advance at Mark lane is about 1s per quarter on both English and foreign descriptions. Millers only buy to meet immediate requirements, but their stocks are low, the necessary result of the cautious policy they have adhered to for so long, and they are accordingly compelled to purchase somewhat largely in the face of rising values. Prices show less firmness

in London than in the provinces, where the actual advance on the week is rather greater. Stocks of fine wheats are getting low, and there is a fair prospect of further improvement. The statement annexed shows the imports and exports of breadstuffs since the commencement of the season, as compared with the corresponding period last year :—

	Imports. 1870-71. Cwt.		Exports. 1870-71. Cwt.		Imports. 1869-70. Cwt.		Exports. 1869-70. Cwt.

Indian corn	8.733.072	.....	56.196	.....	11.787.252	.....	12.676
Flour	2.015.291	.....	1.223.231	.....	3.759.09	.....	11.844

Spring corn has ruled quiet. Barley, beans, and peas have been firm in value; but oats, notwithstanding short supplies, are the turn easier. Maize has commanded late rates. Supplies of flour have been large, and the trade has ruled quiet at firm prices.

Mr George Dornbush thus reports the state of the floating grain and seed trade:—During the last eight days 32 grain and seed-laden vessels have arrived at ports-of-call, viz., 17 wheat, 5 maize, 3 barley, 1 rye, 1 linseed, 2 cottonseed, 3 flour, &c. The floating grain trade has been firm in tone, but wanting in animation. Wheat—Fine cargoes 1s dearer, but ordinary slow to sell. Maize at first 6d dearer, but later, with the arrival of additional cargoes, purchases could be made on easier terms. Barley scarce, and held for fully late prices. Rye inquired after. The reported sales are as follows:—Wheat—23 arrived cargoes: Ghirka Odessa, 49s 6d to 52s 3d; new ditto 53s 3d; soft Berdianski, 53s to 56s; Marianopoli, 53s to 55s 6d; Galatz, 51s 9d and 52s 6d; Ghenighesk, 52s 7½d per 492 lbs. Polish and Odessa, 55s; Theodosia, 55s per 480 lbs; and No. 1 spring and New York, 57s 6d per 500 lbs. To be shipped, 1 cargo Berdianski, Marianopoli, or Ghenighesk, 54s 6d per 492 lbs. Maize—5 cargoes arrived: Odessa, 37s; Moldavian, 36s 6d; Wallachian, 36s 6d; Galatz, 35s 9d; Ibrail, 35s 9d per 492 lbs. On passage, 7 cargoes: Odessa, 36s; Galatz, 36s 6d; Danubian, 36s 9d; Bulgarian, 36s to 36s 3d. Shipped or to be shipped, 4 cargoes: Danubian at 33s to 35s per 492 lbs. Barley—2 arrived cargoes: Nicolaieff, 22s 6d, and Wallachian, 27s 6d per 400 lbs. To be shipped, 1 cargo Danubian at 29s per 400 lbs. Rye—To be shipped, 3 cargoes: Danubian, 38s 6d; Marianopoli, 37s; Azow, 37s per 480 lbs. Linseed at first firm, closing quiet. Arrived 200 tons East India Calcutta at 63s 3d to 64s. On passage, 500 tons ditto at 63s 9d to 64s per 410 lbs; and a cargo Turkish Ismail at 64s 6d per 416 lbs. Rapeseed very quiet, and sell lower. Arrived 50 tons ordinary brown Calcutta, 67s. Shipped or to be shipped 500 tons, 65s 9d to 66s 3d. Cotton-seed quiet, and 2s 6d cheaper. On passage, 350 tons Egyptian and Alexandria at 9l 7s 6d per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The business done this week has been limited and the market remains very dull. Refined has also suffered some further depression. The public sales have been unusually small, and the few parcels of low sugar brought forward were chiefly bought in. Other kinds have occasionally fallen 6d to 1s per cwt. The transactions in West India to yesterday (Thursday), amounted to 682 casks, including grainy yellow Demera at 36s to 36s 6d per cwt. A few parcels of crystallised white Mauritius have changed hands at easier rates, and some Madras Jaggery at the recent decline. The arrivals have been moderate in extent but will soon increase. According to the latest return, the stock at this port was reduced to 54,300 tons, a quantity much less than usual. The home deliveries in London have increased nearly 9,000 tons.

Mauritius.—2,000 bags grainy white have sold at 37s 9d to 38s per cwt (duty 6s), chiefly the former price.

Bengal.—621 bags part sold at 20s 6d to 29s for brown and yellow Dulloah.

Madeira.—Yesterday 2,700 bags Jaggery sold at 17s 6d.

Manila.—13,000 bags low clayed were taken in above the value, viz., 24s.

Other Foreign.—Privately a few lots of Porto Rico have sold at 32s to 34s and a floating cargo Bahia, of the old crop, at 21s per cwt. for the United Kingdom.

Refined.—The market is again lower for dry goods, with an increased business. Prices of lumps and titlers range from 40s 6d to 43s; fine qualities of the latter 44s per cwt upwards. Pieces have been very dull of sale and are cheaper.

MOLASSES.—50 puncheons West India have sold at 12s 6d. 250 casks Australian and other French at prices not reported.

RUM.—The market is quiet, but Jamaica has realised steady prices for the few sales effected. Common kinds dull. Demerara has sold at 1s 11½d; Berbice, 1s 10d to 1s 10½d per proof gallon. No further business reported in Mauritius or East India.

COCOA.—There have not been any public sales of West India. At auction, 5,231 bags Guayaquil were taken in, and a few lots since sold at 52s for good. 594 bags Bahia, partly found buyers at 40s to 42s. A small parcel of Cuba realised 63s 6d to 71s. Privately, Guayaquil has sold at 47s 6d to 53s per cwt. No business reported in Trinidad.

COFFEE.—The sale held by the Netherland Trading Company yesterday went off at 2 to 3 cents under the March prices for most kinds of Java. This unfavourable result, with the expectation of considerable arrivals, and the unsettled state of affairs on the continent, tends to prevent any improvement in this market. 100 tons native have sold afloat at 55s, being lower. The sales of plantation sorts have been small, viz., 201 casks 198 barrels and bags. Prices were easier, excepting for the fine qualities, which obtained about former valuation: grey and dull, 58s to 63s; colory, low middling to middling, 61s to 67s 6d; good middling to good, 68s to 77s; a few lots very fine bold, 87s to 90s 6d. 14 bales 213 half-bales Mocha part sold at 86s to 90s for mixed qualities. 165 bags Singapore were taken in above the value. Of 2,149 bags Rio, a portion met with buyers at 50s to 53s. 1,042 bags Bahia were taken in at 49s to 54s. A floating cargo of St Domingo sold at 54s per cwt for the Mediterranean. A continuance of large export clearances has brought the stock to the level of last season's at the corresponding date.

TEA.—The market remains in the same inanimate state as last quoted, and the business by private contract has been very moderate in extent, chiefly in Foo Chow congou of good common quality. A few public sales, comprising 7,743 packages, have been held, and some of the teas printed "without reserve" went at easier rates. Deliveries are still very large, and the supply on the way is much less than usual.

RICE.—There is not any improvement in the demand, but the market generally is unchanged. Privately the transactions have been chiefly restricted to white Bengal and fine Necrancie Arracan, the latter bringing 10s 9d, Rangoon, 9s 9d to 10s. 4,094 bags Bengal by auction part sold at and after the sales: middling to rather bold white, 10s to 10s 7½d; broken, 9s 3d, being cheap. Some Dacca kind taken in since sold at 9s 9d. 2,306 bags Rangoon partly realised 9s 9d per cwt for good quality.

IMPORTS and DELIVERIES of RICE to March 18, with STOCKS on hand.

	1871.		1870.		1869.		1868.
Imports	tons 21980	...	7140	..	13670	..	14280

Stock	47050		44150	...	38250	...	10670

Deliveries last week, 5,420 tons.

SAGO.—There is not any increase of demand. 107 bags by auction yesterday were taken in at 19s 6d for bold grain.

SAGO FLOUR.—Singapore has sold afloat at 14s 6d ex ship. 998 bags Borneo were taken in at 16s 6d per cwt., two lots selling at that price.

TAPIOCA.—Of 1,166 bags in the public sales a few lots superior quality

Singapore sold at 2¼d to 2½d per lb. 82 bags pearl tapioca realised 17s 6d to 18s per cwt.

BLACK PEPPER.—The feature of the week has been the contracts for delivery during the next three months at lower prices, say 5,000 bags at 4⅞d and 5d Penang or Singapore. On the spot quotations are partly nominal. Good Aleppy sold during the week at 5⅝d per lb. 410 bags Singapore and 287 bags Penang by auction were withdrawn. Further supplies have arrived. According to the latest return the stock was 1,010 tons, against an average of 2,300 tons in the four previous years at the same date.

WHITE PEPPER.—The demand is limited. 345 bags Singapore and 82 bags Penang were partly sold at 7¾d and 7½d per lb respectively, being easier rates.

OTHER SPICES.—At the public sales 31 cases Cochin ginger of the new crop were taken in. One lot good scraped sold at 95s. 80 barrels Jamaica sold at 33s to 43s for very small to good ordinary. 10 cases cassia buds were taken in at 8*l*. 32 cases ordinary cassia vera sold at 46s per cwt. Sales of cassia lignea have been made from second hands at advanced rates. 98 bales Ceylon cinnamon were partly disposed of at the last quarterly sale prices. 200 bags bark realised 1⅝d to 1¾d. 166 bags chips were taken in above the value. 7 cases common Penang mace sold at last week's improvement, viz., 3s 4d to 3s 5d. 265 cases Padang nutmegs part sold: 673, 3s 4d; 97's, 2s 2d to 2s 3d; 1,173, 2s 1d to 2s 2d; low wormy and defective, 6d to 1s 4d. 1,060 bags Pimento all sold at 1¾d to 2d; a few lots 2⅛d per lb.

SALTPETRE.—Fine Bengal is rather scarce, and has sold in small quantities up to 28s. Low and ordinary sorts have declined 1s to 1s 6d, and 2,019 bags by auction only partly sold; refraction, 15 to 7¼, 24s 9d to 25s 6d per cwt.

IMPORTS and DELIVERIES of SALTPETRE to March 18, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imported .....tons	2890	1780	1010	1750
Total delivered	2400	3730	2240	2380
Stock	2870	2880	2960	7500

COCHINEAL.—The sales have gone off flatly, silvers selling at previous rates to 1d decline, but a great deal was bought in. 888 bags Teneriffe part sold: silvers, 2s 4d to 2s 6d; black, 2s 4d to 3s 2d. 82 bags Honduras: silver, 2s 4d to 2s 9d; black, 2s 5d to 3s 3d per lb. 43 bags Mexican silver withdrawn.

OTHER DRYSALTERY GOODS.—There has been a better demand for turmeric, with sales of some extent at higher prices, up to 19s 6d and even 20s. 1,000 bags Bengal by auction yesterday sold at 18s 9d to 19s for common quality. The business in gambier has been chiefly at 15s 6d to 15s 9d, ex ship. Some parcels have sold during the week on these terms. 1,085 bales Cubes by auction were taken in at 21s. Cutch is firm. A good business reported in Bengal safflower at high prices.

SHELLAC.—227 chests were chiefly bought in. A few lots native orange part sold at 5*l* 17s 6d per cwt.

METALS.—Business continues dull, and there is not any general revival of speculative demand. Scotch pig iron has, however, advanced, this morning's quotation being 54s 3d cash. Manufactured iron remains very steady. For English lead a good demand prevails, and prices are firmer for English. The present value of Spanish is 18*l*. A reduction of 2*l* has been made in the official quotations of English copper, at which some orders have been executed. Chili, &c., has sold at 64*l* to 65*l*, and the best brands more in proportion. Walaroo and Burra 73*l* to 74*l* 15s. The Dutch sale of tin on the 30th inst. will contain 80,000 slabs Banca. This market is firmer, with business up to 130*l*. Straits tin shows some recovery, viz,—129*l* to 130*l* on the spot; 128*l* to 128*l* 10s to arrive. Spelter is without change. A sale of Silesian has been made at 17*l* 15s per ton, but more generally required.

HEMP.—Manila remains quiet, and the sales by private contract have been limited, including good at 50*l* per ton.

JUTE.—Prices are the same as last quoted, and the market steady. Several sales have been made for arrival at full prices. At auction 3,547 bales about half sold, from 19*l* 15s to 25*l* 10s for ordinary to good quality. Trade in Dundee is satisfactory, there being a steady demand for manufactured goods, but the makers are well supplied with jute.

LINSEED.—Some further advance was paid at the commencement of the week, but the market is now quiet. Calcutta, 63s to 63s 6d; to arrive about the same prices.

OILS.—There has been little inquiry for sperm, and 84*l* is the nearest value. Pale seal, 37*l* 10s to 38*l*; olive on the spot remains inactive, but a large business done in cargoes, including five for Russia, at 47*l* to 48*l* up to 49*l* 5s for Gallipoli. One of Candia for the United Kingdom at 45*l* per ton, and one of Ionian Isles or Zante at about the same price. Transactions in cocoa-nut have been limited. Cochin, 44*l* to 48*l* 10s; Ceylon, 40*l* to 40*l* 10s. Palm also remains quiet. Fine Lagos, 38*l* to 38*l* 10s. Linseed oil has fallen in price about 1*l*, viz., to 32*l* 10s on the spot. The market is rather quiet, and there has not been any demand for forward delivery. Brown rape inactive. English, 44*l* 10s on the spot and forward. Refined, 46*l* 10s. Foreign, 48*l* 10s to 49*l* per ton.

PETROLEUM.—Refined is very dull, and may be quoted 1s 4½d to 1s 5d per gallon. The stock is 33,071 barrels.

BRITISH TURPENTINE quiet; French, 36s 9d; American, 37s 6d per cwt.

TALLOW.—Prices of Russian have declined, and the supply of colonial here and afloat is still large. This morning the market was inactive. Petersburg, 43s 6d; June, 44s to 44s 3d; October to December, 45s 6d to 45s 9d per cwt. The public sales to-day will contain about 2,000 casks, &c.

PARTICULARS OF TALLOW—Monday, March 20, 1871.

HIDES.—At the public sales of East Indian held yesterday, 233,093 hides about three-fourths sold at prices showing ¼d to ½d per lb decline, chiefly upon light descriptions. The few buffalo hides sold obtained about former rates for Singapore and Kurrachee.

POSTSCRIPT. FRIDAY NIGHT.

SUGAR.—The market remains flat. 177 casks West India sold, making 859 casks for the week. Crystallised Berlin by auction part sold at 35s 6d to 38s for yellow and white. 50 hogheads Demerara bought in. 52 casks concrete taken in at 24s 6d. 1,500 bags dry clayed Manila at 27s. Privately, 7,000 bags low unclayed Manila sold at 20s, and 3,000 bags Madras Jaggery at 17s 6d.

MOLASSES.—182 puncheons West India part sold at 11s per cwt for St Kitts.

COFFEE.—117 casks 15 barrels 29 bags plantation Ceylon sold at irregular and in some cases at easier rates. 5 casks 150 barrels and bags Jamaica sold at 52s 6d to 54s for good to fine ordinary mixed.

BLACK PEPPER dull. Penang, 5¼d per lb.

RICE.—No further sales reported.

SALTPETRE.—The parcels bought in at Wednesday's sale have been disposed of.

TURMERIC.—907 bags Bengal part sold at 19s 6d per cwt for good quality.

OIL.—222 casks Ceylon part sold at 40s to 41s. 41 casks palm bought in at 32s for common. 60 tuns colonial sperm at 84*l*. 75 tuns cod part sold at 36*l* per tun for tinged.

TALLOW.—Petersburg further declined: spot, 43s 3d to 43s 6d; June, 44s; last three months, 45s. Town unaltered. 1,538 casks Australian about half sold: mutton, 41s 6d to 43s 3d; beef, 37s to 41s 9d. 230 casks South American were chiefly bought in. 303 packages Cape sold at 40s to 43s 6d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market is easier, business being done at 2s to 2s 6d reduction. Dutch crushed continues quiet; small sales are made at 35s 6d, prompt shipments for first marks.

GREEN FRUIT.—The report of Messrs Keeling and Hunt states that oranges from the Azores and Spain are in demand, and full prices sustained. Seville sours reduced in price, quality being indifferent. Sicily lemons at easier rates from increased stock. Barcelona nuts higher. Black Spanish in request. Brazil without alteration. A lively sale for West India coker nuts.

DRY FRUIT.—Currants are still in favour, and merchants firm in their demands. Rather more attention shown to the finer growths, lower kinds being steadily held. In raisins, no alteration to report.

ENGLISH WOOL.—A good demand, and prices well supported.

FLAX.—Market firm.

HEMP.—Market steadier, not any lower prices taken this week.

SILK.—Market inactive, nothing done since last mail.

SEEDS.—The seed trade still continues very firm, most descriptions being held for higher prices.

TOBACCO.—There has been but little doing in American tobacco during the past week for home trade purposes; for exportation there has been more inquiry, but the stock of suitable quality is very small, which has very much restricted operations. In segar tobacco there has been a large business done, and for growths termed substitutes there has been a great inquiry.

LEATHER.—The leather trade of the past week has been more quiet than for some previous weeks. The supply at Leadenhall on Tuesday, although showing some increase, was of only moderate extent, and of some articles was still very short. These were light crop hides, light English butts, prime English shoulders, the best qualities of light dressing, and very light shaved hides, calf skins, kips, and horses-hides. Prices were unaltered.

METALS.—The state of anarchy prevailing in Paris has had a depressing influence on our market. Copper is very quiet, and prices generally are rather lower. Iron is steady. Tea has gained some firmness in prices, although transactions are limited. Spelter is quoted firm. Lead is in demand, at about 5s a ton advance. Tin plates continue in steady request.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	45	0
Fat by ditto	2	1
Yellow Russian ditto	45	0
Melted stuff	33	6
Rough stuff	17	0
Greaves	19	0
Good dregs.....	6	0

Imports for the week, 822 casks.

METROPOLITAN CATTLE MARKET.

MONDAY, March 20.—The total imports of foreign stock into London last week amounted to 7,278 head. In the corresponding week in 1870, we received 7,177; in 1869, 15,722; in 1868, 4,555; and in 1867, 9,038 head.

The cattle market has been devoid of any important feature to-day. Only moderate supplies of beasts have been on sale. Although not active the trade has been firm, and prices have been well supported, the best Scots and crosses selling at 5s 6d to 5s 10d per 8 lbs. The supply of sheep has been limited. Sales have progressed quietly, but at fully late rates. The best Downs and half-breds in the wool have sold at 6s 2d to 6s 4d, and in some instances 6s 6d per 8 lbs. For shorn sheep the top quotation has been 5s 8d per 8 lbs. Lambs have sold at from 7s 6d to 8s per 8 lbs. Calves and pigs have been disposed of at previous quotations.

SUPPLIES ON SALE.

	March 21, 1870.	March 20, 1871.
Beasts.....	3,329	2,850
Sheep	27,605	16,780

Veal	4	8	5	4	Small pork	4	4	4	8

Lamb, 6s 8d to 7s 4d.

HOP MARKET.

Borough, Friday, March 24.—A limited inquiry prevails for all classes of hops, and medium and inferior grades are slightly weaker. Fine qualities, however, owing to their scarcity, realised fully previous values. Mid and East Kent, 140s to 140s; Weald of Kent, 40s to 75s; Sussex, 35s to 70s; Farnham and country, 75s to 112s; olds, 20s to 30s per cwt.

POTATO MARKETS.

Borough and Spitalfields, Friday, March 24.—These markets have been fairly supplied with potatoes, and the trade has been quiet, at our quotations. English shaws, 80s to 100s; ditto regents, 60s to 90s; Scotch regents, 60s to 90s; and rocks, 60s to 75s per ton.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

Friday, March 24.—The public sales of East India held here from the 21st to 24th inst., comprised 9,680 bales, and attracted a fair attendance of home buyers, whilst those from the continent were very few indeed. Prices all round have ruled pretty much on a par with those paid in January, gray wools if anything rather lower, and other kinds in many instances a little higher. The sundry descriptions of low foreign wools, to the extent of about 6,000 bales and ballots, will be brought forward on the 28th and 29th inst.

CORN.

(FROM OUR OWN CORRESPONDENT.)

Friday, March 24.—With only a limited attendance of country buyers, few transactions were concluded in any descriptions of wheat. Prices, however, were steady at last Tuesday's rates. Flour moved off slowly, and was nominally unchanged in value. Barley, beans, and peas sold at previous prices. Oats and oatmeal are dull of sale. American and Indian corn, owing to the increased quantity offering, was 6d to 9d lower; this reduction induced some buying, but the sales were small in proportion to the quantity offered.

Wakefield, March 24.—There was a good show of wheat, and prices were quoted 1s per quarter dearer than last Friday. There was a fair demand for red, but not much inquiry for white. Barley firm at full prices. Beans and oats steady at late rates.

The Gazette.

Tuesday, March 21.

BANKRUPTS.

Augustus Whitlock, Lower marsh, Lambeth, cheesemonger.
Robert Black, Birmingham, draper.
George Dunnett, Hastings, bootmaker.
Anthony Burke, Houghton-le-Spring, Durham, grocer.
Allen Hodges, Birmingham, grocer.
Charles Jackson, Birmingham, machinist.
David Jones, New Radnor, innkeeper.
William Lob, Bodmin, hotel keeper.
Stephen Samuel Miller, Margate, lodging house keepor.
Emmanuel Richards, Bristol, builder.
Robert Sutherland and Montgomerie Gladstone, Liverpool, commission merchants.
Thomas Henry Worthington, Manchester, baker.

SCOTCH SEQUESTRATIONS.

Alexander MacGregor and William MacGregor, Perth, drapers.
Archibald Mackie, Glasgow, provision dealer.
Robert Erskine, Glasgow, veterinary surgeon.
George Shand and Archibald Thomas Gray, Denny, Stirlingshire, chemical manufacturers.

THE GAZETTE OF LAST NIGHT.

BANKRUPTS.

Henry Edgar Eton, Selby Oak, assistant to a chemist.
Robert Martin Cook, Hadleigh, auctioneer and land valuer.
George Herman and Timothy Harris Adey, Puckshole Mill, near Stroud, cloth manufacturers.
Philip Rotheram, West Head, Latham, near Ormskirk, beerseller and farmer.
William Huntington, Saint Paul's Mill, Blackburn, cotton manufacturer.
James Fletcher, Bradford, grocer.
William Lewis, Shrewsbury and Baschurch, maltster and farmer.
John Harper Sanderson, Sunderland, commission agent.
Hugh Wood Saunders, Lansdowne place, Hove, gentleman.
Robert Secker, Faversham, coal merchant.
Walter Henry Bulmer, Dover, veterinary surgeon.
Alexander Penny, Hunstbert terrace, Dover, commission agent and factor.

SCOTCH SEQUESTRATIONS.

Thomas Darling, jun., Regent Quay, Aberdeen, commission merchant and insurance broker.
James Moffat, Lockerbie, clothier.
William King, Annfield place, Leith walk, Edinburgh, druggist.
James Young, West Graham street, Glasgow, plasterer.
Alexander Blair, Alloa, brewer.
John Coleman, Glasgow, lessee of the Prince of Wales Theatre, Glasgow, and also of the Theatres Royal, Leeds and York, Yorkshire.
Mackay and Miller, Glasgow, hemp and flax merchants.

STATEMENT

Of Imports, Exports, and Home Consumption of the following articles in the 11 weeks ending March 18, 1871, showing the Stock on March 18, compared with the corresponding period of 1870.

FOR THE PORT OF LONDON.

*** Of those articles duty free, the deliveries for Exportation are included under the head Home Consumption.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident:—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

FOR GENTLEMEN.—H. J. NICOLL'S SPRING OVERCOATS, of waterproof Tweed Cloths, 30s; do. with Silk Lapels, 35s; of waterproof Melton cloths, 42s; of waterproof Cheviot cloths, with silk facings, 52s 6d.

H. J. NICOLL'S SPRING CHEVIOT TROUSERS, 14s; do., Negligé Suits, 42s.

FOR LEVEES AND DRAWING ROOMS H. J. NICOLL'S SUPER CLOTH SUITS, with vest as worn at Court, complete, £20 5s; also Private Gentlemens Uniforms, of the finest and richest cloths, £26. Estimates supplied for naval and military uniforms.

FOR BOYS.—H. J. NICOLL'S KNICKERBOCKER SUITS from 21s; Morning Suits from 30s; Evening Dress Suits, from 55s; Highland Suits, from 45s; Scotch Overcoats in tweed cloths, from 16s; in Melton cloths, from 21s.

FOR LADIES.—H. J. NICOLL'S RIDING HABITS, in various coloured tweed, melton, and superfine cloths, from £3 3s to £5 5s; Paletots, 25s 6d; Suits with Jaw coats, 21s; waterproof Tweed Cloaks, from 21s; do. Costumes, from 42s.

SERVANTS' LIVERIES—THE best, at moderate prices.

H. J. NICOLL, MERCHANT Tailor to the Queen, the Royal Family, and the Courts of Europe, Army, Navy, and Civil Outfitter, 114 116, 118 120 Regent street, and 22 Cornhill, London; 10 Mosley street, Manchester; 50 Bold street, Liverpool; and 69 New street, Birmingham.

TEETH.—MR WEBB (MANY years with Mr Ewell, of 8 Grosvenor st., Bond st.) supplies ARTIFICIAL TEETH which cannot be surpassed for use, comfort, appearance, and durability. Painless treatment guaranteed throughout, as with all other operations, on moderate terms free. Terms moderate. N.B.—Any number of teeth made in two or three hours, and repairs effected whilst waiting. At home daily, 9 till eight, at 27 New Bond st. His treatise, which is well worthy of perusal, free for two stamps.

MESSRS GABRIEL'S [illegible] improvements in ARTIFICIAL TEETH and PAINLESS DENTISTRY, Patent No. 343 (dated Jan. 1871), afford the following advantages:—

Very EXTREME LIGHTNESS (being completely self-supporting), compressed with great facility and comfort, and rendering thus avoiding the covering to the gums often considered an indispensable adjunct to artificial teeth.

MODERATE CHARGES, accounted for by the simplicity of construction, while the highest class of workmanship and materials only are employed, combined with an experience of half a century's application.

ABSOLUTE IMMUNITY FROM PAIN, the system of NITROUS OXYDE GAS, after an experience of many thousand cases in hospital and private practice, stamp the establishment with an absolute security, the anæsthetic gas being one only absolutely free from danger for painless operation.

[illegible] an exhibition of nature (springs being entirely dispensed with) that detection becomes an impossibility.

MESSRS GABRIEL,
(CELEBRATE HILL CITY, and 26 HARLEY ST., CAVENDISH SQ.,) London.

Messrs GABRIEL'S
CELEBRATED PREPARATIONS
FOR PRESERVING AND BEAUTIFYING THE TEETH
Are sold by all Chemists and Perfumers in every town.
Price 1s 6d and 2s.

HOLLOWAY'S OINTMENT AND PILLS.—Under [illegible] remarkable remedies surpass every other medicine for general family use. Their action is extensive, searching, and certain. The Ointment has only to be persevered in and well rubbed over any afflicted organ to penetrate to it organic and painful. Its [illegible] properties are obtained through the wholesome influence it exerts when rubbed over the stomach and liver on the skin. It produces the happiest effects by making their sensations abundant and natural. Holloway's purifying pills should be simultaneously taken. The unrivalled potency of these pills yet potent remedies over stomach, liver, bowels, kidneys, nerves, and nervous is unsurpassed, however [illegible] These [illegible] restore order, tone, strength, and happiness.

WILLIAM MARTIN YOUNG, Secretary.

FORTY-FIFTH REPORT OF

THE COMMERCIAL BANKING COMPANY OF SYDNEY.

"Presented to the shareholders at a General Meeting, held at the Banking house, Gracechurch street, on Friday, the 20th day of January, 1871."

The Directors beg to place before the shareholders a statement of the assets and liabilities of the Bank on the 31st December, 1870.

The profits for the half-year, after deducting rebate on current bills, paying note tax, and making provision for bad and doubtful debts, &c., &c., including the undivided balance from last half-year, amount to £48,633 12s. which the Directors appropriate thus:—

	£	s	d
Dividend for half-year, at the rate of 15 per cent. per annum	£30,000	0	0
Bonus of 5s per share	4,000	0	0
Reserved fund	10,000	0	0
Undivided balance	4,633	12	0
	48.633	12	0

The reserve fund has now reached £130,000.

The dividend and bonus are now payable.

R. JONES, Chairman.

T. A. DIBBS, Manager.
Sydney, 13th January, 1871.

We hereby certify that we have examined the securities, compared the balances, and counted the coin in the Commercial Bank, as on the 31st December last, and that we have found the same as specified in this balance sheet.

CHARLES SMITH,
JOHN R. STREET, } Auditors.

The following resolutions were passed unanimously:—

That the report and statements of account now read be adopted, printed, and circulated amongst the shareholders.

That the thanks of the shareholders be presented to the Board for their management of the affairs of the Bank during the past half-year.

T. A. DIBBS, Manager.

Branch in London—39 Lombard street.
NATHANIEL CORK, Manager.

COMMERCIAL BANKING COMPANY OF SYDNEY, NEW SOUTH WALES.

Established 1834. Incorporated 1848.

Letters of Credit and Bills of Exchange are drawn by the London Office on Sydney, and the following branches in New South Wales, viz.:—Albury, Armidale, Bathurst, Bega, Berrima, Bombala, Bourke, Burrangong, Carcoar, Casino, Cooma, Dubbo, Goulburn, Inverell, Kempsey, Kiama, Maitland, Morpeth, Muswellbrook, Narrabri, Newcastle, Orange, Paramatta, Queanbeyan, Shoalhaven, Singleton, Tamworth, Wentworth, Wollongong, and Yass; and also on Brisbane, Dalby, Gayndah, and Maryborough in the colony of Queensland.

Drafts on the Australian colonies negotiated and collected. NATHANIEL CORK, Manager.

REPORT OF THE DIRECTORS OF THE

LONDON BANK OF MEXICO AND SOUTH AMERICA (Limited),

presented to the shareholders, at the Ordinary General Meeting, held at the Company's Offices, 144 Leadenhall street, London, E.C., on Tuesday, the 21st March, 1871, at 12 o'clock precisely.

The Directors, in submitting to the shareholders the accompanying audited balance sheet and profit and loss account, for the half-year ending the 31st December last, have the satisfaction to report that, after paying charges, deducting rebate, and making provision for bad and doubtful debts, there remains an available balance of £17,419 14s 11d, including £2,612 11s 10d brought forward from last half-year.

The Directors recommend that the above sum of £17,419 14s 11d should be appropriated as follows:—

	£	s	d
Dividend for the half year at the rate of 8 per cent. per annum, sixteen shillings per share, free of income tax	£14,409	12	0
Leaving a balance of	3,010	2	11

to be carried forward to the next half-year, subject to reduction by the payment of income tax.

A vacancy having occurred at the Board, by the resignation of J. M. Mackay, Esq., the Directors have the pleasure to announce that J. J. de Lizardi, Esq., of the firm of F. de Lizardi and Co., of London and Mexico, has joined the Board.

The following Directors retire from office, viz.:—William Anastasius Jones, Esq., and J. de Mancha, Esq., but, being eligible, offer themselves for re-election.

The shareholders will have to elect Auditors for the current year.—By order of the Board,

WM. THOS. MORRISON, Manager.

London, 7th March, 1871.

The Dividend Warrants will be issued payable on and after the 25th instant.

THE TRUST AND LOAN COMPANY OF UPPER CANADA.

Incorporated by Royal Charter.

Established 1851.

Capital, £1,000,000. Paid-up, £250,000. Uncalled, £750,000; Reserved Fund, £79,547.

DIRECTORS.

The Right Hon. Edward Pleydell Bouverie, M.P., President.

Charles Morrison, Esq., Deputy-Chairman.

James Hutchinson, Esq.	W. Gordon Thomson, Esq.
The Hon. Astley Cartr Glyn.	T. M. Weguelin, Esq., M.P.

BANKERS—Messrs Glyn, Mills, Currie, and Co.

This Company was the first established in England for the purpose of receiving, upon the security of a large subscribed capital, money on deposit at a fixed rate of interest, and lending the same, together with the paid-up capital, on mortgages of real estate in Canada.

The Company has been in successful operation since 1851.

The Directors are now issuing Debentures for three years and upwards. Any information required can be obtained on application to

F. PEARON, Secretary.

7 Great Winchester street buildings, London.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER

TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.
Mr WHITE, 228 Piccadilly, London.
Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Umbilical ditto, 42s and 52s 6d; postage, 1s 10d. Post-office orders to be made payable to John White, Post-office Piccadilly.

NEW PATENT

ELASTIC STOCKINGS, KNEE

CAPS, &c., for VARICOSE VEINS and all cases of WEAKNESS and SWELLING of the LEGS, STRAINS &c. They are porous, light in texture and inexpensive and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.
WHITE, MANUFACTURER, 228 Piccadilly, London.

OFFICE—349 Strand.

THE PROBABLE REDUCTION IN THE VALUE OF MONEY.

The anomalous political condition of France is again producing an unexpected movement in the money market. It is some months since it was vitally moved by the war: lately it was much affected by the peace, and the consequent prospect of a large French loan. Now France is convulsed by a revolution, and almost an incipient civil war; and to Lombard street this event is as important as either of the previous changes—perhaps it is more important than either. For some time we have been expecting that the value of money would rise, because the French would borrow largely to pay the Germans. But now, for a considerable period—say two months—they will not be able to borrow. Before that there can hardly be a stable Government which would induce us or anyone to lend at present. There are two Governments, and until there has been a conclusive fight between them, and a single firm one is instead established, French foreign credit is at an end. Even if the Germans interfered and made a French Government, that would not materially help the finance, for no one would like to lend to a Government imposed by the sword, and sure to be changed as soon as there was freedom.

In the expectation of French demand, the external money market stiffened, and the Bank of England raised its rate from 2½ to 3 per cent. But as this cause has disappeared, we must expect that the effect will cease also, and that the Bank, which is losing discounts and gaining bullion, will be compelled to retrace its last step.

WHY SHOULD WE NOT APPLY THE SURPLUS OF THIS YEAR TO THE DEFICIT OF NEXT?

On the whole, our system of annual Budgets works exceedingly well. At the beginning of the financial year, the Finance Minister calculates his expected outgoings and prepares resources to meet them. And in general those resources come under the single head of taxation—at least in that loose and popular sense in which the yield of Crown Lands is classed as taxation. Practically, we require our Chancellor of the Exchequer to meet annual outgoings out of annual incomings. What is paid within the year is to be met by that which is received within the year. In fact, this rule is mostly one of necessity as well as policy. As a rule, there is no way of meeting outgoings except by taxes and by loans, and as, except in the case of immense warlike or other extra expenditures, loans are forbidden, we must trust ordinarily to taxes only. There is no other way of meeting them. Usually we have no cash in hand to resort to. The Government balance at the Bank is rarely more than, considering the scale of its transactions, the Government must have.

But this year we shall have some cash. The excellent weekly account which Mr Lowe was the first to provide for us enables us to anticipate, not of course with precise accuracy, but still with a certain approximation, the retrospective part of his Budget statement.

	£
Up to the 25th of March, the income of the year 1870-1 was	68,532,000
Expenditure	66,138,000
Surplus	2,394,000

Of course these figures may be in some degree altered between the 25th March and the 1st of April, but still they evidently lead us to expect a large favourable balance. On the other hand for next year our outlook is not satisfactory. The expenditure of the country is, as we showed on a recent occasion, to be increased by 4,500,000*l*, or some such sum. Why then, it may be said, should we not set part of the surplus of last year against the need of next year? Why would we pay additional taxes for it all?

In most years there would be a very simple answer. If the entire new expenditure were of a permanent character it would be of little use to set a temporary windfall against a permanent obligation; if we have to raise the extra money in all years to come, we may as well begin in 1871 as in 1872. There would be no reason for varying our ordinary rule, and in money matters fixed rules should never be changed except to gain a large advantage. A steady financial system is in

itself a great good only to be sacrificed for a greater good. But this year that answer is not applicable. Much of the new expenditure is temporary, not permanent. Mr Gladstone stated this on Mr Mundella's motion, and showed how it was in detail. He said that the estimates for next year's expenditure were emphatically "transition estimates," that no one would be more grieved than he was "to think that they represented the "normal expenditure of the country," and especially with regard to the additional million of money this year to be spent on "stores," it was only to be regarded as "occasional." And in this case there is plainly no reason why an occasional good should not be set against an occasional evil,—why an extra outgoing should not be set against an extra in-coming.

But it will be said by our system all surpluses of past income are applied to the reduction of debt. One-fourth of the surplus of each quarter is always, by notice in the *Gazette*, so applied. Since 1866 the amount of debt thus extinguished has been large. The figures are these—

Certified Surplus of Income over Expenditure for the Year Ended—	£	s	d		One-Fourth thereof applicable to the Reduction of the National Debt. £	s	d
1867.							
30 June	2,690,726	9	4	.....	672,681	12	4

* Not yet applied.

It may be said that it is undesirable to interfere with this easy and beneficial process, which reduces the National Debt without anyone's making an intentional sacrifice for it, and without any but a few people hearing of it. And we should not ourselves like to confiscate the whole of the realised surplus, and spend it on the anticipated and coming deficit. We are ready to do much for posterity, but our duty to posterity has its limits like other duties. The average annual amount of realised surplus applied to the extinction of debt in the last four years has been 1,400,000*l*. And then we are ready, though next year is a year of peculiar difficulty, to spend nearly as much as that on the extinction of debt. But pedantry is bad in finance as it is in anything. We have now a realised surplus of more than 2,000,000*l*; why should it not be equally divided?—why should not 1,000,000*l* be devoted to the liquidation of debt, and 1,000,000*l* to the expenditure of next year?

There is precedent for it, and of the highest kind. In 1860, there was also a sudden temporary increase of expenditure, and Mr Gladstone employed "malt credits" to meet it—that is, he called in a sum of money which Government used to lend to particular persons, and used it to meet the temporary demand. In that year, the effect, though hardly the designed effect, was largely to reduce the "cash in hand," the Exchequer balance, too. Mr Lowe's first Budget was upon the same principle. He called in debts due to the country, that is uncollected taxes, and used them to pay the "bill for Abyssinia." As last year's surplus is so large, as it is so much more than we usually use to pay off debt, and as our temporary occasions next year are much greater than usual, we think that 1,000,000*l* of it might fairly be used, just as in those two celebrated Budgets Mr Gladstone and Mr Lowe used for extra payments the extra resources at their disposal.

THE NEW REVOLUTIONARY IDEAS IN FRANCE.

We showed last week how wide the chasm between the great cities of France and the country districts has grown; and this week we have evidence of the full consciousness of the chasm in the explicit profession of faith published by the revolutionary party in Paris, which declares for the independence and federation of the great Communes of France, and for securing for the great cities some guarantee of sufficient influence over the Central Authority, "whatever that may be," in order to prevent their being swamped, as they have hitherto been liable to be swamped, in the representatives sent up by the country districts. This most dangerous revolutionary proposal is, in some sense, no doubt a nemesis on the policy of the Imperial Government, which, resting as it did on the ignorance and conservatism of the rural population, found itself compelled to re-adjust the electoral arrondissements, so as to neutralise as much as possible the influence of the great towns. We often had occasion, while the Emperor still reigned, to point out, as the late M. Prevost Paradol pointed out in his last very instructive book, that the first requisite of a proper Reform Bill for France would by such a readjustment of the electoral districts as should give the great cities of France their fair influence in the National Assembly. But this the Emperor, who knew well that he reigned chiefly by virtue of the confidence which the timid and ignorant peasantry reposed in him, would never grant; and now we see the terrible recoil of the policy of repression in this revolutionary demand that France shall be virtually governed by the great cities—for that is really what the new programme means—and the rural districts kept down by the superior intelligence, force, and wealth of the municipal centres. That is the political ideal after which the Parisian revolution declares itself to be an aspirant. That Lyons and Marseilles, and perhaps St Etienne and Toulouse, more or less share the same views, the recent disturbances there seem to indicate. Should Paris succeed in defying the Central Power and establishing herself as an independent Commune, we may be quite sure that such an example given by the capital will soon be followed by others of the great cities, which have for generations back followed more or less closely in the wake of Paris. And the probable consequence will be the disintegration of the State, and a social war of city against country. It is a frightful danger, and one the magnitude of which has really grown with the recent attempts at a remedy. Louis Napoleon saw the extent of the danger in 1848, and tried to remedy it by drawing from the country an army which kept down the capital and the other great towns; but then, as we have seen, he had to prop up his policy by the political expedient of attenuating the political strength of the greater municipalities, which he effected, after a fashion well understood in political England, by throwing great marginal districts of agricultural population into the "circumscriptions" of the more democratic cities. But all this counterbalancing of the great cities only piqued their vanity and excited their vindictive feelings the more, till at last we see that the quarrel of town *versus* country is like enough to become an open feud.

And perhaps the worst feature of this new revolutionary cry is, that while it is a very exciting cry, a cry which has a very vivid meaning both for town and country, it does not represent anything of definite and intelligible policy for the future. The most dangerous of all social quarrels are those which begin before any intellectual or moral issue is really reached,—quarrels of local jealousy which represent passions and hypothetical interests rather than distinct policies and tangible interests. We know pretty fairly the vague ideas which are fermenting in the great French cities; we know that there is a very widespread distrust of the rich, and a very strong disposition to insist on government by the poor; we know that there is a vague idea that wealth is unfairly distributed, and that in some fashion or other guarantees should be taken for its more equal distribution in future; we know that there is a violent distrust among the *ouvriers* of the principle of competition, and a vague belief that by building up vast labour associations on what they call the principle of *solidarité* they could ensure a fairer division of the rewards of labour; further, we know that there is an intense dislike to the strong proprietary individualism and the torpid life of the rural districts, and a vast belief in the sacredness of political ebullitions of all sorts,—in short, an immense love of excitement, and a strong disposition to novelties of social and political experiment. All these tendencies are deeply rooted in the fluctuating populations of the great cities of France; but there is not one of them which really represents a distinct principle or a practicable political plan. The rural districts rather believe in wealth and rank, and certainly prefer to be governed by the rich and not by the poor. But though the apparent

tendency of a great part of the city masses to distrust wealth and prefer men of their own order makes a social war a real danger, yet it is quite obvious that this is not an issue on which a practical discussion is possible. Even the city poor will not refuse influential leaders from amongst the professional classes if they can get them; and even the country peasants might choose to elect an able and typical man of their own class if they could find one. This is just the sort of division of feeling which causes bitterness without even admitting of a clear settlement. And so too of the semi-communistic notions as to the unfair distribution of wealth. No one has ever formulated them into a practicable experiment, except indeed in the proposal to establish Government workshops for the unemployed—a most dangerous proposal, unless the work were harder and the pay much less than that of any private workshops, in which case the plan would be rejected by the socialists themselves. As for the "solidarists" who want to get rid of competition and "organise" labour on a great scale, no practicable plan has ever been proposed, except co-operative schemes, which are very good in their way, *because* they are checked and stimulated by external competition, without which they would become mere vast monopolies. Then again the general belief in political excitement, experiment, and change, which marks the cities, and which is the horror of the conservative landed peasantry of the country, suggests no issue or principle capable of real discussion; it is a mere vague tendency which has its influence of course in exciting enthusiasm in the cities, and dread in the rural populations, but it is incapable of formulation, incapable of intellectual statement or refutation.

This, then, seems to us to be the great peril of the situation,—that the cities have got a restless, a feverish, a dangerous, an empirical life of their own, to which they are attached, and the influence of which, in some form or other, they desire to see propagated through France; while the country people, ignorant, slow, conservative, and attached to their ignorant, slow, conservative ideas, feel a complete horror of the views and feelings which agitate the cities and desire nothing so much as to be protected from their influence. There, as we have said, is no political issue—nothing capable of being fought out definitely, like the demand for a Reform Bill, or for Free-trade, or even for a Republic. All these clear constitutional issues might be decided by political agitation. But in France we have hostile but, on one side at least, vague ideas threatening an order of society to which the other side is attached, but without even a trace of sufficient definiteness to make it clear what order of society these idealists would substitute for it. Such hostility as this is the more dangerous, just because it is vague, and any distinct comparison of ideas on the subject is impossible. It is more like a quarrel between two different ages of the world,—between a feudal and a commercial period, for instance, as to which should impose its yoke on the other,—than a contest between two sections of the same people, educated under the same influences, and only subject to a certain moderate *divergency* of taste and principle. The only conceivable remedy for it, is a thorough rural education, which should make the country districts more active and susceptible to new ideas, and a thorough city education, which should make the *ouvriers* more sober, less visionary, more clearly aware of the strict intellectual limits on all progress. But that takes a generation or so; and a social struggle in France looks almost as if it were imminent. It is a gloomy prospect.

THE NAVAL ESTIMATES.

Mr Goschen's speech on the Naval Estimates will, we believe, satisfy the public, and this for more reasons than one. It is, to begin with, a proof that Mr Gladstone made no mistake in selecting the Member for London to fill the high office of First Lord. The country as yet knows little of Mr Goschen, and was disposed when the appointment was announced to doubt whether he was more than a financier who might keep the Admiralty expenditure down, but could hardly be trusted to protect our interests in every sea. The speech has removed that impression. Without affecting to be an admiral, acknowledging frankly his ignorance of many details, Mr Goschen displays in every sentence the strong grasp of business which is his qualification for office; while his speech in its entirety reveals his possession of a distinct and intelligible maritime policy. He is not going to help the Admiralty to live from hand to mouth, but to organise and keep up the fleet till it is ready to fulfil the three great duties which may be required of it. He will maintain and increase the number of those gigantic iron-clads, upon which we must rely to prevent any hostile fleet from reaching our shores—the ships upon which we must depend for the last operation of naval warfare, the actual sinking of hostile men-of-war. Such a fleet, he alleges, we already possess in our fifty odd iron-clads—a fleet which could meet and sink any combination of other fleets which we can by any reasonable probability be called upon to meet. He will also maintain and improve the flying squadrons which keep up our influence in distant seas, and bring home to our colonies and our trade that sense of shelter under the British flag which is essential to their prosperity. And finally, he will commence the construction of the iron-clad fleet for shallow waters, the want of which has crippled the French fleet, and might one day endanger our own coasts. The water round most coasts, and more especially the coasts of the Baltic, shallows so rapidly towards the land that no first-class man-of-war can approach except through channels as defensible as rivers; and a huge vessel like the Hercules, as powerful as a first-class fort, is as unable to move as if it had been constructed on the land. The new class of vessels or monitors will add greatly to the security of our own coasts, moving, as they will, within the line which no broadside iron-clads can cross, and may, if the emergency arises, be employed also for attack, say on a fleet anchored under the protection of the guns of some land fortress. This will be an immense addition to our strength—the possession of a first-class monitor able, as Mr Goschen promises, to go to sea and to float in shallow water, being equivalent, for the purpose of attacking harbours, to the possession of a *corps d'armée* fully equipped with transport.

This is an intelligible and a sound plan of maritime defence, and the country only needs further to know that it possesses adequate means of carrying it out. The Admiralty says we do possess them, and on such a point the opinion of the Admiralty is the only one worth having. Statistics of ships are for the public of very little value. There is a permanent delusion existing in the British mind upon this particular point. Almost any man who can read thinks that he can tell, by studying lists of British ships, whether or not the country is sufficiently defended by sea, quite forgetting that the first datum in any such calculation is not the positive strength of our fleet, but its strength in comparison with the fleets of other nations. If, for example, we had the only two iron-clad vessels in the world, we should be safe under the protection of those two, and all further precaution would be waste of money. When, therefore, Mr Goschen says emphatically "we are strong," he means that we have a sufficient fleet to destroy the fleets which could be brought against us; and as he knows the number, condition, and strength of those fleets and the public does not, his belief ought to outweigh any vague popular impression. There is no reason for doubting his frankness, for he repeats again and again that the security of the country is the paramount consideration, and no reason for doubting his judgment, for he is a cool-headed business man, accustomed in very great affairs to apportion means to ends.

Upon another point also these estimates are satisfactory, and though that is no merit of Mr Goschen's, it will be carried by popular opinion to his credit. Our fleet is not too dear. One entire half of the sums voted is paid to men who do actual work in return, and the other half on the ships in which they are to do it. The "waste charges," like that for the conveyance of troops, are being steadily reduced, and the Admiralty is trying hard in every department to get a fair pennyworth for its penny. We do not mean to say there is no waste. No employer of limitless resources can ever entirely avoid waste, because no such employer will ever be quite anxious enough to avoid it; but there is no evidence of waste greater than exists in other grand establishments—in the management, for example, of railways of the first magnitude. Business men know how that stands, and may take comfort when they remember that railway companies in the world deal year by year with a half of the gross sum the Admiralty is compelled to expend. This sum, we are happy to see

shows a tendency to become fixed at about ten millions a year. We say happy because, vast as the amount is—nearly one-half the produce of the Excise—it is, we are convinced, cheaper to expend a fixed sum year by year than to reduce it one year at the risk of making huge grants the next. No matter what the collection to be made,—and remember a fleet is a collection,—the easiest way to make it complete is to assign to it year after year the same sum. Foresight, preparation, housewifeliness, the very qualities so often wanting in rich States as in rich households, then develop of themselves. Nothing impedes economy like a conviction that, after all, there is a purse of Fortunatus still behind, and unless estimates are tolerably stationary, no servant of Great Britain ever forgets that such a purse exists.

There is only one point in these estimates which seems to us to suggest a possible future danger, and that is the small number of "blue jackets" now required for service. Of the 61,000 men now voted, only 18,000 are seamen of the kind described by this well-known nickname. The remainder are—marines, 14,000; mechanics, 2,600; stokers, 3,800; servants, 3,600; 4,000 boys, 3,000 boys in training, 4,300 coastguards ashore; and so on—all most useful persons, but all persons whom other countries can produce as well as ourselves. The special defence of this country—its possession of a class of seagoing men whom no other country could turn out—seems likely, at no distant period, to be terminated. Germany, for example, might have some difficulty in turning out 61,000 seamen, but she would nave no difficulty whatever in procuring the very small number now required to direct a very much larger number of mechanics, engineers, and soldiers in blue.

THE BANK ACT OF 1844.

"A SUSPENSORY CLAUSE."

TO THE EDITOR OF THE ECONOMIST.

SIR,—I beg to make some observations on the last three paragraphs of the article in your issue of 25th March on "Bank of England Meeting." A *three-million* reserve, as we now all know, may be regarded as an exploded tradition of the Bank; a review of the recent working of the Bank probably showing that the directors will henceforth so act as rarely to let the reserve be reduced to less than 33 per cent. of the liabilities. I think *you* hold the opinion that, speaking generally, the Bank is becoming weak when the percentage is tending below that figure.

Here then is the "percentage of reserve" to "liabilities" over a most important period. I do not, for brevity's sake, speak of the particular phases of the money market at the dates I quote; nor do I make reference to the present or impending position, for as you elsewhere observe, until the mode of settling the French indemnity is known everything is in suspense.

The proportion then of the *reserve* to *liabilities* was on—

January 6, 1869	34	per cent.
November 17, 1869	45	—
March 16, 18, 7046	46	—
July 6, 1870	49	—
August 3, 1870	45	—
January 11, 1871	51	—
March 1, 1871	38	—

Nor has the "reserve" ruled lower at any intervening date.

As to the second paragraph referred to, let me recall attention to the Governor's speech at the Bank meeting in September, 1866. There is, however, no doubt it would, as you say, be easy to give a series of statements by Bank authorities of very conflicting nature. Yet it may, I think, be safely concluded that recent practice will prove to be the policy of the near future. Individual opinion of any Governor for the time being must be influenced by, and bend to, the feeling of the Court, based on recent practice. But however desirable it is to have some fixed doctrine on these points, it is probably not to be obtained in the existing organisation under the Act of 1844. The Governor, amongst other things, said—"A "great strain has within the last few months been put upon "the resources of this house, and of the whole banking com- "munity of London. This house exerted itself to the utmost "to meet the crisis. We did not flinch from our post. "When the storm came upon us, on the morning on which "it became known that the house of Overend and Co. had "failed, we were in as sound and healthy a position as any "banking establishment could hold, and on that day and "throughout the succeeding week we made advances which "would hardly be credited. It was not unnatural that in "this state of things a certain degree of alarm should have "taken possession of the public mind, and that those who "required accommodation from the Bank should have gone "to the Chancellor of the Exchequer and requested the "Government to empower us to issue notes beyond the "statutory amount if we should think that such a measure "was desirable. But we had to act before we could receive "any such power; and before the Chancellor of the Exche- "quer was perhaps out of his bed, we had advanced one-half "of our reserves, which were certainly thus reduced to an amount "which we could not witness without regret. But we would "not flinch from the duty which we conceived was imposed "upon us of supporting the banking community, and I am "not aware that any legitimate application made for assist- "ance to this house was refused. Every gentleman who "came here with adequate security was liberally dealt with, "and if accommodation could not be afforded to the full "extent which was demanded, no one who offered proper "security failed to obtain relief from this house."

It follows now practically that the Bank admits and recognises an obligation to keep a reserve equal to all emergencies, seeing it conceives its duty to be to support the banking community, and be it observed "no one who offered "proper security failed to obtain relief from this house."

There then is the reserve of reserves; but how it disappeared in 1866! What if the Bank had actually waited till the Chancellor had been conferred with? You well observe "panics move very rapidly," and referring to the action which may be taken under crisis by one governor or another, you add there ought to be "some sort of fixed code to guide "this changing executive." I have already suggested that probably the past will be the only light we shall have on the future.

Now it is foreign to the object of these remarks to discuss the policy of the Bank discontinuing the custody of *bankers'* balances, except by way of trust, and so letting the banks generally take care of themselves. My observations refer to the institution as it is, and which, as a matter of fact, speaking broadly, works very well. But the great benefit of the Act is obtained at a great price, for on the recurrence of every crisis there are some few days when the credit system of the country breaks down, when *sauve qui peut* is the cry, as when the "reserve" fell on Wednesday, 20th May, 1866, to the insignificant sum of 415,410*l*—the result not of needs but of fright—panic.

It would be waste of time now to enter into any *investigation* of the panic of 1866. We found, as matter of fact, that the suspensory action of 1847, '57, and '66 *stopped* the panic. Can we then lessen the price we pay for the benefit of the Act without injuring it by a *Suspensory Clause*, vesting in the First Lord of the Treasury and the Chancellor of the Exchequer the power? This is the thing needed—a pre-given power, on which the public mind would rest, recognising the principle on which the Bank acts, and so preventative of the spread of disquiet. If I am not mistaken you have before times written on this, and certainly City authorities are not wanting in support of it. Such provision violates no principle, nor does such a supplement to the Act of 1844 involve a reconsideration of the Act generally. That the Act of 1844—*of which the main feature is to regulate our currency by the action of the Foreign Exchanges*—may under certain circumstances be suspended, is as certain as that the Habeas Corpus Act itself may under certain circumstances be suspended, without violation of principle, or weakening the effect of the Act in any degree as regards either the one or the other.

I submit, Sir, that the present is not inopportune for discussing the expediency of the measure referred to.—Your obedient servant, BANKER.

The main point in this interesting letter is the policy of the Bank of England in a panic. We said that it is as yet uncertain, and that the Bank directors differ in opinion about it. Our correspondent quotes a speech delivered by the Governor just after the panic of 1866, which he considers conclusive. But unfortunately we know a good deal about that speech. Immediately afterwards, on the 22nd September, 1866, we wrote an article in approbation of it, and quoting it, like our correspondent, as a binding authority on the Bank of England. But we were not allowed to rest on so happy an impression. Mr Hankey, one of the most sedulous of the Bank directors, and an important member of the Com-

mittee of Treasury, wrote in reply. Nor did he fail in plainness of speech. He said that our doctrine, being exactly that of the recent Governor, as our correspondent interprets it, was the "most mischievous doctrine ever broached in the "monetary or banking world of this country;" that it "expects the Bank of England to perform a miracle;" and that "it is the attempt to force the Bank to do so which has "led to the greater number of difficulties which have occurred "on every occasion of monetary panics within the last twenty "years."

And Mr Hankey thus states his own views of the Bank's duties:—"I consider it to be the undoubted duty of the "Bank of England to hold its banking deposits (reserving "generally about one-third in cash) in the most available "securities; and in the event of a sudden pressure in the "money market, by whatever circumstance it may be caused, "to bear its full share of a drain on its resources. I am "ready to admit, however, that a general opinion has long "prevailed that the Bank of England ought to be prepared to "do much more than this, though I confess my surprise at "finding an advocate for such an opinion in the ECONOMIST. "If it were practicable for the Bank to retain money unemployed to meet such an emergency, it would be a very unwise thing to do so. But I contend that it is quite impracticable, and, if it were possible, it would be most inexpedient; "and I can only express my regret that the Bank, from a "desire to do everything in its power to afford general assistance in times of banking or commercial distress, should "ever have acted in a way to encourage such an opinion. "The more the conduct of the affairs of the Bank is made to "assimilate to the conduct of every other well-managed bank "in the United Kingdom, the better for the Bank and the "better for the community at large." But no other Bank save the Bank of England *can* make immense and unusual advances during a panic; none other holds the "ultimate reserve" of the country; and if its policy is to be assimilated to that of other banks, no such advances as our correspondent expects will be made, and the current panic would in consequence be frightfully aggravated.

After this we made inquiries, and the result is that which we stated last week, that there is no distinct understanding among the Bank directors on this cardinal point. The governor was not authorised by any resolution to say what he did; and we will not even undertake to say that he would himself accept our correspondent's interpretation of his opinions. Even if he did it is certain that many other directors would not approve of it. We have no doubt in another panic that *ultimately* the Bank of England would again lend as in former panics, and that the Act of 1844 would be broken in consequence. But we cannot be sure that they would lend *at once*. A day might easily be lost and great firms ruined, especially if Parliament were not sitting. Suppose a rigid Governor who said with Mr Hankey, that the Banking Department of the Bank of England is to be managed on the same principle as other banks—suppose an iron Chancellor of the Exchequer who will not break the Act—what would be the condition of the banking and commercial community? Suppose, what is as likely, even a vacillating Governor who is directed by no fixed principle and does not know his own mind—suppose a timid Chancellor of the Exchequer who will take no responsibility—and again there might be ruin and incalculable suffering to all.

Upon the other points of our correspondent's letter we will remark on another occasion, but our uncertainty on this primary matter is so complete and so important that we wish it to be considered by itself.

BUSINESS NOTES.

THE PARCEL POST.—We are sorry to learn from Mr Monsell's answer to a question put to him the other evening that the recent concessions in respect of a parcel post are not to extend to India or the Australian colonies. By the contract with the Peninsular and Oriental Company, it appears the Post Office cannot send any article which is not now transmissible "without making a payment commensurate to "the increased burden which would be thus imposed;" and as the Indian postal service now costs more than it brings in, the Government will not pay more. Thus one of the main advantages which were expected from the parcel post will be postponed. The convenience of such a post under the irregular arrangements about "patterns" had been more sensibly felt in the communications between England and the East than at home, and the loss of the privilege caused by the more strict enforcement of the regulations was proportionately annoying. But now when the Government is making concessions, the greatest sufferers are to be left subject to the grievance. The objections stated by Mr Monsell to the extension of the privilege to Anglo-Indian communications are not satisfactory. As regards the contract with the Peninsular and Oriental Company, it does seem a little surprising that the department cannot move hand or foot without breach of contract. Surely a reservation for the reduction or change of postage rates should have been made, so that the contracting company would not be able to veto improvement by a prohibitive charge. In any case, however, the plea would not be sufficient; and it will be observed that Mr Monsell's remaining answer was, in fact, a repetition of the old and unsound doctrine that each particular department of the Post Office business must be made to pay. To make the parcel post answer all the purposes intended, both in facilitating business and social convenience, it should extend as widely as the other postal services. Any direct loss will be more than compensated by the larger measure of indirect benefit resulting.

LOCAL TAXATION.—We have great pleasure in stating that the "Tayler Prize" of fifty guineas, offered through the Statistical Society for the best essay on "Local Taxation," has been awarded to Mr Robert H. Inglis Palgrave, of Yarmouth, third son of the late Sir Francis Palgrave. Mr Palgrave is a well-known member of the Statistical Society, and has already contributed several most valuable papers to their journal, and has besides done some important statistical work—contributing in particular the statistical information for M. de Parieu's important treatise on taxation. The essay will without doubt be a valuable contribution to our knowledge of local taxation, and we hope Mr Palgrave will have an early opportunity of bringing it before the Statistical Society. The prize was offered by Mr Tayler, F.S.A., and the adjudicators appointed by the Society were Messrs Newmarch, S. Brown, F. Hendriks, and J. Waley.

THE GREAT WESTERN RAILWAY.—The advance which has recently taken place in the price of the ordinary stock of this company is a most remarkable instance of recovery in the value of railway property. Only six weeks ago, on Feb. 17, the quotation was 73¼, with an accrued dividend of 1¼ per cent.; and it is now 89½, ex dividend—a rise of 17¾ in price, which is equal to an advance of about 25 per cent. in the market value of the shareholders' property. So far as we can judge, there is fair reason to believe that this advance is not unwarranted, and that the ordinary stock will at an early date still farther improve in value. The Great Western is one of those lines in which the amount of the ordinary stock is small in proportion to the amount of the preference and debenture capital. A net gain of 14,500*l* per half-year suffices for an addition of ¼ per cent. per annum to the dividend; and as the traffic is increasing between 5,000*l* and 6,000*l* per week—between 130,000*l* and 160,000 per half-year—there is clearly room for a very considerable addition to last year's dividends, even allowing for great deductions from the gross gain. But this is not the whole secret of the Great Western advance. Apart from the prospects of new traffic from the extension of the narrow gauge, a specially good prospect is opened up by the paying off of the debenture loans which were obtained under the depressing circumstances that existed a few years ago, and the substitution of cheaper loans instead; and there is also some reason to believe that less deduction for the working expenses need be made from the increase of gross traffic than is the case in other lines which have improved during the last eighteen months. Ordinarily the increased traffic has been earned at proportionately increased cost, while the capitals increased considerably; but in the Great Western a very large amount of the gross traffic is a pure gain. The figures bring out these facts very clearly. The dividends last year were—

	£	s	d		£
1st half-year	1	10	0	per cent., absorbing	174[illegible]
2nd half-year	1	17	6	—	[illegible]
Total	3	7	6	—	[illegible]

—and taking the increase of traffic at 5,500*l* per week, which is the average of the current half-year, we have to calculate

what this will add to the dividend. According to a minimum estimate, assuming that the increased traffic will be earned at proportionate cost, we should have the following result for the present year :—

	Gross Increase of Traffic.		Deduction for Working Expenses.	Deduction for Additional Preference and Debenture Charges.	Net Gain—Amount.	Net Gain—Addition to Dividend.
	£		£	£	£	£ s d
1st half-year	143,000	(16½%)	70,000	10,000	63,000	0 11 0
2nd half-year	143,000	(16%)	66,500	nil.	76,500	0 13 0
	286,000		136,500	10,000	139,500	1 4 0

This would make a dividend of 2*l* 1s, or 4*l* 2s per cent. per annum, for the first half-year, and of 2*l* 10s 6d, or 5*l* 1s per cent. per annum, for the second half-year—average for the whole year, 4*l* 11s 6d. But this is a minimum estimate. The new capital is very small, only 165,000*l* last half-year, and only 265,000*l* estimated the current half-year, not sufficient to compensate the reduction of debenture interest arising from the cheaper rate at which the company borrows to pay off its old loans. Last half-year about 6,000*l* per annum was saved in this way, and there will now be an *increasing* improvement every half-year for some time. There were still 10,000,000*l* of loans in January last, on which 30,000*l* a year and upwards may be saved, as follows :—

	£				£
¼ per cent. on	1,861,000	borrowed at	4½	per cent.	4,650
½ —	463,000	—	4½	—	2,300
¾ —	3,627,000	—	5	—	27,200
					34,150
Less ¼ —	725,000	—	4	—	1,800
Total saving					32,350

This of itself would add more than ¼ per cent. to the annua dividend on the ordinary stock, and though it will not all come in this year it is a quite certain improvement, and will go far to balance all the present contemplated expenditure of new capital—viz., 1,834,600*l*. The most important fact however appears to be that the working expenses will not increase proportionately with the gross traffic. The explanation of experts is that a third of the increase is in passengers and not in goods, and that an increase in passenger traffic is almost pure gain ; but putting aside explanations, the results of last year will speak for themselves. These were—

	Increase of Traffic.	Increase of Working Expenses.	Percentage of New Working Expenses to New Traffic.
	£	£	
1st half-year. 1870	76,027	27,934	35·5
2nd half-year, 1870	58,934	9,024	15·3
	134,961	36,958	27·4

—proving that the Great Western, instead of earning its new traffic at a cost of 46 per cent., earned it last year at a cost of only 27.4 per cent. Assuming that the increased gross traffic in the current year will be earned at 30 per cent., we should have the following results :—

	Estimated Increase of Traffic.	Working Expenses.	Preference Charges.	Net Gain.—Amount.	Net Gain.—Additions to Dividend
	£	£	£	£	£ s d
1st half-year	143,000	43,000	10,000	90,000	0 15 0
2nd half-year	143,000	43,000	...	100,000	0 17 6
	286,000	86,000	10,000	190,000	1 12 6

This would make a dividend of 2*l* 5s, or 4½ per cent., the first half-year, and 2*l* 15s, or 5½ per cent., the second half-year, or an average for the whole year of 5 per cent. That this will be the dividend is not improbable, and coupled with the fact that the rate of increase of the traffic is gradually getting higher, it shows very forcibly the excellence of the position which the Great Western, after the depression of the last few years, has obtained. Short of some great and unexpected calamity, or a sudden forgetfulness of the lessons which misfortune has taught, there is no reason why the Great Western should not immediately become a 5 per cent. line, with every prospect of a rapid farther improvement.

A Ship Canal between India and Ceylon.—The subject which was discussed on Tuesday night at the meeting of the East India Association—the proposal to cut a channel for ships between India and Ceylon—is a very important one, and the proposal seems more within the limits of definite practicality than such schemes usually are. A good many maritime canal schemes, not excepting the Suez Canal itself, have been based on a wrong reckoning. The shortening of time for voyages and the great benefits to commerce have been urged ; but there has been too little disposition to measure the gain, to compare the benefits with the cost, and ascertain that too much is not being sacrificed in the present for the improved roads of the future. The consequence has been that individuals have frequently suffered loss, being induced to contribute capital to great schemes by a species of false pretences, and, apart from this heavy drawback to such schemes, we should think that even if the capital were always obtained in a more legitimate way, yet it is quite possible the same capital could have been employed more profitably for commerce and for the good of the world. The proposal for the channel between India and Ceylon is however free from most of the faults which maritime canal projects are liable to. It is a proposition to furnish a shorter route for a certain traffic, without any vague speculations as to remote effects, and the advantages proposed are clear. It is plain that to shorten the distance between Suez and Calcutta by nearly 400 miles—the saving on the double journey being 750 miles—would be a great gain to steamers ; the saving would be between two and three days' voyage, or, as it is calculated, something like 4 per cent. on the working expenses of the voyage. At the same time the cutting would enable ships on that coast to enjoy the benefit of a magnificent land-locked harbour, which is now useless because off the route. And these advantages are to be given for the price of 90,000*l*, besides a small annual cost for working, so that there is no question of any brilliant and costly engineering scheme. The proposal is certainly one which the Board of Trade here might consider carefully in conjunction with the Indian Government. The latter would gain indirectly in many ways, and would probably be able to reimburse itself by a moderate charge for the use of the channel and harbour.

Lord Westbury on the Foreign and Colonial Government Trust.—The proceedings at the last meeting of this Trust afford good evidence that the warnings as to the reality of the risk which investors ran in it, and the error of the original scheme in promising so much ultimate profit without deducting anything for risk at all, were not without cause. Lord Westbury was both compelled to congratulate his audience on the fact of no default having occurred in the payment of interest on their securities, notwithstanding the disturbances on the continent, and to state that in the drawings one default had occurred, viz., on the Turkish 6 per Cents. of 1865. The fact of congratulation being necessary, and of one of the dangers which attend such investments having occurred, shows that the risk which the Trust professed to guard against, but did not as regards the promise of ultimate profit, was a very real affair. What Lord Westbury urged concerning the honesty of the Turk will be a very poor consolation in the face of the present difficulties of the Turkish administration. In these circumstances, it is not a little surprising that Lord Westbury should speak of the Trust as in a good financial condition, and as "offering a favourable opportunity for investors with small capital."

Stock Exchange Customs.—The Master of the Rolls—*re* Fenwick *v.* Buck—has decided an important point as to the legal effect of non-delivery of stock within ten days of settling day. The defendant's broker had purchased twenty shares in Overend and Gurney on the 27th of April, 1866, just before the failure, the purchase being made in the usual way by his brokor from a jobber on the Stock Exchange. Overends stopped payment on the 10th of May, and on the same day the plaintiff sold twenty shares to Messrs Bristowe Brothers, jobbers, who passed the name of the defendant as the ultimate purchaser. The plaintiff executed the transfer on the 10th of May, but the defendant did not execute the transfer, though he paid the price and took away the certificates, and the plaintiff, who has had since to pay calls, brought the present suit against the defendant to be indemnified. The defendant objected that the purchase was for delivery on the 27th of April, and that his broker had no authority to take delivery on the 10th of May ; but evidence was given of the custom by the Stock Exchange to allow 10 days for delivery, and to continue the contract afterwards until delivery, or until the purchaser's broker gave notice to buy in. The Master of the Rolls held "that a broker who was instructed "to buy or to sell for a particular settling day could not "carry over the bargain to a subsequent settling day without "authority from his principal, but in this instance the contract "was not carried over to the next settling day, which was "not until May 15, but was simply suffered to remain four

"days over time—from the 8th to the 12th of May. It could "not be said that time was so far of the essence of the contract "that it could be vitiated on that ground, though time was "unquestionably of great importance in Stock Exchange "transactions." Decree was accordingly given for the plaintiff with costs.

THE EAST INDIAN RAILWAY DEBENTURES.—We are unable to sympathise very much with the correspondents who have been complaining in the *Times* this week of the alleged sharp practice of the East India Railway Company as regards their debentures issued in 1861. The statement is that these debentures contained an option of conversion into capital stock of the company at any time before the principal became payable, on one month's calendar notice being given; and that the bonds expiring on the 1st of April, and no such notice having been given in some cases, the company has intimated that the bonds will be paid off at par. As the bonds were bought at a premium, owing to the privilege of conversion, and the premium will be lost through the privilege not having been exercised in time, the debenture holders who have been neglectful are angry with the company. But they have only themselves to blame. When a distinct contract, like that stated to be in the debentures, is entered into, it is only a matter of ordinary business that those who wish to secure an advantage promised them on certain conditions should comply with the conditions at their own risk. It would not be thought sharp practice in an individual to enforce strictly the contract he had made with such neglectful creditors. It is argued that the East India Railway should act like insurance companies, which permit a license of twenty-one days for the payment of renewal premiums; but the cases are not similar. An insurance company loses by the forfeiture of policies, and it is for its own interest that it promotes renewals, not from any consideration for the policy-holder. An insurance company would, when the days of license had just expired and the policy-holder then died, would have no scruples about refusing to pay the amount insured—would enforce its contract as strictly as the East India Railway is just alleged to have done. It is a different question whether the clause in the debentures does bear the company's interpretation, and whether the debenture-holders could not give notice any time before the expiry of the debentures, and if there is any ambiguity it would be good policy for the company for its own credit to give the debenture-holders the benefit of the doubt; but on the general principle, and assuming that the debenture-holders have been neglectful, we do not see that they are entitled to any sympathy. If people are not to suffer by such neglect, the laxity of business habits which would be encouraged would soon lead to far greater mischiefs than any that will now be felt.

THE ALBERT RECONSTRUCTION.—The statements made before the Committee of the House of Lords in support of the Bill for Reconstructing the Albert appear to make out an unanswerable case for Parliamentary interference, not only in this affair but in many others. The official liquidator, it appears, had admitted "that he did not remember a single "case of an insurance company in liquidation being "finally wound-up. There were fifty-eight of such "companies in Chancery, and some of them had been there "for fifteen years and upwards; but in no one instance had "the winding-up been completed." When to these considerations is added the enormous expense of liquidating, amounting, it is said, in the Albert to 30,000*l* a year, it becomes evident that the work of disentangling such difficulties is unsuited for a Judge. The exact adjustment of legal rights, which a Judge attempts, becomes worthless if many private interests are kept for years in suspense. Creditors would all gain by obtaining less than their rights now in place of their full rights many years afterwards, and debtors would also gain by the affair being quickly closed. It is good sense and equity therefore to cut all such knots, as was done in the case of the Chatham and Dover Railway by the arbitrators. Whether this could not best be done by a permanent administrative tribunal, working under the supervision of Parliament, instead of by the cumbrous process of a private Act is a different and most important question. Why should not a Judge when he finds a company in difficulties have the power of making a special report to the Legislature that the intervention of a tribunal with legislative powers is necessary, and permanent arbitrators be then called in to do the work which Lords Salisbury and Cairns were specially appointed to do? Of course the working of the machinery would require to be carefully watched, but it would be better to have some such machinery in place of the hopeless liquidations now cumbering the Courts. There is another question here—whether the special reconstruction scheme now promoted is the best mode of cutting the knot—but such a question could be more suitably considered by permanent arbitrators than by special committees of both Houses of Parliament.

PROOFS IN BANKRUPTCY.—The peculiar doctrine of the Judges as to the deductions which secured creditors must make in proving in bankruptcy again comes under notice in the case of the Joint Stock Discount Company *re* Daunt, before the Lords Justices of Appeal last week. Before his stoppage Daunt had drawn five bills amounting to 9,446*l* on various parties who had accepted them, and which bills had afterwards been endorsed by Barned's Bank to the Joint Stock Discount Company. The bills were partly paid by the acceptors and partly by Barned's Bank, and in other ways; and the question now was to what extent the Joint Stock Discount Company could prove upon Daunt's estate, he having executed a deed of inspectorship. The particular issue was, whether the Discount Company could claim for the whole amount unpaid at the registration of the deed, or only for the amount due when the claim was sent in; and the decision was that the proof could only be given for the smaller sum. The injustice of such law is flagrant. Clearly Daunt was responsible for the whole amount of the debt left unpaid by the acceptors of the bills, and his estate should have been made to bear it proportionately. If the creditor, by having recourse against others, obtained farther payments, that plainly should have been no concern of Daunt's other creditors. The ruling of the Bankruptcy Courts is, in effect, a mode of injuring the value of securities, since a creditor, who has two or three people bound, finds that on the bankruptcy of one of them he only gets a dividend upon a portion of his claim. The eccentricity of the law is farther shown by a different ruling in Chancery, in windings-up, where a creditor does get the benefit of his securities; and why the same rule is not extended to bankruptcy is one of the mysteries of our unsystematic legislation.

THE COURT OF LONDON BILL.—It is a great scandal in the way of private legislation which has just happened in regard to the private Bill promoted by the City of London for the amendment of its local courts. After the Bill had passed through many stages, it is at last discovered that it contains a clause giving to the City of London Court the full powers of one of the Supreme courts in the country, and extending an antiquated process of attachment against foreigners, which the City of London Court possesses, in a way which gave the Court more powers than the Supreme Courts themselves. Now that the clause is discovered, no one acknowledges responsibility for it—neither the members whose names were on the back of the Bill, nor the promoters who communicated with them. The chance that such a clause could pass in a private bill, though it affects public interests, raises the inquiry what means are employed to defend the public against general causes in private bills. As a matter of fact the committees look into them, and prevent many scandals, Lord Redesdale's services in this respect being conspicuous; but it would seem necessary that some public officer should be made to report whether private bills contain clauses affecting the private rights of many individuals who cannot be represented, and that then all bills containing such clauses should be promoted as public bills. With regard to this scandal, there ought to be a committee to discover the authors of the outrage. We have a suspicion that some over-zealous officer of the Corporation, knowing well its financial condition, must have got the clause put in with the direct object of increasing the Corporation revenues, which are partly derived from the fees of the Court. The Corporation has, in fact, in these modern days, attempted the plan of the Judges some centuries ago, who gradually extended their jurisdiction under one quibble or another for the sake of bringing business and fees to their Court. But if the Corporation is so poor, some very different means should be attempted in the public interest for the improvement of its finances.

THE REVENUE.

I.—An Abstract of the Gross Produce of the Revenue of the United Kingdom in the undermentioned periods, ended March 31, 1871, compared with the corresponding periods of the preceding year :—

	Quarters Ended—				Year Ended March 31, 1871.	Quarters Ended—				Year Ended March 31, 1870.
	June 30, 1870.	Sept. 30, 1870.	Dec. 31, 1870.	March 31, 1871.		June 30, 1869.	Sept. 30, 1869.	Dec. 31, 1869.	March 31, 1870.	
	£	£	£	£	£	£	£	£	£	£

III.—An Account showing the Revenue and other Receipts in the Quarter ended March 31, 1871, the Issues out of the same, and the Charges on the Consolidated Fund at that date, and the Surplus or Deficiency of the Balance in the Exchequer on March 31, 1871, in respect of such Charges :—

	£	£
Income received, as shewn in Account I.		23,505,031
Amount raised by Exchequer Bonds, issued per Act 33 and 34 Vic., cap. 41		700,000
Amount raised on account of Fortifications, per Act 30 and 31 Vic., cap. 145		150,000
Amount received in repayment of advances for Public Works, &c.		250,076
— — Greenwich Hospital		39,623
Amount cancelled on account of the charge on 31st December, 1870		82
		24,644,812
Excess of the sums charged on the Consolidated Fund on the 31st March 1871, payable in June Quarter, 1871, above the balance in the Exchequer at that date, viz :—		
Excess of charge in Great Britain	£1,346,284	
Surplus over-charge in Ireland	797,323	
Net deficiency		*548,961
*Charge on 31st March 1871 (as on the other side)	£8,343,740	
Paid out of Growing Produce in March Quarter, 1871	771,344	
Portion of the charge payable in June Quarter, 1871	7,572,396	
To meet which there was in the Exchequer on 31st March 1871	7,023,435	
Net deficiency, as above	548,961	
		25,193,773

	£	£
Net deficiency of the balance in the Exchequer to meet the charge on 31st Dec., 1870, as per last account	£5,911,303	
Less—Amount of Sinking Fund applied in repayment of advances to meet the said deficiency	1,000,000	
		4,911,303
Amount applied out of the Income to Supply Services (including 700,000*l* Exchequer Bonds paid off)		11,894,998
Amount advanced for New Courts of Justice		4,109
— Greenwich Hospital		39,623
Charge of the Consolidated Fund on 31st March, 1871, viz. :—		
Interest of the Permanent Debt	£5,109,088	
Terminable Annuities	1,475,332	
Interest of Exchequer Bonds	5,688	
Principal of Exchequer Bills	45,000	
Interest of Exchequer Bills	29,277	
— Deficiency Advances	2,324	
The Civil List	101,546	
Other charges on Consolidated Fund	483,283	
Advances for Public Works, &c.	354,693	
Sinking Fund	737,509	
		8,343,740
		25,193,773

THE PUBLIC REVENUE AND EXPENDITURE.

THE following are the Receipts on account of Revenue during the week ending March 25 :—

	Receipts of Week Ending March 25.
	£
Customs	438,000
Excise	405,000
Stamps	183,000
Taxes	96,000
Income tax	153,000
Post Office	nil.
Telegraphs	nil.
Crown lands	30,000
Miscellaneous	25,954
Total	1,330,954

The total receipts of the previous week were 3,007,191*l*.

The Exchequer issues of the week on account of expenditure were 973,174*l*, viz. :—

	£
Interest of debt	300,000
Other charges on Consolidated fund	20,900
Supply services	650,000
Telegraph services	2,274
	973,174

During the week the cash balances have increased as follows :—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on March 18	6,723,791	1,217,220	7,941,011
— March 25	6,952,472	1,346,093	8,298,565
Increase	228,681	128,873	357,554

The other receipts to date were 674*l*, the other payments were 900*l*.

Agriculture.

THE REPRESENTATION OF HUSBANDRY.

WITHOUT professing to have any great faith in mere class representation, we should see with satisfaction a certain number of real tenant-farmers' representations in the House of Commons. Their special interests are either unrepresented, or are misrepresented by the landowners who profess to speak and vote in the interest of the farmers. But it is of no use to send a farmer-member to the House if he is to act as the mere follower and adherent of the landed proprietors there. It was thereforth with regret we found that the prospect of returning Mr Robert Leeds for one of the divisions of the county of

Norfolk by the votes and at the cost of the tenant-farmers had been given up. Had a man of high professional repute and of really liberal opinions, such as Mr Leeds, been sent from Norfolk by the votes of the farmers, very much would have been accomplished towards the protection of tenant-farmers' interests. It is true that Mr S. Read sits in the House as a Member for Norfolk, and that he is in a sense a tenant-farmer. At all events he was so hailed on the occasion of his election. But Mr Read has never, we believe, given a vote that might not have been given by an ordinary Tory county Member, and his presence in the House has proved rather a convenient shield to the Squirearchal party than in any sense an uneasiness.

And this seems to be the view taken by the agricultural journals. Thus we find in a recent number of the *Mark Lane Express* an article, which, after referring to Mr Read's complaints against the farmers, that they grumble and do not act, or do not act together, and that "it is just the same in the House of Commons as out of it," adds—"And is the farmer above all others to be blamed for such an anomalous state of things? Clearly. For five-and-twenty years, as Mr Read shows us, "he has been hoping against hope. Not a single promise has been redeemed." On the face of it, he (the farmer) would seem to have been returning the wrong men to represent him.

The ironical editor asks—"Should Mr Seward Read bring in a Bill (say) to amend the law of distress for rent, or to recognise the principle of tenant-right, upon how much numerical support could he reckon?"

Fancy Mr Read jumping up from behind the Tory benches, and proposing to amend the law of distress for rent!!

Then we are told "in plain fact, at this reading and writing, the interests of owners and occupiers are not identical. Their relations are, in many respects, not relatively fair one with the other, and so far the chief business of the most powerful party has been to take care of itself."

The fact is, that until the farmers send to Parliament members who will act with the Liberal representatives of the town, and not as mere catspaws of the landlord interest, they may as well go on grumbling without acting, as otherwise, unless they can act effectively, they may as well bide their time.

Literature.

A Book About Roses: How to Grow and Show Them. By J. Reynolds Hole. William Blackwood and Sons. Edinburgh and London.

This little volume does itself great injustice. It is really one of the most practical and complete manuals on the management of roses, from the hardy sweetbriar to the more delicate fancy varieties, that we have ever met with, yet the first impulse, we fancy, of most of its readers will be to throw it aside, as we did ourselves, at the end of some pages of sentimental trash like this:—"He who would have beautiful roses in his garden must have beautiful roses in his heart."

Mr Hole is scarcely happier in his playful than in his sentimental moods, and the result is a most discouraging one for his readers. If he had been content to give in simple language the really valuable information he has to give, he would have deserved well of all rose lovers; and even as it is, looking to the wonderful ignorance of the means by which the more delicate varieties of this favourite flower may be grown without any great outlay and with very simple appliances, we accept his guidance with thankfulness, tempered by annoyance. If his readers will carefully study his facts, digest his advice, and skip his jests and fancies, they will find themselves possessed of much valuable knowledge. We especially recommend for deep consideration the chapter on manures, and the best methods and seasons for their use. Every true rose grower has his own preferences on this subject, and a wide latitude may be allowed for choice in quality, so that the quantity be enough; but most roses are starved. Economy in supply will always be followed by deficiency in results, and people who never add to their roses in the time of the swelling of the buds, or even dress them with manure in the early spring are sure proof that their ill-nourished trees produce cramped and ill-shaped flowers, and say that their garden is not fitted for growing roses.

We are happy to see that Mr Hole prefers the native briar to all foreign stocks. Others may grow and bloom more freely, but for size and beauty of flower the briar is unmatched. His lists of the numerous varieties of roses, his remarks on their separate peculiarities, on the pruning they need, and the situations most favourable for their growth, will be found extremely valuable by all amateurs.

Foreign Correspondence.

(from our own correspondent.)

Paris, March 23, 6 p.m.

The National Assembly at Versailles did nothing yesterday with respect to the proposition before it for delaying anew the payment of commercial bills. It is expected to pass some measure to-day, but up to this moment we have no intelligence of its having done so.

It is only possible to present a comparison of the Bourse quotations of Wednesday, the 15th, and Tuesday, the 21st. Yesterday business was cut short by a panic, caused by a massacre in the Rue de la Paix; but the Threes were done at 50f 75c, the new loan at 52f 50c, nothing else being quoted. To-day the Bourse has been entirely closed, the National Guards, for the maintenance of order, having had to occupy it and all the adjacent streets.

Paris, March 29.

The new revolution of Paris is not only a *fait accompli*, but has obtained the legal ratification of the people. In this troubled land, legality, all important in our country, is of no account at all when a Government has to be demolished; but it possesses a certain value when, the demolition accomplished, a new Government has to be set up. Accordingly the Reds of the Hotel de Ville, having sent flying M. Thiers, chief of the Executive, and his Ministers, called on the Parisians to vote for a Commune, and the Parisians have voted. And so Paris is now a Commune. It is quite true that more than half of the total number of electors abstained from going to the poll; but there is a law which says that in municipal matters one-eighth of the constituency can make elections, and considerably more than that number voted. In consequence the new Government of Paris is now, as things are accepted here, perfectly legal. Paris has sanctioned it, just as it sanctions all revolutions.

The Commune elected on Sunday was installed yesterday at the Hotel de Ville. I went there expecting it to make a proclamation setting forth its objects, and the means it proposes for obtaining them; but the time passed away in the parading of National Guards, the firing of cannon, the singing of the *Marseillaise*, and shouting for the Republic. I never before saw such a forest of bayonets, and have seldom heard so much noise. It was generally expected that having been silent yesterday the Commune would speak this morning in the *Journal Officiel*, but it says not a word. Nor up to the moment at which I wrote these lines has it stuck up any placards on the walls. But before post hour it will probably deign to make known to "the town and the world," as the Pope does, what it has to say.

En attendant we know of course in a general way that the Commune means Red Republicanism and Socialism; but as there are different degrees of redness in the one, and different schools in the other, the knowledge amounts to little. The majority of the new Government are working men of the International Society, of which the headquarters are at London, and we may assume they will endeavour to carry out its principles. This society has issued a very long proclamation, but it is extremely vague. "What do we demand?" it says. "The organisation of credit, of exchanges, of association, in order to assure to the workman the integral value of his labour; gratuitous instruction, lay and integral (*sic*); the right of meeting and association; absolute liberty of the press and of the citizen; the organisation in a municipal point of view of the police, the armed force, hygiene, statistics, &c." But what the "organisation of credit and of exchanges" is the society does not say. If, however, we assume that it means the adoption of laws which will endeavour to make capital entirely subject to labour, we shall not probably be far wrong. And if we assume also

that acquired fortunes will be attacked by means of taxation, and it may be confiscation, or, to use a word the war has brought into fashion, "requisitions," perhaps we shall not err. From these systems, or from such as these, the working men now in arms, and now masters of Paris, expect that they will live henceforth in a sort of Eldorado. But people who know something of the laws that regulate the creation and distribution of wealth read a very different result—the stopping or slackening of all commercial enterprise, and consequently a fearful perturbation and widespread ruin.

Although not yet officially proclaimed, it is perfectly well understood that the Commune of Paris will consider itself independent of the National Assembly,—in fact, a free State, and will consequently pass such laws as it may please; but on what terms will it separate from the rest of France? Will it, for example, accept the responsibility of part of the National Debt, or will it, as many of its adherents are prepared to recommend, "burn the Great Book?" Will it treat the national palaces and buildings in Paris—the Louvre, the Tuilleries, &c.—as municipal or national property? As it will have no army, will it sell the magnificent barracks constructed by Haussmann? Will it shut up the churches, or let them at a fixed rent to the faithful? What will it do with the Bourse? What with the Bank of France? Will it abolish all octrois, and make Paris a free market? and if so, how will it manage to get the Customs duties on the frontiers repealed? The solution of these questions presents such a host of difficulties, that not a few people are convinced that the Commune will not be able to arrive at one. And this fact, joined to the confusion that the "organisation of credit and exchanges" can hardly fail to create, makes them hope that the career of the new Government will be but brief.

It is calculated that the Red men at the Hotel de Ville obtained in the week their power lasted about 3,000,000f by requisitions in money or kind. This sum includes the 1,000,000f of the Bank of France, and 300,000f from railway and other companies. It is said that in addition to it they got yesterday a further sum of 500,000f from the Bank. The total does not comprise the octroi duties, which they compelled the city officials under pain of "energetic measures"—meaning imprisonment, or perhaps shooting—to pay over to them.

The Assembly at Versailles has decreed that the commercial bills that according to its law of the 10th could have been exacted between 13th March and 12th April, shall not be paid for a month dating from the 24th instant, even though they may have been protested. It is sad to see a Parliament under the necessity of modifying a law on such an important subject within a few days after it was passed: it is sad because the modification produces uncertainty in commerce, and shows that legislation is proceeded to with undue haste. The new delay gives no satisfaction to the commercial public. "In a month's time," they say, "we shall no more be able to pay our bills than we are now, and a further postponement must be granted." The Government has presented a measure on the subject of rent. It authorises the Justice of Peace of each of the districts of Paris to form, under his presidency, a court of two landlords and two tenants, to settle all disputes about rent, by according to tenants delay for payment in instalments, not, however, exceeding two years, and even for making for purely commercial lettings a reduction not exceeding one-fourth of the total due. This bill has been received with great disfavour. Shopkeepers say that they cannot pay the three-quarters' rent now owing from the the same reason they cannot honour their bills—they have been making no money for six months; and non-commercial people say that they cannot pay either, because they have wholly or entirely been deprived of employment, or have had their incomes from investments reduced. As to the working men, they hold that the military services they rendered during the siege entitles them to relief from payment; and they denounce landlords—an unpopular class—for having the presumption to suppose that they will get their money as if nothing had happened, when everybody else has had to sustain loss. As in the matter of bills, the Government would have done better to abstain from legislation altogether than to propose a measure which satisfies no one. But after all, its action on both subjects will probably be overruled by the Commune. It will be curious to see how that body will treat them.

No official announcement has yet been made of the payment of the coupon of the Three per Cents. falling due on 1st April. Nor has the payment been commenced of the dividends of the Four-and-Half due 22nd March.

A report was recently spread that forged Bank of France notes of 25f were in circulation, and in consequence many persons have found inconvenience in getting small notes accepted. From Paris this report reached the country, and produced disquietude there. The director of the Bordeaux branch has, however, written to newspapers to say that neither the central administration nor any of the branches has seen any forged notes, and that the notes supposed to be forged were those issued in the provinces, which differ in some respects from those of Paris. It is strange that the Paris bank should not have made an announcement to this effect instead of leaving it to come from a branch.

The annual meeting of the Northern Railway is called for 28th April. That of the Western for the 29th, of the Southern for the 29th, of the Orleans for the 21st.

The Comptoir d'Escompte announces the payment from 1st April of 15f, as half-a-year's interest on the Ottoman loan of 1869.

On account of the investment of Paris, the Company of the Orleans to Rouen Railway paid at Brussels the interest on obligations due 1st January last. The company now announces that the payment will be continued to be made at Brussels to 31st March, and after that date at Paris.

The Company of the Mines de la Loire (Coal-pits) announces that circumstances have prevented the making up of the accounts of 1870, and the calling of a general meeting, but that 4f on account of dividend of that year will be distributed.

The Company of the Coal-pits of Rive de Yier on 15th October resolved to distribute 2f per share as dividend of the first half of 1870. This sum is now being paid at Paris.

The shareholders of the Parisian Gas Company (that which has the monopoly of lighting in Paris) have held their annual meeting. The receipts of 1870 were stated to be 38,531,003f, and the expenses 23,364,679f, so that there remains a balance of profit of 15,166,324f. The sum was 7,547,569f less than in 1869. After adding balances brought forward from 1868 and 1869, and deducting, according to agreement, 1,350,000f for the municipality, there remained for the shareholders 14,096,459f. Of this sum they received in October 4,200,000f, at the rate of 12f 50c per share, and it was resolved to distribute 9,408,000f, making 28f a share, the balance to be carried forward. The directors, however, notified that the payment of the 28f could not be made at the same date as in preceding years, the 6th April, and that there would be "some little delay." Since 1869 this company has doubled the number of its shares by dividing the old ones into two, so that the dividend declared is equal to one of 80f on an old share.

At this moment the return of the Savings' Bank of Paris presents interest. From the 21st to the 27th the deposits were 27,765f, the withdrawals 79,870f.

The cotton merchants at Havre, after long deliberation, have resolved on adopting in the classification of cotton the designations employed in America and Liverpool, instead of the French ones heretofore employed. The propriety of modifying time bargains in such a way as to confine the quantity delivered within certain specified qualities, instead of, as at present, permitting a portion of superior to compensate for a large quantity of bad, was recommended, but the matter was reserved for further consideration. The propriety of modifying tares and discounts was also discussed, but was likewise reserved.

It will be remembered that Havre was one of the first towns to issue small notes (5f and 10f) in exchange for a deposit of Bank of France notes. The machinery it employed was a bank, of which the directors were members of the Chamber of Commerce. The necessity of small paper having ceased to exist, the bank is calling in the small notes, and is to dissolve itself.

A letter from Tunis states that in virtue of the arrangement made between the Bey and the European creditors, the payment of the 15th coupon of the 1863 loan, and the 12th of that of 1865, has commenced; that the exchange of new titles for the old ones has been delayed by the war, but will be proceeded to shortly both at Tunis and at Paris; and that in case the revenues of the State, of which the administration has been confided to a European commission, shall exceed what is required for the payment of interest on the amalgamated debt, the surplus shall be employed in redeeming the debt; if, on the contrary, they are insufficient, the Government shall make up the deficit out of the revenues it has reserved to itself.

Owing to postal communications being still dilatory and irregular, a complete report of the markets cannot be given; but the following has been received from Havre —

COTTON.—Notwithstanding the distrust caused by the events of Paris, the sales in the week ending Friday were 5,127 bales. The quotations fixed by the brokers were—New Orleans very ordinary, 98f the 50 kilogs; Oomrawuttee good ordinary, 83f; Tinnevelly ditto, 78f; Bengal ditto, 70f. This week about 1,500 bales have been sold.

COFFEE.—The demand last week was calm, with prices not firm. The sales were 100 sacks La Guayra, 116f the 50 kilogs, duty paid; 1,012 Haiti, 107f 50c to 109f; 662 Rio, 99f to 102f; 400 Santos, 110f; 753 Winard, 117f 50c to 110f; 300 Malabar, 117f 50c to 118f; 646 Ceylon, prices not stated. This week Haiti, 108f and 110f; Porto Cabello, 115f.

SUGAR.—No sales.

INDIGO.—24 chests Bengal, 1 Kurpah, at established prices. This week Bengal and Guatemala.

HIDES.—950 Monte V deo dry ox and cow, 118f the 50 kilogs; ditto salted, 58f; 300 ditto horse, salted, 51f 50c. Also different sorts by auction.

WOOL.—45 bales Monte Video unwashed, 1f 65c the kilog; 20 ditto, 1f 60c to 1f 85c.

TALLOW.—Sales limited. Monte Video saladeros ox, about 55f the 50 kilogs; La Plata sheep, 53f.

PARIS, March 30.

The Commune has only been in possession of power for a few hours, and it has already issued a decree on the subject of rent. Here it is:—

"THE COMMUNE OF PARIS.

"Considering that labour, industry, and commerce have supported all the charges of the war, and that it is just that property shall make to the country its part of sacrifices,—Decrees: **Art. 1.—A general discharge (*remise generale*) is** granted to tenants for the quarters of October, 1870, January **and April, 1871 [that is, Sept. 30, Dec. 31, and March 31,—** the custom in Paris being to pay rents of small amount a week, and of high amount a fortnight, after they fall due]. **Art. 2.—All sums paid by tenants during the nine months shall be deducted from that of the quarters to follow. Art. 3.—A discharge is also granted for the sums due for** furnished lodgings. Art. 4.—All leases may be terminated at the will of the tenants, within six months from the date of the **present decree. Art. 5.—All notices to quit shall, on the de**mand of the tenants, be prolonged for three months.

"[Signed] THE COMMUNE OF PARIS.

"Hotel de Ville, March 29, 1871."

This decree has created stupor among landlords, and goes **beyond what most tenants, except the working-men, thought reasonable. It will enable an idea to be formed abroad of the manner in which the Capital is destined to be treated by the new government. The Red rulers already notify that they are on the point of issuing decrees relative to bills and to mortgages. Few of the latter can be paid without rent.**

By order of the Commune, bands of National Guards in arms have visited the offices of several Insurance Companies, **among them the France, the Nationale, and the Urbaine. It** is supposed that they wanted to requisition money; but they found none, and they put seals on the *caisses*. They said that they had expected to seize large sums belonging to the ex-Empress.

The annual meeting of the Eastern Railway is fixed for the 27th April.

The Demanial Company of Italy announces that it suspends for a time in France the payments due on its securities. It says that it does so "on account of events," but the reason does not appear satisfactory.

The Bourse was closed on Wednesday, the 22nd, at two o'clock instead of three, in consequence of a panic created by a massacre in the Rue de la Paix, and it was kept shut up on Thursday, Friday, and Saturday, because the National Guards of the Order party surrounding it in arms, to prevent it from falling into the hands of the Red men. It re-opened on Monday, and has been opened daily since; but the business done has been extremely limited—in fact, little more than nominal. People who are anxious to sell are not wanting, but there are few buyers. The Transfer Office has been shut up, and that has caused great inconvenience. The following is a detail of the quotations of Monday and of to-day; that of the Threes is for time, but most of the others are for cash:—

COMMERCIAL AND MISCELLANEOUS NEWS.

The following Imperial measures of capacity, which have been constructed and duly verified and authenticated in the Standards Department of the Board of Trade, and their capacity accurately determined in relation to the Imperial standard measures of capacity established under the provisions of section 6 of the Act 5 George IV., cap. 74, have been declared to be legal secondary standards of capacity, in pursuance of sections 6 and 8 of the Standards of Weights, Measures, and Coinage Act, 1866, viz.:—

IMPERIAL STANDARD MEASURES OF CAPACITY.

Liquid Measure.—The quarter-gill, equal to 1-128th gallon.

Bottle Measures.—The bottle, equal to 1-6th gallon; the half-bottle, equal to 1-12th gallon.

Fluid Ounce Measures.—Measures containing respectively the following weight of distilled water, at the temperature of 62 deg. Fahrenheit's thermometer, weighed in air at the temperature of 62 deg. of Fahrenheit's thermometer, the barometer being at 30 inches—viz.:—Four avoirdupois ounces, two avoirdupois ounces, one avoirdupois ounce, half an avoirdupois ounce. Note.—The following ounce measures are already legalised as Imperial standard measures of capacity—viz.:—Quart, equal to 40 fluid ounces; pint, equal to 20 fluid ounces; half-pint, equal to 10 fluid ounces; gill, equal to 5 fluid ounces; half-gill, equal to 2½ fluid ounces; quarter gill, equal to 1¼ fluid ounces.

Liquid Measures of Grain Weights of Distilled Water.—Measures containing respectively the following weight in grains of distilled water, at the temperature of 62 deg. of Fahrenheit's thermometer, weighed in air at the temperature of 62 deg. of Fahrenheit's thermometer, the barometer being at 30 inches, viz.:—7,000, 4,000, 2,000, 1,000 grains; 500, 300, 200, 100 grains; 50, 30, 20, 10 grains; 5, 3, 2, 1 grain.

Cubic Inch Measures.—Measures containing respectively the following number of cubic inches of distilled water, at the temperature of 62 deg. of Fahrenheit's thermometer, weighed in air by brass weights, as provided by section 5 of the Act 5, George IV., cap. 74, viz.:—10 cubic inches, weighing 2,524.58 grains; 5 cubic inches, weighing 1,262.29 grains; 2 cubic inches, weighing 504.916 grains; 1 cubic inch, weighing 252.458 grains; 0.5 cubic inch, weighing 126.229 grains; 0.2 cubic inch, weighing 50.492 grains; 0.1 cubic inch, weighing 25.246 grains.

Gas Measures.—Measures, duly constructed, and verified and authenticated in the Standards Department of the Board of Trade, and their measuring capacity accurately determined in relation to the cubic foot, the unit of measure fixed by section 2 of the Act 22 and 23 Victoria, cap. 66, for regulating measures used in sales of gas, viz.;—A test wet gas-meter, known as a 20-light meter, to pass one cubic foot of gas or air at one revolution or complete action of the meter; a test wet gas-meter, known as a 100-light meter, to pass five cubic feet of gas or air at one revolution or complete action of the meter. A test dry gas-meter, known as a 20-light meter, to pass half a cubic foot of gas or air at one revolution or complete action of the meter; a test dry gas-meter, known as a 100-light meter, to pass 2½ cubic feet of gas or air at one revolution or complete action of the meter.

Together with the following Imperial measures of length, which have been constructed and duly verified and authenticated in the Standards Department of the Board of Trade, and their length accurately determined in relation to the Imperial standard yard legalised by an Act passed in the 28th and 29th year of Her Majesty's reign, cap. 83, viz.:—

Measures of Length.—Ten feet, divided into feet; 6 feet, divided into feet; 3 feet, or yard, divided into feet, and nails or sixteenths; 2 feet, divided into feet and inches; 1 foot, divided into inches, and further into duodenary, decimal, and binary parts of an inch.

The tables showing the estimated average produce of the crops in Ireland state that the acreage under crops in 1870, as compared with 1869, shows that barley increased by 19,574 acres, bere and rye by 614 acres, potatoes by 1,681, turnips by 16,987, mangel-wurzel by 4,270, cabbage by 2,714, and hay by 102,135 acres. Wheat decreased by 20,613 acres, oats by 35,201, and flax by 34,342 acres. The crops which give an increased estimated average produce per acre in 1870 compared with 1869 are—Wheat, 0·3 cwt; oats, 1·2 cwt; rye, 0·7 cwt; potatoes, 0·8 ton; mangel-wurzel, 0·2 ton; cabbage, 0·2 ton; flax, 4·7 stone; and hay, 0·1 ton. The crops which show a decrease in the estimated average acreable yield are—Bere, 0·7 cwt; and turnips, 0·7 ton. In the estimated total produce of the principal cereal crops there is an increase of 628,456 quarters. In oats the increase is 586,130 quarters. Barley has increased by 81,377, and rye by 3,096 quarters. Wheat has decreased by 41,961, and bere by 186 quarters. In potatoes there is an increase of 846,012 tons; in mangel-wurzel the increase amounts to 58,368. Cabbage has increased by 32,688 tons, flax by 1,202, and hay has increased by 345,757 tons, owing chiefly to a large average. In turnips there is a decrease of 23,270 tons.

In the year ending with September, 1870, 29,017,271 lb of sugar were consumed in breweries: 26,152,084 lb in England—viz., 11,693,382 lb in London, and 14,458,702 lb in the provinces; 510,385 lb in Scotland; 2,354,802 lb in Ireland. In the preceding year the quantity so used was 41,980,949 lb. The decrease in 1870 was almost entirely in England; Ireland shows an increase of above 100,000 lb, and Scotland a decrease of above 100,000 lb.

The use of sugar in this country is constantly increasing, and its consumption is greater than that of any other country. It had risen from 44 lbs per head of the population in 1869 to 47 lbs in 1870. The imports of last year exceeded 700,000 tons, and the consumption 642,000. A few years ago Cuba furnished nearly one half of all the sugar produced, but as slave labour may cease in that island at any moment, and in that case for a time there would be a serious diminution in the crop, and as in most tropical countries the cane crop is dependent on hired Coolie labour, the supply of which is becoming both more costly and more uncertain, the growing increase of beet sugar is a matter not only of great interest, but of great moment. The countries in which it has made most progress are France, Germany, Austria, Russia, Belgium, and Holland. It is in those parts of those countries which most resemble our south eastern counties in climate that it has best succeeded. The middle and south of France are too hot for it. In the last four years the progress in these countries has been as follows, in tons:—

	1867.		1868.		1869.		1870.
France	254,757	.....	213,504	.....	254,146	.....	[illegible]
Germany	165,714	.....	208,140	.....	216,407	.....	250,000
Austria	141,000	.....	161,000	.....	142,856	.....	170,000
Russia and Poland	113,000	.....	87,000	.....	136,000	.....	140,000
Belgium	43,000	.....	45,778	.....	48,352	.....	50,000
Holland, Sweden and Italy	7,000	.....	11,000	.....	12,000	.....	15,000
Totals	654,000	.....	658,223	.....	841,310	.....	925,000

The first three columns give the ascertained produce: the fourth that of last year, is the estimated produce, the actual produce not yet having been ascertained. Of the total produce of 1870 nearly one-twelfth was imported into the United Kingdom.

Mr Frederick Purdy read a paper at the last meeting of the Statistical Society (W. Newmarch, Esq., F.R.S., President, in the chair), "On the preparation of Statistical Returns for Parliament." The object of the paper was to point out the very imperfect manner in which many returns now published by order of Parliament are made out. Columns of statistical data are printed without totals, and consequently sheets of totalless columns are printed without any summary whatever. But the aggregate issue of a body of statistics, whether the collection be a large or a small one, is the first thing people want to know. Then the matter is often given in so senseless a manner that it would seem the department responsible for the document was ignorant of the nature of the facts it was manipulating. Many instances were laid before the meeting of returns thus vitiated, and of others utterly worthless lacking the totals. Several instances were taken to show how, with a little care, they could be rendered serviceable in the discussion of public business. Instances of the neglect or of the absolute refusal of the local authorities to supply information were brought under the notice of the meeting. In a recent railway return no less than 90 companies, though repeatedly appealed to, had failed to comply with the order of the House. It was pointed out that, bulk for bulk, a bad return was as expensive to print as a good one, and that, seeing how numerous bad ones were, the waste of public money was considerable. It was shown that for lack of a good current index to Parliamentary papers no one could with certainty tell what information existed in those documents. Specimens of existing and of proposed titles to papers were produced. Mr Purdy concluded with some suggestions, which, if they were followed out, would probably bring the present chaotic mass of Parliamentary statistics into more serviceable order for the future.

The Registrar-General for Ireland has issued his report for 1868, in which are the following interesting statistics:—The estimated population of Ireland in the middle of 1868 was 5,543,285; the persons whose marriages were registered amounted to 55,398, the number of marriages being 27,699; children born alive whose births were registered amounted to 146,051; and the number of deaths registered was 86,185. The emigrants from Ireland during the year 1868 amounted to 61,018. In the previous year (1867) there were registered 29,742 marriages, 144,388 births, and 93,503 deaths; the number of emigrants was 80,624. As to emigration the number of emigrants who left the ports of Ireland in 1868 amounted to 61,018, of these, 35,412 were males, and 25,606 females. Of the whole number 10,154 were from Leinster, 16,857 from Munster, 14,763 from Ulster, and 9,692 from Connaught. 9,552 persons did not state the county or province to which they belonged; 11·7 per cent. were under 15 years of age, 77·5 per cent. were 15 to 35 years old, 9·8 per cent. were 35 and upwards, and the ages of 1·0 per cent. were not specified in the returns. It is noticeable that this report has only just been published, and bears the date 1871, although it refers exclusively to 1868.

The following is a return of the number of paupers (exclusive of lunatics in asylums and vagrants) on the last day of the third week of March, 1871, and of the corresponding week in 1870:—

	Paupers.				
	Indoor.	Outdoor.		Total.	Corresp'nding Total in 1870.
	Adults and Children	Adults.	Children under 16	3rd week March, 1871.	
West district	5,802	8,917	6,386	21,105*	24,604
North district	7,033	12,850	9,933	29,816	32,457
Central district	6,783	8,071	6,535	21,389	24,081
East district	7,355	11,418	10,257	29,030	36,102
South district	8,939	18,788	16,952	44,679	49,342
Total of the Metropolis	35,912	60,044†	50,063	146,019	166,586

* No returns have been received this week from Kensington (West District.)
† Of these out-door paupers, 16,035 are men and 44,009 are women.

TOTAL PAUPERISM OF METROPOLIS.—Population in 1861, 2,802,000.

	Number of Paupers.		
	Indoor.	Outdoor.	Total.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 29th day of March, 1871.

ISSUE DEPARTMENT.

	£		£
Notes issued	36,533,555	Government Debt	11,015,100
		Other Securities	3,984,900
		Gold Coin and Bullion	21,533,555
		Silver Bullion	...
	36,533,555		36,533,555

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities	12,939,100
Rest	3,736,081	Other Securities	22,954,785
Public Deposits, including Exchequer, Savings' Banks, Commissioners of National Debt, and Dividend Accounts	11,863,980	Notes	13,160,440
Other Deposits	19,164,165	Gold and Silver Coin	824,509
Seven-day and other Bills	561,608		
	49,878,834		49,878,834

Dated the 30th March, 1871.

G. FORBES, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	23,934,723	Securities	36,340,885
Public Deposits	11,863,980	Coin and Bullion	22,358,064
Private Deposits	19,164,165		
	54,962,868		58,693,949

The balance of Assets above Liabilities being 3,736,081*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

	Increase.	Decrease.
	£	£
Circulation	474,834	...
Public Deposits	1,106,743	...
Other Deposits	...	716,865
Government Securities	703,902	...
Other Securities	...	241,427
Bullion	406,117	...
Rest	3,780	...
Reserve	...	123,233

The following is the official return of the cheques and bills cleared at the Bankers' Clearing-house:—

	Week ending March 29, 1871.	Week ending March 22, 1871.	Week ending March 30, 1870.
	£	£	£
Thursday	11,327,000	12,685,000	9,652,000
Friday	11,727,000	12,155,000	10,828,000
Saturday	12,201,000	15,476,000	10,404,000
Monday	11,619,000	11,451,000	10,864,000
Tuesday	11,398,000	13,033,000	9,369 000
Wednesday	11,171,000	11,960,000	28,484,000
Total	69,443,000	76,760,000	79,601,000

GEORGE DERBYSHIRE, Chief Inspector.

Bankers' Clearing-house, March 30, 1871.

The total since the 4th of January, 1871, is 976,017,000*l*, compared with 941,398,000*l* for the corresponding period last year, showing an increase of 34,619,000*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz.:—

At corresponding dates with the present week.	April 3, 1861.	April 1, 1868.	March 31, 1869.	March 30, 1870.	March 29, 1871
Circulation, including bank post bills	£ 20,430,285	£ 24,691,555	£ 24,090,016	£ 23,115,841	£ 23,934,723
Public deposits	7,823,689	6,910,477	7,891,042	11,293,341	11,863,980

Clearing-house return	...	72,662,000	69,164,000	79,601,000	69,443,000

In 1861, the Bank reduced its rate from 7 to 6 per cent., having reduced it from 8 a week or two previous. The first advance of the rate above 6 per cent., consequent on the American troubles and the harvest demands, had taken place on the 6th of January previous; so that there had been nearly three months of a "panic rate" for money. No failures of importance had, however, taken place. Attention was being given to a great strike in the building trade.

In 1868, money continued in little demand, at 2 per cent. The debates on the disestablishment of the Irish Church were in progress. The return of revenue for the year showed a small deficiency upon the estimate, but the details of the receipts showed some favourable signs.

In 1869, the Bank rate was raised from 3 to 4 per cent., the demand for money on account of foreign loans and revived trade having recently improved, and the Bank having been somewhat neglectful in not raising its rate a week or two previously. The returns of the revenue were half-a-million above the estimate, and were considered to promise much.

In 1870, money was easy, at 3 per cent. The revenue promised a large surplus for the coming Budget.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 8,582,583*l*; in 1868, a deficiency of 406,738*l*; in 1869, a deficiency of 2,651,517*l*; and in 1870, a deficiency of 3,942,015*l*. In 1871, there is a deficiency of 3,790,620*l*.

DISCOUNT AND MONEY MARKET.—The fall in the value of money has continued this week, and the rate for the best short paper is fully ¼ under last Friday's quotation—the quotations for long bills showing a still more marked decline. As we have noticed also during the last week or two, the market is in an unsettled state, with a constantly drooping tendency. To-day there is a temporarily improved demand,

caused by the usual payments at the end of the quarter and by the fortnightly Stock Exchange settlement which occurred to-day, and for which a good deal of money has been in request. There has been no advance, however, in the quotations, in which there has been the fall for the week we have described.

Money continued to be abundant, and during the week a large quantity of gold has been sent into the Bank, at which there has been only a moderate demand for accommodation. The receipts of bullion into the Bank shown by the account amount to 406,000*l*. The principal other changes in the account are an increase of 474,000*l* in the circulation (due to the usual demand at the end of the quarter); a decrease of 716,000*l* in the private deposits; and an increase of 703,000*l* in the Government deposits, accompanied by an increase of 1,107,000*l* in Government securities.

We subjoin our usual quotations for mercantile paper having various periods to run :—

Bank bills—2 to 3 months	2½		per cent.
Do 4 —	2¾		per cent.
Do 6 —	3¼	3½	per cent.
Trade bills—3 months	2¾	3	per cent.
Do 4 —	3¼		per cent.
Do 6 —	3½	3¾	per cent.

The allowance for deposits at the joint stock banks and discount houses is as follows :—

Joint Stock Banks at call	2	per cent.
Discount houses at call	2	per cent.
Do with seven days' notice	2¼	per cent.
Do fourteen days	2¼	per cent.

During the week notice was given by the discount houses of a reduction of the allowance for money at 14 days' notice from 2½ to 2¼ per cent., which we quote above.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent.		Open Market, per Cent.	
	1870.	1871.	1870.	1871.
Paris	2½	6	2	...
Vienna	5	5	5	5
Berlin	4	4	3½	3½
Frankfort	4	3½	2½	3¼
Amsterdam	4	3½	3¾	3
Turin	5	6	5	5
Brussels	2½	4	2¼	3½
Madrid	5	5	5	5
Hamburg	...	...	2½	3¼ ½
St Petersburg	5	8	4½	7

THE STOCK MARKETS.—The influences affecting the market this week—with the exception of to-day, when there was a general reaction caused largely by realisations—have been the same as we had to notice last week—a decline in French securities, caused by the state of affairs in France, and a general tendency to weakness in foreign stocks; a rise in English Government securities, due to the great abundance of money and check to business which is produced by the French disturbances; and a further rise in English home railways, also stimulated by the abundance of money, but still mainly caused by the striking increase of traffic. In other markets, particularly American and Canadian stocks, the tendency has been mainly upward, though in telegraph shares there has been great fluctuation. There appears to be no prospect of an early termination of the present difficulties in France, and great confidence appears to be felt in the continuance of the present aspect of the markets for some time longer. The Paris insurrection, and its success so far, are quite as effective as the war itself in keeping French money in this country; while any demands on the money market which a settled Government, whether in peace or war, would have been likely to make are effectually stopped. The foreign market again is depressed by the knowledge of the necessities of many States. Apart from the discredit into which they have fallen, the mere fact that new loans are impending tends to keep the whole market weak; and there is no prospect of a change, as the postponement of the impending loans only adds to the necessities of the Governments. In these circumstances, and as there is a great accumulation of money, owing to the caution of investors two or three months ago, we may expect that attention will continue to be given to the principal home securities, which are daily growing in real value, and are not subject to foreign dangers. The better class of American securities will also command favour. The present state of the markets will doubtless cause a great many new schemes to be brought forward, but it will be some time before these are of sufficient magnitude to affect the demand for money, and weaken speculation for a rise. The likelihood of these demands becoming important, and then of a return to a more stable order in France, which will revive the great demands now in suspense, is a contingency which should not be overlooked. Later in the year there may be a good deal of pressure, consequent on the undertaking of new engagements, in forgetfulness of the possibility of France again receiving some sort of established Government.

ENGLISH GOVERNMENT STOCKS.—The rise in Consols until to-day has been most steady, caused to some extent, as we pointed out last week, by the closing of a large bear account, but principally by the suspense and abundance of money. But the reaction to-day still leaves an improvement on the week. Prices are now indeed rather better than towards the end of January, while the termination of the siege of Paris was yet doubtful, when the Conference was sitting, and every kind of operation was in suspense. The rise for the week is from 92⅛ ¼ to 92¾ ⅞ for the April account, or a rise of ⅝, and the quotation for the May account is ⅛ higher.

Subjoined is a list of the highest and lowest prices of Consols every day :—

CONSOLS.

	Money.		Account.		Exchequer Bills.
	Lowest.	Highest.	Lowest.	Highest.	March and June.
Saturday	92	92¼	92¼	92⅝	par to 5s pm
Monday	92⅛	92¼	92¼	92⅝	par to 5s pm
Tuesday	92⅛	92⅜	92¼	92⅝	par to 5s pm
Wednesday	92⅜	93	92⅝	93	par to 5s pm
Thursday	92⅞	93⅛	92⅞	93⅜	par to 5s pm
Friday	92¾	93⅛	93	93⅜	par to 5s pm

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Consols for money	92 ¼	92⅜	+ ⅛
Ditto account	92⅜ ¼	92⅝	+ ⅛
Reduced 3 %	90⅞ ⅛	91⅛	+ ⅛
New 3 %	90⅞ ⅛	91⅛	+ ⅛
Bank Stock, last dividend 4½ %	239 41	239 41	... ...
India Stock, 10½ %, red. at 200 Apl. 30, 1874	205 7	205 7	... ...
Ditto 5 %, red. at par, July 5, 1880	109½ 10	111 ½	+ 1½

EXCHEQUER BILLS.—Par to 5s prem.

COLONIAL GOVERNMENT SECURITIES.—The following are the changes for the week in this department :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Canada 6 %	105 6	105 6	... ...
Ditto 5 %	98 9	98½ 9½	+ ¼
New Zealand 5 % Consolidated Bonds	99 ½	99 ½	... ...
New South Wales 5 % Bonds, 1888 to 1890	99 100	99 100	... ...
Nova Scotia 6 % Bonds, 1875	103 4	103 4	... ...
Queensland Government 6 % Bond, 1884-5	108 9	108 9	... ...
Victoria 6 %	112 13	112 13	... ...
Ditto New 5 %	102 3	102 3	... ...

The Government of New Zealand, through the Crown agents for the Colonies, have invited tenders on Thursday next for 1,200,000*l*, under Loan Acts of the Colony authorising a loan for immigration and public works, and one for defence and other purposes. The amount, it is stated, is mainly to be devoted to assist immigration and to the construction of public works, and the loan will be identical with the 5 per Cents., known in the market as New Zealand Consols.

FOREIGN GOVERNMENT STOCKS.—There is hardly anything to notice in this department, except the fluctuations in the French 6 per Cent. loan, and the 3 per Cent. Rentes. The former closed last Friday at 94½ ⅜, a fall of between 3 and 4 per cent. from the previous week, and the depression has gone still farther. There was a fall of 1½ on Monday, and after fluctuations in the middle of the week, there was again a heavy fall on Thursday, when 91½ for money was touched. On the same day the 3 per Cent. Rentes were at 49½ ½, the closing quotation last Friday having been 50⅜ ⅝. To-day the depression continued, aggravated by the pressure for loans at the settlement, money being raised with some difficulty on French securities. The settlement also showed the full extent of the account which had been open for the rise prior to the French disturbances.

The principal other changes, it will be noticed, are a fall in Honduras bonds, and a relapse in Russian and Turkish securities, the result of the dealings in other foreign stocks having been nearly even, with a tendency downwards. The rates for loans in this department have been exceptionally high in some instances, but the rates have usually been from 4 to 5 per cent. To-day this department shared in the general reaction which occurred, and altogether there is generally a falling off for the week.

The particulars of the new Argentine loan, which has been for some time talked of, are now announced. The prospectus, it is stated, will be issued on Monday by Messrs C. de Murrieta and Co., "under arrangements with the firms by whom the negotiations have been carried on." The amount is said to be 6,000,000*l*, in 6 per cent. stock, with 2½ per cent. sink-

ing fund, and the price 89, which, by the terms of issue, will be equivalent to 87½.

Tuesday next, the 4th of April, has been appointed a special settling day in the scrip of the new Russian loan, but the question of an official quotation has been postponed. The price to-day is ⅞ to 1 pm. The same day is appointed for the Dutch-Indian 5 per cent. bonds, which are to be marked in the official list.

The following are the changes for the week, taking the latest unofficial prices for quotation :—

English Railways.—As we have already noticed, there has been a marked rise in almost all the principal home railways, principally in Great Eastern, Brighton, Metropolitan, and Great Northern, The latter rise, as in the case of the northern railways generally, is accompanied by a report of some arrangement having been come to in regard to the competitive coal traffic. The rise in the Metropolitan appears to be in anticipation of the Easter Monday traffic; but the traffic generally is beginning to be good, and we may assume that the effect of the opening of the International Exhibition of 1871 is beginning to be anticipated. In Brighton stock the rise is only a continuation of the movement of the last two or three weeks. In present circumstances it may be expected that, as in the case of the Great Eastern this week, one stock after another which has been neglected will be taken up. The increase of the business of the country cannot but improve the railway monopolies to a greater or less extent according to their special circumstances, and the traffics are perhaps more favourable than they have been, as the increase is now more in passengers, and therefore more profitable in its return to the ordinary shareholders than an increase in goods traffic, which is earned at proportionate expense. To-day there has been rather a sharp reaction from the higher prices of the week, mainly caused we believe by the magnitude of the settlement in the railway department. With the present abundance of money however the large demand was met, and the reaction is much less than would have occurred in a different state of the money market. On the week there is a considerable advance in the principal stocks.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Caledonian	87½ ½	89 ½	+ 2
Great Eastern	40½ 1	43⅛ ⅜	+ 2⅝
Great Northern	121 2	122 3	+ 1
Ditto A	131½ ¾	134½ 5	+ 3½
Great Western	86½ 7	89½ ½	+ 2⅞
Lancashire and Yorkshire	134⅜ 5½	138 9	+ 3¾

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending March 25, to 717,111*l*, being an increase of 54,499*l* on the corresponding week of the previous year. The aggregate receipts for the current half-year are now 7,464,424*l*, being an increase of 416,461*l* on the corresponding period of last year. The principal increases for the week are—London and North-Western, 9,672*l*; North-Eastern, 8,600*l*; Great Western, 6,704*l*; Lancashire and Yorkshire, 6,743*l*; and Midland, 5,263*l*. The following shows the details of the increase in each case for the week and for the whole period :—

American Securities.—Five-Twenty bonds have been in demand throughout the week, and the market closed with renewed firmness to-day. There have, however, been no important dealings in the scrip of the new loan, which has attracted less attention than the least hopeful operators anticipated. Quotations are quite nominal. In Messrs Jay Cooke and Co.'s (New York) circular, dated March 14, we find the following :—

"The United States' loan, the most prominent financial event of the season, has not thus far attracted the attention anticipated. As subscriptions in the European and home markets respectively are mutually dependent on each other, there is a certain degree of waiting on each side of the Atlantic to see what course may be taken on the other, which is an unavoidable cause of delay. It was somewhat generally expected, though apparently on no adequate ground, that, at the opening of the loan, the Treasury would call in a large amount of Sixty-Two bonds, and that, concurrently, prestige would be given to the movement in Europe by the conversion of large amounts of Five-Twenties purchased below par in anticipation of the new loan. The disappointment of these

expectations has naturally had some influence with those who regarded the success of the operation as dependent upon this sort of inauguration. These disappointments of more or less unreasonable expectations, however, are now followed by symptoms which augur favourably for the success of the negotiation. The National Banks are now taking the new bonds quite freely, the conversions made through our own agency to date being 3,500,000 dols., while the amount thus taken reaches 10,000,000 dols. Although, as yet, the Government has not called in for redemption any part of the Five-Twenty loans, yet as the gold balance in the Treasury is unprecedentedly large, and there now appears to be good reason for expecting that such an operation would be followed by corresponding subscriptions for the new bonds, it may be deemed quite within the range of probability that the Secretary will see fit to employ a liberal portion of his gold resources in this way."

Telegraphic advices from New York state that the subscriptions in the United States have amounted to 40,000,000 dols.

A heavy rise has taken place in Atlantic and Great Western Consolidated Mortgage bonds, while Virginia State bonds have also risen considerably. The following shows the fluctuations on the week :—

	Closing Prices last Friday.		Closing Prices this day.		Inc. or Dec.
United States 6 % 5-20 Bonds, exchng. 4/6	91¼ ⅜	.....	92⅜ ½	+	⅛

JOINT STOCK BANKS.—The transactions in bank shares have not been numerous, and the movements in the quotations have been comparatively unimportant. The leading feature is the tendency to recovery in the quotations for Eastern banks—Oriental and Chartered of India, &c., being each 1½ higher. Agra, Anglo-Austrian, and English of Rio de Janeiro shares have advanced ½, but City and Imperial Ottoman have given way ¼; London and Westminster, and Union of London, ½.

[illegible] Canada, 1; [illegible] Waterworks, and Ebbw Vale [illegible]; Madras Irrigation shares have given way 1; and London Financial, ½.

Mr Hope has issued another address to the shareholders of the International Financial Society, replying to the statements of the directors, and communicating to the shareholder further information respecting their affairs. The meeting which has been called in consequence of the requisition will be held next Wednesday, when the disputes, it is to be hoped, will be fully gone into.

EXCHANGES.—There is no particular change to note this week.

BULLION.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week :—

Gold.—The demand for export has for the moment ceased, and 695,000*l* has been sent into the Bank since our circular of the 23rd inst., to be followed by further amounts during the next day or two. The Nyanza has brought 391,910*l* from Australia, the Westphalia has brought 10,000*l* from New York, the China has brought 160,000*l* from New York, the Hansa has brought 20,000*l* from New York, the City of Brussels has brought 12,000*l* from New York—total, 593,010*l*. The Overland Mail has arrived at Galle with 401,500*l*, gold, from Australia, of which 357,000*l* is on English account.

Silver remains very quiet, and we quote the price 60¼d per oz standard as the nearest. We continue to receive amounts from New York and India; the total to hand during the past week is about 180,000*l*.

Mexican dollars have been in request for China, and the total received during the past few days, amounting to about 30,000*l*, has been purchased for the East at 58⅜d per oz for new, and 58¾d per oz for old coinage.

Exchange on India for Banks' drafts at sixty days' sight is 1s 10⅜d to 1s 10½d per rupee.

India Government loan notes are as last quoted by us, viz.:—The 4 per Cents., 92¼; the 5 per Cents., 100; and the 5½ per Cents., 107½.

Quotations for bullion.—Gold—Bar gold, 77s 8¾d to 77s 9d per oz std; ditto refinable, 77s 11d per oz std; South American doubloons, 73s 8d to 74s per oz; United States gold coin, 76s 3d per oz. Silver—Bar silver, 5s 0½d per oz std, nearest and last price; ditto containing 5 grains gold, 5s 0⅝d to 5s 0¾d per oz std; Mexican dollars, 4s 10⅝d to 4s 10¾d per oz, last price.

The sum of 297,000*l* in gold was sent into the Bank to-day.

According to to-night's *Gazette* the imports of the precious metals into the United Kingdom during the week ended March 29 were—gold, 906,354*l*; silver, 199,336*l*. The exports were—gold, 22,364*l*; silver, 211,151*l*.

It has recently been decided by the Board of Inland Revenue that cheques drawn by trustees in bankruptcy against bankrupts' estates are exempt from stamp duty. This applies to cheques drawn both by creditors' trustees and by the registrars of the court when acting as official trustees. This decision is the result of a correspondence which has recently taken place between Mr Registrar Brougham and Mr Aldridge, the official solicitor to the Court of Bankruptcy, on the one hand, and the Bank of England and their solicitors Messrs Freshfields, on the other.

NOTICES AND REPORTS.

STOCKS.

Danish 5 per Cent. Loan of 1864.—Bonds representing 8,300*l* have been drawn for repayment at par on the 1st July.

New South Wales 5 per Cent. Loan for 407,100*l*.—The tenders were opened on the 28th ult. at the Bank of New South Wales. The total amount tendered for was 1,630,700*l*. All tenders above 98*l* 16s receive allotment in full, and those at that price about two-thirds of the amount applied for.

New Zealand 5 per Cent. New Consolidated Loan.—The Crown Agents invite tenders for 1,200,000*l* (a first instalment of a loan for 5,000,000*l*, of which 1,000,000*l* is guaranteed by the Home Government) for defence, immigration, and public works. The debentures are identical with the 5 per Cents. now in circulation. The dividends are payable quarterly, and there is a sinking fund of 1 per cent.

Turkish 6 per Cent. Loan, 1869.—The numbers of 5, 75 obligations, which were drawn on the 23rd March in Paris, have been published for redemption on the 1st instant.

RAILWAY COMPANIES.

Bahia and San Francisco.—The half-year's net balance amounts to 60,868*l*, and the directors recommend a dividend at the rate of 6½ per cent. per annum, leaving 2,368*l* to be added to working capital account.

Central Argentine.—The revenue account for the year to the 17th of May, 1870, showed that 78,790*l* had been received, and 41,758*l* expended, leaving 37,032*l* towards the guarantee. The accounts with the Government had been settled. The first sod of the branch line, the Rio Cuarto (about 82 miles) was cut by the Minister of the Interior in November last. This extension was being made at the cost of the Government, and must add largely to the traffic of the Central Argentine Railway.

Great Western of Canada.—The dividend is announced at the rate of 6 per cent. per annum for the second half of 1870.

Metropolitan District Railway—5 per Cent. Perpetual Preference Stock.—Messrs J. and A. Scrimgeour have been authorised by Messrs Waring Brothers to receive applications for 250,000*l*, the balance of the 1,500,000*l* preference stock of the Metropolitan District Railway Company. The stock has already been issued by the company to Messrs Waring's, so that no increase to the capital will now be made. The price of issue is 65 per cent., payable—5 per cent. on application, 10 per cent. on allotment, and 50 per cent. on or before the 15th May.

Nassjo Oscarshamn Railway.—The Union Bank of London invite subscriptions for 180,000*l* Five per Cent. First Mortgage Debentures by the Nassjo Oscarshamn Railway Company, or more intelligibly, the Eastern Railway of Sweden. The object of this railway is the connection of the port of Oscarshamn, one of the largest and best harbours on the Baltic coast of Sweden, with the State lines which run from the North Sea to Nassjo. By it this productive port will be put into complete communication with the railway system of Sweden, State and private. The line is promoted by the iron-masters and landowners of the district through which it will run, and has received a donation from the Government of Sweden, a subsidy having been granted. The proposed issue of stock at five per cent. is to be made at 78 per cent., and as interest dates from the beginning of the year, the return to the subscribers will be about 6½ per cent., exclusive of the bonus involved in the repayment of the stock at par by annual drawings at the rate of 6 per cent. to begin in 1873. The debentures will be the first charge upon the line, for which the entire capital required is 360,000*l*, and 55,000*l* in Government subsidy—and which the Swedish Government inspector estimates will yield 55,405*l*, equal to a net income of about 33,000*l* per annum.

Pomeranian Central Railway 5 per Cent. Participating Preference Shares.—Messrs Blyth and Co. are offering 552,000*l* of this Prussian railway preference capital, consisting of 18,400 shares of 200 thalers (30*l*) each for subscription, at the price of 24*l* per share, payable by instalments over an extended period. The line is to be ninety-one miles in length, and running through Pomerania, will form the shortest route from Konigsberg and Dantzic to Stettin and Hamburg. The works are to be completed by July, 1872. The capital is 1,104,000*l*, one-half of which, in the shape of ordinary shares, has been subscribed in Prussia, and the balance, or preference shares, are now offered. The prospectus states:—"The shares bear interest at 5*l* per cent. per annum upon the whole nominal amount from the 1st of January, 1871, up to the completion of the works. After that time a dividend will be payable of 5*l* per cent., in priority to that payable upon ordinary shares, yielding to the investor 6¼ per cent. per annum. After satisfying the 5*l* per cent. aforesaid, and the ordinary share dividend, the remaining profit (estimated by the calculations hereunder to produce an additional dividend of over 5*l* per cent. on the whole capital, or, with the preference dividend, upwards of 11*l* per cent. for the preference capital, will be divisible rateably between the preference and ordinary shareholders. Any deficit in the dividends on the preference shares in any one year is chargeable in priority on the earnings of future years, and no further preference or debenture capital can be issued."

BANKS.

Agra.—Year's net profit, 47,171*l*; and after deducting the interim dividend, 33,791*l* remains. Owing to the heavy decline in cotton and silk during the war, and to the consequent failure of some of the customers of the bank, the directors have determined to reserve out of the profits the sum of 14,000*l*. After making this provision, there will remain 19,791*l*, out of which a dividend is recommended at the rate of 4 per cent. per annum, free of income tax, leaving 75*l* to be carried forward. A payment of 1*l* 5s per share on account of return capital is announced on the old shares of the late Agra and Masterman's Bank.

Bank of Scotland.—At the meeting the report showed that the net profits for the past year had reached 132,340*l* and a dividend was declared of 6 per cent., making a total distribution of 12 per cent. for the year, and leaving 16,117*l*. The directors have applied 5,000*l* in reduction of the cost of heritable property in the occupation of the bank, leaving 11,117*l* to be carried forward. The undivided profits, including the reserve fund, amount to 311,117*l*.

British North America.—Year's net profit, 76,228*l*. This will permit of the payment of a bonus of 1½ per cent., in addition to the usual 6 per cent. dividend.

Oriental Bank Corporation.—Dividend announced at the rate of 12 per cent. per annum.

FINANCE, CREDIT, AND DISCOUNT COMPANIES.

Credit Foncier of Mauritius.—A dividend at the rate of 8 per cent. per annum has been declared, leaving 6,520*l*.

Mauritius Land Credit and Agency.—An interim dividend at the rate of 7½ per cent. per annum has been paid, free of income tax.

ASSURANCE COMPANIES.

Alliance British and Foreign Life and Fire Assurance.—Total income in the life department in 1870 132,692*l*, while the claims, with bonus additions, reached 117,499*l*. The actual payment was 55,376*l* in respect of claims announced previous to 1870, and 76,136*l* for claims advised in that year. The life assurance and annuity funds amount to 899,481*l*. The premium income from the fire business was 164,156*l*, and after deducting agency, commission, expenses of management, and the claims by fire, there remains a profit of 28,419*l*. The aggregate funds at the close of the year amounted to 1,610,492*l*. The usual dividend of 17s per share was declared, of which half will be paid on the 10th of April, and the other moiety on the 10th of October.

Economic Life.—The new policies for the year were stated to have been 360 for 277,125*l*, and the new premiums 9,029*l*. The total policies in force from the 31st of December were 9,676, assuring 8,884,755*l*, and the total annual income was 346,586*l*. The assets at the same date amounted to 2,748,961*l*.

Law Union Fire and Life.—In the fire department 5,116 new polices were issued during the year ended the 30th November,

[CONTINUED FROM PAGE 388.]

yielding in premiums 6,019*l*; and in the life department 290 new policies, insuring 228,212*l*. yielding in premiums 8,080*l*. and that the assets of the company amounted to 209,835*l*. A dividend and bonus together of 12 per cent. on the paid-up capital was declared at the meeting.

Lloyd and General Life.—The report showed the new premiums for 1870, exclusive of all re-assurances, to have been 8,128*l*. and the net new assurances 224,470*l*. The net revenue in the year from premiums was 129,529*l*. and interest 68,484*l*. while the total funds, after deduction of all admitted claims, were upwards of 1,622,000*l*.

Realm Marine Insurance, Limited.—Capital, 800,000*l*, in 20*l* shares; one-half to be first issued. The undertaking is established to afford further facilities for effecting marine insurances, and the services of an experienced underwriter have been secured. Special attention is to be directed to the Indian and Chinese trades, which have received a stimulus by the opening of the Suez Canal. It is mentioned that existing underwriting offices are paying large dividends, and that the shipbuilders of the United Kingdom are turning out 250,000 tons of steam-shipping every quarter suitable for the passage of the canal.

Scottish Provident Institution.—The new assurances of the year were 1,163, for 612,025*l*, yielding in premiums 19,481*l* besides 1,283*l* of premiums by single payment. The aggregate assurances in force are 15,206, for 7,188,565*l*, with 192,475*l* of yearly premiums; and the realised fund is 1,765,251*l*.

Universal Non-Tariff Fire Insurance, Limited. — Capital, 250,000*l*, in 100,000 shares of 2*l* 10*s* each. This new insurance company is established to transact fire business only. The company is not to be bound by the "Tariff-Association Regulations," but will accept all risks on merits.

MISCELLANEOUS COMPANIES.

British Gas Light.—Dividend declared at the rate of 10 per cent. per annum.

Canada Company.—At the meeting the report, which announced that the sum divided by way of dividend last year was 3*l* 5*s* per share, and that a further sum of 2*l* was returned to the proprietors in repayment of capital, was adopted.

Gas Light and Coke.—The financial result of the half-year's working was a profit equal within a fraction to a dividend at the rate of 9 per cent. per annum upon the ordinary shares. In view, however, of the heavy additional charge upon revenue which the new capital expended at Beckton would shortly become, the directors were of opinion that, carrying forward a balance of 5,574*l*, to the credit of the current half-year, the dividend now payable should be restricted to 8 per cent. per annum.

Anderson's Quick Drying Paint, Limited.—Capital, 20,000*l*, in 2*l* shares. By use of a new composition, to be manufactured by this company, painters will be enabled to dry paint in ten minutes, thereby effecting a great saving of time where second coats have to be given. The inconvenience of "wet paint" will be avoided, and the new preparation is at the same time announced to be inodorous and free from poisonous properties.

Mutual Tontine (Westminster Chambers).—Dividend for the half year 12 per cent.

Phœnix Gas.—Six months' profit, 43,189*l*. The usual maximum dividends are announced.

Rio de Janeiro City Improvements.—Dividend declared at the rate of 6*l* per cent. per annum, the balance carried forward being 9,951*l*.

Rio de Janeiro Gas.—The available profit is 63,630*l*, and the report recommends a dividend at the rate of 10 per cent. per annum, which will absorb 50,000*l* and leave, after an appropriation of 13,630*l* to the insurance and contingency fund, 1,000*l* to be carried forward. The insurance and contingency fund will then amount to 14,630*l*, which, would stand at 86,006*l*, but 40,000*l* is to be used for an extension of works, and new shares will be issued to the proprietors representing the sum.

Scottish Steam Cultivation and Traction, Limited. — Capital, 250,000*l*, in 5*l* shares. It is intended to acquire and let out engines and machinery and apparatus requisite for ploughing, reaping, threshing, and the other operations of husbandry, which have now to be steadily and thoroughly effected by these means. Large profits are anticipated. The head office will be in Edinburgh.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The grain trade has shown comparative firmness. The imports have been large during the week, but the unusual scale of the export trade is maintained. Some consignments from the Baltic have come to hand. Transactions to-day were not extensive, but the recent advance was fully supported for both English and foreign grain. Swedish oats showed a tendency to give way, otherwise there was no change to notice in the value of every kind of spring corn. For maize and flour there was a fair inquiry at late rates. This week's imports of foreign and colonial produce into London have amounted to 2,670 qrs of wheat; 12,030 barley; 49,000 oats; 850 beans; 3,800 maize; 800 sacks and 2,700 barrels of flour.

The Liverpool cotton market has been steady during the past week, and a good business has been done at full rates. The total sales of the week are 81,660 bales, of which the trade have taken 57,520 bales, speculators and exporters 24,140 bales. The imports are 50,068 bales, the actual exports 23,114 bales, and to-day's stock is 750,240 bales. Quotations for American descriptions are unchanged, while the better grades of East Indian show an advance of ⅛d per lb since this day se'nnight. To-day the market closes quiet. Sales, 10,000 bales.

At Liverpool and Wakefield this morning wheat ruled steady in value and demand.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended March 30, 1871:—

	Imported.	Exported.
American.....bales	20,477	13,995
Brazilian	10,817	1,156
East Indian	21,821	11,953
Egyptian	1,005	365
Miscellaneous	3,885	107
Total.....	58,005	27,576

At New York yesterday, middling Upland cotton was quoted at 15¼ cents per lb. Telegraphic advices from Bombay to March 25 report the cotton market quiet at 177 rupees for Dhollerah.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, March 4:—During the week which has just closed many circumstances have arisen calculated to make exporters chary of operating freely in this market. Telegraphic accounts from home have been most discouraging, many limits have been reduced or cancelled, whilst the rapid advance in exchange has nullified the advantage which seemed to open out to shippers in a lower range of prices. Freights also have moved upward, and altogether exporters find themselves to-day in no better position than they were last week. Notwithstanding these adverse elements, however, a large business has been done both in ready and distant delivery cotton. The demand for the former has been chiefly supported by firms having continental connections, and a large proportion of the purchases made are destined for Trieste, Venice, and other Mediterranean ports. For forward delivery April and early May Dhollerah has been chiefly in request at prices opening at 185 rs, and closing about 5 rs easier. Machine-ginned Broach also has been eagerly sought after at prices varying from 201 rs to 197 rs per candy, all March delivery. Akote has been largely dealt in, as has also Barsee, Khandeish, and Julgaum. The total business of the week may be estimated at 10,000 candies. The tone of the market has been dull, and dealers show a good deal of anxiety to realise. Prices are tending downward, and with continued depressing advices from Liverpool for another week a notable decline would appear certain. Some differences are becoming observable in the quality of the cotton coming forward from the Berars, and it is now becoming to be realised that the rains in January did considerable injury. The Ellichpoor cotton, which gave such satisfaction in early part of the season, shows much stain, and has quite lost the silky feeling and fine bright appearance which first arrivals possessed. Akote also is not quite so good as it was, but very nice selections are still obtainable in it. Khamgaum descriptions require much care and attention, and it would be most difficult to find a parcel of any magnitude free from stain and black leaf. Arrivals of cotton are now on the increase, and we look for a rapid accumulation of stock for some time to come. From Tinnevelly we have a telegram, dated 2nd instant, quoting 6 7/8d per lb.

EXPORT of COTTON from BOMBAY to March 3.

	1871.	1870.
London.. .....bales	1,167	72
Liverpool	103,629	78,020
Total, Great Britain	104,796	78,092
Channel for orders	1,170	...
Continent	32,067	31,324
China	7,179	5,727
Grand total	145,212	115,143

Actual exports since last mail left, 31,021 bales.

Messrs E. B. Liddell and Co., of Alexandria, have furnished the following report, dated March 17:—Cotton—Our last report was dated 10th inst. The decline then noticed seems to have been checked, and prices for a day or two past have shown a hardening tendency. This was especially the case in to-day's market, the favourable accounts received from Liverpool causing almost every sample to be withdrawn. The general quality of our stock and receipts is each day deteriorating, which fact has made holders of desirable parcels extremely firm, whilst the higher grades have become so scarce that they have to be paid out of all proportion to the other sorts. Our following quotations represent the last business done, but we do not anticipate they will continue applicable to to-morrow's market:—Fair, 7⅞d per lb, f.o.b; good fair, 7¾d to 7⅞d, ditto; Gallin, 9½d to 11⅝d, ditto. Freight about 3/16d per lb for steam-pressed bales.

EXPORTS.

— 1864–65.....	159,997	30,170	180,167

The colonial produce markets have again ruled dull. In sugar there is no improvement to report, both raw and refined goods having sold very slowly. The coffee market has been inactive, and prices of native and plantation descriptions have shown weakness. Cocoa and rum are unchanged in value, but rice has been in more request, both on the spot and afloat. The wool trade has been less active in consequence of the state of affairs in France, but prices have been supported, there being a good demand for yarns from the home trade.

The following report, dated February 20, has been forwarded by Messrs Fryer, Schultze, and Co., of Colombo:—We have again to report great activity in shipping operations. Tonnage having continued abundant, there has been a good deal of produce sent afloat, and clearances outward are still in excess of the shipments of last year. The distribution of the season's exports thus far are given below:—

PLANTATION COFFEE.

	1870. cwts.	1869. cwts
To Great Britain.....	298,590	300,532
Foreign ports.....	11,384	3,597

	317,192	310,661
NATIVE COFFEE.		
To Great Britain	34,565	28,782
Foreign ports.....	10,707	12,894
Australia and India ...	1,262	1,597
	46.534	43,273

Our market for coffee has been very quiet during the fortnight, shippers of plantation sorts having been unwilling to concede the terms demanded by growers, whilst the crops on offer have been few and of small extent. We have consequently a limited business to report at unchanged value for fine descriptions, and rather easier rates for ordinary parcels. The crops of clean native sorts from the Kandyan districts appear to be nearly at an end, and we have now only the Ouvah gatherings to look forward to.

The annexed is dated Rangoon, February 20:—Natsain rice has continued in active demand, and prices have gradually advanced to 125 rs to 127 rs per 100 baskets, 5 to 6 parts rice, equal to 5s 6¼d to 5s 7d per cwt, free on board, at the exchange of 1s 11½d per rupee. As supplies have been pretty fair of late, and as they are still increasing, our market is easier, but prices are firmly maintained as above quoted. The tonnage in port loading rice for Europe is comparatively small, amounting to 25,000 tons burthen only, but exporters are anxious to lay in stocks for vessels later due. The demand for other qualities is but moderate, but as supplies had become exceedingly small, Ngakyouk rice fetched for a few days equal prices as Natsain; however they have now declined again to 121 rs to 123 rs per 100 baskets, 5 parts shipping quality. The vessels loading for the Straits and China aggregate 5,500 tons burthen. Exports of rice from 1st January up to date:—To Europe, 13,612 tons; to China, Straits, and coastwise, 4,543 tons.

Messrs A. C. Stewart and Co., of Port Elizabeth, writing on February 14, observe:—We are now at the close of the early wool season, and the principal one not having commenced, arrivals are small in quantity. There being several orders here and but little stock, the competition has made prices of some sorts very firm. During the last month an advance of ½d per lb has been established on superior country scoured wools, beyond that buyers will not operate. In Uitenhage scoured a few parcels have changed hands at 14½d to 15½d per lb. Grease wool this year has lost very heavily in washing.

and nearly all the stock here costs the owners more than they can get for it. Rather than submit to certain loss here, holders will probably ship these wools on their own account. Fine washed, good demand for good average qualities at 8d to 8½d. No stock in town. In consequence of American orders, prices of long stapled grease wools have gradually advanced till they are now higher almost than in London—6d to 9d per lb. and even higher for very choice clips being the ruling rates. Every lot is snapped up on arrival, and there is not a bale in first hands to-day. Washing descriptions sell readily at 4¾d to 5¼d, according to condition.

Annexed is from William Moran and Co.'s indigo report, dated Calcutta, February 28:—The London February sales are reported closed, with 9,000 chests sold out of a total of 9,700 declared, prices being quoted for desirable qualities 3d to 6d above the rates of October, and for low qualities par to 6d lower. We may remark that the quantity sold has only once been equalled in a February sale within the last ten years. The only transactions in this market have been the sale of J H B Lehra, Cawnpore, 17 chests at 235 rs per fy. md., and about 70 chests of fancy and low native Oudes at previous prices. Exports of indigo from 1st November, 1870, to 25th February, 1871:—To Great Britain, 16,227 chests: to France, 242: to Trieste, 2,751: to foreign Europe, 250: to America, 2,000: to Calpee and Cawnpore, 1,662—total, 23,224 chests.

The annexed is dated New York, March 17:—Domestic trade is rather moderate, considering this is usually the most active period of the spring season. There is, of course, a large volume in the aggregate, but it is not so evenly distributed as in some seasons, while the margins are everywhere reported to be out of proportion to the cost of conducting business. The trading classes continue to be exceedingly averse to extending their operations much beyond present necessities, in the absence of a reliable basis for calculations, which, in consideration of their experience of late years, is quite natural. Local monetary matters remain easy, though there are indications of an increased demand and higher rates as the quarterly settlement day—first of April—approaches. Discount rates are a trifle higher, there being very little paper now passing below the legal rate. Call loans remain 4 to 5 per cent. Gold has ruled a shade higher, which, with the recent shading in freights to transatlantic ports, has stimulated the export trade somewhat. Cotton is going forward freely, especially from the south. The receipts of the staple at New Orleans of late have been very heavy, and as a large quantity has been drawn against, prompt shipments are necessary, thus bringing into requisition a vast amount of tonnage. Exchange is not quite so strong under an increasing supply of cotton bills.

THE COTTON TRADE.

LIVERPOOL.—March 30.

Cotton has again been in good demand, and though the lower descriptions continue to be freely offered, the better kinds are firmly held, and the quotations of last week are in some instances advanced. For Sea Island the demand has again been very limited, but prices show no change. A further considerable quantity retained has been forwarded inland, chiefly to continental spinners. In American the business has been large, but prices are without any material change. New York advices to the 20th instant quote middling Uplands 15¼ cents, equal to sell on Liverpool 8d per lb, by steamer. Brazil has been rather more inquired for, but is without change in value. Egyptian has again been in good demand, and prices have advanced ½d per lb. East Indian continues in good request, and though freely offered, prices have ruled against the buyer to the extent of ¼d per lb in the inferior, and ½d in the medium and better grades.

In cotton "to arrive," after some fluctuations, the latest quotations are—American, bales of middling, from any port, March-April shipment, 7¼d—New Orleans, not below good ordinary, March-April shipment, 7½d; June-July delivery 7½d; ship named, 7½d—bales, not below good ordinary, April-May shipment, 7⅝d—Low middling, New Orleans, March-April shipment, 7⅞d—Broach, good fair new merchants, March-April shipment, via Cape, 6¼d—Oomrawuttee, fair new merchants, March-April shipment, via Cape, 6½d; per steamer, at sea, via Canal, 6¼d per lb.

The sales of the week, including forwarded, amount to 81,660 bales, of which 9,020 are on speculation, and 15,120 declared for export, leaving 57,520 bales to the trade.

March 31.—The sales to-day will probably amount to about 10,000 bales, with a dull market.

Saturday, the 8th, and Monday, the 10th April, will be strict holidays in the cotton market.

The above figures show:—

	bales.
An increase of import compared with the same date last year of	510,180
An increase of quantity taken for consumption of	118,430
An increase of actual exports of	128,140
An increase of stock of	298,370

In speculation there is a decrease of 47,320 bales. The imports this week have amounted to 50,068 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to March 25) is 365,000 bales, against 227,000 bales last year. The actual exports have been 23,114 bales.

LONDON.—March 30.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

There has been a firm market this week, especially for cotton afloat, and prices, both on the spot and to arrive, are fully up to last week's quotations, the latest transactions showing in some cases ¼d per lb advance.

NEW YORK.—MARCH 17.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, March 17. From the figures thus obtained it appears that the total receipts for the seven days have reached 102,484 bales, against 136,553 bales last week, 126,935 bales the previous week, and 136,661 bales three weeks since, making the total receipts since Sept. 1, 1870, 3,153,517 bales, against 2,303,872 bales for the same period of 1869-70, showing an increase since Sept. 1, this year, of 849,645 bales. The exports for the week ending this evening reach a total of 103,600 bales, of which 66,325 were to Great Britain, 666 France, and 36,609 to rest of the continent, while the stocks as made up this evening, are now 644,882 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:—

Week ending March 17.	Exported to		Total this week.	Same week 1870.	Stock.	
	Great Britain.	Continent.			1871.	1870.
	bales.	bales.	bales.	bales.	bales.	bales.

Total since Sept. 1	2633319	427008	2070327	1402940	...	...

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 8,793 bales, while the stocks to-night are 145,685 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to March 10, the latest mail dates. We do not include our telegrams to-night, as we cannot ensure the accuracy or obtain the detail necessary by telegraph:—

The improvement which was established towards the close of last week not only continued this week, but the upward movement progressed quite regularly until yesterday, when middling Uplands closed at 15¼c and ordinary at 11⅛c; this advance was engineered under the influence of the increased business and advance at Liverpool, stimulated somewhat by the smaller receipts at our ports. Holders were less free in their offerings, although purchasers were able to find all the cotton they wanted at the ruling quotations. The principal inquiry has been on the part of shippers; spinners doing something without, however, displaying any particular anxiety to operate, supplying simply present wants. To-day, with the receipts footing up rather more than anticipated, and the advices from Liverpool less assuring, the feeling here became less favourable; and with little doing prices have declined ⅛c on the lower grades, and ⅛c on low middling and grades above, middling Uplands closing at 15⅛c, and low middling at 14c. For forward delivery the business has been large and the fluctuations greater. As prices advanced parties having contracts out began to desire to cover them under the fear that an extra demand for the continent springing up might leave them short. This feeling helped the advance till on Thursday low middlings for April sold at 14⅛c; for June, 14 3/16c; for July, 14 5/16c; for August and September, 14½c. But to-day prices were off ⅛c for April and May, closing for March 14c; for April, 13¾c; for May, 13¾c; for June, 13⅞c; for July, 14c; and for August, 14⅛c. The total sales of this description for the week have been 104,500 bales. For immediate delivery the total sales foot up this week 21,444 bales, including 801 bales to arrive, of which 2,974 bales were taken by spinners, 799 bales on speculation, 15,665 bales for export, and 2,006 bales in transit. The following are the closing quotations:—

The exports of cotton this week from New York show a decrease since last week, the total reaching 15,659 bales, against 24,669 bales last week. Below we give our table, showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1870; and in the last column the total for the same period of the previous year:—

—*New York Commercial and Financial Chronicle.*

NEW YORK, March 24.—According to Messrs Moffat, Davidis, and Co.'s report, the receipts of cotton at all ports have been 82,000 bales, and since the 1st of September 3,241,000 bales. Shipments to England, 64,000 bales; ditto to France, 5,000 bales; to the continent, 28,000 bales; total since the 1st of September, 2,172,000 bales. Stock at all ports, 625,000 bales. Middling upland, 7 1/16d, cost and freight per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, March 30.—Little or no variation has occurred in the state of our market during the past week. The leading feature for many weeks past is the great steadiness of prices, and this still continues. There is always business to be done whenever a spinner or manufacturer shows any willingness to meet a buyer, hence producers seldom are out of order, and consequently never pressed to sell at a disadvantage. The business of the week, including current engagements, has been quite sufficient to absorb all stocks as soon as they began to accumulate, and spinners generally are under contract for April, whilst manufacturers, in many cases are sold to the end of June. In yarn the business of the week is moderate, especially for shipping qualities; home trade counts are in good demand, and both are held for full rates. Cloth has been in general demand, but large contracts for distant delivery have not been numerous. A large business has been done for quick delivery, and prices have shown much firmness. At the close a quiet tone prevails, but prices well supported.

Messrs Alexander Collie and Co. received the following telegram from Manchester yesterday:—Market continues steady at Tuesday's prices, except for home trade yarns, which are rather dearer. Little business is doing.

BRADFORD.—The wool market shows unusual quietness. The transactions in wool are comparatively few and small, and still confined principally to good wethers and hogs, required for urgent consumption. Though there is less activity in demand, there is no alteration in prices, which are still maintained with great firmness. The same apathy pervades both the yarn and the piece markets, especially with regard to the export trade.

LEEDS.—There was a moderate attendance of buyers in the cloth-halls, but they purchased only sparingly, making small selections of spring and summer goods. There was a fair demand for plain goods. There was not much demand for tweeds, and those sold realised very low prices. The prices of other goods were firm.

ROCHDALE.—The flannel market was well attended, and there was a more lively demand for goods than of late. Both plain and fancy goods are very firm in price. There was a moderate demand for Yorkshire goods, which were held firmly at late rates. Not much business was done in woods, but the sales effected were at fully late prices, and the tendency of the market is upward.

CARDIFF.—The clearances of steam coal have been considerable the French ports taking some thousands of tons. The reduction in wages will take effect at the majority of the collieries from the end of this week. There is an improved feeling in the iron trade, but orders are still slow in coming in.

BELFAST.—Flax—Our markets were again but moderately supplied, demand was scarcely so active as previously, still very little alteration was perceptible in prices. Yarns—Not much change to note in this department. Linens (brown and [illegible]—Good makes of light linens for bleaching, cloth for dyeing and linen handkerchiefs again changed hands freely at steady [illegible] prices unchanged. Powerloom—Demand for cambric handkerchiefs and drapers scarcely so active during last as during the preceding week. Stocks stationary. Prices irregular. Linens (bleached and finished)—Little change of importance has occurred in this department since last report.

DUNDEE.—Our flax market has continued without material alteration; there has been little doing in flax on the spot for the last few days and no alteration in prices can be noted. Stocks being now in small compass, holders are very firm in requiring full rates as it is not likely that fresh arrivals from Riga can take place for some weeks yet as by last accounts there was no appearance of the ice giving way there. The demand for tows of good medium quality continues fair, and prices are very firm. Jute continues steady, but the transactions taking place in this market continue on a rather limited scale. The yarn market has been quiet, in consequence of the revolution in Paris having caused a temporary suspension in business, but no important change in prices can be noted, some descriptions of flax yarns could probably be bought on rather easier terms. In linens there is no alteration to notice.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, MARCH 17.

The markets for flour and grain the past week have been only moderately active, and the fluctuations in prices slight, closing with the tone somewhat depressed. Flour arrived more freely early in the week, and this had the effect of weakening prices, especially for shipping extras and lower grades, for which the demand has been light. The finer grades of flour from spring wheat declined materially, but all grades made from winter wheats have remained firm, and have become, in fact, somewhat scarce. Flours between $7 and $7.75 have been taken pretty freely for the West Indies. Toward the close, receipts again fell off, and although the demand for shipping extras did not improve, they ruled more steady. Some fair lines could have been placed at $6.65, but few offered below $6.75. Southern flours continue scarce. Rye flour and corn meal have been very strong. Wheat has slightly advanced. Very little is coming forward by rail, and the quantity at hand is experiencing a rapid reduction. Nevertheless, in view of the early reopening of inland navigation, and the probability that the Erie canal will be open twenty days earlier than last spring, holders have shown a disposition to meet the demand. Millers bought freely, and shippers, favoured by a decline in ocean freights, have been able to execute some orders, taking new spring at $1.58 to $1.60, with some old at $1.49 and red and amber winter at $1.60 to $1.71, the latter price for choice new, at which the market was quiet on to-day's exchange. Corn has met with a brisk export demand, with a good local trade, and as receipts have been small, an advance in prices has taken place, partly attributable to a decline in ocean freights. Yesterday there were free sales at 88c to 89c for western mixed and 90c to 91c for yellow; but to-day, under a variety of influences, there was some decline, the sales being mainly at 87½c to 88c for prime mixed, afloat, including parcels to arrive at the lower figure, and 88½c for western yellow. The movement in breadstuffs at this market has been as follows:—

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Although the weather during the past week has been somewhat unfavourable to the winter-sown crops, the accounts from the leading counties do not speak seriously of the effect of the frost, though wheats on sandy soils appear to have suffered.

The market here has ruled firm, owing to the shortness of the supplies of English, and to the heavy export demand. Prices must be quoted 1s per quarter higher for English, and for fine Russian and American qualities. The arrivals at ports of call have lately fallen off in number, and the number of vessels on passage has also diminished. The number now at sea is estimated at 185, against 210 at the corresponding period last year, of which 120 are wheat, against 125. Shipments are now being resumed from the Baltic ports, and the Danube is again reported open. The following statement shows the imports and exports of cereal produce into the United Kingdom from September 1 last to March 25, the figures for the corresponding period for 1869-70 being added for the sake of comparison :—

	Imports. 1870-71. Cwt.	Exports. 1870-71. Cwt.	Imports. 1869-70. Cwt.	Exports. 1869-70. Cwt.
Wheat	19 097,822	1.948.234	26.065.327	150.610
Barley	4.497,913	42,400	4.620.874	13,269
Oats	4,292.591	817,488	5,704,887	68,005
Peas	432,898	38,655	748,834	9,384
Beans	1,001.957	9,710	1,118,902	1,225
Indian corn	8,953,861	56,196	12.018.827	12,676
Flour	2.713.715	1,246,458	3,900.794	12,037

The trade in spring corn has ruled quiet but steady, though the late arrivals of oats, notwithstanding diminished stocks on hand, have sold on easier terms. Business in beans and peas has been very limited in extent, but the quotations have been maintained. Maize has given way 6d to 1s in value, owing to the arrival of a large quantity of new American corn at Liverpool. The supply of flour is still much in excess of present demands, the condition of political affairs in Paris having checked the export demand, in anticipation of which millers had manufactured largely. Although the market has ruled dull prices have been maintained.

Mr George Dornbusch thus reports the state of the floating grain and seed trade :—During the last eight days 13 grain and seed-laden vessels have arrived at ports-of-call, viz. :—7 wheat, 1 barley, 1 linseed, 1 rapeseed, 1 flour, 1 valonea, 1 locust beans. The floating grain trade has been inactive. Wheat, with a restrictive choice business, has been limited at about last week's prices. Maize—Notwithstanding the limited quantity offering sales have been difficult to effect at 6d to 1s decline on the week. Barley—Good cargoes inquired after at late prices, but secondary neglected. Rye only a single sale has taken place at slightly below late prices. The reported sales are as follows :—Wheat—12 arrived cargoes : Ghirka Odessa, 48s 6d to 52s 9d; ditto Nicolaiff, 49s 3d per 492 lbs; Sandomirca, 57s 7½d; Polish, 51s 3d; prime spring New York, 56s per 480 lbs; Berdianski, 54s; New Ghirka Taganrog, 51s 6d per 492 lbs. Maize—3 arrived cargoes : Odessa, 36s per 492 lbs. On passage, 1 cargo Danubian at 34s 6d per 480 lbs. To be shipped, 1 cargo Danubian, 32s 6d per 480 lbs. Barley—2 arrived cargoes : Danubian and Sulina, 22s 6d; ditto from Ibrail, 25s per 400 lbs. Rye—On passage, 1 cargo Odessa at 37s 6d per 480 lbs. Linseed dull, and prices tending downwards. Arrived, 200 tons East India Calcutta, 63s, and a cargo Azow at 64s 4½d per 424 lbs. Rapeseed quiet at the late decline. Arrived, 100 tons ordinary brown Calcutta at 66s 6d per 416 lbs. To be shipped, 200 tons ditto, 66s to 66s 6d per 416 lbs. Cotton-seed quiet; no sale reported, except a lot on passage per steamer, at 9*l* per ton.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market has been without improvement, being very quiet. Statistics continue favourable, but there seems an absence of speculative demand. The home deliveries at this port are proceeding satisfactorily, and are already 11,000 tons larger than in the previous season. As arrivals have come in rather slowly, the stock has further decreased to 53,500 tons, against 72,000 tons last year, and 64,000 tons in 1869 at the same period. Transactions in West India to yesterday reached only 276 casks. Other kinds are quiet. Jaggery has met with rather more attention. The home trade have taken moderate supplies of refined at the recent decline. At the Dutch Trading Company's sale this week prices did not experience any material alteration.

Mauritius.—A parcel of brown has sold at 22s 6d.

Madras.—2,000 bags Jaggery have been disposed of at a price not reported.

Foreign.—The transactions on the spot have been exceedingly limited, including 1,500 bags soft brown Java at 18s. A floating cargo of Bahia is reported for the United Kingdom at 22s 6d per cwt. 44,400 baskets of Java, sold by the Netherlands Trading Company yesterday, went without any material change compared with current quotations.

Refined.—Dry goods have now attained such a moderate value that the trade buy more freely. Lumps and titlers, 40s 6d to 43s per cwt. There is no revival of export demand. Pieces continue depressed.

MOLASSES.—Some Demerara has sold at 12s 6d, and 100 casks Melado at 13s. 400 barrels treacle from New York sold at 16s to 16s 3d. 213 barrels low from the South Sea, at 10s 6d per cwt.

COFFEE.—The public sales have again been small, but the demand is at present slow, and the unsettled aspect of affairs upon the continent has a most unfavourable effect here. Deliveries show a very important increase, and the stock is much less than in the previous season; but the arrivals of the new crop are now coming forward. At auction 388 casks 76 barrels 516 bags plantation Ceylon found buyers on former terms : pale and grey, 57s to 67s 6d; colory, small berry and low middling, 59s to 62s 6d; middling mixed to good bold, 68s to 77s. For native only very low offers have been made. These are refused for parcels afloat. 31 bales 107 half-bales Mocha by auction were bought in above the value. 64 barrels 6 bags Jamaica sold at 52s 6d to 56s for ordinary mixed to good ordinary bold palish. 1,868 bags Rio were taken in. A few lots low quality sold at 50s. 162 bags St Domingo realised 46s 6d to 53s. By private contract small sales of Rio have been effected at 50s to 55s per cwt.

COCOA.—At the public sales of Trinidad on Tuesday 1,659 bags were about two-thirds disposed of at previous rates, ranging from 53s to 70s for grey and red, and 73s to 128s for good to very fine marks. 110 bags Surinam were sold at 68s to 70s. Small sales of Guayaquil are reported privately at last week's prices. The delivery of foreign for export have already been 14,500, against 4,000 bags last year, and 370 bags in 1868. Total stock at this port 32,820 bags, against 23,000 bags last year, and 30,100 bags in 1869.

TEA.—The market continues dull, and the business has been chiefly in common grades of congou upon former terms. At the public sales of Indian tea held this week only 600 packages sold at prices showing little alteration. The total quantity printed was 3,900 packages, and previous to the sales 1,300 packages were disposed of. Darjeeling teas have become dull by private contract.

RUM.—At rather lower prices there has been some inquiry, and a few sales effected in West India : Demerara, 1s 10s to 1s 11d; Berbice, 1s 9½d; Leewards, 1s 6½d to 1s 7d. A sale of Cuba has been made at 1s 10d per proof gallon.

RICE.—Supplies now afloat to the United Kingdom are much smaller than last year, and the deliveries here show a material increase, but stocks are still rather large. The market remains unchanged, the principal feature of the week being the sale of some cargoes of soft grain for the continent said to be at 10s 3d to 10s 7½d. On the spot more inquiry prevails for white Bengal, of which a few parcels have sold at 10s 3d to 10s 10½d per cwt.

IMPORTS and DELIVERIES of RICE to March 25, with STOCKS on hand.

Sago is very dull. 258 boxes 772 bags small grain by auction were taken in.

Black Pepper.—Forced sales have been made by speculators, Penang showing ¼d and Singapore about ½d decline, but subsequently a slight recovery ensued. 4,265 bags Penang by auction yesterday part sold at 4¼d to 4⅝d; sea-damaged, in proportion. Of 2,785 bags Singapore, a small portion realised 4⅜d to 4¾d for common. The latest actual sales privately were at 4⅜d to 4½d for Penang, and 4⅝d to 5⅛d per lb for Penang. Some contracts have been made for distant delivery at low prices.

White Pepper.—There is very little inquiry privately. 104 bags low Penang by auction were bought in at 7¾d per lb.

Other Spices.—At the public sales yesterday 4 cases Penang brown nutmegs sold at fair rates: 87s, 2s 5d; 63s, 3s 9d to 3s 10d. Mace firm. 4 cases low Singapore were bought in at 3s 5d to 3s 6d. Zanzibar cloves are quiet. An inquiry has prevailed for Penang. 566 bags pimento found buyers at 1¾d to 2d for low to good. 46 bales coarse to middling quality of Ceylon cinnamon sold by auction at easier rates, as follows: 1st sort, 2s 9d; 2nd, 2s 7d; 3rd, 2s 2d; 4th, 1s 10d. 103 bales spurious withdrawn. 319 bags bark taken in at 2½d. 196 boxes China cinnamon were chiefly bought in at 9d to 1s per lb. 313 barrels Jamaica ginger obtained steady rates: low and small, 33s to 39s; good ordinary to middling, 40s to 50s per cwt.

Saltpetre.—There has been rather more business done, but at irregular prices. About 1,500 bags Bengal were reported sold on the spot at 25s to 26s, refraction 9½ to 8. Finest qualities continue scarce. A parcel has sold to arrive at 25s 6d per cwt.

Imports and Deliveries of Saltpetre to March 25, with Stocks on hand.

Delivery last week, 242 tons.

Indigo.—The quarterly sales of Guatemala were concluded on Tuesday, and prices ruled about the same as last quoted. Low ordinary, pale and mixed sorts, showed generally 6d to 1s reduction, and others went at last sale's rates to 6d discount. Flores, 8s 6d to 9s 4d; Sabres, 5s 6d to 8s 6d; Cortes, 6s 6d to 7s 3d; very low to middling, 1s 6d to 6s 3d. New Granada, 2s 6d to 10s 2d per lb.

The market for East India has been steady, and some business has been done in common kinds.

Other Drysaltery Goods.—The public sales have been small. 54 bales Bengal safflower were chiefly bought in, a few lots selling at 7l 10s to 7l 15s for low quality. Gambier firm, with several sales at 15s 7½d to 16s, ex ship, and Cubes offeat at 17s 9d. The quantity now on the way is much less than at the same date last year, and the stock is getting moderate. Myrabolanes have sold at 13s 6d per cwt.

Shellac.—The market is quiet. 150 cases, consisting of button and fine orange, offered by auction were taken in.

Metals.—There has been a want of animation in the markets. Copper is rather quiet. Burra and Walaroo, 74/ to 74/ 10s; Chili, 64 to 65. No change in English. Lead fully maintains the late advance. Spanish 18/ 5s. English, 18/ 10s to 18/ 15s. Spelter firm, but the transactions have been rather limited. Present quotations of Silesian, 18/ 2s 6d to 18/. Iron has been in steady demand, and rails maintain the recent improvement. Scotch pig has met a fair inquiry during the week but is now rather quiet at 54s 6d cash. The sale of Banca tin held by the Netherlands Trading Company yesterday, and consisting of 80,800 slabs, went off at a price about the same as previously ruling—viz., averaging 77¼ guilders. This market is firm. Straits, 129/ to 129/ 10s.; to arrive, 128/ 10s to 129/, and there has been more inquiry since the Dutch sale. Tinplates are in steady demand.

Hemp.—Russian quiet. Petersburg clean, 33/ to 33/ 10s. To arrive about 1/ less. A parcel of low Manila has sold privately at 43/, beyond which no business of interest has transpired. 2,235 bales by auction were taken in. 330 bales Sunn part sold at 18/ to 22/ 15s per ton.

Linseed.—The market is dull, owing to the further reduction in the price of oil. Calcutta seed quoted 62s 9d to 63s. Black Sea, 64s 3d to 64s 6d per quarter.

Oils.—Seal and other common fish oils are quiet. Sperm has been dull. Business in American at 88/. Colonial held at 84/ per tun. Olive remains dull. Floating cargoes are in demand for the North, but no further sales reported. Linseed oil is easier, and has further declined. Quotation on the spot, 32/ to 32/ 5s; May and three following months delivery sold at 32/ 10s. Sales have been made in English brown rape at a considerable fall, viz., 42/ 10s on the spot and to the end of May. English refined quoted 45/ to 45/ 10s, foreign, 48/ 10s. Palm very dull. Pane Lagos, 38/ to 38/ 10s. Ceylon cocoa-nut is not much in demand, at 40/ to 40/ 5s. Lime cocoa-nut keeps exceedingly scarce. Middling to good sold at 45/ to 46/ per ton.

Turpentine.—American quiet, at 37s; French, 39s 9d per cwt.

Petroleum dull. American refined, 1s 4½d to 1s 5d; Spermaceti to Dunkerque 1s 6d per gallon.

Jute.—The market is rather quiet, and the disturbed state of affairs in France has checked the demand in Dundee for manufactured goods. A few parcels have sold about the week at about former quotations, ranging from 20l 10s to 24l 15s per ton. The business on the spot is limited in extent.

Tallow.—Owing to the unsettled state of affairs in France, the heavy arrivals of colonial to this kingdom, and the rather large stock here, the market is quiet. Prices of Russian are lower in all positions. Petersburg, 43s 6d; June, 44s 6d to 44s; October to December, 43s 3d to 43s 6d per cwt. The public sales of Australian to-day will be earlier than usual.

Particulars of Tallow Monday March 27 1871.

POSTSCRIPT. Friday Night.

Sugar.—The market continues quiet. Sales of West India, 284 casks, making 560 casks for the week. 1,853 bags foreign beet offered by auction were withdrawn. Privately, 500 bags brown Bengal sold at 19s per cwt.

Coffee.—319 bags Honduras sold at 61s 6d to 62s for the sound portion. 507 bags Rio were chiefly bought in. A few lots of low quality selling at 45s 6d. 130 bags washed Rio sold, chiefly at 57s to 58s per cwt.

Rice.—The sound portion of 16,024 bags Rangoon by auction was taken in. 2,337 bags Ballam were bought in at 9s 9d.

Gambier.—100 tons sold at 16s 1½d, ex ship. 135 bales by auction at 15s 9d to 16s per cwt.

Cutch.—1,200 boxes by auction part sold at 21s to 21s 6d.

Safflower.—90 bales Bengal part sold at 7/ 15s to 8/ 5s for common.

Shellac.—619 chests part sold at a considerable decline: orange, 5/ 12s 6d to 6/ for reddish and livery; native orange, 5/ 10s to 5/ 15s.

Oil.—280 casks palm by auction part sold at 32s to 34s 6d per cwt.

Tallow.—618 casks Australian by auction sold: mutton, 41s 6d to 42s 6d; beef, 37s to 41s. 169 casks South America were taken in. 46 casks East India sold at 36s to 38s per cwt.

ADDITIONAL NOTICES.

Refined Sugar.—The home market continues quiet at easier rates, but with more business doing. Dutch crushed is more inquired for at the reduction in prices.

Green Fruit.—The report of Messrs Keeling and Hunt states that Azores and Valencia oranges have improved in price, buyers securing stock for the Easter demand. Sicily lemons are lower, owing to increased arrivals. Seville sours cleared off the market. The invoice price of Barcelona nuts being higher, a corresponding increase in value has taken place. Black Spanish and Brazil in moderate demand. West India cocoa-nuts have a ready sale.

Dry Fruit.—No alteration to note in prices. Business generally is very dull; but as the forthcoming statements of stocks is looked for by dealers and merchants alike, it may possibly stimulate trade to some extent.

Colonial Wool.—The market is very firm, with brisk demand, especially for scoured Cape.

Flax.—Market firm.

Hemp.—Market very quiet, and little business done this week.

Silk.—Market dull. Nothing doing. Prices have a downward tendency.
